The following is a comparative statement of the receipts from all sources of the Marietta and Cincinnati Railroad, as re-organized, for the years 1862 and 1863:

	1862.	1863.
January	$33,904 04	$38,202 72
February	22,652 04	53,778 25
March	25,891 25	60,540 08
April	38,579 40	64,305 82
May	32,667 54	35,325 66
June	23,383 48	40,706 50
July	37,270 88	58,704 07
August	56,684 84	52,864 51
September	46,452 47	77,112 14
October	81,328 75	83,058 71
November	55,257 12	76,763 85
December	48,458 92	68,863 03
	$512,217 73	$710,225 34

Toledo and Wabash Railroad.

The earnings of this road for the years 1862 and 1863, have been as follows:

	1862.	1863.
January	$82,234 81	$86,321 34
February	47,141 92	91,970 58
March	56,005 88	103,056 20
April	83,582 40	132,110 54
May	106,845 44	134,271 80
June	113,577 66	152,584 67
July	115,214 03	105,758 97
August	168,218 72	116,379 38
September	170,379 87	120,595 24
October	172,869 91	151,052 03
November	147,547 65	134,563 15
December	139,528 44	96,203 70
Totals	$1,408,146 78	$1,424,862 60

Baltimore City Passenger Railway.

From the report of this company made to the Baltimore City Council, we learn that during the past year there was received from passengers $269,189 91; sale of old material, $1,149 43, and manure, &c., $2,564 25—total $273,203 49. The total expenses to $268,390 04, leaving a balance of $4,813 45. Included in the above is the payment to the city, on account of Park Fund, of $53,030 32; city license on cars and tax on property, $3,714 23; and the amount paid to the General Government on receipts, $4,108 53. The total amount paid to the city since the organization, July, 1859, is $177,934 62. The capital of the company is $650,000. The cost of the track (thirty miles in length,) was $240,000; 81 cars, $60,000; the estimated depreciation of the track caused by wear and tear, $80,000; on cars, $30,000, and horses, $6,250—total $116,250. The average daily cost for feed for single horse for the year ending July, 1863, was 40 cents; for the six months ending December, 1863, 55 cents, and at present period 60 cents.

Railroad Earnings--Monthly.

The earnings of the Erie Railway for the month of January, 1864, were $984,836 79
Corresponding month of previous year 845,694 82

Increase $139,141 97

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending February 5, 1864, was as follows:

Passengers $18,980 45
Freight and live stock 45,080 90
Mails and sundries 1,146 88

Total $65,207 73
Corresponding week of 1863 ..... 72,801 66

Decrease $7,593 92

The earnings of the Grand Trunk Railway for the week ending January 30, 1864, were:

Passengers $21,638 56
Freight and live stock 71,432 11
Mails and sundries 2,800 00

Total $95,870 67
Corresponding week, 1863 ..... 93,728 56

Decrease $2,142 11

The earnings of the Galena and Chicago Union Railroad for the week ending February 8, were:

	1863.	1864.
Freight	$19,381 00	$32,381 64
Passengers	6,208 02	12,848 95
Mails, &c	1,100 00	1,300 00
Total	$26,689 02	$46,530 59
Increase 1864		$19,891 57

The earnings of the Marietta and Cincinnati Railroad for the 1st week in February, were:

	1864.	1863.
Passengers	$6,600 68	$2,772 68
Freight	9,913 59	8,307 44
Mail, express & telegraph	937 58	863 04
Total	$17,451 85	$11,943 16
Increase		$5,508 69

The earnings of the Chicago and Rock Island Railroad for the 1st week in February, 1864, were $40,569 00
Corresponding week of previous year .. 32,452 00

Increase $8,117 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in February, 1864, were $25,052 23
Corresponding week of previous year .. 18,595 88

Increase $6,456 35

The earnings of the Michigan Central Railroad for the 1st week in Feb., 1864 were $68,160 00
Corresponding week of previous year .. 56,979 00

Increase $11,181 00

The earnings of the Chicago and Northwestern Railroad for the 1st week in February, 1864, were $24,008 92
Corresponding week of previous year .. 15,169 93

Increase $8,838 99

The earnings of the Montreal and Champlain Railroad for the week ending Jan. 30, 1864, were:

Passengers $996 77
Mails and sundries 188 00
Freight and Live Stock 1,713 48
Ferries 95 40

Total $2,993 65
Corresponding week, 1863 ..... 4,185 69

Decrease $1,192 04

The earnings of the Chicago and Alton Railroad Company for the week ending Jan., 7th, were:

	1864.	1863.
Passengers	$11,813 25	$10,130 11
Freight	17,088 68	17,069 71
Sundries	1,174 34	1,011 01
Total	$30,076 27	$28,210 83
Increase 1864		$1,865 44

St. Louis, Alton and Terre Haute Railroad.

The earnings of this road for the years 1862 and 1863 have been as follows:

	1862.	1863.
January	$74,251 61	$109,807 93
February	63,880 56	110,602 82
March	68,748 44	120,310 38
April	71,854 10	123,115 01
May	112,383 71	113,798 43
June	93,766 51	123,778 76
July	67,720 65	118,076 81
August	85,358 74	130,378 44
September	95,969 04	153,469 94
October	118,887 26	144,736 12
November	129,166 37	148,747 82
December	135,616 02	162,920 68
	$1,117,603 01	$1,554,743 14

Chicago and Rock Island Railroad.

The earnings of this road for the years 1862 and 1863, have been as follows:

	1862.	1863.
January	$120,775 81	$140,023 60
February	90,607 29	130,224 71
March	75,675 78	122,511 95
April	76,458 95	127,507 59
May	102,353 43	144,995 14
June	138,378 58	191,766 06
July	119,947 25	139,363 03
August	117,086 45	161,014 40
September	146,268 15	224,584 40
October	161,502 68	217,384 87
November	138,794 72	198,152 54
December	185,595 55	202,013 90
Totals	$1,423,439 64	$1,999,492 20

Pennsylvania Canals.

The present Legislature of Pennsylvania has obtained the first official statement of the canals of that State. Although not complete, the record is of importance. It shows that there are about 1,200 miles of canal in the State, having no less than 750 locks, and employing in the aggregate about 6,000 boats, the greater portion of which are owned by private individuals. The estimated cost of the various works is as follows:

Canals.	Miles.	Cost.
Pennsylvania	276	$1,000,000
Lehigh Navigation	72	4,450,000
Wyoming Valley	64	500,000
Susquehanna West Branch	121	500,000
Erie	161	1,364,984
Wiconisco	12	450,000
Junction	18	530,636
Union	98	5,750,000
Delaware Division	60	2,433,350
Muncy	1	2,625
Lancaster Slackwater	18	200,000
Schuylkill Navigation	109	10 287,194
Delaware and Hudson	108	7,500,000

Finances of Kansas.

We learn from the message of the Governor that the receipts of the year have been $166,311 94; and the disbursements, $157,484 95—leaving a balance December 31, 1863, of $8,826 99. The amount of bonds, certificates and other liabilities is $300,884 53; balances and dues, $174,426 30—total, $126,458 23. The estimated amount to be supplied for the coming year is $109,387 02, which will be materially increased by expenses

not estimated. Bonds of the State to the amount of $85,000 have been disposed of during the year at favorable rates.

Manufacturing Dividends.

The following are the dividends for 1863—regular and extra—paid by several of the leading manufacturing companies of New England: Amoskeag Manufacturing Company, 25 per cent., Androscoggin 20, Appleton 20, Bates 20, Hamilton Woolen 35—quarterly dividends of 7½, 5, 10, and 12½ per cent.—James Steam Mills 80 per cent., Manchester Print 40, Middlesex Mills 55, Nashua 20, Pacific 24, Pepperell 40, Salisbury 30—7½ quarterly, Washington Mills 20, York Mills 45 per cent., and beside the above quite a number have paid 8 to 15 per cent. In 1862 large profits were also divided by several mills, the Appleton paying 20 per cent., Bates 26 cash, and 25 stock, Boston 80 per cent., Hamilton Cotton 20, Hamilton Woolen 25, Jackson 30, Laconia 49, Manchester Print 25, Massachusetts Cotton 30, Middlesex Mills 31, Nashua 35, Naumkeag 71, Pepperell 62, Salisbury 20 cash, and 33⅓ stock, and York Mills 30 per cent. These large profits are owing in a great measure to the immense rise in cotton and wool, many of the mills having a large stock on hand two years ago; and other enterprising managers foreseeing the natural results of the rebellion purchased largely at what then, to some, seemed high rates, thus reaping a rich harvest.

Oswego and Rome Railroad.

This company has been organized by the election of the following officers:

President.—Hon. L. B. Crocker.

Vice President and Treasurer.—Delos De Wolf.

Secretary.—Chas. Rhodes.

Directors.—Messrs. Cheney Ames, John B. Edwards, Theodore Irwin, M. B. Richardson, A. C. Mattoon, Thomas S. Mott, S. B. Johnson, of Oswego; Leonard Ames, of Mexico; Charles H. Cross, of Pulaski, and David Utley, of Rome.

Messrs. Merriam, Powers & Co., have the contract for the whole work, and they hope to begin laying the rails by the 1st of May. The road is leased to the Watertown and Rome Railroad Company, and will be stocked and run by it under contract.

PROPOSALS FOR $500,000.—VOLUNTEER Soldiers' Family Aid Fund,

BONDS NO. EIGHT.

Sealed proposals will be received at the Comptroller's Office until Tuesday, March 1st, 1864, at 2 o'clock, P. M., when the same will be publicly opened, for the purchase, at not less than their par value, of the whole or any part of the sum of five hundred thousand dollars of the Volunteer Soldier's Family Aid Fund Bonds No. 8, authorized by an ordinance of the Corporation passed February 9, 1864, and an act of the Legislature of the State of New York passed March 5, 1863.

The said bonds will bear interest at the rate of five per cent. per annum, payable semi-annually, on the 1st day of May and November, in each year, and the principal will be redeemed November 1, 1872.

The proposals will state the amount of bonds desired, and the price for one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the Chamberlain of the city, within five days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive bonds for equal amounts of the par value thereof, bearing interest from the dates of payments.

Each proposition should be sealed and endorsed "Proposals for Volunteer Soldiers' Family Aid Fund Bonds, No. 8," and inclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if the interests of the Corporation require it.

MATTHEW T. BRENNAN, Comptroller.

City of New York, Department of Finance, Comptroller's Office, February 10, 1864.

Notice to Contractors.

Engineer's Office Morris & Essex R. R. Co.
Newark, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hackettstown to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

Ocean Steam Navigation.

REPORT OF THE NEW YORK CHAMBER OF COMMERCE.

We have on our table a Report of the New York Chamber of Commerce on the subject of Ocean Steam Navigation, consisting of 80 pages octavo, accompanied by a map. This report was prepared under the supervision of a committee of the Chamber, of which Thomas Tileston, Esq., was chairman, by Mr. Stevens, the efficient Secretary of that institution. It was the result of the conviction of the members, that our ocean commerce, deprived of steam mail facilities, was not only rapidly declining, but deserting us for more enterprising countries; and though the ravages of the rebel privateers were for the present the principal cause of its prostration, yet it could not be recovered except by the use of the same means which have given the ascendancy to Great Britain. n order to fully understand the state of the case, it became necessary to make minute as well as accurate inquiries into the proportions of British and American commerce, to refer to British and American steam navigation, to compare its respective progress, and to present to the eye the results which have attended the enterprise of both countries. All this has been well done, and a document has been given to the public, which, if properly appreciated, will produce consequences of great practical importance.

Our foreign commercial rivals, if we may take the London *Times* for their organ, look on with complacency at the continuance of a struggle which is wasting much of our valuable internal strength, while they also enjoy the spectacle of our having surrendered steam navigation on the ocean almost without a struggle, and our commerce carried on under foreign flags.

We trust this report will awaken the American people to the necessity of immediate action, and the American Congress to the necessity of immediate legislation on the subject. Fortunately we are in a position to apply the remedy at once, and to inaugurate lines of steamers all over the Atlantic and Pacific, at a moderate cost, which shall not only restore our declining commerce, but most efficiently protect it. The Chamber of Commerce concludes its report by favoring the views which have for more than two years past been presented in our columns, and which were adopted by the Secretary of the Navy in his last annual report; so that the scheme is now endorsed by the merchants of New York through its most efficient public body, and there cannot be any excuse for delaying its execution on the part of Congress. We do trust that, at least, the frivolous subjects which are introduced there, either from a design to interrupt important business or delay it, may be passed by, in order that this most important one may be taken up and acted upon. We call on the statesmen at the head of the Government, and those in the representative and legislative councils to read this report, and rise to a sense of its importance and value. Passing over the argument introducing the facts in the report, as to the necessity of the use of steam, if we wish to preserve our ocean commerce, we come to a history of Congressional legislation on the subject beginning with the report of T. Butler King, in 1841, recommending a European line, the legislation of 1845 giving the P. M. General authority to contract therefore, and the subsequent contracts with Edward Mills, E. K. Collins, Messrs. Sloo, Harris, and others out of which came the Liverpool, Havre, Bremen, and Atlantic and Pacific lines. All these are treated of in the report. We have nothing left of these but the lines which ply on the Atlantic and Pacific, and which may be deemed as domestic and not foreign traders. On the other hand we find the following formidable fleets owned by foreign capitalists, which visit our ports, carry all the passengers, all the steam freight and all the mails. No less than fifty-four steamers of the best description ply between foreign countries and our own. We do not pretend to compete with them any more. The Cunard line contains eleven splendid ships. The German companies run nine more. We have struck our steam flag to these rivals.

The report discusses the propriety of Government subsidies, urging the successful example of Great Britain in contrast to our own, taking for granted that they are essential to the support of steam lines. No doubt they are so in some reasonable shape and quantity, but it is nevertheless against the policy of our Government to make large grants to monopolies, generally obtained by corrupt appliances, and leading to mismanagement of the companies which obtain them. The Collins' line it is thought, might have continued to this day, but for some of the consequences of such tendency to mismanagement.

The table at page 25 shows that the British Government received for all its sea postages in 1860 only the sum of £112,000, of which the principal part was obtained from the Liverpool and New York service, to wit: £82,500. The report also contains valuable tables, showing the amount of subsidies paid by the British Government to the different steam mail companies, also of those paid by our Government in former years. From this latter we deduce the important and encouraging fact, that our Havre, Liverpool and Bremen lines received in the aggregate for postages more than they were paid for the services rendered to the Government.

Table showing Comparative Subsidies to American Lines in 1857.

Line.	Trips.	Distances.	Subsidy.	Gross postage.	Total miles.	Pay pr. mile.
Collins	29	3.100	$385,000	$415,867	124.000	$3.10½
Bremen	13	3.700	128,937	128,937	96.000	1.34
Havre	13	3.270	88.484	88.484	85.020	1.00½
Aspinwall	24	3.200	290.000	139.610	153.600	1.88½
Pacific	24	4.2 0	348.250	183.238	201.600	1.70
Havana	24	669	60,000	6,288	32.112	1.86½
Vera Cruz	24	900	29,062	6,900	43,200	.07
			$1,329,733	$1,035,740	725,732	$1.80½

This table shows conclusively that if the Government adopts the recommendation of the Chamber to which we shall presently allude, it will be an important item in favor of the plan proposed.

At page 35 commences a valuable series of tables, giving the progress of American commerce with different foreign countries lying southward of the United States on this continent. These to which we are nearest and most natural, are precisely those with which our trade may be made directly and speedily profitable. We are nearer to the West Indies, Central and South America than Europe. With anything like an equality in a steam marine we might defy all competition. While we cannot expect to supply Europe largely with our manufactures where there is skill equal to our own, and labor is much cheaper, we may and we do, article for article, beat them everywhere on this continent. And since the development of a European policy to plant its system on the Southern continent to the destruction of its youthful republics, we may be certain that commercial intercourse with the United States is now the first wish of their hearts. The report gives the progress of this British and American commerce in various tables, and the total as far as made up in the following table:

TOTAL TRADE OF SOUTHERN AMERICAN COUNTRIES.

United Kingdom—	Exports.	Imports.	Exchanges.
1853	$63,998,785	$75,180,035	$139,178,820
1860	89,597,090	102,842.415	192,439,505
Increase..	$25,598,205	$27,662,380	$53,260,685
United States—	**Exports.**	**Imports.**	**Exchanges.**
1853	$30,334,012	$51,172,211	$81,505,223
1860	47,174,708	87,006,809	134,181,517
Increase..	$16,840,696	$35,834,598	$52,675,294

"When it is considered that the trade of the United States with these countries is one-sixth of its whole trade, it will not seem strange that a desire is felt to watch over, foster and promote it."

Our trade with Colombia, including the isthmus trade, and the transit of goods by the railway is enormous and has been too much neglected. The following statement gives only the isthmus trade, which would be largely swelled in amount if that with Carthagena and its neighboring ports was included.

Total value of cargoes inward and outward $76,972,785.

Of this the United States are the owners to the amount of upwards of sixty millions.

The memorial attached to this report recommends, that Congress shall offer subsidies for a first class line of steamers to make weekly trips between New York and Liverpool. Also the following lines.

A line twice each month should be established to Havre, touching at Cowes. One or more lines should be established to provide a weekly communication with some of the Hanse Towns, *Bremen and Hamburg*, requiring, as the condition of a large subsidy, that ample accommodations should be provided for persons seeking to emigrate to this country, at reasonable rates; the steamers to be under constant government inspection, and the subsidy to depend upon the faithful performance of the contract.

A line should be established to Lisbon, Cadiz, and to Genoa, touching at Barcelona and Marseilles.

A line established from New York to Point Isabel, at the Brazos Santiago, semi-monthly, with a semi-monthly branch from New Orleans, would at once recover to us a large portion of that valuable trade of Northern Mexico which we have lost by our own negligence.

This line will ultimately become very important when railroad communication is open to Monterey, and thence to Mazatlan, on the Pacific. This railroad will make one of the most important connections in the world, being on the direct line from London to Hong Kong.

By the offer of a sufficient subsidy, the Havana line might be extended, by branch service, to Porto Rico, Hayti, St. Thomas, Jamaica and other of the West India islands, and to the principal points on the North Pacific coast.

The Venezuelan government have offered to contribute a subsidy of $30,000 per annum to a line for coast service.

A line of semi-monthly steamers to Rio de Janeiro, touching at Pernambuco and Bahia, and with a connecting branch to Monte-Video and Buenos Ayres, would no doubt meet similar encouragement on the part of the Brazilian government.

The Pacific Mail Steamship Company should be induced to extend their service to Valparaiso touching at intermediate ports, and a first class line semi-monthly between San Francisco and China and Japan.

The really important and beneficent part of the report, that which gives it its most immediate force and value, is found in the following paragraph.

"And while some plan of wise legislation is being matured, which will open to American enterprise the fertile valleys of the tropical South, and draw us nearer to the treasures of the Western shores of the Pacific, by the development of a system of steam communication and mail service worthy of this great commercial nation, your memorialists pray *that ships of war be assigned to the duty of conveying the mails to all the chief points on the coast of the two oceans*, whereby they may serve to protect as well as to foster our commerce."

This is practical, immediate and remedial. We have an enormous Navy which has cost the people many hundreds of millions of dollars The Secretary of the Navy, his assistant Mr. Fox, and his friend Donald Kay assert that we have a whole fleet of very fast wooden steamships of war. What shall be done with them? Shall they be sent out after the old fashion on long, expensive, and costly cruises to look into a port now and then and do nothing else. Shall we expend millions a year for these pleasure trips, for they are but little more. Or shall we dismantle them and lay them up in our Navy Yards to rot and be lost to us.

We think the true plan is to place them as mail carriers on the routes designated by the report and without delay. Let the very fastest be selected, let the armaments be reduced in guns and men, to an equality with the Alabama or Florida, so as to be a match for them, if they should meet these vessels on any of the routes of service. Let them carry letters, packages, specie, certain kinds of easily handled freight, and passengers; the last especially between South American ports and the United States.

It will be seen that the postages received from our subsidized steamers in 1857 amounted to $1,035,740. This sum would certainly go far to help the lines proposed by the report. We have some fine large ships like the Niagara, Minnesota, St. Jacinto and steamers of that class that would inaugurate a line to Europe.

And the admirable part of the project is that we should keep twenty or thirty of our finest vessels constantly afloat, doing good service by their protection to our commerce, and at the same time being themselves commercial agents.

Just as soon as private enterprise sought to establish mail steamers on these routes, the Government could withdraw their own. This would be the work of some years, for it takes time to build such vessels as the Adriatic, but in the meantime our commercial correspondence would have been established all over the world, orders would have come from every port which they visited, and business would be so established that the new lines would step in at once to the enjoyment of a certain trade, and regular employment.

In three months' time, if Congress will but act, we may have a dozen lines of steamers in full activity, carrying our letters everywhere. What a day of rejoicing would such a spectacle cause in this city. What an impulse to trade and manufactures it would give? What an increase of our revenue it would ensure.

Readers of the JOURNAL give this report a perusal, and add your efforts to carry its prayer into effect.

Chicago and Milwaukee Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:

President.—ALEXANDER MITCHELL.

Directors.—Alex. Mitchell, Stillman Witt, W. S. Gurnee, Julius Wadsworth, E. K. Rogers, Edward Weston, Frederick Schuchardt, E. S. Wadsworth, S. C. Baldwin.

Vice President.—E. K. ROGERS.

Secretary and Treasurer.—A. S. DOWNS.

Superintendent.—S. C. BALDWIN.

Pennsylvania Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia, on the 16th inst., at which the Seventeenth Annual Report of the Directors for the year 1863 was presented, read and accepted, and referred to the Board of Directors for publication. The following statements will exhibit the operations of the Company for the year 1863:

The earnings of the railway between Philadelphia and Pittsburg during the year were:

From passengers, first class	$2,202,778 83
" " emigrants	72,757 95
United States troops	514,693 18
United States mails	75,598 20
Expresses under contract	75,735 00
Extra express freight	187,393 82
Freight	8,602,261 97
Miscellaneous sources	160,194 00
Total earnings	$11,891,412 95

The expenses for operating the line were:

For conducting transportation	$1,594,681 27	
New buildings and extensions	107,465 46	
Motive power	1,642,878 91	
New tools and machinery	10,493 57	
New locomotives	557,665 54	
Maintenance of road	1,311,497 15	
New second track and sidings	244,870 42	
Maintenance of cars	466,001 88	
New cars added to stock	727,308 05	
General expenses	117,137 96	
		6,780,000 21
Leaving net earnings		$5,111,412 74

The gross revenues of the line, this year, are

equal to $33,216 per mile of main line of road, (358 miles,) and exceed in the aggregate those of 1862, $1,587,121 99. This is made up by an increase of $544,144 58, for passengers and emigrants—of $135,299 97 for troops—of $824 77 for United States mails—of $983,842 12 for ordinary and $116,276 86 for express freight.

A decrease occurs in miscellaneous receipts of $143,266 31.

The whole number of passengers carried over the road during the year was 1,707,386, averaging a distance of sixty-four and six-tenth miles for each passenger.

The number of tons of freight moved, (including 188,319 tons of fuel and other material transported for the Company,) was 2,454,326, embracing 903,199 tons of coal.

The increase in the coal traffic is 68,053 tons, and the whole tonnage over that of last year 231,275 tons. To meet this increase of traffic there has been expended for new locomotives, new cars, second track and sidings, &c., $1,647,803 04, all of which has been charged to the expenses of operating the road. The was expended for similar objects in 1862, $1,221,779 09.

The earnings of the Company's canals were:

Susquehanna Division	$242,146 92
Juniata Division	24,426 91
Western Division	9,741 29
Miscellaneous sources	10,841 40
Total earnings	$287,156 52

against $251,481 76, in 1862.

The expenses of maintenance, enlarging and operating the canals, were:

Susquehanna Division	$159,556 98	
Juniata Division	162,120 83	
Western Division, including purchase of boats in consequence of abandonment of canal above Blairsville	40,396 51	
		362,374 32

Showing a loss on the canals, during 1863, of $72,217 80

The expenditures in 1862, for same object, were $258,091 56—showing an increase of $104,282 76 during the past year.

The enlargement of the Canal will be completed by the opening of navigation in 1865, from Columbia to Millerstown dam, on the Juniata, a distance of fifty nine miles. Above that point, the locks will only be enlarged as they require rebuilding, until there is a reduction in the price of materials and labor. At the Millerstown dam, the railway and canal are close to each other, affording every requisite facility for transhipment of freights from the road to canal, and giving a full opportunity to test the capabilities of the latter work, for the cheap transportation of heavy products. The Western Division of the Canal, which has been a source of continued expense to the Company, may be abandoned upon the extension of the Western Pennsylvania Railroad to the Allegheny Valley Railroad.

The whole income of the canals from the first of August, 1857, when they came into possession of the Company—six years and five months—amounted to $1,393,196 11, all of which has been appropriated to their maintenance and improvement, except $97,346 21, an amount about sufficient to meet the expenditures upon them previous to the resumption of navigation in the spring. The Canal Department will then start with an enlarged canal upon its Eastern Division, and a portion of the lower Juniata, and with nearly the whole line east of the mountain regenerated. In its present condition, this portion of the property of the Company may safely be estimated as worth $1,500,000, and should, hereafter, return at least an interest of six per centum per annum upon that sum.

The Philadelphia and Erie Railroad was not opened throughout its length, as anticipated, by the first of January last, owing to circumstances which that Company could not control. This Company has promptly supplied it with all the capital needed for the construction of the road, but the requisite labor could not be obtained. The completion of the line may, however, be confidently expected in July next. The revenues derived by this Company under its lease, from those portions of the Philadelphia and Erie Railroad delivered to it, have fully sustained the estimates of the Board on submitting the contract with that Company for your confirmation. They are, for the year 1863, as follows:

From passengers	$275,604 20
" troops	20,568 06
" freights	383,234 53
" express packages and freights	11,800 53
" mails	13,324 99
" miscellaneous sources	23,137 62
	$627,669 98

The expenses during the same time were:

Conducting transportat'n	$109,624 28	
Motive power	87,835 84	
Maintenance of way	127,379 33	
" " cars	11,756 58	
Thirty per cent. due on lease to meet interest on bonds, &c	218,300 96	
		554,896 99
Net earnings of road		$172,772 94

Which is chargeable with the interest on the rolling stock, shop, machinery, and their probable *depreciation*, estimated together at about 12½ per centum, say $127,772 94

Leaving net profits $45,000 00

The whole receipts of the Company from the operations of its works, including the Philadelphia and Erie Railroad, for the year 1863, were as follows:

From Pennsylvania Railroad	$11,891,412 95
" " Canal	287,156 52
" Philadelphia and Erie R. R.	727,669 93
Total receipts	$12,906,239 40

The net revenues of the Company during the past year have been absorbed in the payment of the interest upon its debt—two semi-annual dividends of four and five per centum respectively, and in the construction of the commutation roads—the Philadelphia and Erie, and the extension of its own line to the Steubenville and Pittsburg road, opposite Pittsburg, second track, increase of rolling stock, the purchase of real estate for the road at Pittsburg and other points, &c. All of these expenditures have been met from the earnings of the road—an increase of $252,360 48 in the debt of the Company, and a sale of less than half a million of the securities received from other companies. All the railroad companies claiming assistance under the Commutation act have received the amounts that they were respectively entitled to, except the Pittsburg and Steubenville line, which has been delayed in its expenditures in consequence of its imperfect rights across the State of Virginia. Since these have been determined, the work has been steadily pushed forward, and will be completed during this year.

The expenditure of the commutation fund, as might have been anticipated, has involved the necessity of further advances to complete those lines to points that would render them serviceable to the public and profitable to the Company. In pursuance of this plan, the Ebensburg and Cresson Railroad has been opened to Ebensburg, the Tyrone, and Clearfield to Phillisburg, and the Bedford road to the Southern Turnpike, near Bloody Run. The Bald Eagle Valley and the Western Pennsylvania Railroads have made such progress as to insure their completion before the close of this year, the first, to the Philadelphia and Erie Railroad at Lock Haven, and the second, to the Allegheny river opposite Freeport. These lines will not be immediately productive, but it is believed that nearly all of them will eventually yield a direct profit upon the investments made in their securities.

The amount paid for these securities has been charged to profit and loss, and the securities placed in the sinking fund established for the payment of the second mortgage bonds.

The Board has heretofore called the attention of the shareholders to the policy of aiding the construction of a branch road from or near Greensburg in a southwestwardly direction. It still views such an improvement with favor; and, should the citizens of that region embark in the enterprise, as has been proposed, it would recommend that you should extend to it efficient aid.

The expenditures of the Company during the past year, in addition to the interest on its debt, dividends, taxes, and the ordinary disbursements for operating its roads and canals have been $5,007,621 51, which includes $1,647,803 04 expended in the purchase of new cars, new locomotives, construction of second track, &c., charged in expenses for operating the road.

There will be required for similar objects during 1864—if the requisite labor and materials can be obtained for the outlay—as follows:

For new locomotives	$1,050,000
" " cars	1,100,000
" Construction of Philadelphia and Erie Railroad	700,000
" Shops, engine houses, and shop machinery, Phila. and Erie Railroad.	650,000
" Shops, engine houses, depots, Pennsylvania Railroad	250,000
" Extension of Penna. Railroad to Pittsburg and Steubenville R. R.	500,000
" Extensions of sidings and arrangements for oil depot	250,000
" Commutation and other roads	500,000
Total	$5,000,000

about the same amount as expended the past year.

Of this sum we may estimate as derivable from the net receipts of the road $3,000,000, and the remainder from the sale of securities in the possession of the Company.

The tonnage of the Pennsylvania Railroad east of Harrisburg, upon the completion of the Philadelphia and Reading Railroad, will be largely increased, and will consequently demand increased accommodations. Of this portion of the line, that west of Columbia is leased from the Harrisburg and Lancaster Railroad Company for 999 years, and the remainder was purchased from the Commonwealth in 1857. The Harrisburg and Lancaster Road has two tracks separating at Middletown, one intersecting the State road at Columbia, and the other at Lancaster. The requirements of the freight traffic which follows the Columbia Branch, (in consequence of its better gradients,) already demands a second track, which is being laid, thus giving three tracks between Middletown and Lancaster.

The alignment of the old Philadelphia and Columbia Railroad is exceedingly defective, and when the present scarcity of labor shall cease, it will be the duty of this Company to materially alter and improve the details of its location, and prepare it for three tracks for a large portion of the distance east of Lancaster. Although two tracks are capable of accommodating almost an unlimited traffic of similar character, such as coal, lumber, &c., yet when the business of the line is very large and diversified, requiring different speeds for its trains to insure its proper development, a third track placed between the two main tracks becomes necessary to insure punctuality and efficiency to a great thoroughfare. Upon other portions of the line a similar enlargement of the facilities, afforded by a third track, will eventually become necessary, the points for which can be determined when the traffic of the system of roads that this Company has been endeavoring to perfect, shall be developed.

The completion of the remaining twenty-one

miles of second track, all of which is required between Lewistown and Mill Creek, will be suspended this year in consequence of the scarcity of labor and the necessity for its use for other objects of more *pressing* importance.

The rapid destruction of iron under the high speeds and heavy locomotives now used upon railways, has become a subject of serious consideration, not only to the managers of these improvements in this country but also in Europe. When the Pennsylvania Railroad was planned, a locomotive weighing 45,000 to 50,000 pounds was considered as the extreme limit to these machines, justified by prudence. But the demands of the public for high speed have compelled the introduction, upon all thoroughfares, of more powerful engines. These could only be obtained by adding to their dimensions and weight, which has produced its natural result—great wear and tear of iron rails, and the superstructure of the road. This evil has been still further increased by the inferiority of the rails now manufactured compared with those placed upon railways when the edge rail was first introduced. It was then deemed essential that rails should be made from the best refined iron, produced from selected ores. The great increase in the demand for iron, under the rapid development of the railway system in England and this country, soon caused the substitution of an inferior article, which seemed for a time to answer the purpose, but which experience has proven to be insufficient to resist the causes referred to, as continually operating for its destruction. A return to the quality of iron originally used on railways, would be the natural remedy for this difficulty; but this will require time, as none of the rail mills have the required furnaces to refine their metal. In Europe this subject has been longer considered, and the determination appears to be general, to gradually substitute a still more expensive material—either a rail made wholly of steel—with a steel head only—or the wearing surface converted into steel after the iron rail is made. The present high cost of rails made entirely of steel will probably prevent their general adoption, although the rapid destruction at the termini and stations, where the iron rail, in some positions, does not last six months, will fully justify their introduction. For the purpose of testing the relative value of steel and iron rails in such positions, we have procured 150 tons of rails made wholly of cast steel. A trial is also being made of a rail with a steeled wearing surface passed through the rolls when drawn from the converting furnace, which promises well. It is understood that favorable results have been obtained from rails, the top plate in the pile from which they are made being puddled steel. If the two metals can thus be firmly welded together, this improvement in railway bars will be generally adopted. This is a subject of such great importance to the company, that it will continue to meet the earnest attention of your Directors, and, if necessary to effect the reformation desired in the quality of rails, it should become important to erect works to effect that object, such a policy will be adopted. The frequent renewal of rails is not only expensive, but it adds to the interruption of the traffic of the line.

It will be seen from the Treasurer's statement, appended to this report, that there remains, after paying coupons due January 1st, ult., on first mortgage bonds, and setting aside $1,000,000 for a contingent fund, to be charged with any extraordinary expenditures on account of accident from fire, floods, or other casualty, in order that regular dividends may not be disturbed from such occurrences, a balance to the credit of the company of $5,637,505 80.

The contingent fund was established chiefly by placing in it the amount claimed by the State for tonnage duties, which was afterwards commuted into an obligation to expend this sum upon certain railways of *other* companies. This fund was to be charged with these disbursements as they occurred, but the increased traffic of the line, in consequence of the closing of the markets on the Mississippi river for Western products, and other causes, seemed to justify the direct charge of these outlays to profit and loss, and increase the contributions to this fund to the amount stated, and apply it to the objects and for the purposes already mentioned.

The sinking fund established for the payment of the second mortgage bonds of this company, and those of the Harrisburg and Lancaster Railroad Company, the payment of which it has assumed, amounts to $1.451,315 12. The securities placed in this fund have been so fortunately selected that they are now worth considerably more than twice their cost, and without further additions—except the bonds of the commutation roads, since placed to this account—it will be sufficient to pay, at maturity, with its own accumulations, the bonds for which it was created.

The semi-annual payment to the State of $230,000, for the interest, and towards the principal of the purchase money for the main line, will extinguish the debt due to the Commonwealth before it falls due. By continuing to pay this sum out of the revenues of the company as heretofore, there will remain no other debt unprovided for, except the first mortgage of $5,000,000, which can be continued at a low rate of interest, in preference to its payment.

The shareholders will doubtless feel gratified to learn, from this exhibit, that the directors have kept steadily in view their original reluctance to incur a debt for the construction of their road, and in pursuance of the policy indicated by their wishes, have provided, at the earliest moment consistent with the permanent interest of the company, for its reduction to a sum that all must admit can be maintained without any risk to the company.

In presenting these gratifying results of the operations of your road, it must not be forgotten that the causes which have been largely instrumental in producing them cannot long continue. The railways of the North generally, since the first year of the rebellion, have greatly increased their earnings. Those of this company have advanced from $5,362,355 21, in 1859, the year before the war commenced, to $11,891,412 95, in 1863. This increase is chiefly in freight, the passenger business having increased but from $1,420,912 43, to $2,275,536 78, omitting the earnings from transportation of troops. The increase in the money receipts from freight, for obvious reasons, is greater than the tonnage.

The limit to the receipts of the company from eastward bound traffic, during the continuance of favorable navigation on the Ohio river, has only been controlled by the amount of rolling stock at its command.

At all other periods, the equipment has been ample to meet the demands upon it. The revenues of the company during January of this year show a large falling off, compared with those of 1863, owing to the ice blockade of the Ohio river, and to the interruption to the traffic of the Pittsburg, Fort Wayne and Chicago Railway Company. But we have not much expectation that the business of the road for the year will be materially less than last year.

The increase in the receipts of the company from freight being largely due to more remunerative rates of freight, the decrease in its revenues, that may be confidently looked for after the close of the war, will not affect the tonnage of the road in the same ratio. The stimulus given to the internal trade of the State, by the great demand that has existed for the past two years for her products, added to the additional traffic that may be expected from the new territory opened by the branch lines and extensions already made, and those that will be brought into use by the close of the year, will go far towards maintaining the tonnage of the main stem, which time must gradually continue to augment.

The surplus profits of the company, and the disposition made of them, have already been referred to. They are now represented by good securities, in the possession of the Treasurer. The Board, from prudential reasons, has heretofore declined to recommend a division of them, but it does not now see any sufficient reason for their longer retention. An extra dividend has therefore been declared of fifteen dollars ($15) on each share of the present capital, as registered upon the books of the company, February 15, 1864, which dividend shall be payable in the stock of the company, at its par value of fifty dollars ($50) per share. The additional stock thus created to be dated May 2, 1864, and be entitled to dividends payable in November next, and thereafter of same amount semi-annually, as the present stock of the company. The certificates of stock for the extra dividend to be delivered to stockholders on and after May 2, 1864.

The Directors feel much gratification in renewing their expression of unabated confidence in the intelligent, efficient, and faithful services of the heads of the several departments instituted for the management of the business of the company, their officers and employees generally.

For more detailed information in relation to the operations of the road, the shareholders are referred to the reports of Enoch Lewis, General Superintendent, W. H. Wilson, Chief Engineer, and J. P. Laird, Superintendent of Motive Power, &c., of the Pennsylvania Railroad, and to the report of Joseph D. Potts, General Manager of the Philadelphia and Erie Railroad, and to that of T. T. Wiertman, Chief Engineer of the canals of the company.

By order of the Board.

J. EDGAR THOMSON, President.

THOMAS A. SCOTT, } Vice Presidents.
HERMAN J. LOMBAERT, }

Railroad Earnings--Monthly.

The earnings of the Norwich and Worcester Railroad for the month of January, 1864, were $38,778 00
Corresponding month of previous year. 27,793 00

Increase $10,985 00

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of Jan., 1864, were $51,570 15
Corresponding month of previous year. 35,046 85

Increase $16,523 30

Illinois Central Railroad Company.

The following is the report of the President to the Directors, for the year ending 31st December, 1863:

The traffic upon the Illinois Central Line the past year shows that the settlement of its Land has greatly increased its resources, for, although the Wheat harvest was a partial failure and the Corn crop very seriously injured by frosts, the extent of land planted and greater variety of products in the older settlements have given a larger Tonnage than in previous years. Fifteen millions of bushels of grain were forwarded. The opening of the Mississippi River to trade led to a profitable traffic upon the Main Line, and, with this favorable market for the crops, to an active demand for our lands. Illinois is still favored with a large immigration and is daily adding to its numbers and wealth from the substantial population now settling on the Prairies. This gain in the number of settlers is going on with great regularity; hence the land is annually becoming more valuable, and we have had no reluctance to reduce the large contracts. Our policy has been to subdivide the tracts and diminish the debt of each purchaser.

During the last two years upwards of six thousand buyers have taken an average of less than sixty acres, and therefore owe less than $10,000 each. With one or two good harvests many of them will prepay this small amount, which meantime is running at six per cent. interest. There are still 1,282,626.24 acres of land for sale. Of the Company's lands, 1,812,373 acres have been sold; $6,749,844.88 have been collected from these sales in cash, leaving $9,914,008.56 balances due on contracts in hand which relate to 928,429.17

acres; the payments in full have been made on 383,944.59 acres only. Thus the sales embrace—

Acres	383,944.59	Cash.....	$6,749,814.88
Acres	928,429.17	Contracts.	9,914,008.56
Acres	1,312,373.76	Total.	$16,663,823.44

The following Revenue Statement is condensed from the various Reports annexed, and will doubtless be satisfactory to the Shareholders, who may reasonably expect regular Dividends from this property in future.

INCOME ACCOUNT.

Balance of income account, January 1st, 1863		$465,895.39
Net collections from Lands in 1863, principal and interest		1,278,033.99
Net income from traffic in 1863		2,118,847.15
To credit of income account		$3,862,776.15
Applied—		
To cash paid for construction bonds	$466,706.19	
Interest on F. Debt	1,016,127.50	
Exchange on Sterling Coupons	77,670.99	
*Interest and dividends on shares.....	973,555.95	
		$2,534,060.63
Cash in hands of Treasurer, 31st December, 1863.....		$1,328,725.90

Besides the balance of $1,328,715.80 the Treasurer holds $364,928, the unexpended balance on Capital, with a further sum added to it by subscription to the Stock since 1st of January.

CAPITAL ACCOUNT FOR 1863.

Balance as per report of January 1, 1863		$469,434 24
Increase of capital stock.....		419,340 00
Miscellaneous assets realized		426,999 96
Working stock of supplies (reduced)		711 79
		$1,316,485 99
Applied to payment of 8 per cent. bonds	$17,000 00	
Applied to permanent expenditures	934,557 99	
		951,557 99
Cash in hands of Treasurer 31st December, 1863		$364,928 00

No new engagements have been made with other companies, and at this time there exists no litigation or controversy of moment. The supplies are purchased for cash. The stock in hand cost $615,424 77. The debt is:

$14,329,000 of construction bonds.
257,000 of bonds due in 1865.
33,000 of bonds due in 1868.

It is desirable to purchase more of the construction debt which is now at a premium in the market, although the Trustees of the construction mortgage have $871,000 more in bonds than the amount of deeds issued by them. Good faith to those who pay for land requires that bonds be lodged with the Trustees as fast as the partial payments are made. The maintenance of the company's standing in Illinois by making these deliveries promptly is of the highest importance; and in pursuance of your resolutions a proposition has been made to the holders of the construction bonds to exchange these bonds for six per cent. bonds of long date, allowing upon the exchange fifteen per cent. difference. This proposal is open to the extent of two millions of dollars, and seems to be the only practicable method of meeting the wants of the company and of protecting the bondholders known to the company from an unexpected demand for their bonds, which by their terms the company may call for by paying twenty per cent. premium. It is believed that by your plan the bonds will be readily exchanged upon terms alike advantageous to the bondholder and to the company. The premium will be a debt on the land, and will ultimately be redeemed by it.

Referring to the report of the General Superintendent herewith, I will only add that the road and working stock have been well maintained. The substitution of iron for wooden bridges is being made, as the latter require repair, and substantial masonry is taking the place of other wooden structures. The stock of cars has been increased one-fourth and is still inadequate, and the motive power is insufficient to meet the increasing traffic.

The land commissioner reports during the year extensive sales to German and Swedish settlers, and latterly a large demand from the adjoining States, South and East of Illinois. It is worthy of note that when the interest due upon many of the contracts is made up, the total result of the sales of half the land will exceed $17,000,000, the value placed on the entire grant of land ten years since.

The dividend upon the entire share capital declared the fifth of January has placed all the stock on the same basis and released the lien upon 314,504 acres of land.

W. H. OSBORN, *President.*

NEW YORK, February 9th, 1864.

*Interest Coupon of 2 per cent. on Full Paid Shares was paid on 1st January, 1863; 2 per cent. on all Shares 1st February; 2 per cent. on all Shares 1st August, 1863.

Railroad Earnings—Weekly.

The earnings of the Grand Trunk Railway for the week ending February 6, 1864, were:

Passengers	$21,747 40	
Express freight, mails and sundries ...	2,500 00	
Freight and live stock.....	64,258 26	
Total.....	$88,505 66	
Corresponding week, 1863	80,558 98	
Increase.....	$7,946 68	

The traffic of the Great Western Railroad for the week ending February 12, 1864, was as follows:

Passengers	$17,491 31
Freight and live stock.....	49,505 23
Mails and sundries.....	1,201 43
Total	$68,197 97
Corresponding week of 1863	68,061 19
Increase	$136 78

The earnings of the Marietta and Cincinnati Railroad for the 2d week in February, were:

	1864.	1863.
Passengers	$7,095 67	$2,879 39
Freight	9,052 97	10,468 43
Mail, express & telegraph	937 58	863 04
Total	$17,086 22	$14,210 86

The earnings of the Chicago and Alton Railroad Company for the week ending Feb., 15, were:

	1864.	1863.
Passengers	$13,468 43	$10,883 56
Freight	21,134 60	14,982 04
Sundries	2,253 62	1,011 01
Total	$37,856 65	$26,876 61
Increase 1864		$1,098 04

The following is a statement of earnings of the Toledo and Wabash Railway for the weeks ending

	Feb. 7.	Feb. 14.
1864	$20,931 71	$25,885 19
1863	20,081 24	24,240 84
Increase	$850 47	$1,594 35

The earnings of the Chicago and Northwestern Railroad for the 2d week in February, 1864, were..... $26,484 71
Corresponding week of previous year.. 16,273 67
Increase..... $10,211 04

The earnings of the Galena and Chicago Union Railroad for the week ending February 15, were:

	1863.	1864.
Freight	$23,287 41	$32,394 77
Passengers	6,741 83	11,493 75
Mails, &c.....	1,100 00	1,300 00
Total	$31,078 74	$45,188 52
Increase 1864		$14,109 78

The earnings of the Montreal and Champlain Railroad for the week ending Feb. 5, 1864, were:

Passengers.....	$1,187 96
Mails and sundries.....	188 00
Freight and Live Stock.....	1,362 54
Ferries	97 41
Total	$2,835 91
Corresponding week, 1863	3,417 81
Decrease	$581 90

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week in February, 1864, were $29,973 00
Corresponding week of previous year.. 20,161 00
Increase..... $9,812 00

The earnings of the Michigan Central Railroad for the 2d week in Feb., 1864 were $63,690 00
Corresponding week of previous year.. 60,888 00
Increase $2,802 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of Feb., 1864, were..... $69,600 00
Corresponding week of previous year.. 55,141 00
Increase..... $14,459 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in February, 1864, were $44,920 00
Corresponding week of previous year.. 32,106 00
Increase..... $12,814 00

Marietta and Cincinnati Railroad.

We learn from the Cincinnati *Gazette*, that the work upon the extension of this road from Loveland to the city has nearly all been put under contract and will be begun immediately. The contract requires the grading to be completed ready for the rail by January next, and it is expected the road will be ready for the cars by April or May of next year. The line is as follows: Crossing the Little Miami at Loveland it keeps down the river bank five miles, nearly to Milford, where it takes up the Valley of the Sycamore, and crosses over the summit into Duck Creek bottom, and on to Madisonville. From there it strikes through to Sharpsburg, and down Ross' Run, passing under the Miami Canal two miles below the Trotting Park, through Ludlow's Woods, and thence down the east side of Mill Creek to the city. The Company have made arrangement with the Indianapolis and Cincinnati Railroad Company to use their Pearl street depot, and their track from Harriet street into the same. For a freight depot they have leased the square between John and Smith streets, and south of the road. The only portion of the distance not put under contract is the first nine miles out from the city. Most of this requires heavy filling, the earth to do which will be taken from the Ludlow Woods, thirty acres of which the Company have bought for this purpose. This section, if not put under contract within a month, will be worked by the Company themselves, who are procuring steam excavating machines for the purpose.

American Railroad Journal.

Saturday, February 27, 1864.

Stock Exchange and Money Market.

Some idea of the enormous extent of the daily money operations of this city, may be formed from the fact, that on a single day, Saturday of last week, the aggregate amount of the business at the Clearing house was something more than one hundred and twenty millions of dollars. But another fact, still more curious is, that the real and final balance paid by the debtor to the creditor interest on that day through the Clearing house, was but a very small part of this sum. The debts of A to B, B to C, C to D, and so on through the whole alphabet, are in the aggregate, very large, but if each pays the other in course, or by a general clearance, and accounting at one time, the payments carried along and finally credited in the right place, the sum necessary to discharge the whole will be found to have been a moderate one. The real final balance is the sum and sub-

stance of the transactions. All the rest have been exchanges, credits and shiftings of accounts. This shows us very plainly the nature of commercial operations, their delicate intricacies, their mutual dependence and relations, and the advantage of their being conducted with promptness and certainty. If each debtor on clearing day had to pay his indebtedness in gold, if it had been so required on Saturday for example, that day would have witnessed the bankruptcy of nearly the whole city. One hundred and twenty millions could not have been had to represent and pay the mutual liabilities of those who had then to meet their engagements. But they were met notwithstanding without difficulty.

Now let us apply this fact to the National currency. If the Government was called on at once to redeem its legal tenders in gold, it would not be possible. Nor could the richest European Government do it, but let the amount of our taxation equal two hundred and fifty millions a year, and in three years' time all the legal tenders may be redeemed at the Treasury with the greatest ease. In fact they would require no redemption; they would be absorbed. If not all withdrawn then, the Government on the Clearing house principle would be found to be called upon for but a very small sum in coin, and a sum entirely within its reach. Those persons who in matters of finance or commerce, look simply at aggregates and totals, may naturally enough take alarm, but those who go deeper into the subject, find compensations, equivalents and offsets which equate these large differences, strike many of them out of the account and leave no very alarming sum at the bottom.

It is with this view of the subject we look upon our existing debt, including currency, without much anxiety. The whole is as yet but between sixteen and seventeen hundred millions, a little more than one-fourth in currency, which must inevitably be absorbed in the way we have mentioned, if no more are issued. And if the policy is persisted in of putting out bonds at low interest and long dates, the absorption will be still faster, and the currency will hereafter assume the form of National bank bills. This is the inevitable course of things, and appears to be the present policy of Mr. Chase. It will be then for the banks so to shape their business, as to meet the return to specie payments with as little loss and inconvenience as possible. They know, what all anks find out by experience, that when they are ready to pay specie for their notes there is but little call for it. The public are like the man who presented with some anxiety a bill for redemption at the counter of a local bank, who as soon as he saw he was to receive coin for it, put it in his pocket saying, "If you *can* pay it, I do not want it."

Gold is apparently on the decline again. It fell 2 per cent. on the mere publication of Mr. Chase's letter approving of the plan of a sale of the surplus in the Treasury, a most sound and patriotic view of the question. It rose again on the fact that the measure was not probably to be immediately successful. Since then as the leading presses in this city and Philadelphia have warmly advocated it, and many intelligent members of Congress like Mr. Stebbins of this city are in its favor, with a probability of its adoption, the dullness has continued. The objections made by the operators in the article, we mean those of a certain class, for the large banking houses and capitalists are understood to be unfriendly to speculations in gold, is, that it is checking free trade, and that the example of England and the Bank of England are no guide for us. They are entirely without force. The Treasury is at present our bank of issues and deposits. The requirements of gold for interest and duties enhance the price. The enhanced price of this article puts up prices of all the necessaries of life, and is an excuse for dealers in them to add to the price. The Government would act oppressively if it hoarded its surplus gold, and do great injustice to the community. What would the people say if the Treasury went on adding to its hoards, under the pretence of reserving them for the future payment of the principal of ts debt to the extent of say three or four hundred millions of dollars? The price might rise for aught we could tell, 2 or 300 per cent. Such a policy would be intolerable and would not be permitted. On the same principle, hoarding twice or thrice as much gold as is necessary to pay interest regularly, is equally unjust and impolitic. We see no difference whatever.

This dullness in gold has been assisted by the movements of Gen. Sherman towards Mobile, so far without a check; the march across Florida, and the approach of Admiral Farragut, who does not permit his fleets to lie for months in the presence of the enemy's forts without attempting their reduction. The calculation that gold should fall with the slightest success on our part, or rise with the occurrence of the smallest disaster, shows most conclusively that it is in the hands of speculators merely, who do not know or care what are the resources of the nation, the spirit of the peopeople, nor what must be the finality of the struggle. Indeed they do not want to know. Rumors are their aliment, and their pockets their barometer.

With this condition of gold there has been a disposition to realize by the holders of the high priced railway shares. It is difficult to foresee the consequences of an early peace upon many of the roads. The impression appears to be that in such an event there may be a fall in prices; but there is nevertheless a steady advance in most of the shares, and confidence in railway productiveness continues strong.

We believe there will be little diminution in their future business, and it seems to us that the companies which are conducted prudently, keep down their expenses and make no unnecessary contracts, will weather every storm; will be able to pay as large dividends hereafter as now, and their shares will be always reasonably above par. All this time Government securities have been steady, and a favorite both with banks and the people. This will appear distinctly from our weekly tables. So too, States are quite firm. Tennessees and Missouris are approaching their old figures, as they fall back to their former political condition, and keep time to the National airs.

Exchange sympathizing with gold is dull and slow at 172½.

The Money Market is easier, as the rates have fallen to 6 per cent., and on good securities to 5, when in large amounts. Ordinary borrowers, without the gilt edge to their paper have to pay 7, and others again who have to go to the street brokers for aid, find they have to pay whatever is demanded. As large quantities of the 7-30's shortly coming due are seeking conversion, the following correspondence will throw much light on the method to be adopted for that purpose. We accordingly give the substance of what has passed on the subject:

Hon. M. B. Field, Assistant Secretary of the Treasury, Washington, D. C.

DEAR SIR:—Will you oblige us by answering the following questions to enable us to satisfy inquiries:

1st. If the seven-thirty notes shall be converted before maturity, will the accrued interest to that date be paid by the Government in gold or in currency?

2d. How soon after maturity of the 7 3-10 notes will the privilege of their conversion cease?

3d. When seven-thirties are converted into a 20 year bond, will said bond bear date from time of conversion?

If not, when will it be dated, and must the back interest to date of conversion be paid in gold?

Respectfully,

LIVERMORE, CLEWS & Co.

TREASURY DEPARTMENT, Feb. 22, 1864.

GENTLEMEN:—Your letter of the 19th instant is received.

When, at date of conversion, the accrued interest on the seven-thirty notes exceeds the accrued interest on the bonds, the bonds are issued with full coupons, and the balance of interest is paid in coin.

When at date of conversion the accrued interest on the six per cent. bonds exceeds that on the seven-thirty notes, the interest due on the notes is paid in coin, and the bonds are issued with the first coupon stamped with the date of conversion. If, however, parties desire the bonds to be issued with full coupons, they can deposit the necessary amount in coin with the Assistant-Treasurer, and forward his original certificate of deposit, with the notes sent for conversion.

The seven-thirty notes are exchangeable before or at maturity for six per cent. bonds, which are payable after June 30th, 1881.

M. B. FIELD,
Assistant Secretary of the Treasury.

The Assistant Treasurer reported an increased balance on hand, on Tuesday last of $40,177,450.

The total value of the exports during the last week exclusive of specie was $2,963,866.

The bids for the two millions soldiers' bounty loan in this city amounted to $3,130,700, ranging between par and 105½. There was one bid of $7,000 at 107. This shows the strength of the credit of the City of New York.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Peninsular R. R., 47; Chicago and Milwaukee, 70; Rome, Watertown and Ogdensburg, 133; Indianapolis and Cincinnati R. R., 100; Cincinnati, Hamilton and Dayton, 124; Ohio 6s, 1881, 105; Kentucky 6s, 101; Illinois War Loan, 101½; do., coupon 6s, 1879, 103; North Carolina 6s, 55½; Louisiana 6s, 60; Missouri 6s, issued to the Pacific R. R., 75½; Long Dock bonds, 110; At. & Gt. Western (Ohio div.) 1st mort., 94; Sixth Avenue R. Impolicy of Constructing Another Railroad between Washington and New York.

Whatever might be the propriety of constructing another railway between the city of New York and the National Capital, the project is one which smacks strongly of speculation. We know that some of its advocates at the beginning of the war, for it has been pushed into public notice ever since, were men who were at the service of those who would pay best for their services, and who by their connection with the press were always able to get into print, in favor of any project they chose to advocate. Under the pretence of military necessity those men would advocate anything. The establishment however of a National Railroad in the direction proposed, would even if constitutional, be the inauguration of a very doubtful policy. The necessity for it is daily growing less, the war beyond all question is drawing to a close, and it is no time to enter upon works of vast expense when all our resources will be required to sustain the National credit, and pay off the National indebtedness.

The complaint is that the present railway accommodation is not equal to the public requirements. Quite possible. Nothing has been equal to these during the war. Every branch of business, of supply, of transportation, has been deficient. Shall the Government step forward and establish rival manufactories, transportation lines, bridges, and passenger steamers all over the United States, because the private resources of the country have not been at once equal to its unexpected requirements? If the principle is correct in one case, it is in all. It is well known for example, that the New York Central and other roads have not had equipment nor double track enough for the business crowded upon them. Does Congress propose a National route between New York and Buffalo?

Whatever may have been the policy of New Jersey in restricting its railway grants, it cannot be denied that until now there has been little complaint as to the present route, or its usual management. And even the deficiencies complained of, apparent only from the enormous increase of traffic, have been provided for as fast as *possibilities* allowed. But it is not necessary for us to enter into a defence of any of the companies which perform the service between New York and Washington. We have before us the letter of S. M. Felton Esq., President of the Philadelphia Wilmington and Baltimore Railroad Company addressed to Mr. Sumner of the United States Senate, which meets all the objections, and refutes all the arguments of the advocates of the proposed new route. We give the following extracts:

The establishment of a double track between

Philadelphia and Baltimore is already far advanced; twenty-seven miles of the second track have been completed; the permanent way has been graded for the additional distance of thirty miles, on which the rails will be laid as soon as they arrive from England, where they were purchased on account of inability to procure them in this country, and the work will be consummated with the utmost diligence.

The Susquehanna Ferry will be superseded by the erection of a bridge at that point, for which undertaking the soundings and surveys have already been completed, the land for the approaches and the right of way have been secured, a large quantity of stone has been quarried and dressed, two piers have been constructed, one of which was built in water forty-two feet deep, and the foundations of five other piers and one abutment have been prepared. There will be required thirteen piers, two hundred and fifty feet apart, and two abutments. The substructure will be finished during the present year in case the requisite materials and workmen can be procured, and it is anticipated that the bridge will be ready for travel in 1865.

An improved mode of transit through Philadelphia, for some of the through trains, has lately been introduced to obviate the transfer of passengers and baggage from one railroad to the other by street cars or ferry.

This railway connection is temporary in its nature, and although a decided improvement over the previous arrangement, it is designed to be used for a few months only, when the Junction Railroad will be completed.

The Junction Railroad would have been finished during the last year but for the invasion of Pennsylvania, in which emergency the engineers and workmen were sent to the interior of the State to lay out and build fortifications, and, moreover, an extensive earthwork, designed for city defence, was erected upon the line of the railroad, which caused a delay of four months in the work of construction at that point.

A railroad, known as the Connecting Railway, has been located and commenced to unite the Junction with the Philadelphia and Trenton Railroad, and when finished, the line through Philadelphia will be faultless; in the meantime the Richmond Branch of the Reading Railroad will be used as the connecting link between the two railroads.

The improvements of the railroad between Philadelphia and Baltimore, effected within the last year, involved the expenditure of five hundred thousand dollars, while those in progress, to be completed within the next two years, will require an outlay of fifteen hundred thousand dollars more, and then this railroad will be excelled by none in the country for safety, expedition and comfort.

The anomalous state of affairs resulting from the war has produced a marked effect upon railroads. The demand for men for the army and navy has caused a scarcity of workmen, and the enhanced wages of laborers have rendered them indifferent to constant employment. The construction of an immense fleet for naval service, and the rebuilding, repairs and operation of railroads by the Government have withdrawn vast supplies of raw materials, manufactured articles and skilled labor, from private parties.

In a recent debate in the House of Representatives, one of the members alleged, on the authority of some anonymous individual, that the railroad companies between Washington and New York had practiced extortion on the Government.

The accusation is utterly unfounded, and the company, courts the most rigid investigation of its conduct in its relation to the public service.

An impartial investigation of the subject will show that the existing route between Washington and New York is the nearest practicable approximation to an air line, and that more favorable grades are unattainable; that the railroad companies are unremitting in their efforts to serve the Government and accommodate the public; that no expense has been spared to remedy defects and overcome impediments; that improvements are now in progress, which will require the expenditure of several millions of dollars, and that on their completion, the route will be unsurpassed in continuity, comfort and appointments by any in the country; that in consequence of the enhanced value of real estate, labor and materials, a railroad between Washington and New York could not now be built and equipped by private enterprise, for *less than fifty millions of dollars*; and if constructed by the Government, its cost would be greatly enhanced; that the projected railroad could not be finished within four years, before which time, national tranquility, it is hoped, will be restored, when the army will be reduced, and business will subside to its natural proportions, affording inadequate support for two railroads. In that case the United States would not only sink the entire capital invested in the project, but be required to make annual appropriations to defray the operating expenses of the railroad and maintain a horde of greedy partisans.

The present route between Washington and New York through Philadelphia and Baltimore is the most direct line practicable. It varies but little from an air line, and that only where such variation is necessary to retain the railroad on fast land and avoid running many miles in the waters of the Chesapeake Bay, through which a straight line between these two cities would pass, from a point considerably east of the Susquehanna river to a point west of Baltimore, a distance of more than forty miles, and would, therefore utterly impracticable. The nearest approach, consequently, to a straight line that can be attained is the existing route, passing through Philadelphia and Baltimore.

If a national route between Washington and New York be deemed a public necessity, and it be the legitimate province of the Government to own such a route, it should be the policy of the Government to purchase the existing railroads and establish them as a military and post road. They could doubtless be obtained at less cost than a new line, and would yield an immediate revenue to the Government, whereas the establishment of an independent route would involve the loss of four years' interest upon the capital invested without any income, and would be of no utility to the Government in the present exigencies.

☞ The omission to give credit to the *U. S. R. R. and Mining Register* for the "Coal Tables" copied from it into our issues of the 6th and 13th inst., was purely accidental. There is no journal comes to us which we appreciate more highly than the *Register*. Its knowledge of the great coal and mining interests of Pennsylvania is minute and accurate, and it is altogether conducted with care and ability.

The Railroad to Waterville.

The Directors of the Utica City Railroad held their adjourned meeting to decide upon the route of the proposed railroad to Waterville, yesterday. Large and intelligent delegations were present from the Sauquoit Valley and Clinton, representing the rival interests of their respective localities. Several long conferences were held, and a good deal of feeling was manifested on both sides.

The subscriptions required from each were complete, and on each side they had been secured with the condition that the road extend through to Waterville over the respective routes. There was no provision made for a branch road, either to Clinton or Clayville. After the claims of the respective routes had been fully presented, and the matter thoroughly talked up, the Sauquoit Valley people were offered the road if they would agree to certain conditions. They concluded to do so, and the decision that the road should go to Waterville *via* Clayville and Cassville thus became conclusive. A railroad by that route may now be regarded as a fixed fact. The specifications that were agreed upon are not yet disclosed. Another meeting will be held on the 25th inst.—*Utica Herald.*

☞ The bill for the completion of the Missouri railroads has finally passed both Houses of the Legislature of that State. It provides for raising the State lien on the Pacific road, to admit a first mortgage on the road west of Dresden, to secure $1,500,000. It is proposed to borrow for its completion to Kansas City. The act provides for the transfer of the Chariton and Randolph and the Missouri Valley Railroads, by a vote of six majority of their stockholders, to the North Missouri Railroad Company, to be called the West Branch of said road; and for the completion of the North Missouri Railroad to the Iowa State line, as also the said west branch; and to build a bridge across the Missouri River at or near the town of St. Charles. The company is authorized to borrow $2,000,000, giving a first mortgage for security on said road north of Macon City.

Ascot Mining Company.

The directors of this company have recently issued a report on the "Condition and Prospects of the Undertaking." The mine is situated in Canada East, and further developments since the organization of the company have brought to light new deposits of ore exceeding in richness the veins hitherto worked, confirming previous opinions of the extent and persistency of the deposits. The company have erected smelting furnaces whose operations have demonstrated the practicability of their plan of reducing to copper regulus their own and the ores of other Canadian mines, the peculiar fluxing properties of the Ascot ore being admirably adapted to this purpose.

The board of management is composed of the following gentlemen, many of whom are well known in this city:—Walter Shanley, of Montreal, President; J. G. Weld, Secretary and Treasurer; Directors—Walter Shanley of Montreal, Wm. A. Crocker of New York, Rush C. Hawkins of New York, and E. T. Loring, Geo. W. Messenger, J. W. Rogers and J. G. Weld of Boston. Herbert Williams of Canada, Consulting Engineer.

British and American Copper Mines.

From the Copper Mines of Lake Superior, there were sent to market in 1862, according to the *U. S. R. R. & Mining Register*, more than three-fifths the number of tons of copper that were yielded by the ores raised from the British mines. In these days of the infancy of the copper trade of Michigan, the native copper product of her Lake Superior mines is but little less in tons than the culminated and declining product of the copper mines of Great Britain. And after this present year, the copper product of Michigan will surpass the joint yield of the British copper mines, for the Michigan product increases, whereas the British product declines.

In 1862 the copper mines of Great Britain produced jointly, of copper.	14,843 tons.
In 1862 from the copper mines of Lake Superior there were shipped, of copper	9,020 "

In 1862 twelve of the copper mines of Lake Superior produced each over 100 tons of copper, the product of one mine, the Cliff, being 1,634 tons.

In Great Britain the copper mines have been worked for centuries, whereas less than a score of years have elapsed since the first ton of native copper was shipped from Lake Superior.

In Great Britain the copper mines are giving

out—are yielding a diminished product; at Lake Superior virgin veins and lodes are every year uncovered and developed, the yield being rich and unfailing, and the prospect being full of profit and promise.

However, the copper market may expand and the consumption of the metal increase, the Lake Superior copper region will be found an adequate source of export and supply.

Chautauqua Central Railroad.

The Engineer Corps, accompanied by D. Williams, Esq., completed a preliminary survey of their end of the proposed route, from the landing at the head of Chautauqua Lake, at Mayville, *via* this village and Dunkirk, last week. They found the route unexpectedly favorable. They reached the summit this side of Mayville at an elevation of only 32 feet, and a distance of over 4 miles in which to overcome it. From the summit this way was very easy, the maximum grade being not over 43 feet to the mile, and the cutting and filling, we learn, does not exceed the average of the Lake Shore road through this county. The line is more direct than the present traveled road, this village being reached in less than 17½ miles from the boat landing at the head of the lake. From Mayville to the connection with the Atlantic and Great Western Road, a level route is found on the western shore of the lake. A connection can be made between the B. and Erie road and the A. and G. W., over the line which has been examined, in less than 35 miles, and with such an easy grade that it would seem needless to look for a more favorable route. The large amount of oil and coal which would find transportation over the road, if constructed, in addition to the local business and travel, cannot but make such a link in the railroad connection an important one to the county as well as to Buffalo and places beyond.—*Fredonia Censor.*

Liability for Loss of Baggage by Co-operating Roads.

In the novel and interesting case of Najac *vs.* The Boston and Lowell Railroad corporation some time since, decided in Massachusetts, and now pending there on an appeal to the Supreme Judicial Court, a somewhat peculiar state of facts existed, which in some respects would seem to distinguish the case from that of an ordinary claim from loss of baggage by railroad corporations. The facts were as follows:

In September, 1859, one Josiah Perham, called on the managing agent of the Boston and Lowell and Nashua Railroads, (the two then doing business by agreement between them as one road,) and suggested an arrangement through him for an excursion train from Boston to Montreal, and back to Boston. Perham proposed to put the tickets at five dollars to defray the costs of printing and selling, and of advertising the excursion, and to receive fifty cents on each ticket as his compensation. He requested the agent to correspond with the other roads on the line, to wit: the Concord, the Northern, the Vermont Central, the Ogdensburg, and the Champlain and St. Lawrence, and ascertain if they would join with the defendant on the terms proposed by him. The agent wrote to these roads, and they replied that they would join and divide with the defendants the $4.50 per ticket, in proportion to the number of miles by them severally run.

Thereupon it was arranged by the agent and Perham, that the excursion train should start from the defendants' depot in Boston, on the 20th of September, and that the agent should procure the tickets to be printed. Perham paid for the printing, took a portion of the tickets and disposed of them as he pleased, and some of them were sold at the ticket office of the defendants. He gave a receipt for the tickets when he received them, and returned all that he did not sell. The tickets were in the usual form, had the printed heading, "From Boston to Montreal," bore the name of the agent with the designation of his office, and had attached to them coupons for the other roads with the printed heading "From Boston to Montreal."

They were good for ten days and covered the return trip.

It was optional with the purchasers of tickets to go to Montreal over the roads before named, or to take the steamboat part of the way. The defendants' agent had no correspondence with the owners of the boat. Perham arranged with them.

The plaintiff, a citizen of Providence, purchased of Perham in Boston two tickets, one for himself and one for his wife, intending to go to Montreal, and on his return to visit his friends in Vermont, Maine and New Hampshire, and to be absent from home several weeks.

On the 20th of September, the plaintiff delivered two trunks to the defendants' baggage master at their depot in Boston, and requested checks for them to Montreal. The baggage master declined to check them, saying, they did not provide checks on excursion trains. Plaintiff then asked to have them checked by the regular train. To this the baggage master replied, that the trunks and the plaintiff must go by the same train, and they would be perfectly safe as he, the baggage master, was to go through with them. The trunks were placed in the baggage car of the defendants, and the plaintiff and his wife took their seats in one of the defendants' passenger cars Both cars went through to Montreal. Defendants locomotive went no farther than Nashua where their roads terminated.

Each of the roads furnished its own locomotive, and conductor. Several of the roads contributed passenger cars. The defendants' baggage master went through to Montreal. He then (September 21,) delivered to the plaintiff one of the trunks, and the plaintiff demanded of him the other trunk. This trunk with its content was lost, but not until after the train had passed beyond Nashua. The evidence left it uncertain where the loss occurred. Some time after the plaintiff's return he had an interview with the defendants' managing agent in reference to the lost trunk. The baggage master was called in, and being asked by the agent why he did not check the trunk, replied that the baggage came in so fast he could not check it. To this the agent replied that he must never let baggage go again without checking it. The plaintiff on November 1st, demanded of the defendants the missing trunk and contents. Some time after the excursion the defendant paid to the other roads their proportionate parts of the ticket money. The owners of the steamboats they paid on the order of Perham. The contents of the trunk were specified, and were admitted to be reasonable and ordinary baggage, and were admitted to be of the value of $355.70. Mr. Justice Ames of the Superior Court of Massachusetts, held that the action was maintainable, and that the plaintiff was entitled to judgment for the amount claimed.

The Waupaca Railroad.

The Island City *Times* says the Chicago and Northwestern Railroad Company have accepted the offer made by Waupaca of $20,000 in bonds and $4,706 in cash, and agrees to finish the road by next fall. The road will cross Wolf River at Fremont and run through both Waupaca and Weyauwega. Should the town back out of the arrangement above, the road will run only through Waupaca, and leave Weyauwega four miles north of the line. But there is no danger of Weyauwega failing to vote bonds, and in any case, we are assured, it will be built and running within the year 1864.—*Oshkosh Courier.*

New York Savings Banks.

The following is an abstract of the annual reports of the Savings Banks of this State, transmitted to the Legislature by the Superintendent of the Bank Department, showing the condition of those institutions on Jan. 1, 1864.

The whole sum represented in savings banks at the time stated was $98,881,171. Of this amount $93,786,384 is directly due to depositors, and the balance consists of real estate, furniture, and accumulated profits amounting to $5,094,787.

The following comparative statements of the operations of the banks for the years ending Dec. 31, 1862 and 1863, will serve to mark the rapidity with which this trust is increasing in bulk, volume and value:

	1862.	1863.
Number of institutions in operation	71	71
Number of open accounts	347,184	400,194
Amounts due depositors	$76,538,183	$96,736,384
Amounts deposited	39,096,308	54,257,096
Amounts withdrawn	28,897,495	40,257,953
Amt. of int. received	4,167,005	5,074,759
Amt. of int. cred. depos.	3,079,302	3,760,524

The following summary shows the aggregate of the resources and liabilities of the Savings Banks of the State, as exhibited by their reports, Jan. 1, 1864:

RESOURCES.

Bond and mortgages		$23,922,202
Estimated value of mortgaged premises	$56,402,975	
Stock investments		59,287,019
Par value of stocks	59,348,844	
Estimated value of same	59,993,360	
Stocks upon which money has been loaned, par value	3,988,747	
Amount loaned thereon		3,409,219
Amount loaned on personal securities		372,926
Amount invested in real estate		1,237,532
Cash on deposit in banks		8,080,862
Cash on hand		1,644,955
Amounts not loaned or deposited		692,522
Miscellaneous		232,934
Total		$98,881,171

LIABILITIES.

Amount due depositors	$98,786,384
Miscellaneous	9,204
Excess of assets over liabilities	5,085,583
Total	$98,881,171

Total amount deposited during the calendar year of 1863	$54,257,096
Total amount withdrawn	40,257,953
Total amount received for interest	5,074,759
Total amount of interest placed to the credit of depositors	3,760,524
Number of open accounts	400,194

Average to each depositor, $234 35.

Of the stock investments reported, $31,635,752 is in United States securities. Bonds and mortgages are diminished $1,589,110. Loans on personal securities have increased from $174,717 in 1862 to $372,926 in 1863.

Finances of West Virginia.

From the message of the Governor we learn that the receipts into the Treasury have been $306,998 90; and the payments for all purposes $97,315 09—leaving a balance, January 1, 1864, of $209,683 81. The State owes no debt, unless for a portion of the Virginia debt existing before the Rebellion. When all the State pays taxes, the revenue will be sufficient for all purposes, and then taxes will be less than in any other State. There is a demand against the United States Government for expenses incurred for protection against invasion, &c., but the amount is not yet ascertained. To develop the mineral resources of the State, the appointment of a State Geologist and a proper survey is recommended.

Lumber Trade of Chicago.

From the Annual Review of the Lumber Trade of Chicago, published in the *Tribune* of that city, we extract the following statement of the receipts of lumber, shingles, laths, etc., from 1847 to 1863, inclusive:

	Lumber, Ft.	Shingles, No.	Laths, No.
1863	393,074,882	152,485,683	41,665,000
1862	299,365,000	131,225,000	23,880,000
1861	249,309,000	79,356,000	32,637,000
1860	255,147,000	133,578,000	30,509,000
1859	265,710,832	165,087,000	49,548,210
1858	268,616,000	125,788,000	44,517,000
1857	444,396,300	130,462,000	79,650,000
1856	441,961,900	135,870,000	70,285,120
1855	297,507,669	158,770,000	46,487,550
1854	228,336,783	82,061,250	32,431,550
1853	202,191,098	93,483,784	39,433,116
1852	147,816,232	77,080,500	19,759,670
1851	125,056,437	60,338,250	27,583,475
1850	100,364,779	55,423,750	19,809,700
1849	73,259,553	39,057,750	19,281,733
1848	60,009,250	20,000,000	10,052,100
1847	32,218,225	12,148,500	5,655,700

The stock of lumber on hand in Chicago on the 1st of January, 1864, was 92,285,784 feet; on the 1st of January, 1863, 73,000,709—an increase of 19,255,075 feet.

RAILROAD IRON.

FOR SALE, to arrive, 800 Tons English Rails of the G L Brand, 52 lbs. per lineal yard.
Apply to C. CONGREVE & SON,
No. 6 Pine street, New York.

Livermore, Clews & Co.,
BANKERS
AND
U. S. GOVERNMENT LOAN AGENTS,
32 Wall street, New York.

UNITED STATES SECURITIES of all descriptions purchased and for sale.
Accounts of Banks, Bankers and others received, and interest allowed on deposits subject to Draft at sight.
STOCKS, BONDS AND GOLD, BOUGHT AND SOLD ON COMMISSION.

TO RAILROAD CONTRACTORS.

Sealed proposals will be received at the office of the Pacific Railroad, (of Missouri,) in St. Louis, till March 25, 1864, for doing the graduation and masonry of about thirty-five miles of the road, being from Holden, in Johnson County, to a section in Jackson County between the Little Blue and Independence. Profiles, list of sections to be let, giving time as to when they must be completed, forms of bids, specifications, &c., can be seen at the office of the Chief Engineer in St. Louis.

Bids should be made for each section of about one mile, and no distance greater than ten miles will be let to any party or firm.

Payments will be made monthly in cash, fifteen per cent. being retained till the completion of the work.

Bids should be addressed to GEORGE R. TAYLOR, President, and where the bidder is not personally known to the President or Engineer, he must accompany his bid by substantial references, and should give also his post-office address, and he will be informed of the acceptance or rejection of his offer.

The company reserve the right to reject any or all bids.
T. McKISSOCK, Chief Eng'r and Sup't.

Notice to Contractors.

ENGINEER'S OFFICE MORRIS & ESSEX R. R. Co.
NEWARK, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hackettstown to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

6t8. J. B. BASSINGER, Chief Engineer.

PATENT OFFICE.
J. J. GREENOUGH,

(Formerly of the United States Patent Office), solicits Patents in the United States, Europe, &c. Practices before the courts in patent cases, and prepares all legal documents connected with patents and their transfer. Special attention given to difficult appeal cases in sufferance, &c. Offices No. 6 Wall street.

American Railroad Journal.

New York, Saturday, March 5, 1864.

Maps of the Coal and Iron Regions of Pennsylvania.

We have received from the author, P. W. Sheafer, Esq., copies of his two new maps, being in fact official documents, containing on large sheets, all the localities of the coal and iron mines of Pennsylvania, its railroads and canals, and the sites of its various manufactories of iron. It shows also the various avenues to market by natural and artificial routes, indicating the enterprise of the people of that State in a striking manner. Annexed to the larger map are numerous descriptive and statistical tables, containing the names and locations of the various iron furnaces, rolling mills, forges and bloomeries, not only in Pennsylvania but the neighboring States. The smaller map is a comprehensive one of the coal fields, the best we have seen. In short, these maps show at a glance, and yet in detail, the immense mineral area of the State, and the position of its various coal fields, in a convenient and practical form, suitable for the counting-room or the private study. It is a timely and valuable contribution to topography, and physical as well as terminal geography.

We should be pleased, if we were not restrained by the copyright, to make some extracts from the tables to verify the favorable opinions we entertain of these maps.

Opening of the Pacific Railroad.

Under this heading, in our issue of 5th December last, we gave an account of the opening of a portion (31 miles,) of the railroad from San Francisco to San Jose. We now learn that the whole section of 50 miles has been completed, at a cost of $2,000,000. The road was formally opened for business on the 16th of January last. This road forms the first section on the Pacific slope of the great contemplated railway across the continent. The prospects are regarded as extremely flattering. The *Alta California* says:

The Central Pacific Railroad Company are pushing their work on from Sacramento to the State line, and already several miles of rails are laid. The surveys on the Western Pacific Railroad, from this point to Sacramento, are now about completed, and the work of actual construction will commence with the opening of spring.

Allegheny County Bonds.

An important decision was recently rendered in the U. S. Circuit Court for the Western District of Pennsylvania, by Justice Grier, in the case of Evans *vs.* the Cleveland and Pittsburg Railroad Company. This was an action of debt, brought to recover the sum of $15,000 for over-due coupons on the bonds of the County of Allegheny, guaranteed by the Cleveland and Pittsburg Railroad Company. The coupons were in the usual form. The contract of the defendants was endorsed on the bonds, and read as follows:

OFFICE OF THE CLEVELAND AND PITTSBURG R. R. Co., CLEVELAND, Ohio, Oct. 20, 1853.

For value received, the Cleveland and Pittsburg Railroad Company assign the within bond to ——, or bearer, and guarantee the punctual payment of the interest thereon, as it may fall due, at the place and time specified.

By order of the Board of Directors of the said Company.

CYRUS PRENTISS, President.

The County of Allegheny refused to pay the interest, and the plaintiff instituted action against the railroad company for the payment of it. The following points were decided:

The Cleveland and Pittsburg Railroad Company had full power to execute a contract guaranteeing the punctual payment of the coupons attached to the bonds of Allegheny County, which were given the county in payment of her subscription to the capital stock of the Railroad Company.

The bonds and coupons being made payable to bearer, they pass by mere delivery, and no assignment is necessary to enable the holder to sue.

The contract being made in Ohio, to be executed in New York, and by the laws of both those States, such a contract being an original undertaking, in order to maintain an action on the guarantee it is not necessary for the holder to sue the County of Allegheny in the first instance, or pursue it to insolvency; nor is any demand or notice required.

The Courts of the United States receive the statutes and judicial precedents of the different States as evidence of the law of each State without special plea or proof witnesses.

Chicago and Northwestern Railway.

The Chicago and Northwestern Railway Company is successor to the Chicago, St. Paul and Fond du Lac Railroad Company. The latter was a consolidation, under acts of the Legislature of Illinois and Wisconsin, of the Illinois and Wisconsin Railroad Company in Illinois, and the Rock River Valley Union Railroad Company in Wisconsin. The consolidation was consummated in March 1855.

The "Illinois and Wisconsin" Company's line extended from Chicago, Illinois, to Janesville, Wisconsin, a distance of 92 miles, and at the time of consolidation had been completed and was in operation from Chicago to Woodstock, Illinois, 52 miles. The gauge of this road was originally six feet, but was subsequently altered to one of 4 feet 8½ inches.

The "Rock River Valley Union" Company whose line extended from Janesville north to Fond du Lac, had failed, and its property been sold under foreclosure to the bondholders. At the time of consolidation, however, the northern portion of its line viz., from Fond du Lac southward to Chester, 18 miles had been completed and was in operation.

By means of the consolidation, the Chicago, St. Paul and Fond du Lac Company became possessed of an entire and direct line from Chicago into the very heart of Wisconsin, reaching the large and increasing business of its most important inland towns and cities, including Janesville, Madison,

Watertown and Fond du Lac; and power by charter to extend the road *via* Madison northwestwardly to the northwest State Line of Wisconsin near St. Paul, the capital of Minnesota, and from Fond du Lac, on Lake Winnebago, northwardly through the great lumber and mineral regions to Lake Superior.

The first object of the new company was the completion of the road between Chicago and Fond du Lac, a length of 178 miles. The main northwestern and northern divisions of the line it was considered necessary to hold in abeyance until this object was attained.

The first annual report of the new company brings matters up to the 1st September, 1855. The total expenditure on the line to that date, including $100,000 expended between Janesville and Madison had been about $3,625,000, which was represented as follows:

By stock (and interest) Ill. and Wisc. R. R. Co. ..... *about*	$1,100,000
By stock issued and to be issued on account of purchase of Rock River Valley Union Railroad, at sale under mortgage March 24, 1855, in accordance with bondholders' agreement ..... *about*	1,200,000
By mortgage bonds of Illinois and Wisconsin R. R. Co., sold	950,000
By special 10 years' bonds of Chicago, St. Paul and Fond du Lac R. R. Co., issued and to be issued for interest on on the above bonds	125,000
By Bills payable ..... *about*	250,000
Total ..... *about*	$3,625,000

And the cost to complete the line as contemplated was estimated at $2,375,000—making a total cost of 178 miles $6,000,000 or about $33,700 per mile. This sum included the cost of large and valuable depot grounds at Chicago, Janesville, etc.

The condition of the road at the same date was as follows:

Road completed and in use	70 miles.
" fully graded	50 "
Line to be graded	58 "
Total length of line	178 "

The bridging and masonry on the graded portions were also nearly complete; and the 58 miles not graded lying chiefly in the valley of Rock River had been found very favorable and compared with the rest of the line could be completed at a moderate expense. The company also held valuable machine shops at Chicago and others at Fond du Lac, and had economical depot buildings and water stations at Chicago and the principal stations on the line.

On the 1st July, 1855, the equipment, stock, etc., of the roads severally were as follows:

	Ill. & Wis. R. R.	V. U.	Total.
Locomotives.	5	2	7
Passenger cars	4	1	5
Baggage cars	4	–	4
Freight cars—box	46	6	52
" " —platform	27	23	50
Gravel cars	30	25	55
Hand cars and trucks	7	4	11

—and machinery, lumber and materials, etc., valued at $19,000. The whole cost of these including the cost of machinery etc., had been $182,200.

The earnings of the two ends of the road for the month of August, the first month of uninterrupted use since the opening to Woodstock and subsequent to the change of gauge were about $17,000. The earnings prior to August on the Chicago end of the road while in progress and operating various distances from 20 to 40 miles had been about $57,000.

To provide means for the further prosecution of the work, and free it from encumbrances, the company now determined to issue $3,000,000, 7 per cent, 30 year, convertible bonds, secured on the entire line from Chicago to Fond du Lac, and by a sinking fund of one and a quarter per cent per annum.

Of these bonds $1,500,000 were used to retire the bonds of the Illinois and Wisconsin Company, made previous to the consolidation and secured on 70 miles of road in Illinois ($950,000 of which bonds had heretofore been sold and $550,000 pledged for liabilities); and the remaining $1,500,000 were to be expended on the unfinished portion of the line. Including the unexpended portion of these bonds the total resources of the company for the further prosecution of the work amounted on the 1st Sept., 1855 to $2,878,000 as follows:

Unappropriated first mortgage bonds ..	$2,050,000
Stock pledged along the line.	250,000
Stock to be paid contractors	108.000
Bond subscriptions voted by towns and cities, viz:	
City of Fond du Lac 7 pr. ct. 20 yr. bonds	200,000
City of Watertown 8 pr. ct. 20 yr. bonds	120,000
City of Janesville (balance of $150,000) 8 per cent. 20 year bonds.	70,000
Town of Jefferson 8 pr. ct. 20 yr. bonds.	40,000
Town of Ft. Atkinson 8 p. c. 20 yr. bonds	40,000
Total resources	$2,878,000

—and the wants of the company to complete the road from Chicago to Fond du Lac were—

For existing liabilities.	$250,000
To finish road from Chicago to Janesville 92 miles	534.000
To finish road from Janesville to La Crosse Junction 56 miles	1,000,000
To finish road from Junction to Fond du Lac 30 miles.	120,000
To provide additional rolling stock	100,000
Stock and bonds to be issued to contractors	216,000
Total	$2,220,000
Leaving for discounts, etc	$658,000

The second annual report was presented to the stockholders in May 1857. By this we are informed that the company had completed and opened the portion of its road extending from Woodstock in Illinois to Janesville in Wisconsin, and extended the northern section of the line from Chester to its junction with the La Crosse and Milwaukee Railroad—thus having added to its line about 58 miles of new track and making in all 122 miles of road in operation.

"The portion of the road now finished" says the report "is unsurpassed in real merit by any other of the same length in the west. Between Chicago and Janesville it deviates but very little from an air line for the whole 92 miles; and on the remaining 30 miles in the northern division the curves are very slight, and the grades nowhere upon the route exceed 40 feet to the mile." "At Janesville a connection is made with the Milwaukee and Mississippi Railroad which has within the present month been opened for business to Prairie du Chien; thus making our road part of a *through* route of 227 miles from Chicago to the Mississippi River at that point."

The equipment of the line at this date consisted of 18 locomotives, and cars, viz., 14 passenger, 120 box freight, 138 platform, 50 gravel and 6 baggage; and 8 passenger, 1 baggage, and 40 box freght cars had been ordered.

The unfinished portion of the road between Janesville and La Crosse Junction was in progress and the iron had been purchased. The portion between Janesville and Milton, 8 miles was under contract to be completed by August 1st; that between La Crosse Junction and Watertown 18¼ miles by September 1st; and the remainder between Watertown and Milton by January 1st, 1858. Thus the entire link connecting the southern and northern divisions were now under contract and the work being prosecuted vigorously.

In the spring of 1856, by efforts mainly of this company, a grant of land was obtained by an act of Congress to aid in constructing railroads in Wisconsin and Michigan. The lines provided for in the grant, and specially sought for by this company, were—the one line from Fond du Lac northerly to the State line, and thence diverging through the northern peninsula of Michigan with two termini on Lake Superior, to wit: one at Ontonagon, the general depot and harbor of the copper interests, and the other at Marquette the harbor and depot of the iron interests of those regions, and—the other line from Madison to St. Croix River near St. Paul. These lines specified in the act of Congress, were the precise routes over which this company contemplated building its roads, and were mainly covered by its charter. But the grant for Wisconsin Railroads having been given to the state, as is usual in all such cases, and not directly to this company, the Legislature of the State in October 1856, for reasons not apparent but evidently not from any hostility to this company, thought proper to give the western grant to the La Crosse and Milwaukee Company, then extending their work from Milwaukee; and the eastern grant they gave to a new company of citizens of Wisconsin alone under a new charter, by the name of the Wisconsin and Superior Railroad Company.

The line of this company being the natural continuation of the Chicago, St. Paul and Fond du Lac Railroad, and as the latter company was actually engaged in constructing its line north of Fond du Lac, arrangements were mutually agreed upon for uniting the interests of the two companies.

The result was that under an act of the legislature of Wisconsin passed during the session of 1856–'57, the two companies were consolidated into one corporation on the 5th March, 1857, under the corporate name of the first named company, and thereby the company so consolidated became endowed with all the rights of the original land grant company, as well with its right of the grant of land from Congress over the road from Fond du Lac northerly to the State Line a distance of about 165 miles.

The legislature of Michigan which had the disposal of the lands granted to that state, in aid of railroads, distributed them among several companies. That portion of the grant pertaining to the route from Marquette on Lake Superior to the Wisconsin line was donated to the Lake Superior and State Line Railroad Company, and that portion of the grant extending from Ontonagon to

the Wisconsin line to the Ontonagon and State Line Railroad Company, both companies organized under the general railroad laws of the State.

In accordance with the provisions contained in the said several charters, and also by virtue of special acts of the Wisconsin and Michigan Legislatures authorizing the same, the Chicago, St. Paul and Fond du Lac Company, and the two Michigan Companies were consolidated, the first by articles signed March 15th, and the last named by articles signed March 27th 1857.

The distance from Fond du Lac (where the land grant commences) to the State Line of Michigan is about 165 miles, and from State Line to Marquette about 75, and to Ontonagon about 90 miles, making in all 330 miles of land grant road, upon the most direct and natural route to the copper and iron harbors of Lake Superior. The act of Congress gives every alternate section of land for six miles in width on either side of the road, or in other words for the 330 miles of route no less than 3,840 acres per miles, or in all 1,267,000 acres. Besides this the company has the right of running a road northwesterly to the west end of Lake Superior within the State of Wisconsin to which the grant of land also attaches. This can be done at any time within 10 years from the passage of the act, and if done, will add about 900,000 acres to the lands of the company.

In the meantime while these arrangements were progressing the Chicago, St. Paul and Fond du Lac Company decided to push on northward, and in the winter of 1856–'57 made ready for the superstructure the section between Fond du Lac and Oshkosh a length of 17 miles. The line from Oshkosh to Appleton was surveyed the same season, and the further extension of the line to Green Bay decided upon.

The total cost of construction and equipment to May, 1857, was $5,692,207 64 which sum was raised as follows:

Capital stock, scrip etc	$3,750,100 00
First mortgage bonds	1,503,000 00
Ten year bonds	131,000 00
Two year bonds	175,751 76
Fond du Lac city bonds	5,000 00
Cash advances and outstanding liabilities, etc., etc.	1,619,102 88
	$7,183,954 64
Less available assets on hand, consisting of city bonds, farm mortgage bonds, lands etc., received mainly in payment for stock	1,491,747 00
Total cost of construction and equipment	$5,692,207 64

The whole additional cost of completing the road to Appleton, 40 miles north of Fond du Lac. was at this time estimated at $2,075,025 29. To provide for this outlay as well as to cover the advances above stated and to secure an ample margin for discounts, etc., the resources of the company were:

1st Available assets on hand, as above	$1,491,747
2d First mort. land grant 8 p. c. bonds	3,600,000
Total resources	$5,091,747

The land grant bonds here spoken of were based upon the Congressional grant commencing at Fond du Lac and ending at Appleton or 40 miles north of the first named place. On the completion of this portion of the road the company would be entitled to 230,400 acres of land. The $3,600,000 bonds issued under the mortgage bearing date April 6, 1857, were a first lien on these lands as well as on the road itself and also a second lien on the 178 miles south of Fond du Lac—one half of the existing 1st mortgage bonds, however, to be retired, so that the increased lien on the property would be only $2,100,000. This accomplished, the company's position would be as follows:

Its property 218 miles of road, or including side tracks 240 miles	$7,660,000
230,400 acres of land at $13.50 per acre	3,110,400
Total valuation	$10,770,400
1st mortgage bonds	5,100,000
Excess of value over lien	$5,670,400

"These bonds," says the report, "bear interest at the rate of 8 per cent. per annum, and have twenty-five years to run, being dated 1st of May, 1857, and payable 1st of May, 1882. The coupons are payable in New York 1st of May and 1st of November in each year." The mortgage itself provided for an issue of $12,000,000, but $3,600,000 only to be issued at this time.

The earnings of the road while in course of construction to Janesville, were for the first eight months of 1856, $166,199 98. The road was opened to Janesville in September, and the earnings on that portion of the line for the next eight months, or to the end of April, 1857, were $288,048 33. The operating expenses were estimated at less than 50 per cent. of the gross earnings.

The financial crisis of the fall and winter of 1857 brought grief to this among many other western companies. During its existence the company became indebted to employees and others, and the earnings of the road (sadly fallen off from the promise of the last report,) had been applied to the liquidation of their claims only. This was an unforeseen difficulty, and as a matter of course money for construction had to be procured from other sources. By the terms of the land grant the 17 miles of road between Fond du Lac and Oshkosh were to be completed by the 1st of August, or the lands be forfeited. Only $50,000 were required to finish this section, and even this could not be raised. In this emergency the bondholders met in New York on the 11th of February, 1858, to devise measures to accomplish the end desired. The result was a recommendation that the first bondholders ought to supply the needful means, and a committee of three was appointed to solicit their consent to allow the earnings of the road to be applied to construction until completed. This we believe was complied with, and the road was opened for travel in due time and the land grant saved from forfeiture.

The condition of the company, however, continued to get worse and worse. Every interest of the country, indeed, was involved in trouble during the next year; and early in 1859 a re-organization of the company was determined upon. Meetings of the creditors and stockholders were held in New York on the 17th and 22d of February, 1859. At the first meeting a resolution was adopted, appointing a committee of twelve, (three from each class of bondholders, three from the unsecured creditors, and three from the stockholders,) to devise and with the least practical delay, report a plan for extricating the enterprise from its embarrassments and for the prosecution of it to final completion to a point 40 miles north of Fond du Lac in season for the fall business. This committee reported at the adjourned meeting which assembled on the 22d, that the liabilities of the company were substantially as follows:

1st mortgage 7 per cent. bonds		$3,000,000
Unpaid coupons due Feb. 1, '59	$432,180	
Add coupons to Aug. 1, 1860	315,000	
		747,180
Total 1st mortgage, 1st Aug., 1860		$3,747,180
2d mortgage (land grant) 8 per ct. b'ds		3,000,000
Add coupons due up to, and including Nov. 1, 1860		406,000
		$3,840,000
Real estate 8 per cent. bonds $350,000, and interest		406,000
Builders' and tax lien on engines		80,000
Debt to Winslow, Lanier & Co		150,000
		$8,223,180
To this add the balance of the general debt, which may be found due after deducting and applying the securities, or the avails of them pledged for the payment of portions of this debt. The aggregate amount of debt so outstanding, including bills payable, ten year bonds, Fond du Lac City bonds and sums due on the line of the road etc.	*about*	$2,500,000
Less securities applicable to the payment of this sum	1,250,000	
		1,250,000
Total		$9,473,180
Or exclusive of the capital stock	*about*	4,250,000

To finish the road from Janesville to La Crosse Junction, there was also required an additional sum of $600,000, and to discharge the Winslow debt and other liens $230,000—in all, say $830,000, to pay which the company had no resources, either from earnings or otherwise. Nothing, indeed, remained to save the property from ruin, but the adoption of prompt measures, and a reasonable reliance on the forbearance of the company's creditors. The precise method of solving the difficulty was left to the friends of the road, but the committee had agreed to recommend the following:

1st. The foreclosure of the two existing mortgages, the property to be purchased by the agents of subscribing bondholders, and the reorganization of the company to be effected on the following basis:

a. An issue of coupon 30 year sinking fund bonds to the amount of $4,500,000 at 7 per cent., secured on the entire road from Chicago to a point 20 miles north of Fond du Lac to pay the 7 per cent. coupon bonds and past due coupons thereon up to, and inclusive of August 1, 1860, the balance to the extent of $1,000,000 to be applied to the payment of the Winslow and other liens, except to the amount of $600,000 to be set apart to the cost of the division between Janesville and the La Crosse Junction, and of the road to a point 20 miles north of Fond du Lac.

b. The land grant 8 per cent. bonds $3,000,000, with coupons at 8 per cent. from 1st of January, 1857, to be provided for as follows: The land which secures these covers 153,600 acres, and this shall be vested in the land grant bondholders in the extinguishment of $1,000,000 of the principal, and all the coupons on the whole issue of $3,000,000, up to November 1st, 1860. For the balance

the company to pay $2,000,000 in coupon 6 per cent. bonds, interest semi-annually after November 1st, 1860, and secured by a second mortgage on the entire road from Chicago to a point 20 miles north of Fond du Lac.

c. The general and unsecured debts outstanding to be liquidated in the common stock at 75 per cent. on the amount including interest due.

d. The stockholders to receive 60 per cent. in a new issue of stock.

Bondholders of both classes were also required to advance ten per cent. in cash on the face of their holdings, for which they were to take at par —the 1st bondholders, 1st sinking fund bonds, part of the issue of $4,500,000, and the land grant bondholders 1st mortgage bonds. Those not coming in within 60 days after the 1st of March, to be excluded from the benefits of the arrangement, and to receive only their *pro rata* of the sum for which the property might be sold; and in case of inability or unwillingness to pay the 10 per cent., then the first five coupons due or to become due to be surrendered.

This arrangement was virtually carried out. On the 2d of June, 1859, the Ch. S. P. and Fond du Lac Railroad and property, lands and effects of the company were all sold under foreclosure of the 1st and 2d mortgages, and the entire title passed by these sales to Samuel J. Tilden and O. D. Ashley of New York, duly authorized purchasing agents of the bondholders under an agreement bearing date, March 16, 1859.

On the 7th of June same year a new corporation was duly and legally organized in pursuance of special and general laws of Illinois, Wisconsin and Michigan, under the name and style of the

CHICAGO AND NORTHWESTERN RAILWAY CO.;

and the said purchasing agents thereupon duly conveyed over to the said company, the said railroad so sold and purchased by them together with all its lands, property and effects whatever.

On the 10th of June following the company let the contracts for the grading, bridging, superstructure and track laying of the unfinished road between Janesville and La Crosse (now Minnesota,) Junction, and proceeded at once to purchase iron for the same, and to obtain the necessary right of way.

About the 1st of July the contractors commenced work on the road, and on the 6th of October following, the company ran a train over the entire road from Chicago to the city of Oshkosh about 194 miles.

According to the 1st report of the company, the moneys subscribed by the bondholders for the completion of the road, viz., 10 per cent. upon all their bonds had all been collected except about $9,000.

Within the year last past several new connections and running arrangements had been made. The Kenosha, Rockford and Rock Island Railroad had been completed to Rockford, and the Racine and Mississippi Railroad extended to Freeport, and *via* the Illinois Central Railroad to Dubuque; the Milwaukee, Watertown and Baraboo Valley, and the Milwaukee and Horicon Railroads had been tapped, etc. The extension of the road to Neenah, Menasha, Appleton and Green Bay was now called for, and the right of way obtained from the people living on the proposed line, chiefly by free grant.

The 2d report of the company brings its history up to 1st of April, 1861. By this time the extension of the road north was in operation to Neenah, 12 miles from Oshkosh, and the track laid nearly to Appleton. For the construction of this extension (the Appleton,) bonds to the amount of $8,000 per mile were issued, and $30,000 of the earnings of the line used. Large sums from earnings had also been expended on equipment, etc. These circumstances taken in connection with the alarming changes in the political condition and prospects of the country, caused by the approaching rebellion and the consequent serious derangements of monetary and business affairs, made it impossible for the company to obtain money wherewith to pay the coupons on its general first mortgage bonds due February 1.

This inability to pay interest on the general first mortgage bonds was notified by circular dated January 21st, and a meeting of the bondholders called for the 11th of April. At the meeting then held the affairs of the company were fully stated by the directors, and a committee of nine appointed "to take into consideration the report of the directors presented to the meeting, and to report thereon on the 16th." At the adjourned meeting the committee reported that the best plan to meet the existing difficulty would be to fund the coupons falling due until the road should be completed and other obligations discharge. But it was not until the meeting held on the 12th of July, that any decision was come to when the committee recommended the funding of five coupons in 7 per cent. bonds to run 15 years, secured by a sinking fund of 2 per cent. per annum to commence November, 1862. This recommendation was carried into effect by a resolution approved at a subsequent meeting held July 18, but was so altered as to embrace six coupons and extend the time for the commencement of the sinking fund to November, 1863. The bonds issued for the coupons surrendered are known in the market as "Interest Bonds," or "Coupon Bonds," and the general first mortgage bonds with the coupons cut off to August 1, 1864, are known as "Assented Bonds."

At the same meeting (July 18,) the bondholders authorized the extension of the road to Green Bay, and provided an issue of bonds not exceeding $12,000 per mile. This was completed in November 1862, and thus the whole line between Chicago and Green Bay, was finally brought into use.

For more detailed statements regarding the affairs of this company, we must refer the reader to former numbers of the JOURNAL, and especially to the volumes for 1860, p. 771; for 1861, pp. 642 and 746; for 1862, pp. 666 and 828; and for 1863, p. 758.

"Within the past year," says the fourth annual report, "the Peninsula Railroad Company has been organized for the construction of a railroad from Little Bay de Noquet on Green Bay across the upper peninsula of Michigan about 50 miles to the great iron mines of that region and to Lake Superior at Marquette, and looking in the future to an extension to the copper regions not far distant.

"Many of the parties interested in the Peninsula Railroad are also interested in the Chicago and Northwestern Railway, and the two are likely to co-operate in harmony and with a unity of interests.

"Steamboats will carry freight and passengers between Green Bay and Little Bay de Noquet; and the trip from Chicago to Lake Superior when these arrangements are carried into effect will be made in 24 hours. The distance to be traversed by steamboat is about 120 miles, making the distance from Chicago to Marquette 410 miles.

"The completion of the Peninsula Railroad, will it is believed add largely to the earnings of the Chicago and Northwestern Railway in both passengers and freight."

Another contemplated improvement by this company, or by a separate organization is the construction of a new line from Janesville *via* Madison to the Mississippi at a point some 26 miles above La Crosse, and in a substantially direct line of extension of the present road from Chicago to Janesville. The route (surveyed in the fall of 1862,) was found to be an entirely feasible one, much of the way through a fine productive settled country, and terminating at one of the most important towns for business, and especially for the receipt of produce on the upper Mississippi. The distance from Janesville by this route is 190 miles.

With regard to the extension of the land grant lines northward nothing definite has been decided upon; but it is not to be doubted, but that the company will at the proper time direct its energies to the successful accomplishment of the scheme.

The views of the company, however, do not appear from recent disclosures to be very contracted. The aim of the management seems to be expansive, and as development proceeds the guiding minds of the company, follow in the wake. In the *Herald* of the 14th ult., we find the following which fully corroborates the above statement, but for the truthfulness of which we are unable to vouch: "The St. Paul and Pacific Railroad has made a very advantageous change of base. Under the legislation amending its charter it has consolidated with the Chicago and Northwestern Railway, and the St. Paul and Winona Railroad; and the Northwestern is to be continued *via* Winona to St. Paul making almost an air-line to Chicago. Twenty miles are to be completed from St. Paul to Hastings the present year. The amended charter authorizing it to issue special stock for the building of different portions of the road, and authorizing the stockholders to form separate organizations, they have issued special stock for the division from St. Paul to Watah, 100 miles north, and organized what is called the first division of the St. Paul and Pacific Railroad.

The only other matter of interest of recent occurrence, is the exchanging of the 2d mortgage 6 per cent. bonds into a 7 per cent. preferred stock—thus reducing the mortgage liens by $2,000,000.

The earnings of the road are increasing rapidly, and if affairs are properly managed the future prosperity of the company is secured. Those desiring the figures will find them for each month of 1859, '60, 61, '62, '63 and '64, on page 233 of our present issue.

The Nassau Bank, N. Y., will purchase at a premium the bonds of Muskingam County, and the City of Zanesville, O.

Railroad Earnings--Monthly.

The business of the Philadelphia and Reading Railroad Company for the month of January, 1864, compared with the corresponding month of 1863:

	1864.	1863.
Received from coal	$311,576 24	$239,689 78
" merchandise.	62,816 57	55,991 70
" travel, etc...	62,348 64	40,053 59
Total	$436,741 45	$335,685 07
Transportat'n, roadway, dumpage, renewal fund, and all charges.	246,357 81	202,345 16
Net profit for the month.	$190,383 64	$133,339 91
" for previous month.	251,327 08	258,363 67
Total net profit 2 mos..	$441,710 72	$391,703 58

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending February 13, 1864, were:

Passengers	$21,071 59
Express freight, mails and sundries	2,500 00
Freight and live stock	69,770 49
Total	$93,342 08
Corresponding week, 1863	90,197 79
Increase	$3,144 29

The traffic of the Great Western Railroad for the week ending February 19, 1864, was as follows:

Passengers	$16,649 66
Freight and live stock	44,985 98
Mails and sundries	1,207 16
Total	$62,842 80
Corresponding week of 1863	72,562 58
Decrease	$9,719 78

The earnings of the Montreal and Champlain Railroad for the week ending Feb. 13, 1864, were:

Passengers	$1,169 97
Mails and sundries	188 00
Freight and Live Stock	1,889 98
Ferries	89 46
Total	$3,337 41
Corresponding week, 1863	2,795 41
Increase	$542 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week in February, were:

	1864.	1863.
Passengers	$7,044 43	$2,968 14
Freight	9,261 74	7,248 29
Mail, express & telegraph	937 58	863 04
Total	$17,243 75	$11,079 47
This month to date	51,781 82	37,233 49

The earnings of the Chicago and Alton Railroad Company for the week ending Feb., 23, were:

	1864.	1863.
Passengers	$16,367 15	$12,849 97
Freight	19,188 71	18,396 54
Sundries	2,791 23	1,072 01
Total	$38,347 09	$32,318 43
Increase 1864		$6,028 66

The earnings of the Milwaukee and Prairie du Chien Railroad for the week ending Feb., 21, 1864, were $24,122 00
Corresponding week of previous year.. 19,949 00
Increase $4,173 00

—The receipts from the 1st of January to the 21st of February were $181,897, against $125,836 during the same time last year.

The earnings of the Galena and Chicago Union Railroad for the week ending February 22, were:

	1863.	1864.
Freight	$21,144 52	$23,927 14
Passengers	7,281 82	10,314 81
Mails, &c	1,100 00	1,300 00
Total	$29,526 34	$35,541 95
Increase 1864		$6,015 61

The earnings of the Chicago and Rock Island Railroad for the 3d week in February, 1864, were $37,798 00
Corresponding week of previous year.. 36,663 00
Increase $1,135 00

The earnings of the Chicago and Northwestern Railroad for the 3d week in February, 1864, were $24,845 00
Corresponding week of previous year.. 21,832 86
Increase $3,012 14

The earnings of the Michigan Central Railroad for the 3d week in Feb., 1864 were $64,584 00
Corresponding week of previous year.. 63,156 00
Increase $1,428 00

Foreign Commerce of the United States.

The *Journal of Commerce* gives a revised statement of the foreign commerce of the United States for the year ending June 30, 1863, as follows:

IMPORTS.

Dutiable merchandise		$208,093,944
Free merchandise		35,166,359
Specie and bullion		9,675,569
Total imports for the year		$252,935,872

EXPORTS.

Domestic produce other than specie		$249,891,436
Foreign dut. mdse	$12,581,031.	
Foreign free mdse	5,215,169	
		17,796,200
Domestic specie & bullion.	$55,993,562	
Foreign specie & bullion.	8,163,049	
		64,156,611
		$331,844,247

The following is a comparative statement for five years, the value of imports being given according to the foreign cost in specie, and the value of exports (except specie) in currency:

	EXPORTS. Domestic produce.	Foreign produce.	Specie and bullion.	Total expt's.	IMPORTS. Dutiable.	Free goods.	Specie and Bullion.	Total Impt's.
1859	278,892,080	14,509,971	63,887,411	357,289,462	259,047,014	72,286,327	7,484,789	338,768,130
1860	316,842,422	17,333,634	66,546,239	400,122,296	279,874,640	73,741,479	8,550,135	362,166,254
1861	359,920,311	15,504,217	29,791,080	404,765,668	234,606,573	75,204,969	46,339,611	356,150,153
1862	181,875,988	11,027,236	36,986,956	229,790,280	185,683,123	52,721,648	16,415,052	205,819,828
1863	249,891,436	17,796,200	64,156,611	331,844,247	208,093,944	35,166,359	9,675,569	252,935,872

☞ The Boston, Hartford and Erie Railroad Company have petitioned the General Assembly of Rhode Island for permission to extend their road from its present terminus in Providence to Woonsocket.

The Reciprocity Treaty.

The Detroit *Free Press* gives the following statement of trade between Canada and the United States, carefully prepared from the Canadian volumes on trade and navigation. The tables are both for free trade and goods paying a duty, for the years 1855 to 1862, both inclusive, and they show many interesting facts deserving the careful attention of all our citizens. The total balance of trade in our favor in all goods coming and going is $35,554,836 on manufactured goods, &c.; the balance of trade in our favor is the large sum of $72,266,224. But on free goods the balance of trade is in favor of Canada to the amount of $36,711,388.

IMPORTS INTO CANADA FROM THE UNITED STATES.

	Goods paying duty.	Free Goods.	Total.
1855	$11,449,472	$9,379,204	$20,828,676
1856	12,770,924	9,933,584	22,704,508
1857	9,966,428	10,268,220	20,224,648
1858	8,473,607	7,161,958	15,635,565
1859	9,032,861	8,556,545	17,589,406
1860	8,526,230	8,740,485	17,266,715
1861	8,338,620	11,859,447	20,198,067
1862	6,122,171	16,514,077	22,636,248
Total	$74,680,313	$82,403,520	$157,083,833

EXPORTS FROM CANADA INTO THE UNITED STATES.

	Manufactures, &c.	Free Goods.	Total.
1855	$229,164	$16,508,112	$16,737,276
1856	198,212	17,781,540	17,979,752

American Railroad Journal.

Saturday, March 5, 1864.

Stock Exchange and Money Market.

One of the anomalies of the hour, considering the large amount of United States currency afloat, is, that there are not small bills in quantities enough to meet the daily expenses of the Government. At the Brooklyn Navy Yard, the paymaster has his safe full of $500 and $1,000 notes, but is unable, or was at the last accounts, unable to pay off the men for want of small bills. He found it impossible to get them either from the Treasury or by exchange with the local banks. What has become of the millions of small notes hitherto issued by the Treasury? Are they hoarded like gold, or are they passing from hand to hand to perform the functions of business, and cannot be spared?

Even the banks continue to pay a premium for them. Indeed were it not for the rise in gold we would scarcely know that our currency is inflated

We go by rule and dogma in this as we do in most things, not always regarding this axiom, that circumstances frequently alter cases.

This question of gold is not yet settled in Congress, nor in the street. We are of opinion now, as we were a year ago, that it may be carried up to 200, if the combination persist in inflating the price. The demand is principally owing to the necessity of its use at the Custom House. In other words, the Government causes the greater part of the demand. Importers may and do remit products of various kinds. Every bushel of wheat sent abroad produces a gold dollar in return at least, but wheat will not pass at the Custom House for duties. Now it appears to us as plain as day, that the rise in the article being largely owing to the Government, it is the duty of the Government to check that rise by some modification of its power. It is a common office of the State to interfere with what is called free trade, when the public safety or interest requires it. No one thinks it strange that the British Government recently prohibited the exportation of saltpetre. No one believed that our embargo and non-intercourse laws were not within the rightful authority of Congress. So in this case of gold, we cannot doubt but the power which in great part creates the scarcity, may alleviate the evil consequences. There is a necessity for some sort of action in this matter, for the people of the North and West are beginning to pay the most extravagant prices for articles of necessity, because gold is rising in price. The taxes we are paying are light and bearable in comparison with the profits we are charged on the necessaries of life; each rise in gold being made an excuse for further demands. This is the evil against which we wish to provide, and to control which the Government should, if it can, interfere.

We repeat it, it is not taxation which is likely to oppress us, but it is the cost of living, and this is attributable but to a single cause. In 1863 we saw gold at 171, and it afterwards fell to 122. This was a sensible relief to the community. We imagine, if the Secretary of the Treasury now placed upon the market his surplus coin from time to time, there would be a fall as great as there was in 1863. We have seen within the last two weeks a decline of several per cent, on the mere publication of Mr. Chase's letter, and great hesitation and doubt in the street among the operators since, on the mere prospect of his views being carried out.

If the mere rumor of the measure has had a good result, what would not the measure itself effect. We are for making the trial, and if it fails, the Government will have replenished the Treasury by the premium gained. If it sold twelve millions it will have made six millions profit, and we shall be where we were before. It is understood, that Mr. Stebbins of this city, is to speak on the question when it comes fairly before the House, and we shall look for his opinions with much interest. If any Member of Congress understands the question, he certainly does. It is admitted on all hands that cash gold is scarce, and this may be a present reason for its advance; make it plentiful and it must certainly fall.

The National Banks continue to increase. They have great advantages over the local institutions, which latter, if they consult their interest will finally adopt the principle. The deposits in the associated banks of this city increased in one week, ending February 22d, $6,860,953, the total balance that day being $154,875,059. Their total capital is but $60,000,000, their specie $22,301,-687, and their circulation $5,907,851. The aggregate of the clearances between these institutions amounted for the week ending February 20, $514,-887,411 20, and for the week ending the 27th, $575,442,304 22, making a total of $1,090,329,715 42. This enormous sum is the result of but half a month's business of these associated banks; it reveals the extent of the financial operations of the regular bank dealers in this city alone, and certainly accustoms us to the use of large sums, and shows us how easily they may be disposed of without convulsion.

We are particular to notice this circumstance, because we think it is suggestive of a method by which taxation may be enlarged with great justice and good effect. Most of the heavy taxes we now encounter are laid upon manufacture and production. This is a charge on industry as well as capital. Now we imagine if the transfers of property were more relied upon for revenues we should realise larger sums and with less difficulty. In every business transaction the seller and buyer are both supposed to be benefited. Both ordinarily claim a profit. It is this profit in transitu which we would tax, as neither party would feel it. The purchaser who has by the transfer of real estate to himself made one, two, three or four thousand dollars, certainly could not be much injured by a per cent charge on the amount, which would be only a tax on his gains in the transaction. So in ordinary business sales of even the commonest articles, there is a supposed profit on both sides, and this would better bear a tax, than the manufacture on hand and unsold. We are aware this principle obtains already in our system of internal revenue, but we would carry it out still further, applying it to the various forms of these transactions, and the very papers which represent them.

So too devises, legacies, estates intestate, all passing to parties benefitted by them, which benefit is obtained under the protection of the law, should be called upon to contribute to the public wants, precisely as they are in England. A legatee who has not earned his estate, might very well be called on to pay a duty. We also believe that the stamp duties might be largely increased with good results. Men who borrow money and get it, are of all men the readiest to pay for the accommodation, and rarely feel it.

The balance on hand at the assistant Treasurer's office on the 1st Feb., was $34,960,499 19. The total receipts from all sources for the month of January last were almost incredible.

RECEIPTS.

Feb. 1, 1864, by balance, Cr.		$14,971,316 72
Receipts on account—		
Customs	$7,483,511 15	
Loans	15,686,350 59	
Internal Revenue	1,435,578 66	
Transfers	21,370,000 00	
Patent Fees	6,099 50	
Miscellaneous	6,739,749 37	
Post-Office Dep't	398,989 43	
		$53,130,278 90

In other words the receipts from all sources as named were at the rate of $636,000,000 per annum, and though fifteen millions were from loans, and twenty one from transfers, probably from other offices, yet the fact is conclusive as to the financial power of the Government, and its ability to master and control large sums. Let our custom receipts be increased one-half, and our internal revenue be doubled as it may be, by placing government lines of steamers on the Ocean, as recommended by the Secretary of the Navy, and the New York Chamber of Commerce, and by increasing taxation on the current transactions of business, and there will not be the least difficulty in paying not only the interest of our debt in gold, but in creating a sinking fund which in twenty years will wipe out the principal. As we have again and again said, the present national debt as compared with the magnitude of the war and its objects, is a small one. It is as yet (legal tender currency bearing no interest, included) but about sixteen hundred millions of dollars, and with proper energy and skill in pursuing up our military advantages irrespective of political manœuvres and personal views, the war may be closed and the debt kept very near its present condition. But if politics are to be the sole business of our Statesmen, the best natured and the most patriotic, and self-denying people in the world will have been abused and betrayed.

It would be a most unhappy circumstance, if personal ambition or actual imbecility should cause any further unnecessary expenditures. The generous support of the North is not given to men but to the cause.

The money market continues easy on good short paper, the quotation being 5 per cent. There is a fair demand for the 5 20's at 107¼ for account of foreign orders. Treasury certificates bring 99⅞. Exchange for the Boston steamer closed at 174¼, City Bank shares are held at a fair advance. The aggregate of the week's exports exclusive of specie was $3,596,520. Government securities continue firm at full prices, and are not offered in large amounts. There is the same scarcity in Border states and railway mortgages. Mining stocks are growing in favor. It is perceived that our copper, iron and lead mines are likely to pay large profits, since these metals are in as much demand as gold itself. The news from Europe is of a mixed character. It comes to us chiefly from English channels, and takes its color from the anxieties for peace, which there are evidently very great. But the last accounts from Denmark, and from Duppel, where the Danes were more successful, confirm us in the opinion that the war question is still in great doubt.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Hannibal and St. Joseph R. R. 20; do., pref., 45; Ohio and Mississippi pref. certificates, 85; Stonington R. R., 122; Buf., N. Y. and Erie 2d mort., 100; N. Y. Central Real Estate bonds, 104; At. & Gt. Western (Ohio div.) 1st mort., 97; North Carolina 6s, 60; Indiana, 5s, 85; do., 2⅛s, 62½; Illinois War Loan, 101½; Kentucky 6s, 101; Sixth Avenue R. R., 145; Quartz Hill Mining Co., 14¼; Central Coal, 73½; Wyoming Valley Coal 82½; Copake Iron 11¾; Lancaster Lead, 2; Bucks Co. Lead, 1; Canada Copper, 7½; Sandy River Coal and Oil Co. 1st mort., 91¼; Shoe and Leather Bank, 110; Merchants' Ex. Bank, 98; Continental Bank, 102;

St. Nicholas Bank, 101; Am. Ex. Bank, 110; Merchants' Bank, 106; Bank of Commerce, 107¾; Mechanics Banking Ass., 100; Irving Bank, 101½; Metropolitan Bank, 114; Continental Bank, 102½; Park Bank, 132; Butchers' and Drovers' Bank, 125.

Philadelphia.—Allegheny Valley R. R. 7s, 105; Camden and Atlantic, 17; do., pref., 25; do., 1st mort., 97¼; Elmira Chattle 5s, 78; Cleveland and Mahoning 1st mort., 104; Chester Valley, 6; Camden and Amboy mort. 6s, 108; Pittsburg 6s, 81½; Union Canal 3⅞; do., Int. bonds, 27; Huntington and Broad Top, 22½; do., 1st mort., 103; Penn. 6s, War Loan, 107⅛; Penn. R. R. div. stock, 65; West Branch Canal, 105; Ridge Avenue R. R., 20½ West Phila., 72½; Girard College, 30½; 13th and 15th streets, 42; 17th and 19th streets, 183¾; Hazleton Coal, 68; Buck Mountain, 32½; Big Mountain, 9⅝; Green Mountain, 7⅛; Fulton 7⅛; N. Y. and Middle Coal Field, 12½; Penn. Mining Co., 10⅛; Girard Mining, 6¼; Oil Creek, 14; Broad Top, semi-anthracite 12; Lehigh Zinc, 70; Mandan, 6⅝; Marquette, 5; Mech. Bank, 28½; Southwark Bank, 101½; City Bank, 55; Girard Bank, 46½; Western Bank, 72; Corn Exchange Bank, 37; Farmers' and Mechanics' Bank, 59. The latest quotations are: City 6s, 102¾@103, do., new, 107@107½; State 5s, 97@97½; do., coupon, 100@100; ½ do., 6s, 1879, 102¾@103; Phila., Wil. and Balt., 66@68½; Reading, 66@66⅓; do., 6s, 1870, 106@106½; do., 1886, 132@132⅛; Camden and Amboy, 173@175; Pennsylvania R. The Public Lands.

In our character of journalists devoted to facts, we are often obliged to correct the misapprehensions of the public on statistical subjects; for false premises are the cause of most of the disorders of finance and philosophy.

A letter has been extensively republished in relation to our public lands, or as we may proudly term them, our National domain, in which the quantities remaining unsold, and the propriety of a repeal of the present Homestead law are stated, with the augument appended, that by their future sales we might nearly discharge the National debt. The writer of that letter estimates the amount of these public lands remaining as public property to be as follows:

States.	Acres.
In Ohio	745,000
Indiana	2,751,000
Illinois	14,060,000
Missouri	29,216,000
Alabama	17,238,000
Mississippi	24,308,000
Louisiana	22,854,000
Michigan	24,864,000
Arkansas	27,402,000
Florida	31,801,000
Iowa	27,153,000
Wisconsin	26,321,000
Minnesota	56,000,000
Northwest Territory	376,000,000
Oregon Territory	218,536,000
Nebraska Territory	87,488,000
Indian Territory	119,789,000
California and Utah	287,162,000
New Mexico	49,727,000
	1,423,415,000

These figures are pronounced by a Western co temporary, well informed on this and kindred subjects, to be erroneous. In Ohio there are not 10,000 Government lands unsold, and not an acre of these saleable at any price. In Illinois there are not 25,000 acres of these public lands unsold. In Indiana the amount named is entirely beyond the actual fact. The people there would like to know where these millions of acres are situated. In Iowa the quantity is not three fourths of that stated. In Missouri not a fifth. Not a tenth in Mississippi, Louisiana or Alabama. Not a fourth in Arkansas, Michigan, Wisconsin or Minnesota, and not one half in Florida. A great part of this land will never bring ten cents an acre. So the statement in regard to Oregon is equally incorrect. Instead of two hundred and eighteen millions of lands in Oregon fit for settlement, there are not twenty millions. In fact the whole amount of surveyed lands in September, 1860, was 440,960,040, from which large grants, bounties and railway concessions were yet to be deducted. To give up our present tariff, and internal revenue system, and to rely on the sale of public land

would be the height of folly, and lead to bankruptcy and repudiation.

The policy of such a measure may be questioned on other grounds. The best of the public lands would be purchased by speculators. So that persons of small means would be obliged to purchase poor lands, or become practically the bondsmen and serfs of rich non-resident proprietors.

It is a fact well known in this state, that wherever large tracts of lands had been thus held by such proprietors, their settlement has gone on slowly. The plan, from the very nature of things, converts freehold settlers into poor dependent tenants. Now as long as the emigrant, whether a native or foreigner, can get good land without paying a large profit to the forestalling speculator, we may be certain of increasing emigration, population and production. These are the elements of our western growth. It appears that up to September 30, 1861, the whole quantity of public lands heretofore sold for cash, was 152,141,052 acres, and 247,245,102 had been disposed of on private claims, bounty land warrants, railroad and swamp land grants, &c.

This is the result thus far, of all the sales. It is not probable that the sales in the future would be in a much greater ratio, until the Pacific Railroad and its branches were completed. The annual amount of sales could not be very large, not as much per annum, as can be raised out of an ordinary whiskey tax. Besides we want men, we want workers and diggers in our soil. If we give them a homestead, they give us back the products of the soil for consumption and commerce, for transportation foreign and domestic; they build villages, towns and cities; they pay taxes; increasing in ability with agricultural improvement, we extend our political and financial power, and maintain our stability and unity. These are the views which thinking men take of the public lands, and their real value in the end. In the last report of Mr. Edmunds, Commissioner of the land office, he states that it is "the design of Congress not to look to the public lands as a source of direct revenue, but rather by encouraging actual settlement, and important works of internal improvement, to quicken the settlement of the Country, and by increasing individual wealth, *secure national riches and prosperity.*"

Interference with Railroad Franchise.

A question of great practical importance to the interests of railroad corporations was recently decided in the Supreme Court, in an action brought by the New York and Harlem Railroad Company against the Forty-second street and Grand street Ferry Railroad Company. The defendants had made preparations to connect their railroad tracks on Twenty-third and Fourteenth streets by running a double track on Fourth Avenue. The plaintiffs had for years been in the enjoyment of a railroad franchise in the Fourth Avenue for a double track; the defendants proposed to lay one track on each side of the plaintiffs' road, leaving a space of twelve feet between the defendants' track and the curb. The plaintiffs claimed an exclusive right to the use of Fourth Avenue for railroad purposes under an agreement with the City of New York, which was the owner in fee of the soil of Fourth Avenue subject to the use of the public for a highway.

The plaintiffs obtained an injunction against the defendants' proceedings, which the defendants moved to dissolve. The case was heard before Mr. Justice Peckham of Albany, and he, after a consideration of the points raised by counsel, granted the motion. The following extract from the opinion, omitting technical questions, shows his view of the law applicable to the case:

The case must turn on the one question, whether the running by the defendant of a track on either side of the plaintiff's track is such an actual taking of the actual property of plaintiff, as cannot be done without compensation; for though there may be some question whether the crossing of plaintiff's track would not be such a taking as would require compensation, yet no such question is raised by the bill and answer, or the papers on this motion.

There is very little force I think in the objection, that it is proposed to lay defendant's tracks so near to plaintiff's as to injure or practically interfere with its running. The track proposed is the same distance from plaintiff's track, that plaintiff's tracks are from each other, viz: five feet. The interest which the plaintiff has in Fourth Avenue is a right of way; its franchise consists in its right to lay and use exclusively a railroad, subject to the duty of running public cars thereon. It has no control or interest whatever in that part of Fourth Avenue not occupied by its own road, except that common to the rest of the community, *i. e.*, that it shall be kept free and clear for public use.

All and any persons have a right to pass along said street.

They cannot stop and obstruct it. The crowd of passers may be so great as in itself to be an obstruction, yet so long as it is a moving crowd, whether of individuals or vehicles of any description, it is a legal use of the street.

Were the defendants then about to run any number of omnibuses or other ordinary wheeled vehicles the plaintiff could not complain. The injury to its road might be as great or even greater than that which may accrue from the proposed action of the defendants, and yet so long as their action was not malicious it cannot be pretended that the plaintiff would require a right to complain.

This shows that the consequence of which the plaintiff complains, *i. e.*, difficulty of access to its cars may exist and the plaintiff have no cause of action; in other words, the fact may exist and be no wrong, can it then be claimed that that which if caused by one means is not wrong, becomes a wrong on being effected by another means. The use of a city street by a railroad for running public cars has been decided to be a public use, the exclusive right to the track being controlled by the public right to the cars, that being as the running of the defendant's cars would be but an exercise by the public of the public right of way.

The cars were not run unless in obedience to the public wants, for otherwise they would not pay. Should they do so for the mere sake of malicious annoyance to the plaintiff other questions would arise.

If then after the running of the plaintiff's road, the public retained a right to the use of the rest of the street as a public street, and for public use, and if this proposed use by the defendants be as has been decided a public use, the plaintiff has suffered no infringement of its rights or property, and the injunction must be dissolved.

Tolls, Trade and Tonnage of the Canals.

From the Annual Report of the Auditor of the Canal Department on the tolls, trade and tonnage of the canals this State during the season of navigation in 1863, presented to the Assembly on the 15th ult., it appears that the whole amount of tolls received is $4,645,207, which is composed as follows:

Tolls on boats and passengers	$242,848
" on products of the forest	715,059
" on products of animals	89,426
" on products of vegetable food	3,012,823
" on other agricultural products	4,194
" on manufactures	137,017
" on merchandise	137,253
" on other articles	307,087
Total	$4,645,207

The whole amount of tonnage arrived at tide water by way of the Erie Canal from Western States and Canada, was 2,279,252 tons.

The whole amount of tonnage, the product of the State, was 368,437 tons.

Barrels of flour arriving	1,603,065
Bushels of wheat, 22,386,433, which, turned in flour, calculating five bushels to the barrel, would make	4,467,287
Total	6,070,352

Total number of bushels of corn arriving, 19,918,464.

Whole number of boats registered during the last year, 771, of the tonnage of 119,170.

Comparing the season of 1862 with that of 1863, shows a decrease in revenue of $543,736, and a decrease in tonnage of 41,093.

The whole amount of tonnage transported on the canals during the past season, ascending and descending, was 5,557,692. The value of such tonnage was as follows:

Product of the forest	$13,421,909
Product of animals	15,257,555
Vegetable food	84,866,206
Other agricultural products	966,750
Manufacture	13,041,051
Merchandise	91,417,513
Other articles	21,072,477
Total	$240,046,461

The total number of tons carried one mile during the last season was $1,034,130,023.

In flour and wheat there has been a decrease in tonnage the past year of 348,643, and a decrease in tolls of $620,488. In corn and oats there has been an increase of 13,571 tons, and a decrease in tolls of $82,551.

Whole number of bushels of barley transported over the canals in 1862, was	2,764,916
In 1863	3,816,458
Increase	1,051,542
The number of bushels which arrived at tide water in 1862, was	2,562,659
In 1863	3,263,792
Increase	701,133
Amount of tolls received on barley and barley malt in 1862, was	66,760
In 1863	100,440
Increase	33,680

Comparing the traffic in tolls of 1863 with 1862, there has been a decrease in the shipments of corn of 138,287 tons, and a decrease in tolls of $221,476

Making a like comparison in the shipment of oats, and there was an increase of 151,852 tons and an increase of $188,925 in tolls.

Cleveland, Columbus and Cincinnati R. R.

The following is the statement of this company for the year ending December 31, 1863:

Earnings for the year 1863		$2,145,030 22
Expenses for eleven months ending November 30	$861,735 45	
December expenses (not fully paid,) estimated.	100,000 00	
		$961,785 45
Net earnings for the year		$1,183,294 77
There has also been expended during the year, for new depots, machine shops and engine houses, and additional depot grounds and tracks		163,575 00
New and additional cars and engines		102,170 00
Woodlands		23,000 00
Indorsed Columbus, Piqua and Indiana Railroad bonds taken up		61,000 00
Bellefontaine and Indiana Railroad stock purchased		201,994 00
		$551,739 00
Add cash dividend paid August 1, 1863, 6 per cent.	$300,000 00	
Add cash dividend payable February 1, 1864, five per cent.	250,000 00	
		550,000 00
Total		$1,104,789 00

A stock dividend of twenty per cent. has also been declared, payable February 1, 1864.

Interest and Dividends.

The coupons due March 1, 1864, from the bonds of the Peninsular Railroad Company of Michigan will be paid at the office of the company, No. 8 Wall street.

The Pittsburg, Ft. Wayne and Chicago Railway Company have declared a dividend of 7 per cent. on their third mortgage bonds, for the year ending December 31, 1863, payable on and after April 1, at the office of Winslow, Lanier & Co., 52 Wall street.

The Board of Directors of the Bellefontaine and Indiana Railroad have declared a dividend of twenty-five per cent.

The Wyoming Valley Canal announces its regular quarterly cash dividend of four per cent., payable on the 21st of March. The company also authorizes the issue and distribution to shareholders as they may stand on the books of the company March 6th, 1864, of two thousand shares of stock at par, being an increase of $100,000 of the capital stock, in lieu of that amount of cancelled bonds, the new stock to be divided at the rate of one share to every six held, without regard to fractions. This, it will be remembered, is not a stock *dividend* but a stock *distribution*, for which the par of fifty dollars per share must be paid. The shares are now selling at 83.

The Chemung Railroad Company will pay on demand, at the Park Fire Insurance Co., a quarterly dividend of 2 per cent. free of tax.

The Hudson River Railroad Company has declared a semi-annual dividend of five per cent., payable March 12.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of 10 per cent.

☞ The amount of stock divided to the shareholders of the Pennsylvania Railroad Company last week was some 85,000 shares, representing at their par value $4,200,000, or at their market price $6,035,000. With this addition of new stock, the capital of the company is now represented in 365,000 shares, covering at par $17,250,000 in money.

Debt of Sacramento, Cal.

We are indebted to Hon. Chas. H. Swift, Mayor of Sacramento, for the following statement of the indebtedness of that city:

Sacramento has three series of debts and liabilities, as follows:

1st—6 per cent. registered bonds with coupons, $1,474,800—authorized by act of Legislature May 28, 1858, and payable in 1888, 1893, 1898, and 1903. Issued for the redemption of all outstanding debts, including bonds previously issued. For the payment of interest 55 per cent. of all city revenue is pledged, and interest has been paid to date.

2d—Miscellaneous bonds, $240,440. These bear different rates of interest, and are fundable, under the act of May 28, 1858, in 6 per cent. registered bonds (as above,) but are not yet funded. They include bonds issued for the Fire Department, Water Works, Levee, City Hall, Prison, etc. On funding, the accrued interest will be added.

3d—Certificates for floating debt, $66,362. These were issued to retire floating debt accumulated from 1858 to 1863, and are secured by a special tax annually until paid. No interest is attached, and their redemption may take place at any time when $1,000 is on hand—the lowest bidder for the sum offered having preference.

The total debt of the city is $1,781,602.

The Mayor regrets that he cannot send a more favorable account. But "stubborn facts will not allow it."

Susquehanna and Wyoming Valley Railroad and Coal Company.

The committee on securities to be dealt in at Stock Exchange, have made to that body the following statement of facts obtained from official documents:

The company is chartered by special incorporation in Pennsylvania, (Act of 1854, patent granted 1859, charter expires 1875,) owns mines and town lots at Scranton; transports its coal to New York by Delaware, Lackawanna and Western Railroad. No floating debt. Mortgage 7 per cent., is $500,000, less $12,000 retired, $488,000. The bonds appear to have been issued in payment for the property in Scranton, and are convertible into stock. Capital stock at present, 6,400 shares of $50—$320,000, with power to increase for mining purposes, and since this application was made to the Stock Exchange, the company has decided to increase to 20,000 shares of $50 each, $1,000,000. No individual liability is apparent, except for labor and materials used in mining operations. The increase of capital is represented to be for additional cars and mining lands, and the new shares will be issued in payment for the contracts made or to be made.

Penn Haven and White Haven Railroad.

The annual meeting of the stockholders of this company was held at Mauch Chunk on the 25th of January, when the following gentlemen were elected to serve for the ensuing year: President, Asa Packer; Managers, Asa Packer, John A. Hutchinson, William H. Gatzmer, Robert Lockhart, Robert H. Sayre and Garret B. Luckerman; Treasurer and Secretary, John A. Hutchinson. The Penn Haven and White Haven Railroad begins at Penn Haven, on the Lehigh, nine miles above Mauch Chunk, and skirting that stream for a distance of sixteen miles to White Haven, where it connects with the plane of the Lehigh Navigation Company to Wilkesbarre. The Philadelphia *Ledger* says: "The rails are already being laid down on one portion of it, and spring will see it finished and in operation. It will be an important feeder to this city in connection with the roads from the Wyoming and Lackawanna regions."

California Treasure Shipments.

The total amount of treasure shipped from San Francisco during the year 1863 by the Pacific Mail Steamship Company, was $41,569,783 67. Of this only $10,390,229 66 was sent directly to New York, the remainder, $31,179,454 01, having been shipped to Panama and England. The rebel privateers were the probable cause of depriving our steamers of the carrying trade. The *Alta California* gives the shipments of treasure since 1849, and including that year, as follows:

1849	$4,921,250	1857	$49,340,187
1850	27,476,346	1858	43,897,159
1851	45,582,095	1859	47,664,299
1852	46,586,134	1860	42,303,345
1853	57,331,024	1861	40,639,090
1854	51,328,855	1862	42,380,809
1855	44,640,090	1863	41,569,783
1856	51,042,268		
Total			$637,002,534

The shipments to China and other points by other vessels than the Pacific Mail Steamship Company, are included in the total shipments of the year previous to 1863. If these were included in the estimates of last season they would swell the gross amount to a total not greatly below that of any previous year.

☞ At a meeting of the directors of the Northern Central Railroad Company, held in Baltimore on the 25th inst., a motion was made to refer the annual report of the directors to a committee of five, with instructions to report thereon at a meeting to be held at Calvert Station on the 15th of April next. The subjects of stock and cash dividends, or both, the expenditure of $1,500,000 as recommended by the Superintendent, as well as all matters affecting the interests of the shareholders to be embraced in said report. We are informed that the sentiment of those most interested in the successful working of the line was adverse to a dividend either of cash or stock.

☞ The Erie Railway Company has passed resolution authorizing the conversion of the bonds of the Long Dock Company into stock of the Erie Company, requiring 20,000 shares of new stock. A resolution was also passed allowing the conversion of the Buffalo Branch Bonds, $200,000. The conversions have increased the common stock thus far 10,000 shares.

Albany Horse Railroads.

We learn that contracts have been executed for the completion of the track of the Horse Railroad from the present terminus in Washington Avenue, at Townsend's Park, to the Two Mile House, on the Schenectady Turnpike, West Albany, and from the present railroad in State street at its intersection with Pearl street, to the south bounds of the city. The latter route will be extended to Kenwood as soon as the company can obtain the right of way. These roads are to be commenced as soon as the weather will permit, and are to be completed with despatch.

☞ Sixteen millions of mortgage debt in Ohio have been paid off within the two last years. In 1863 the total outstanding mortgage debt unpaid was $19,973,171. The amount of judgment debts paid off during the same time was about $9,000,000.

Area, Population, Valuation and Debt of each of the Loyal States of the Union.

* The amounts here given are such only as are liable to State Taxation—the real valuation is much greater.

† Valuation estimated at one-fifth of the total of Virginia as in 1860.

Baltimore City Passenger Railway.

A bill has been favorably reported to the Baltimore City Council, amending the charter of the Passenger Railway Company of that city so as to allow it to charge six cents fare for each passenger instead of five, as at present. The operations of the act are limited to two years from its passage. The Company say that unless the act is passed they will be compelled to stop running.

☞ It now seems highly probable that, notwithstanding the many disappointments we have experienced in regard to the building of the Buffalo and Pittsburgh Railroad, we are, at last, to have a real genuine railroad through this village! We learn that Engineers are already surveying two lines for the proposed route—one through Springville, East Otto, Mansfield, and Ellicottville, and the other through Aurora and Machias, along the old and unfinished route.—*Cattaraugus Freeman.*

Montreal and Champlain Railroad.

We learn that this road passed into the hands of the Grand Trunk Railroad Company on the 1st of January last. Passengers are now carried across the Victoria bridge free of charge, and with but little loss of time. The well known ferry boat the Iron Duke will consequently be no longer necessary to carry Railway passengers across the river.

☞ J. N. McCullough, Esq., has been appointed General Superintendent of the Pittsburg, Fort Wayne and Chicago Railroad, in the place of John B. Jervis, Esq., resigned. Mr. Jervis has been appointed Chief Engineer.

☞ The library of Congress contains 82,000 volumes, and during the last sixty years $343,000 have been expended on the purchase of books. By law a copy of every book published in this country must be deposited in this library.

Brome Mining Company.

This is a Canada Copper mine, with 100,000 shares. The location of the mine is in the town of Sutton, Brome County, Canada East, and this region is now attracting unusual attention from the success of the Canada, Bedford, and Sutton mines. The Brome has the same vein as the Sutton, and is even more favorably situated on the side of the hill, than the latter, equally as good ore being taken out within a few feet of the surface as is obtained by sinking shafts, 60 to 70 feet at the Sutton. Work has been progressing at the mine for nearly a year, and is being pushed with vigor.—*Boston Courier.*

Rockland and Bath Railroad.

This project it is said commands a fair prospect of being built. A Wiscasset correspondent of the Rockland *Free Press*, in urging the importance of a railroad along the shore route, to the Kennebec and Portland road, says a route has been reconnoitered, striking the Kennebec at Twing's Point, below Swan Island, and seven miles from Wiscasset.

Chicago and Alton Railroad.

The operations of the Chicago and Alton Railroad for the year ending Dec. 31, 1863, have been thus: The gross earnings of the line have been $2,021,770 22, being an increase of $515,165 90 over 1862. After deducting the amount paid the Joliet, Chicago, and Terre Haute and St. Louis Railroads, Alton Packet Company, &c., of $348,663 62, the earnings of the Chicago and Alton Railroad amounted to $1,673,706 60, being an increase of $448,705 77 over 1862. The expenses of the Chicago and Alton Road in 1863 were $971,840 78, being an increase of $204,633 77 over 1862. The balance carried to the credit of income account in 1863 amounted to $701,865 82, or an increase of $244,072 over 1862.

Camden and Amboy Railroad.

The Camden and Amboy Railroad Company have applied to the New Jersey Legislature for an extension of their privileges for a period of twenty years from the 1st of January, 1869, at which time their present grant will expire. The present application is not for an extension of charter, which, we think, extends some twenty-five years yet, but for an extension of their original privilege of exclusively carrying passengers and freight between Philadelphia and New York. In view of the advantages which result to the taxpayers of New Jersey from the connection of the State with the joint companies, there is little reason to doubt the extension of the privilege solicited. Not only does the State's interest in the companies largely exempt the people from taxation, but the connection has had the effect of giving a railroad to every country in the State, and some of the counties so isolated that railroad advantages could by no other means have been obtained. Of course such a system will not be lightly yielded, however much outside schemers may complain.—*Phila. Ledger*, Feb. 27.

Another Outlet from the Lehigh Valley.

We notice in a Montgomery county newspaper of last week the report of a meeting in favor of a new railroad connecting that valley with the Schuylkill Valley, which, if carried out, must greatly advantage the Reading Railroad. That company having within the last two years absorbed all the roads in the valley of the Schuylkill, is now looking to the Lehigh Valley for a portion of the coal and iron productions of that wonderfully prolific region. The proposition now is to construct a new railroad, of some eighteen miles in length, from near Pottstown, on the line of the Reading Railroad, to some point most feasible, on the East Pennsylvania Railroad, as near to Allentown as may be. Such a line of road, connecting with this city, would use about forty-five miles of the Reading Railroad, and, independent of the trade that such a connection would invite from the Lehigh Valley, the region of country through which it is proposed to construct the connecting

link abounds in large quantities of the very best and richest iron ore in the State. At the meeting of citizens held last week a committee was appointed to raise $300,000 on the line of the projected road, and a statement was made from J. Dutton Steele, of the Reading Railroad, that that company could be induced to endorse the bonds of the proposed road to two-thirds the estimated cost to build the first section. The Reading Railroad management adopted the true policy when it set up as principal carrier from the Schuylkill region, and in commanding the lateral roads instead of being subservient to them, took the first step in the development of its capacity to command and control the tonnage of the Schuylkill region. Its subsequent amicable arrangements with competing lines were all in the same salutary direction, and gave the company last year a coal tonnage of over *three millions of tons*, at a per centage of net profits, over interest and all expenses, of about 22 per cent.—a per centage of profits unequalled by any road of equal length in the country.—*Phila. Ledger.*

Wisconsin and Lake Superior Railroad.

We see by a correspondence from New York, in the Lake Superior *News and Journal*, that the initiatory steps are being taken in New York for organizing a company to build a railroad from the copper mines of Lake Superior to Green Bay. It is to be known as the Wisconsin and Lake Superior Railroad, and will run from the mouth of the Menominee river to the copper range, via. Lake Michigaumi and Kewenaw Bay. The road will probably take the grant of the Ontonagon and State Line Road, and will pass through a rich iron region.

That such a road must eventually be built, has long been evident to us, and we are happy to learn that a movement is being made in the matter.—*Green Bay Advocate.*

RAILROAD IRON.

FOR SALE, to arrive, 800 Tons English Rails of the G L Brand, 62 lbs. per lineal yard

Apply to C. CONGREVE & SON,
No. 6 Pine street, New York.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

All steel warranted, both in quality and finish, equal to any imported.

OFFICE AND WAREROOMS,
254 CANAL STREET, NEW YORK.

Notice to Contractors.

ENGINEER'S OFFICE MORRIS & ESSEX R. R. Co.
NEWARK, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hacketts-town to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

6t8. J. B. BASSINGER, Chief Engineer.

TO RAILROAD CONTRACTORS.

Sealed proposals will be received at the office of the Pacific Railroad, (of Missouri,) in St. Louis, till March 25, 1864, for doing the graduation and masonry of about thirty-five miles of the road, being from Holden, in Johnson County, to a section in Jackson County between the Little Blue and Independence. Profiles, list of sections to be let, giving time as to when they must be completed, forms of bids, specifications, &c., can be seen at the office of the Chief Engineer in St. Louis.

Bids should be made for each section of about one mile, and no distance greater than ten miles will be let to any party or firm.

Payments will be made monthly in cash, fifteen per cent. being retained till the completion of the work.

Bids should be addressed to GEORGE R. TAYLOR, President, and where the bidder is not personally known to the President or Engineer, he must accompany his bid by substantial references, and should give also his post-office address, and he will be informed of the acceptance or rejection of his offer.

The company reserve the right to reject any or all bids.

T. McKISSOCK, Chief Engr and Sup't.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD.

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

OFFICE OF THE

ÆTNA

FIRE INSURANCE CO. OF NEW YORK,

NEW YORK, *January* 12, 1864.

☞ THE DIRECTORS OF THIS COMPANY Have this day declared a Semi-Annual CASH DIVIDEND to Stockholders of FOUR (4) PER CENT., payable on demand. Also, a SCRIP DIVIDEND of FIFTY (50) PER CENT., to its Customers upon the premiums earned during the year ending December 31st, 1863, on all its policies entitling the holders to participate in the profits of the Company's business, and scrip will be issued on the 15th day of February. Also, an INTEREST DIVIDEND of SIX PER CENT. in Cash on all outstanding scrip, payable on demand; all free from Government tax.

LIVINGSTON SATTERLEE, Sec'y.

The Mercantile Mutual INSURANCE COMPANY,

No. 35 WALL ST., NEW YORK.

INCORPORATED, APRIL, 1843.

ASSETS OVER $1,250,000.

MARINE and Inland Transportation risks on Vessels, Freight and Merchandise insured on the most favorable terms.

Policies are issued, loss, if any, payable in Gold, or at the office of RATHBONE, BROTHERS & CO., Liverpool, if desired.

Parties effecting insurance at this office may participate in the Scrip dividend of profits, or receive an equivalent cash discount, at their own option.

The risk of war covered at the lowest current rates.

ELLWOOD WALTER, Pres't.
CHAS. NEWCOMB, Vice Pres't.
C. J. DESPARD, Secretary.

CENTRAL PACIFIC RAILROAD COMPANY OF CALIFORNIA.—The coupons due Jan. 1, 1864, on the Mortgage Bonds of this Company, will be paid on and after the 1st proximo, in gold coin, less Government tax, at the office of EUGENE KELLY & CO., No. 36 Wall street. 1md21.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 51 Beekman st., (up-stairs,) New York.

OFFICE OF THE

COLUMBIAN (MARINE) INSURANCE COMPANY,

Corner of WALL and NASSAU Streets.

CASH CAPITAL.....$1,000,000

Total Assets, June 2nd, 1863, less Losses adjusted and paid, $2,008,651 03.

LOSSES PAID IN GOLD

Upon RISKS on which the PREMIUM is paid in like Currency.

DEALERS with this Company will be allowed the option (to be signified at the time of application for insurance) of receiving in lieu of scrip, at the end of each year, Returns in Cash, of premiums paid and earned during the year, upon all new risks under the New York form of policy, as follows:

1st. Upon every OPEN policy (CARGO RISKS) upon which there shall have been earned and paid $300 and upwards, a return of TWENTY PER CENT.

2d. Upon other voyage risks upon CARGO and FREIGHT, a return of FIFTEEN PER CENT.

3d. Upon TIME risks upon HULLS and FREIGHT, a return of TEN PER CENT.

Such privilege, however, being confined to persons and firms, the aggregate of whose premiums upon such policies earned and paid during the year shall amount to the sum of One Hundred Dollars.

B. C. MORRIS, President.
THOS. LORD, Vice-President.
WM. M. WHITNEY, 2d Vice-Pres't & Sec'y.

BRASS SWITCH LOCKS,

MARKED with initials of Road, with chains and keys. EXTRA LOCKS AND KEYS—when ordering Locks and Keys to match others, enclose key in letter.

Permanent Way.

This expression in common use has a peculiar meaning, not generally understood except by scientific men. It is, according to Mr. R. M. Stephenson, that part of a railroad which includes ballasting, sleepers, rails, chairs, keys and bolts. And these have tasked the untiring ingenuity of our American mechanics to its utmost extent. We may have a good line, good grades, good viaducts and bridges, but if the permanent way itself is defective, the road will be a source of continual trouble and expense. The term first came into use when large blocks were made the support of the rails, and this plan of English origin was at first adopted in this country. The Albany and Schenectady Railroad was constructed in this idea; but it was found here as well as in England, that the objections to it were very serious. The bearing area was insufficient. The blocks could not be tied to keep the gauge, nor could their forward and backward movement be prevented. Because the attachment to the rail was slight and insecure at best, because the chairs were loosened by the movement of the trains, and because the blocks were like anvils reacting on what was placed on or passed over them, it was seen that they did not answer the purpose intended. They actually were deficient in stability. The action of the wheels of the train upon them was like that of a sledge hammer. It was supposed the difficulty might be obviated by continuous lines of low stone walls, but the result was the same. In short, it was discovered that there was too much rigidity, too much reaction, and that these destroyed the rolling stock.

Robert Stephenson illustrated this at a meeting of the Civil Engineer's institution in so satisfactory a manner, that the British Engineers at once changed their ideas as to permanent way. He showed that in the tunnel at Camden's town on the London and Northwestern road, upon "a solid cutting where the ballast lay superincumbent on the clay," and water had no access to it, the rails were most invariably destroyed after but a moderate use. The fact could not be accounted for until the sleepers were taken up, and "the ballast below was found as hard as the solid rock." This was dug up and loosened, and the difficulty ceased.

An English authority now before us says, that the pleasantest travelling by rail, is over a newly laid line with plenty of ballast, in which the sleepers lay soft and fairly bedded, while the rails, chairs and joints are all firm. This is not elasticity, but *plasticity*. We noticed this peculiarity in travelling over the Buffalo and Lake Huron Railway soon after its completion, and though running over it for a good distance at the rate of a mile a minute, the motion was very equable and pleasant.

Numerous attempts have been made in iron and wood to obtain sleepers which should be equal to the wear and tear of the largest traffic. Many inventions sprang up for examination and adoption. Those of iron are still in use on many English railways, but we believe our American system has rejected them.

Our ordinary plan is to lay down wooden transverse sleepers, either on the soil or in ballast, on the surfaces of which rests and is secured the rail itself. Some roads, however, are still further strengthened by longitudinal sills resting on the transverse sleepers, and supporting the rails. This principle of construction is pronounced by Mr. Stephenson "the most perfect yet devised, wherever the free use of timber is admissable."

Otherwise as experience teaches, the sleepers, or cross ties as we term them are apt to get loose, by the action of the trains; "they rock fore and aft with that of the wheel." They throw up clouds of dust by their vibratory motion, and thus damage the machinery in its joints, bearings, and gearing by the increased rubbing and friction the dust creates. Several ingenious plans have been devised to remedy this difficulty, of one of which we have formerly spoken favorably. This was to cut the ties or sleepers into half lengths, and to place the rails over their centres.

Of the rails, an essential part of the permanent way, there appear to be two principal kinds, the double head, which when worn may be reversed or turned upside down, and the foot rail fastened directly to the chairs. We are not personally acquainted with any of the former kind as being in use among us, though some years ago, the Harlem Company laid some hundreds of yards of this kind, in cast iron and in lengths of ten feet in this city near the present depot. But the destruction of the heavy double head rail is so certain under the weight of heavy engines that it was early abandoned. The foot rail which embraces all the various forms is the most usual style now in use. The varieties are innumerable, and the weight quite arbitrary.

There is still room for further exercise of the ingenuity which has so long tasked itself to obtain the strongest and most durable rails, with the least expenditure of metal. The recent introduction of the steel rail, either solid, or with a steel head only by the Pennsylvania Railroad Company, is a step evidently in the right direction. In the report of the company which we published in the JOURNAL of 27th ult., it is stated that the experiments thus far made with this new rail realize all the good results expected. An indestructible rail, so to speak will be one of the greatest improvements of the time, and make a material difference in the expense of maintaining the permanent way. Mr. Justice, of Philadelphia, agent for the manufacturers of solid cast steel rail, says: "It is believed that they will outwear TEN iron rails, while their cost is but double that of iron. An estimate of the interest account and wear and

tear on cast steel rails, as compared with iron, shows a balance in favor of cast steel varying from $10,000 to $30,000 per mile in a term of fifty years. In stations and crossings they are invaluable." The old fish belly rail, the underside of which was a curve or reversed arch, and which extended from sleeper to sleeper, has we believe been entirely abandoned by modern engineers. Rails are now made of the weight of 92 lbs., where extra care is given to permanent way, and there is a heavy traffic. So too, the chairs' on which they rest have increased in weight. They are made of from 7 up to 22 lbs., at various American manufactories. In England on some roads, the weight of 42 lbs. is adopted.

Chairs, a most important part of the way, have been also much changed in form from time to time. In some cases they have been dispensed with altogether, the rails being fastened by spikes driven through holes punched through the bearings, or by spikes with heads that clasp the rails, and are exterior to it and driven into the ties or sleepers.

Under the title of permanent way we also include ballasting, or the placing of broken stone between and around the rails, turn tables, switches, turn outs and fencing. It is a curious fact that one-sixth part of the expenses of maintaining and repairing a railway is that due to the fracture of rails, chairs and pins. This was ascertained by a series of careful observations made on the Belgian railways.

It will thus be seen that permanent way is a very important feature in railway management, and it is evident that its supervision can only safely be entrusted to the best order of engineering talent. We have always contended that our principal roads would gain by selecting managers of scientific, combined with practical knowledge. Large sums are annually lost to the stockholders, by the want of skill of this sort.

A railway is the product of the most perfect system of natural, philosophical and mechanical principles nicely adjusted to each other; and can be calculated, combined and used almost to perfection by competently trained engineers.

When a road is worked at hap hazard, as one would drive a cart, it will be found in the end a very uncertain and a very troublesome property.

Marietta and Cincinnati Railroad.

OFFICE OF MARIETTA AND CINCINNATI R. R. Co., Chillicothe, O., Feb. 1st, 1864.

To the Stockholders:

The Board of Directors respectfully submit the following Semi-Annual Report for the six months ending the 31st December, 1863:

1.—BALANCE SHEET, DECEMBER 31ST, 1863.

Railway and equipments		$9,433,432 19
Union Railway purchase (on acct. of)		
in cash	$102,636 67	
Do. do. in bonds	50,971 91	
		153,608 58
Hillsboro' & Cincinnati Railway p'rchase (on account of,) in cash.	$2,202 50	
Do. do. in shares	$1,550,115 07	
		1,553,317 57
Materials on hand		10,307 08
Cash due from banks and bankers		1,118,499 67
Real Estate		102,544 70
Construction	$590,364 08	
" extension	1,831 10	
		592,195 18
		$12,963,904 97

Capital Stock—		
First preference shares and scrip		$5,445,442 21
Second do.		3,483,571 97
Common stock		1,850,000 00
		$10,779,014 18
Liabilities—		
Sterling bonds issued	$1,000,000 00	
Dollar "	609,977 84	
		1,609,977 84
City of Baltimore loan to Union R. R.		20,000 00
Bills payable	$26,508 95	
Pay roll	23,461 16	
Cash dividend No. 1, preference stock	162,478 50	
		212,448 61
Profit and Loss—		
Balance, resulting from earnings		342,464 34
		$12,963,904 97

2.—REVENUE ACCOUNT.

From July 1, 1863, to December 31, 1863.

Receipts—		
From passengers		$162,178 66
" freight		234,488 24
" mails		10,468 74
" express		5,064 75
" telegraph		7,490 91
		$419,691 30
Expenditures—		
Locomotive running		$37,641 49

Repairs of cars		17,416 33
Road repairs		34,601 79
Stations, rent and repairs		2,156 71
Traffic expenses		66,577 81
Telegraph expenses		4,368 29
General charges		15,073 24
Balance carried to profit and loss		220,650 07
		$419,691 30

3.—PROFIT AND LOSS, DECEMBER 31, 1863.

Coupons due August 1st, 1863	$25,802 00
Interest on City of Baltimore loan	600 00
Federal taxes	9,792 86
State Taxes	5,410 59
Bond scrip interest	41 83
Rent of Little Miami R. R. Track	80,000 00
New York Office expenses	315 78
Cash dividend No. 1, on 1st preference Shares, say 3 per ct., on $5,415,950	162,478 50
Balance	342,464 34
	$576,905 85
Balance June 30, 1863	$338,684 56
Net earnings for 6 months	220,650 07
Interest account	17,571 22
	$576,905 85

General Balance Sheet.—By this account it will appear that the company is free from floating debt, and that its cash means amounts to the sum of $1,118,499 67, from which should be deducted the dividend payable the 10th instant, the balance being available for the prosecution of works now under contract.

The board apprehend no difficulty in effecting such additional sales of mortgage bonds as may be necessary at full prices. Within the past year they have sold to the extent of $1,325,000, at prices averaging more than par value.

Revenue Account.—The revenue from traffic for the half year ending 31st December, amounted to $419,691 30

Deduct working expenses	199,041 23
Leaving as net earnings the sum of	$220,650 07

which is transferred to the credit of "profit and loss," as will be seen by reference to that account.

Profit and Loss.—After paying a cash dividend of 8 per cent. on the first preference shares, which amount to the sum of $5,415,950, say $162,478 50, as well as the coupons which matured within the half year, and all other time items chargeable to this account, there remains a balance of $342,464 34 to its credit.

Transfer Office in New York.—The company have opened transfer books with the "Farmers' Loan and Trust Company in New York." Holders of preference shares who desire to have them registered at that agency, and to receive their dividends in New York, can do so by forwarding their certificates to the Registrar, at Chillicothe, to be discharged to the New York office.

Annual Meeting.—At a late meeting of the stockholders, the time for holding the annual meetings of the corporation was changed from August to February. The next annual meeting and election for directors will occur on the third Wednesday of February, 1865.

Dividend.—The board declared a cash dividend out of the net earnings of the half year upon the first preference shares of three per cent., payable in cash on the 10th February. Stockholders registered on the transfer books in New York, will be paid at the Farmers' Loan and Trust Company in that city; and those registered on the books of the company will be paid at their office in Chillicothe, Ohio.

The traffic of the line for the past six months has greatly exceeded the capacity of its motive power, cars, and other requisite facilities, and as measures have been adopted to secure large additions to the equipment, and as the condition of the railway is rapidly improving, there is no apparent cause for not relying with confidence upon a large and steady increase in earnings, and a continuance of cash dividends upon this class of shares, with a confident expectation that the time is not very distant when the net revenue of the company will be equal to cash dividends upon its entire capital stock.

Progress of the Work in Completing the Main Line.—At the date of the last Annual Report, the work required to complete the main line had been placed in the hands of contractors.

Since that time the long tunnel, previously passed by a zig-zag line, has been finished. About 2,500 lineal feet of tressling filled up with earth. The Pilcher Tunnel, of 1,600 feet in length in all, is now reduced to 500 feet. Over 4,000 lineal feet of new bridges have been built, and the heavy grades occasioned by temporary lines reduced at the most difficult points.

In prosecuting the work, care has been taken to apply the expenditure to the most defective portions of the road, and to the removal of the greatest obstacles to an economical and safe transfer of the traffic. Three steam excavators, with adequate equipment for moving the material, are constantly at work filling up the trestles. The contractors have arranged to place another on the work early this season. A full force is engaged on the remaining tunnel, and it is expected that by the end of the coming season there will be no obstacle left in the way of satisfactory working of the main line.

Completion of the Workshops at Zaleski.—Arrangements have been made for eight new locomotives to be delivered this season—but the high prices prevailing for all kinds of railroad equipment, together with the long delay in securing such as may be contracted for, compels a resort to our own shops both for car and locomotive work. The buildings now erected at Zaleski are sufficient for the repair and construction of locomotives whenever proper machinery shall be supplied.

But it will be necessary to erect new buildings for car works. This it is proposed to do immediately in a substantial form.

Equipment is rapidly becoming the great want of our enterprise. The forces already organized and at work upon the road bed, will soon remove all obstacles to economy, safety, and success.

The rolling stock of all kinds must be speedily replenished. This can only be done with proper economy by enlarging our own facilities for that kind of work.

The company propose to add ten locomotives and two hundred new cars to their equipment within the present year.

* *Purchase of the Scioto and Hocking Valley Railroad.*—A contract has been closed with the trustees of the Scioto and Hocking Valley Railroad for the purchase of that road. A line extending from Hamden, in Vinton County, to Portsmouth, on the Ohio river.

This purchase has been effected by the payment of $500,000 in first preference shares at par. The road being under a mortgage of $300,000, which has twenty-five years to run. This road is fifty-six miles in length—traverses one of the richest mineral districts of Ohio—is built with grades and curves similar to those prevailing on the completed portion of our road—is laid with sixty pound rail upon cross ties recently renewed, and is in good condition for operating.

Its net earnings for December, 1863, (being the only month that it has been in our possession,) were over $6,000.

By this purchase the traffic of eighteen iron furnaces, in addition to those located on our main line, is brought within our control. The extension of the "Iron Railroad" from Ironton, on the Ohio river, to the Scioto and Hocking Valley line, would give us access to nearly every furnace in Southern Ohio. By the purchase of the Scioto and Hocking Valley road we have in all twenty-four furnaces dependent upon our line for transportation of their products and return of their various supplies. Assuming the business of each furnace to be worth $12,000 of gross revenue, we have an increased income of $288,000 from this source.

Extension to Cincinnati.—The White Water Canal, built by a corporation under a charter from the State, was constructed many years since, and had acquired a very central position in the city of Cincinnati—indeed, was located and built before improvements had occupied to any extent that portion of the city grounds.

This canal having become unprofitable, the stock was purchased by the Indiana and Cincinnati Railroad Company, and legislative and judicial sanction obtained for the use of its bed for railroad purposes.

In connection with and immediately adjacent to the terminus of this canal, the city is the owner of a large market space embracing two whole squares, the use of which for its original purpose had become unnecessary. The city granted the use of this space for railroad purposes to the Indiana and Cincinnati and other roads that might make their terminus at that point. The opportunity has thus been afforded for securing a most central and commanding position in the city of Cincinnati in direct connection with friendly roads.

To secure and render permanent these advantages, a *perpetual* contract has been entered into with the city and the Indiana and Cincinnati Company for the use in common with them of the four tracks now laid in the bed of the old canal, and of the passenger depot which is to occupy the ground of the old market squares. We have also acquired, immediately adjacent to their tracks, and accessible from them, a commodious lot for freight purposes. We will thus be brought at once to the business centre of the city upon tracks, avoiding all interruptions from street-crossings, the streets crossing the old canal, but being passed over on bridges at an elevation sufficient to permit the passage of trains; and with one exception, the turnpikes and other roads crossed by our track for the distance of about seven miles from the terminus in the city, are passed either over or under the railway, so as to avoid any contact with them—thus admitting the passage of trains at full speed to and from the terminus in the heart of the city.

In the case of many other roads approaching large cities, experience has demonstrated the necessity of immense outlays of capital in securing access to central positions. In our case the right has been secured at moderate cost.

The rights of way have been generally obtained upon reasonable terms from Loveland to the intersection with the tracks laid down in the old canal bed within the city limits.

Contracts have also been entered into with responsible parties for the completion of the road bed from Loveland to the city by the first of January next.

The contractors have already a considerable force of men and teams at work. Iron rails for this extension, including adequate side tracks, have been procured, and are in course of delivery.

The location thus secured in the city will relieve us from the embarrassment and loss of business resulting from the inferior and inadequate accommodations afforded by our connection with the Little Miami road. A heavy loss of business has resulted during the past season solely for the want of room to handle freight in the narrow space we are compelled to occupy.

Upon the completion of this extension we shall be brought into direct connection with the railroads running westwardly from that city, whose relations with us must be of the most friendly character. Exchanges of freight and passengers resulting in mutual benefits cannot fail to largely increase our revenues, and that too from a source that has hitherto afforded but little aid. It will enable us to build up and sustain a large through passenger traffic. From the Atlantic cities to the southwest our road, in connection with those leading westward from Cincinnati, will afford the shortest and most convenient route for travel. This will also secure to us beyond question the great through mail and express.

Coal Market—To the above general benefits resulting to the ordinary business of the route from this new and independent position in Cincinnati, may be added the opening of a new and most valuable market for the mineral products existing in such abundance along the line of our road.

It is true that we have hitherto carried coal to the city of Cincinnati, but never in such quantities, or under such circumstances, as to render that market of any value. A principal obstacle to success in the coal business has been the utter lack of convenient and commodious places for its delivery in the city. It is impossible for a railroad to do a large and profitable coal business while its cars are used as warehouses for storage of the article until it is sold out. The quantity moved should be enough to constitute a separate coal train. The railroad performing solely the office of hauling it to market, the cars being loaded and unloaded with regularity and promptness. This makes it absolutely necessary to have coal-yards of sufficient capacity to contain all the surplus beyond current sales. These yards should be opened at different points in the city, and located so far from the river as to give the railroad coal-dealer advantage of cartage in supplying the immediate vicinity of his yard.

A large proportion of the city consumers prefer to purchase in small quantities. This they could safely do if they were certain always to have a supply at hand.

By the extension of our line from Loveland to the city we have access to all the interior points where the delivery of coal can be accomplished with greatest freedom from river competition, and with entire convenience to by far the larger portion of her consumers. To obtain access to suitable points for coal delivery resort must be had—1st. To the use of the streets to convey the coal directly without handling to suitable yards where it may be unloaded without delay. It is not doubted that the use of suitable streets will be granted by the city council for this purpose. 2d. Another means of access to central and convenient points for the delivery of coal, is offered by using the Miami Canal from the point of its intersection by our road to the head of Broadway in the city. The level of this canal is 100 feet above low water in the Ohio River, thus offering a most important advantage in the delivery of heavy articles. The coal will be transported in cars constructed so as to discharge by dumping.

A cheap trestle-work extended over the canal will place the car over the boat so that the unloading of a train of coal cars will be the work of but few minutes. The coal thus deposited in boats can be transferred at very slight cost for delivery at any point within the city along the canal. It may also be found practicable to transfer the car loaded with coal on the deck of boats suitably arranged with a track, and thus deliver the coal to a large number of consumers immediately from the car.

In this way, by the use of either the streets or the canal, or both, at least two-thirds of the city of Cincinnati is open for the distribution of coal from our line, with an advantage to the railroad coal-dealer over the river of at least two cents per bushel in cartage.

A supply of coal by railroad is the only certain protection of the city against "fuel famine."

With these facilities for delivery giving assurance of a large and constant business, the railroad company can afford to haul coal at a low rate. And although the river may, under favorable circumstances, be able to offer a cheaper supply at particular seasons, yet a certain, uniform, daily receipt by rail of this indispensable article will be found a safer and, in the end, a cheaper reliance. In addition to this really new market opened for coal from our mines in the city, we shall have access, by the Hamilton and Dayton Railroad and the Miami Canal, to a large coal-consuming population north and northwest of the city. The counties of Butler, Montgomery, and Preble, in Ohio, and adjacent counties in Indiana, furnish consumers nearly equal in number to Cincinnati, who would gladly avail themselves of this fuel at paying prices to the road and the miners, if they could be assured of a constant and unfailing supply. This interior country is highly cultivated, with a dense population. Timber has become scarce, and is highly valued. Manufactures are beginning to start up; in a word, fuel is becoming to them a necessity. Its supply through the canal and the railroads with which we connect must be a certain result of proper efforts in that direction.

The commercial statistics of Cincinnati place the highest consumption of coal in one year by the city at 17,000,000 bushels. A uniform supply at moderate rates would doubtless find market to the extent of at least 12,000,000 bushels. If to this be added the supply of the coalless district west and northwest made accessible by the extension of our road and its connections with other roads and the canal, we have a basis for coal traffic sufficiently inviting.

The facts justify the claim, that at least 10,000,000 of bushels can be supplied to interior consumers in the city and country, by our railway, it having an advantage over the river of 2 cents in the delivery.

One coal train of 20 cars per day would yield, at 6 cents per bushel for transportation, $108,000 per annum gross revenue, and would deliver about 2,000,000 of bushels per annum; so that it would require 5 regular trains to supply these markets thus made accessible, and in which the road will always have ample protection against a supply from the river.

These five trains would yield a gross revenue, at the above rate, of $540,000 per annum. Add this to the estimated value of the Iron Furnace traffic, and we have the total of $828,000 gross revenue from these two local sources. The value of this business must increase with the increasing population and industrial development of the district thus brought under our immediate control. In the future, this source of revenue, in connection with others of like value, all local and certain in their character, will guarantee the productiveness of the entire Railroad property.

Coal Fields.—Our railway passes through the rich and inexhaustible fields of bituminous coal, in the counties of Jackson, Vinton, Athens and Washington, of superior quality. Workable veins varying from three to ten feet in thickness are immediately accessible to the line, and favorably located for working by drifting into the hills or by shafting.

Ohio River Bridge.—The engineer in charge of this work has completed his surveys for the location, and is now engaged upon the plans a

* This will hereafter be designated the "Portsmouth Branch."

drawing for the bridge. It is expected that the work upon this important structure will be commenced early in the coming spring.

Conclusion.—The improved and rapidly improving condition of the railway, the increase of traffic certain to result from the extension of the line into *the heart* of Cincinnati *from that city;* the large and certain development of coal and iron trade of the line; the close connection which will be formed with the Western railways entering the city; thus securing the heavy traffic to which this line is legitimately entitled from sources not heretofore available, the transportation of the through mails and express matter from Balt. and Washington city, to Cin., St. Louis, Louisville, and the Southwestern and Western States; the through passenger traffic to which the line is entitled, and which has not been attempted under existing circumstances; form a certain guarantee of a very large increase of traffic, and of the consequent substantial and permanent value of the property, and give assurance that the continuance of dividends may be expected with confidence.

Respectfully submitted.

NOAH L. WILSON, *President.*

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1863, have been as follows:

From freight	$2,500,959 91
" passengers	1,797,972 12

Total amount as shown in the General Balance Sheet		$28,610,229 23

From the Report of the General Superintendent we learn that the earnings of the road from all sources for the year 1863, were $4,636,827 80, being an increase over the earnings of 1862 of $1,127,634 05, or 32½ per cent. The following comparative statements show the sources and amount of revenue for the years 1862 and 1863, and includes $65,799 42 more than is credited in the Treasurer's statement of earnings—being one-half the earnings over the P. & O. R. R.:

Earnings:	1862.	1863.
Freight	$1,995,767 54	$2,632,558 75
Passengers	1,329,766 51	1,797,972 12
Extra baggage	1,324 26	2,749 11
Mails	76,300 00	76,300 00
Express	26,476 73	40,809 70
Rents	8,413 30	15,149 17
Rent of property	62,726 43	54,196 04
Rent of engines and cars	8,171 02	17,011 42
Storage and dockage	247 96	81 49
	$3,509,193 75	$4,636,827 80

The operation expenses of the road, in which are included all expenses except charter tax, have been unavoidably increased, both by the largely increased business, and by the great advance in rates of wages and prices of material, as compared with the previous year. The total amount of these expenses, as shown in the following comparative statement, is $2,151,786 67—being an increase over the expenses of 1862 of $536,530 63, or 33.2 per cent.:

Operation Exp'ditures:	1862.	1863.
Salaries	$72,313 96	$77,083 26
General expenses	94,004 92	83,402 14
Legal expenses	8,751 66	9,493 95
Claims and damages	27,996 06	17,086 52
Station expenses	254,520 75	338,303 00
Train expenses	346,447 95	509,493 76
Maintenance of machinery	367,229 36	498,045 36
Maintenance of road	402,829 43	564,335 03
Repairs of fencing	8,266 12	31,634 71
Operating St. C. Air Line	957 48	1,709 78
Insurance	20,315 21	19,397 28
Loss & damage by fire	7,059 00	1,257 00
Exchange	4,564 14	544 93
	$1,615,256 04	$2,151,786 67

The net earnings for the year are $2,485,041 13—being an increase of $591,103 42 over those of 1862, or 31.2 per cent., and equal to 7.8 per cent. on the capital stock and bonded debt of the company.

The proportion of operation expenditures to earnings is 46.4 per cent., against 46 per cent. in 1862.

During the past year, the motive power and rolling stock were taxed to their full capacity. The satisfactory increase in earnings is due to this fact. With greater facilities, a still larger increase would have been shown.

The number of miles run by engines with passenger trains during the year was 952,875; with freight trains, 1,611,197; with construction trains, 110,886; with wood trains, 1,769; with switching trains, 333,970—total, 3,010,697, an increase over the previous year of 449,505 miles. Average number of cars hauled, 12.51; lbs. waste used, 40,957; gallons of oil, 24,914; cords of wood, 24,887; tons of coal and coke, 61,850. Cost of repairs, $231,417 42. Cost of repairs per mile, 7.69 cents. Cost of wages, 3.93 cents. Cost of cleaning, .73 cents. Cost of fuel, 9.05 cents. Cost of oil, waste and tallow, .88 cents. The entire cost per mile run by each locomotive, including oil and waste, fuel, wages of engineers and firemen, and repairing and cleaning engines, is 22.28 cents, against 17.42 in 1862—an increase of 4.86 cents per mile. This increase in cost is principally in fuel; coal having cost 72.6 per cent per ton, and wood 6.3 per cent. per cord more than in 1862. All materials used in the repairs of machinery advanced during the past year from 15 to 20 per cent. over the average rates paid in 1862.

The total number of engines owned by the company at the close of the year was 116; 82 of which are now using coal as fuel—nine having been altered from wood-burners during the year. Four new engines were purchased, and two constructed at the company's shops.

The company have 62 passenger cars; 29 baggage, mail and express cars; 2 officer's cars; 1 pay car; and 7 sleeping cars; 2,955 freight cars; 9 derrick, wreck and tank cars; and 14 snow plows. The cost of repairs of was .52 cents per mile run. The cost of repairing passenger cars has been very much increased by damages sustained when used for transporting troops. It was equivalent in the past year to 1.67 cents per mile run.

The expenses in the Road Department have been largely increased during the past year, and the roadway and structures are now in excellent order. The cost of repairs of road and bridges for each mile of road, was $798 21; and for each mile run by locomotives, 18.74 cents. There have been placed in the track during the year, 197,387 ties, 191,437 lbs. spike, 33,337 chairs, and 668,484 lineal feet of iron rails, consisting of 11,467 bars re-rolled iron, 505 bars new iron, 13,325 bars repaired iron, and 7,386 bars of old iron.

Number of passengers carried, 852,659; number carried one mile, 73,078,752; average number of miles traveled by each passenger, 85.71.

Tons of freight transported, 952,814; tons carried one mile, 134,777,404; average distance each ton was carried, 141 miles. Tons of freight carried one mile north, 52,365,381; do., south, 82,412,023. Tons of local freight carried, 764,187; do.. carried one mile, 112,352,384; do., carried one mile north, 43,024,575; do., one mile south, 69,327,806. Tons of through freight, 206,627; do., carried one mile, 22,425,020; do., carried one mile north, 9,340,803; do., south, 13,084,217.

Land Department.

From the report of the Land Department we learn that the total land sales in 1863 were 221,578.05 acres, for $2,411,737 03. The aggregate sales from commencement to January 1, 1864, were 1,313,103.75 acres, for $16,020,151 58. The unsold lands amount to 1,282,626.24 acres.

The following is a statement of transactions of the Land Department for the year 1863, and general statement of accounts to December 31, 1863:

Land notes and contracts on hand as per report of 1862		$10,267,210 81

One year Treasury Notes	5,860,000 00
Two years' Treasury Notes	95,502,031 22
Oregon war debt	1,016,000 00
Certificates of indebtedness	136,121,650 00
Six per cent. 5-20 bonds	510,165,446 92
Total	$1,513,702,837 62
Less amount in Treasury	9,411,795 27
Total March 1, 1864	$1,513,291,042 35

Government Receipts and Expenditures.

We have the official figures showing the actual receipts of the government from the different sources of revenue for the first two quarters of the present fiscal year. They were as follows:—

	July 1 to Sept. 30.	Oct. 1 to Dec. 31.
Internal Revenue	$17,599,713	$27,000,000
Customs	22,562,018	23,666,000
Public lands.	136,182	170,000
Miscellaneous.	641,542	2,514,000
Total	$40,939,455	$53,350,000

Taking these figures as a basis upon which to estimate the receipts for the remaining half of the fiscal year, we find the aggregate would be $188,579,000. Secretary Chase in his last annual report to Congress estimated the total receipts of the government during the present year at $156,240,000, which is over thirty-two millions short of the above figures. The expenditures during the same time were as follows:

Quarter ending September 30, 1863	$176,110,932
Quarter ending December 31, 1863	357,260,000
Total for half year,	$533,370,932

By the same reasoning the expenses for the year will be $1,066,742,000, which is thirty-three millions less than Mr. Chase's estimate. During the quarter between the 1st of October and the last of December the War Department disbursed $163,300,000; the Navy Department paid out $24,000,000; for the redemption of certificates of indebtedness $57,000,000 were required, and $82,500,000 went towards the cancelling of temporary loans.

The Finances of Canada.

The Montreal papers contain a telegraphic statement from Quebec, of the financial condition of the Canadas for the year 1863. How accurate it is, can only be seen by the regular official report hereafter.

The total expenditures for the year are stated at $14,909,182; and the total receipts at $14,382,508. We notice that the receipts from customs were $5,170,000; the interest on the public debt is $3,718,000; the subvention to the ocean steamships is $511,000; aid to schools and colleges $528,000; support of the civil Government $430,000; the administration of justice $695,000; prisons $152,000; legislation $627,000

American Railroad Journal.

Saturday, March 12, 1864.

Stock Exchange and Money Market.

The great abundance of paper money stimulates speculation, and this money still retains the confidence of the people, who are willing to part with any commodities they have in exchange for it. The railway market is affected by it, and heavy advances have marked the operations of the last week. As will be seen by reference to our quotations, some of the shares have risen from 13 to 32 per cent. Government bonds have also partaken in the upward movement, assisted by a large foreign demand. The public confidence in these securities continues to grow stronger, and almost every person in the country who has money to spare is investing it this shape. Thus the relations between the state and the people are growing more close and trustful every day, a circumstance which augurs well for the stability of our republican institutions.

We give elsewhere an official statement of the actual receipts of the Government for the two first quarters of the present fiscal year, and they are satisfactory. The aggregate receipts for the six months were $94,289,455. On this basis the receipts of the whole year will be equal to $188,579,000 or more than thirty-two millions in excess of the estimate of Mr. Chase, in his last annual report to Congress. It is rather an uncommon occurrence in Treasury calculations. The usual experience is, that the receipts do not equal the Government estimates. Such is generally the case with both British and French Budgets. The public has been much gratified with the recent speech of the Hon. Mr. Stebbins of this city, on the subject of the gold bill. This gentleman is President of the Board of Brokers, and has for many years been a prominent financial operator. He is intimately acquainted with the New York market, and understands its combinations, resources, and opinions.

He therefore fully comprehends two facts, one is, that the rise in gold is brought about in great part by interested parties; interested not only in speculation as such, but in sympathy with the enemies of the Union. The other is that the Government itself unwillingly is a contributor to the rise, since it is receiving as custom house dues, many millions more of gold than it has any use for. It is therefore clear to the mind of Mr. Stebbins, as it is to that of most people who give the subject any reflection, that this surplus hoard should be disposed of. We have seen a report of his speech, not in full however, which is conclusive on all the topics it embraces. It disabuses the public of the impression as to the extent of the public debt, the amount of the currency afloat, and the resources of the nation, and is a valuable contribution to our current public documents.

After bestowing our hearty approval upon the gentleman for his patriotic and financial effort in behalf of the credit of the Nation, we must express, our deep regret that the House of Representatives has failed to comprehend the question, either in its magnitude or its consequences. The relief sought by the people has been refused, and as a poor compliance with their views, the Secretary of the Treasury is expected to discount in advance the interest coming due on his securities. This operation which any child can understand, will be no more nor less than so much more opportunity for further arrangements by the speculators, who will exactly know what amounts they will have to provide for by further combination. It is very remarkable that our Legislation is so easily warped from its course of duty by considerations of private interest, as in the case of the gold bill and the whiskey tax.

We do not wish to see the great disparity between this and legal tenders any longer. It is seriously affecting the expense of living by its enhancing the cost of the necessaries of life, though they were never more abundant than now.

We are willing to be taxed to any extent. The country could pay four or five hundred millions a year and not feel it sensibly, for we are not half taxed now on many articles of luxury and taste, but we do not want to pay 200 per cent advance for food and clothing, rent and fuel. We therefore trust that as a financial measure of the greatest import, an immediate disposition of our surplus gold will be provided for in a way, not to invite but to defeat speculation and combination.

The tone of the week having been one of the utmost excitement, we have to record an unparalled rush into the street to make money; and we also venture to predict that the consequences will ere long display themselves in the ruin of the margin operators and persons of limited means. No one party makes money without some one else losing it, and sometimes a great many persons are ruined to make one man rich. The streets of New York are filled with the wrecks of men once in good business and good standing, who were engulfed in stock speculations, and swept out of sight in the angry breakers. In fulfillment of his pledges, the Secretary of the Treasury is now relying on loans for his future supplies of money, instead of his legal tenders. A forthcoming loan of two hundred millions is announced, redeemable in forty years, if not previously redeemed at the pleasure of the Government after ten years. The interest is to be five per cent payable in gold. We consider this therefore a stock of which principal and interest will both be paid in gold. The bonds are to bear date the 3d of March. The half yearly coupons and registered interest will run from March to September, the plates are engraved, and large orders are waiting to be filled at the earliest moment. Gold has again advanced. It was sold on Wednesday as high as 167¾. We see no reason why it should not reach as high rates as it did last year. The public are perfectly helpless, and the Government absorption at the custom house increases the scarcity. It is suspected that the market is somewhat affected by secret operators from Richmond. It is known that greenbacks are eagerly sought for there, that our prisoners are deprived of all their funds as soon as they get into captivity, and that fifteen dollars confederate money are paid for one of the United States currency. Now as it is well understood confederate paper will never be redeemed, and that it is worthless, it is very clear that it is a good operation to get rid of it at any price for United States money. This money sent North may be and probably is largely disposed of for gold, and this again is remitted to Europe for confederate account. It would be easy to show that this operation may be carried on to a large extent, and greatly to the damage of our own financial operations. In this way more injury may be done than in any other. Bills on London are comparatively cheaper than gold, another circumstance verifying our opinions, and so they have been for some time.

The week's exports of domestic produce and miscellaneous goods (exclusive of specie) from this port, have been to the value of $3,333,153 against 3,749,684 same week last year, and $2,057,398 the corresponding week of 2842.

The balance at the Office of the Assistant Treasurer of the United States, New York, on Tuesday was $36,097,679 40.

The foreign news continues to be complicated and without immediate solution. The parties actually engaged in hostilities give no signs of a change of purpose, and this offers an opportunity to such powers as France and Italy, which we are inclined to think they will shortly embrace.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Gutta Percha Wagon Springs.

We received a few days' since, from the New England Car Spring Co., 237 Broadway, New York, a set of Gutta Percha Wagon Springs, very neat in appearance, and excelled in all respects, but for which at present we have no possible use. It appears that some ingenious individual, for the purpose doubtless of making his vehicle a little easier, having obtained a copy of the JOURNAL, presented himself, paper in hand, at the office of the above company, and preferred his request for the favor in our name. The goods fortunately were sent to this office, instead of being handed to the bearer, and hence he missed them. The Springs have been returned to the makers. We are not in the habit of asking favors of this sort from anybody; and it is well enough therefore to expose the transaction above alluded to, in order to put our friends on their guard.

☞ The bill authorizing the city corporation of Baltimore to endorse three millions of dollars of the bonds of the Western Maryland Railroad Company has passed the lower House of the Legislature, and it is said will pass the Senate.

☞ We learn that the Steubenville and Indiana Railroad, rolling stock, &c., have been sold for the sum of $1,890,000. The purchasers are John Edgar Thomson, of Penn., Henry M. Alexander, of New York, and George W. McCook, of Steubenville.

West Virginia Railway Company.

A bill has been passed in the House of West Virginia, and is now before the Senate, to incorporate the West Virginia Railway Company. The act authorizes the company to construct a railway from the Pennsylvania line, near Joseph Carroll's, in Preston County, by the way of Brandonville, the mouth of Muddy Creek and near Kingwood, the junction of Three Fork and Raccoon Creek, in the county of Taylor, Buckhannon, in the county of Kanawha, thence to the mouth of Sandy river, in the county of Wayne. If, after the organization of the company, it shall be ascertained that the purposes of the company can be better attained by a change of route, the company is authorized to change the route so as to commence anywhere on the Pennsylvania line in the counties of Monongahela or Preston, and extend the same up any of the streams of the Monongahela or elsewhere to the waters of the Elk River, thence by way of Charleston to the Kentucky line. The work shall be commenced within five years after the passage of this act, and one-fourth of the work must be completed within two years after it is commenced.

Steel Rails.

A new branch of manufacture, of no little interest and importance, is about to be introduced into Toronto, C. W. Mr. Gzowski, of that city, has lately returned from England, having completed arrangements during his visit, for adding the manufacture of steel to the other industrial processes hitherto carried on at the Rolling Mills. The advantages of steel over iron have led the railway companies of England to adopt the use of the former material for their rails; and the Rolling Mills will in future contract to furnish the Grand Trunk Railway Company with steel-headed rails for use along their line.

☞ The Allegheny County and Pittsburg bonds are now of two descriptions—the one, the old 6 per cent. bonds, issued to various railroads, and the new 5 per cent. bonds, which are now issued by the city and county in exchange for the old bonds. The interest on the latter is now regularly provided for, and paid here and in Philadelphia; but the interest on the 6 per cent. bonds, as such is not paid. Holders of the latter may exchange them for the new 5 per cents on application to Messrs. J. R. & H. B. Fry, of Philadelphia, who are the agents for effecting the exchange, and can give all information touching the two descriptions of bonds.

☞ The Air Line Railroad from Chicago, *via* the Galena and Chicago, and Iowa and Nebraska railroads now extends as far west as Cato, and by November next will reach Boonsboro', on Des Moines river, 345 miles west of Chicago, being a point further west than any other line in Iowa. The Chicago *Tribune* predicts a large amount of business from that rich valley.

☞ The Chicago *Tribune* says that a bed of cannel coal has been found in the Minnesota Valley, on the Cottonwood river, a little more than one hundred miles from St. Paul. The bed is eighty-eight feet below the surface where the shaft was sunk, and is six feet in thickness. All indications are that immense coal beds exist in that locality. A company has been organized in St. Paul to work the mines.

Important Amendments to the Pacific Railway Law.

Senator Sherman's bill to amend the Pacific Railway and telegraph law, approved July 1, 1862, provides that the shares shall be $100 instead of $1000 each, and that the number of shares shall be one million instead of one hundred thousand. To be a director one must hold fifty shares of stock instead of five. Persons holding thousand dollar shares may have hundreds in their stead. The company can take land for the track, and fees or other material for constructions, damages to be assessed by a commission. The company may use coal and iron on the public lands, and may have such land at government price. The lands taken by the company are secured from private entry. Lands that have been entered upon under government title are to be made up by others on either side of the road for twenty miles. The company may select good lands for sterile ones over which the track may pass. Mineral lands are construed to mean gold and silver mines. Section 5 of the act is amended by striking out the word "sixteen" and inserting the word "twenty-five," and by striking out the words, "may be paid in treasury notes," &c., and inserting, "shall be paid in the same manner as the bonds of the United States are made payable." Time for designating general route and filing map of the same, and the time for the completion of that part of railroad required by the terms of said act, is extended one year. Central Pacific Railroad, in California, to build but twenty-five miles of their road a year. One-half the compensation for services rendered the government shall be required to be applied to the payment of the bonds issued in aid of the construction of the road. Grades and curves not to exceed those of other roads in the United States that are in successful operation. The iron may not be of American manufacture exclusively, and the company may import iron rail and locomotives free of duty.—*Washington Chronicle, Feb.* 26.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of February was:

LAND DEPARTMENT.

Acres construction lands sold	31,103.96	for	$232,219 25
Acres Interest Fund Land sold	560.00	"	3,171 80
Acres Free Lands sold	5,116.74	"	61,980 04
Total sales during month of February, 1864	26,780 70	for	$292,371 09
To which add town lot sales			3,299 90
Total of all			$295,670 99
Acres sold since Jan. 1, 1864	46,266.55	for	$517,473 55
Cash collected in February			$157,634 50

TRAFFIC DEPARTMENT.

Receipts from passengers	$160,186 65
" freight	230,049 95
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of Feb., 1864	$406,594 93
Total receipts in month of Feb., 1863	271,085 04
Increase	$135,509 89

The earnings of the Michigan Central Railroad for the month of February, 1864, were $278,848 00
Corresponding month of previous year 245,357 00

Increase $32,991 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of February, 1864, were $299,890 00
Corresponding month of previous year 230,508 00

Increase $69,382 00

The earnings of the Cleveland and Pittsburg for the month of February, 1864, were $167,600 00
Corresponding month of previous year 115,400 00

Increase $52,200 00

The earnings of the Galena and Chicago Union Railroad Company for the month of Feb., 1864, were $173,029 00
Corresponding month of previous year 121,160 00

Increase $51,869 00

The earnings of the Chicago and Rock Island Railroad Company for the month of February, 1864, were $168,151 60
Corresponding month of previous year 126,521 00

Increase $41,630 00

The approximate earnings of the Marietta and Cincinnati Railroad Company (as re-organized) for the month of February, 1864, were $77,873 61
Corresponding month of previous year. 53,778 25

Increase $24,095 36

The earnings of the Chicago and Milwaukee Railroad Company for the month of February, 1864, were $43,748 00
Corresponding month of previous year. 30,660 75

Increase $13,087 25

The earnings of the Toledo and Wabash Railroad Company for the month of February, 1864, were $95,842 58
Corresponding month of previous year. 91,970 58

Increase $3,872 00

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of Feb., 1864, were $54,735 34
Corresponding month of previous year. 31,619 19

Increase $23,116 15

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending February 20, 1864, were:

Passengers	$19,734 24
Express freight, mails and sundries	2,800 00
Freight and live stock	45,875 30
Total	$68,409 54
Corresponding week, 1863	77,109 09
Decrease	$8,699 55

Traffic in 1864 partially interrupted by snow-storms.

The traffic of the Great Western Railroad for the week ending February 26, 1864, was as follows:

Passengers	$17,856 67
Freight and live stock	53,082 18
Mails and sundries	1,210 79
Total	$72,149 64
Corresponding week of 1863	71,367 17
Increase	$773 47

The earnings of the Montreal and Champlain Railroad for the week ending Feb. 20, 1864, were:

Passengers	$878 58
Mails and sundries	188 00
Freight and Live Stock	1,274 75
Ferries	44 88
Total	$2,386 21
Corresponding week, 1863	2,894 76
Decrease	$508 55

Traffic in 1864 partially interrupted by snow-storms.

The earnings of the Marietta and Cincinnati Railroad for the 4th week in February, were:

	1864.	1863.
Passengers	$12,003 99	$4,672 20
Freight	13,147 43	11,009 52
Mail, express & telegraph	940 37	863 04
Total	$26,091 79	$16,544 76
This month to date	77,873 61	53,778 25

The earnings of the Chicago and Alton Railroad Company for the week ending Feb., 29, were:

	1864.	1863.
Passengers	$11,847 05	$9,263 28
Freight	17,392 07	10,487 78
Sundries	1,213 34	1,090 00
Total	$30,452 46	$20,841 06
Increase 1864		$9,611 40

The earnings of the Galena and Chicago Union Railroad for the week ending February 29, were:

	1863.	1864.
Freight	$24,151 30	$30,268 02
Passengers	7,957 45	14,201 32
Mails, &c	1,807 89	1,300 00
Total	$33,916 64	$45,769 34
Increase 1864		$11,852 70

Distinction between a Branch Railroad and an Extension.

In the case of The People against The New York and Harlem Railroad Company, which affected the right of the company to extend their road through, and upon certain public streets in the city of New York, the decision turned upon the question, whether the so called extension was not in fact a branch railroad, and not authorized by a law permitting an extension of the road. In April 1863, an ordinance was passed by the Common Council of New York, and approved by the Mayor, granting permission to the defendants to extend their railroad, and construct a double track from their present Fourth Avenue track, between Seventeenth and Fifteenth streets, through Broadway to the foot of Whitehall street, with an additional single track around Bowling Green and State street, and another additional single track around Union square, with further permission to construct an additional single track to the Fulton ferry, through John street, Burling slip and South street, returning through Fulton street.

Permission was also thereby granted to the company to extend their railroad, and construct a double track from their present track in Fourth Avenue, through Twenty-third street to Madison Avenue, and thence through Madison Avenue so far as it is or may be opened, with further permission to connect therewith by a single or double track, from Fourth Avenue to Madison Avenue through to Twenty-fourth street. The ordinance, if valid was in pursuance of an act of the legislature which authorized the New York and Harlem Railroad, Company, to extend their railroad through such streets in the city of New York, as the Mayor, Aldermen and Commonalty of the city might from time to time permit.

A motion was made for an injunction, to restrain the defendants from laying or constructing such railway or track, in any of the streets or avenues named, and from breaking or removing the pavements therein, and from obstructing or incumbering such streets or avenues for such purpose, or disturbing or interfering with the carriage way thereof, or interrupting the travel thereon. The

main questions in the case were, whether the power conferred by the statute had been exercised and exhausted; whether the laying down and construction of the railroad track authorized by the ordinance, were a legitimate exercise of the right to extend their railroad conferred by the act, and whether the act had been expressly or impliedly repealed by subsequent statutes, abrogating the same or inconsistent therewith.

Hoghboom, J.—The New York and Harlem Railroad Company, was incorporated by an act of the legislature passed April 25, 1831. They were empowered to construct a single or double railroad or way, from any point on the north bounds of Twenty-third street, to any point on the Harlem River, between the east bounds of the Third Avenue and the west bounds of Eighth Avenue with a branch to the Hudson River, between One Hundred and Twenty-fourth street and the north bounds of One Hundred and Twenty-ninth street. The practical location of the railroad within these prescribed limits, would I think exhast the power conferred, and prevent a subsequent change of location, except by consent of the legislature.

The line of the road it will be observed was only from New York to Harlem. The location of the tracts (if there were two) would have to be I think substantially upon the same route. The permission to build a double track would be construed to mean, I think two tracks essentially upon the same location, for the purpose of enabling cars to run in opposite directions without detention or collision—and not two essentially different routes through different streets or avenues, such as would be occupied by parallel railroads. Indeed the rights of granting to other persons or corporations authority to construct parallel railroads, on streets or avenues not occupied by the New York and Harlem Railroad Company was expressly reserved to the Legislature by the 16th section of the same act. Then came the amendatory act of the 6th of April 1832, on which the defendants rely. By it this Company were authorized and empowered with the permission of the Mayor, Aldermen and Commonalty of the City of New York, to extend their railroad along Fourth Avenue to Fourteenth street in the said city, and through such other streets in the said city as the Mayor, Aldermen and Commonalty of said city might from time to time permit, subject to such prudential rules as were prescribed by this act and as the said Mayor, Aldermen and Commonalty in Common Council convened might prescribe.

By this act the railroad, which before terminated at Twenty-third street, was permitted to be extended, that is, continued or prolonged to Fourteenth street. This was ten streets further south upon the same avenue. But it was foreseen that public convenience and travel might require its further extension, and I think this was intended to be in the same general direction. It could not be extended further north; it already extended in that direction to the Harlem river and there were no streets beyond that river. The intent of the legislature was I have no doubt, that it might be extended further south, if the interest of the community should require, and through such other streets proper to accomplish that purpose as the Mayor, Alderman and Commonalty might from time to time permit not necessarily to terminate at the end of Fourth Avenue, at the Junction of Fourth or Fifth street for it was foreseen that the public accommodation might require it to be carried further down; not necessarily to terminate at the end of the Bowery for a large portion of the Population and business of the city was still below that! not necessarily perhaps pursuing the route of either of these streets—at all events not necessarily ending at their southern terminus but through such other streets as the city authorities might permit or prescribe, consistently with the main purpose of the act. At the end of the Bowery several streets diverged to the south or in that general direction. The precise route was not intended to be defined, but this was I think designedly left to the sound discretion of the Common Council having reference to the traveling and business interest of that crowded mart; and it was to be extended through such other streets as the Mayor, Aldermen and Commonalty might from time to time permit. I see no reason to doubt that this was a continuous power left to be exercised from time to time as the wants of the community should require. It was not therefore a power which was spent by a single grant or permission, but might be repeatedly exercised according to the exigency of the case.

Whether the power exercised and acted upon by the laying down of a track in accordance with the permission given, could be recalled, the track broken up and a new route prescribed, is a question which is not necessary to be decided and which I shall not discuss—it has its difficulties.

But I am strongly inclined to think that the extension authorized by this act was a longitudinal and not a lateral one. A lateral road is more properly a branch than an extension. It is spoken of under that name in the first section of the act of 1831, where authority is given to construct a branch to the Hudson river, that is a road or route diverging from the main trunk of the railroad. So by the first section of the amendatory act of May 12th 1836, authority is given to alter and change the route or location of the branch of their railroad which is to be constructed from Fourth Avenue to the Hudson river. So by the first section of the act of May 7th 1840, the right is granted to build a road through the county of Westchester, "extending thence northwardly to an intersection of the New York and Albany Railroad Company's line of road, and the right of extending a branch eastwardly to the State of Connecticut."

In saying that I think the extension authorized by the first section of the act of 1832, was intended to be longitudinal and not lateral, I do not mean that it should pursue the same precise direction with that portion of the road to which it was attached, not in any degree diverging from such a course, but that it should have the same general direction as a southern, southeastern or southwestern direction and not a direction to opposite or widely divergent points of the compass. For example it is very possible that under the act of 1832, the New York and Harlem Railroad Company might with the permission of the local authorities, if they had not located any other route, have diverged to the west at Fourteenth street and passed down Broadway. There seems to be no absolute requisitive that they should continue on the Fourth Avenue below Fourteenth street; and there is no other street or avenue at that point on which they could pass except Fourteenth street, and no street after such divergence, by which they could so soon return to the same general course as they had before pursued as Broadway. But it is a different question whether after having practically located their road by a double track below Fourteenth street through the Fourth Avenue, the Bowery, Broome and Centre streets to the lower end of the Park, used it in that location for a series of years, and maintained it in full operation to the present time insisting still upon retaining that route, they can in addition locate and operate an entirely new and supplemeatal route through Sixteenth street to Union Park and thence through Broadway to the foot of Whitehall street. I think they cannot, and in part for these reasons:

1. Such a route would be entirely new and independent route, as much so as if pursued under independent authority from the legislature to another corporation. It is in effect a parallel route, which the legislature have in the 16th section of the act of 1831, reserved to themselves the right to grant to a distinct corporation. It would give to this company the right to operate a double track in two locations entirely distinct. This was not intended by the legislature. This power was not conferred by the act of 1831; and although the act of 1832 makes no mention of a limitation to a double track it must be construed in connection with the charter of 1831, being an amendment thereof, and not enlarging the powers of the corporation in this particular.

The effect of the defendants' interpretation is to authorize this corporation with the consent of the local authorities to lay and construct railroads over every unoccupied street and avenue of the island of Manhattan. It is unreasonable to suppose that the legislature intended to invest this company even under the superintendence of the Common Council with powers and privileges so sweeping and comprehensive. The act must receive a reasonable interpretation, confining it, substantially to the main purposes of its original enactment except so far as additional powers are plainly conferred.

2. Nor is this new route in any just sense a mere extension of the original railroad. That road had an obvious limitation by the terms of the Charter, to a single route though with a double track. It was designed to open a railroad communication between New York at Twenty-third street and Harlem. Below that point it was probably supposed that the public could be advantageously saved by stages and conveyances. By the act of 1832, permission was given under certain limitations to extend this route further south, doubtless with a view to public accommodation in the more southern portion of the city. In 1840 permission was given to extend it in the other, the northerly direction. In 1845 by the act of May 14th of that year, this power was conferred in more distinct and ample terms to continue their road to a point on the Hudson River opposite Albany But it was probably never imagined even by those interested in the corporation that these acts vested the company with authority to establish parallel lines of railroad over the intervening territory between New York and Albany. Nor is it in my opinion a just construction of this act to give it a wide scope in regard to its extension at the south-

ern terminus further than required by the plain terms or obvious meaning of the language employed. It may extend through such other streets as the Common Council may designate, but only through such other streets as may subserve the leading object of the extension, to wit: a continuation of the road to more southern portions of the island.

I think further that a reasonable interpretation of the act requires that the extension should be made from the terminus of the road already constructed, so as to be a legitimate continuation and prolongation thereof. It was to go further, not to return back. It was to be continued, not to branch off. It was to be a single route, not several routes. It was to be an extension and not a branch. I am not able to give this act any other construction, I therefore conclude that the permission attempted to be granted by the ordinance of the 21st April, 1863, was not warranted by the terms intent or fair interpretation of the amended charter of 1832. This view is sufficient to dispose of the main question in the case, and makes it unnecessary for me to consider such of the other questions presented as relate to the supposed repeal of this act by the passage of other acts inconsistent therewith.

There is an additional ground on which the defendants rest the justification of their proceedings in this case, and that is: that independent of any statutory grant or authority, the permission granted by the Common Council to the New York and Harlem Railroad Company is maintainable as a lawful exercise of power granted to the Common Council under the ancient Dougan and Montgomery charters. But to this view of the case I think there are several answers:

1. The permission granted to the railroad company was by the terms thereof confessedly based upon the authority conferred by the amended charter of 1832. It professed to be derived from that source and no other. Under that all the parties acted, and there is some reason for saying that to that the parties should be limited.

2. But whether so or not it is no longer a debatable question at least in this tribunal:

1. That the legislature have notwithstanding these charters the right to make grants of railroad privileges and franchises over the streets and avenues of the city, and that when this power is exercised it is superior to and exclusive of any power which previously resided in the local authorities; and

2. That the local government has no right to grant railroad privileges or establish railroads in cities, independent of legislative action and approved.

I must therefore overrule this ground of defence, I think it is also settled upon authority that all public streets and highways are for the use of the people of the whole state whether located in town or country; that the interest in such use or the ownership thereof is public juris; that the appropriation of such streets to private or corporate use without authority of law under the consequent obstruction of them, and impediments to travel occasioned thereby, constitute a nuisance and justify an injunction, and that the people of the state are the appropriate parties to seek and enorce the necessary remedy.

Motion granted.

New Union Depot at Erie.

We learn from the best authority that a new Union depot at Erie has been planned and put under contract, under the supervision the Buffalo and Erie, Pittsburg and Erie, Cleveland and Erie, and Philadelphia and Erie roads, all of which it will accommodate. It will be a building worthy of the rank of Erie as a growing city, and of the business done by the roads which centre in it. The building is to be completed by the 4th of July next, at which time a delegation of Philadelphians will make an excursion over the Philadelphia and Erie road to celebrate the completion of that road and the erection of a new depot.

By the way this great road—the Philadelphia and Erie—is now nearing completion, having been constructed to within a distance of about twenty miles from Erie. Its completion to the latter point will make a very important era in railroad matters, and will give an impetus to business that will be felt throughout the West. It will lay open to our commerce the anthracite coal fields and extensive lumber regions of Central Pennsylvania, and will connect us with Philadelphia by a new and direct route.—*Cleveland Leader.*

Receipts and Shipments of Gold and Silver at San Francisco.

The following statement will show the receipts of gold and silver of the new product of the Pacific coast at San Francisco for the years 1862 and 1863, and of the exports, including shipments, from that port:

	1862.	1863.
Receipts from interior	$42,539,799	$45,327,826
Receipts from north coast	4,931,679	4,970,023
Imports foreign	1,904,084	2,156,612
Total	$49,375,462	$52,453,961
Exports	42,561,761	46,071,920
Currency movement	$6,812,701	$6,382,041

From the silver districts (included in northern mines) the total receipts for the past year were $12,433,915, against about $6,000,000 in 1862. They are divided as follows:

From Washoe	$11,846,915
From Esmeralda	587,000
Total	$12,433,915

The above statement of receipts has no reference to the product of the Colorado (Pike's Peak, and other mines on the eastern slope of the Rocky Mountains, which comes overland to the Atlantic cities.

The value and destination of the treasure shipments from San Francisco for the last ten years, were:

Years.	To Eastern Ports.	To England.	To China.
1854	$46,533,166	$3,781,080	$965,887
1855	38,730,564	5,182,156	889,675
1856	39,895,294	8,666,289	1,308,852
1857	35,531,778	9,347,743	2,993,264
1858	35,891,236	9,265,739	1,916,007
1859	40,146,437	3,910,930	3,100,756
1860	35,719,206	2,672,936	3,374,680
1861	32,528,011	4,061,779	3,541,279
1862	26,194,035	12,950,140	2,660,754
1863	10,389,330	28,467,253	4,206,870
Total.	$341,659,147	$88,306,055	$24,957,524

Years.	To Panama.	Other Countries.	Total.
1854	$204,592	$560,908	$52,045,633
1855	231,207	128,929	45,161,731
1856	253,268	673,732	50,697,434
1857	410,929	692,978	48,976,097
1858	299,265	175,779	47,548,026
1859	279,949	202,390	47,640,462
1860	300,809	258,185	42,325,916
1861	349,769	95,920	40,676,758
1862	434,508	322,324	42,561,761
1863	2,503,296	505,657	46,071,920
Total.	$5,267,602	$3,516,010	$463,706,338

From the above it will be seen that the total amount of treasure shipments from Jan. 1, 1854, to Dec. 31, 1863, were $463,706,338
To which we add shipment of 1853.. 54,905,000
" " shipment of 1852.. 45,779,000
" " shipment of 1851.. 34,960,895

Making a total for the 13 years of... $599,351,233

In reference to the amount of coin added to the circulation of California, the *Shipping List* says:

We are sometimes asked what amount of gold coin is in circulation on the Pacific coast, or in other words, what is the volume of our currency? We are unable to answer the question. The following figures, however, may furnish some clue to the currency movement of the past three years, and perhaps give an opportunity to approximate the amount of our circulation, or more properly speaking, of the coin in the hands of the people:

	1861.	1862.	1863.
Coin remitted to the interior	$11,842,547	$12,498,548	$12,916,781
Coin received from interior	9,363,214	5,593,421	6,383,974
Added to interior circulation	$2,479,333	$6,905,127	$6,532,807
Total for the three years			$15,917,267

Changeable Car Trucks.

We recently noticed the passage of a freight car through this city on its way to Chicago, the invention of a Mr. Tisdale, and designed to pass over tracks of different gauges. There is now being built by the Northern lines of roads leading from Boston, and connecting with the Grand Trunk road at Prescott, a freight car automatically adjustable to two or more different gauges of rails, and so designed as to pass from one gauge to another without delay, or intervention by any one. The construction is very simple, safe and in an economic point of view as regards wear, &c., promises the most favorable results. It is the invention of Mr. N. F. Bryant of East Boston, Massachusetts, with whom arrangements have been made by General Stark, the well-known manager of the Northern lines of roads referred to, for the building of a car, or a train of freight cars, as the case may be, to run between Boston and Chicago, should the invention meet the high expectation it justifies.—*Detroit Advertiser.*

Atlantic and Great Western Railway.

The Urbana *Gazette* says that in a few days the Atlantic and Great Western Railway line will be open to Marion, and that from that point to Urbana the work is being pushed forward with great activity.

New York and Boston (Air Line) Railroad.

A change of administration and management has just taken place in this road. N. C. Munson, Esq., has been chosen President in place of Hon. John M. Wood, resigned. Other changes have taken place in the direction; capital has been brought in and the road put upon a more substantial basis. Parties in the Pascoag Valley are subscribing to the stock, and the road will be completed to Slatersville at once.—*Boston Adv.*

Bridge Across the Toledo.

The citizens of Toledo are discussing the matter of a bridge across the Maumee river at that place. The Board of Trade has passed a series of resolutions in opposition to the scheme, while the railroad companies terminating at Toledo or passing through there are moving for the bridge.

Grand Trunk and Sarnia Line.

The managers of the Grand Trunk Railway have contracted with Colonel E. B. Ward to furnish them with a daily line of steamships between Milwaukee and Port Sarnia, to commence trips as soon as navigation opens.

Ohio and Mississippi Railroad.

We stated a day or two since that Wm. D. Griswold, Esq., of the Terre Haute, Alton & St. Louis R. R., had been appointed President of the Ohio & Mississippi Railroad, with indefinite power. We were not then informed whether Mr. Griswold was to assume control of the Eastern or Western Division, or of the whole line, but we now learn positively that he has been appointed President of both Divisions.

Mr. Griswold is one of the ablest railroad managers in the country, as his successful management of the Terre Haute, Alton and St. Louis Railroad is evidence, and we look upon his appointment as President of the entire line of the Ohio and Mississippi Railroad, as of great importance, for it will at once relieve the road of the many difficulties that have existed, growing out of the two distinct organizations, which have never worked amicably together.—*Cincinnati Gazette.*

☞ The following gentlemen have been elected Dierectors of the Pennsylvania Railroad Company; J. Edgar Thomson, Josiah Bacon, Thomas Mellor, John Hulme, G. D. Rosengarten, Wistar Morris, G. W. Cass, Pittsburgh; Wm. H. Smith, Pittsburgh; Samuel T. Bodine, Joseph B. Myers.

☞ Bills have been introduced in the Wisconsin Legislature to incorporate the Waupun and Rock River Railroad Company, which proposes to connect Waupun with the Chicago and Northwestern Railroad by laying about two and a half miles of track; to incorporate the St. Croix and Lake Superior, and the Berlin and Lake Superior Railroad Companies.

McGregor Western Railway.

We are informed by Judge Green, President of the McGregor Western Railway that on Monday next two trains each way will be run between North McGregor and Monona. The train which leaves Monona at 7: 15 a. m. will connect with the day express train on the Milwaukee and Prairie du Chien Railway, so that passengers can breakfast in Monona and take their supper the same day in Chicago.—*McGregor News.*

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

OFFICE AND WAREROOMS,
254 CANAL STREET, NEW YORK.

Notice to Contractors.

ENGINEER'S OFFICE MORRIS & ESSEX R. R. Co.
NEWARK, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hacketstown to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

6t8. J. B. BASSINGER, Chief Engineer.

TO RAILROAD CONTRACTORS.

Sealed proposals will be received at the office of the Pacific Railroad, (of Missouri,) in St. Louis, till March 25, 1864, for doing the graduation and masonry of about thirty-five miles of the road, being from Holden, in Johnson County, to a section in Jackson County between the Little Blue and Independence. Profiles, list of sections to be let, giving time as to when they must be completed, forms of bids, specifications, &c., can be seen at the office of the Chief Engineer in St. Louis.

Bids should be made for each section of about one mile, and no distance greater than ten miles will be let to any party or firm.

Payments will be made monthly in cash, fifteen per cent. being retained till the completion of the work.

Bids should be addressed to GEORGE R. TAYLOR, President, and where the bidder is not personally known to the President or Engineer, he must accompany his bid by substantial references, and should give also his post-office address, and he will be informed of the acceptance or rejection of his offer.

The company reserve the right to reject any or all bids.

T. McKISSOCK, Chief Eng'r and Sup't.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

American Railroad Journal.

New York, Saturday, March 19, 1864.

Boston and Roxbury Mill Corporation.

From the report of this company, it appears that the receipts during the year 1863 were $162,156 24; cash on hand, $52,138 30; notes receivable, $35,550 00; total, $249,844 54. Expenditures for ordinary expenses and filling flats, $52,770 14, and dividends, $69,036, making a total of $121,806 14, which, deducted from the above, leaves $128,038 40. Due on old dividends, 1,485 50, leaving available for 1864, $126,552 90. Deducting a dividend of $5, payable Jan. 4, 1864, ($35,000) the sum of $91,552 90 is now left for contracts and other purposes. The corporation has sold during the year 60,000 feet of land for $148,710 or $2 48 per foot. A contract has been made with N. C. Munson, for filling the flats between the sluices and the Roxbury branch. This contract will furnish 254,250 feet of saleable lands. The work is now making such progress as will ensure in the spring sufficient quantity of land to meet the demands of the market. The following named gentlemen were elected Directors for the ensuing year: C. H. Parker, B. T. Reed, J. A. Davis, S. Jennison, William Gray, Jr., W. W. Tucker and D. N. Spooner. William S. Whitehall was re-elected Clerk.

☞ Holders of bonds of Allegheny county Penn., the coupons of which are payable at the office of the Pennsylvania Railroad Company, are informed said bonds can be converted into the stock of the Pennsylvania Railroad Company, at their office in Philadelphia. By act of the Legislature, it is lawful for executors, administrators, guardians and trustees, holding bonds of Allegheny County, to exchange the same for stock, and to hold or dispose of the same without responsibility. The privilege of conversion can be revoked by the Commissioners at any time.

The Harvest in the United States.

The Commissioner of Agriculture, in his annual report to the President, estimates the yield of the great staples of agriculture to the United States in 1863, as compared with the previous year, as follows:

	1862.	1863.
Wheat, bu.	189,993,600	191,038,239
Oats, bu	178,520,097	174,858,167
Corn, bu	583,704,474	449,163,893
Hay, tons	10,600,000	9,280,000
Tobacco, lbs	208,807,078	258,462,413
Wool, lbs.	68,524,172	79,405,215

Lebanon Springs Railroad.

A bill is now before the Legislature, authorizing the Lebanon Springs Railroad Company to change the Northern terminus of its railroad, from the Massachusetts State line, as declared in its articles of association, to any point within the town of Hoosick, in the county of Rensselaer, or the town of White Creek, in the county of Washington; and to construct a branch to a terminus at the Vermont State line, at a point of junction with the Western Vermont Railroad; and also to construct a branch with a terminus in either or both of the cities of Albany and Troy. Provisions are also made in case of a consolidation of this road with the Western Vermont Railroad.

Gold Mines of Idaho.

We notice that five light draught steamers are advertised to run from La Crosse to Fort Benton and other places on the Missouri River the ensuing season, passing through nearly one thousand miles of the gold bearing territory of Idaho. The first departure will be on the 5th of April next. This line connects with another on the Yellow Stone. The route is pronounced in all respects safer and pleasanter than the overland.

☞ A bill has been introduced in the Wisconsin State Senate, providing for the construction of a ship canal of such width, depth and dimensions as may be required by all classes of shipping on the lakes between the head of Sturgeon Bay in Door County and Lake Michigan, so as to connect the waters of said bay with said lake, and to construct a breakwater and harbor on the lake shore at the north of said canal, and to dredge and improve the said bay so as to make a convenient and safe anchorage and harbor in Sturgeon Bay. The bill provides that the capital stock will be $250,000.

Galena and Chicago Union Railway.

The earnings and expenses of this road for the years ending December 31, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From freight	$1,308,847 98	$1,621,096 94
" passengers	389,832 71	496,316 34
" mails, etc.	78,860 73	75,882 18
	$1,777,541 42	$2,193,295 46
Expenses, viz:		
Repairs of track	$213,755 43	$233,661 55
" bridges	29,285 67	74,678 09

Operating B. & M. R. R.	.....	14,341 08
Incidentals	5,150 84	5,621 63
	$942,936 08	$1,277,726 41
Net earnings	$834,605 89	$915,569 05

A comparison of the earnings of the past with those of the preceding year, shows an increase of $415,754 04; with an increase in expenses of $334,790 38—making the increase in net earnings $80,963 66. The income account of the company is as follows:

Surplus earnings, January 1, 1863..		$355,652 93
Operating receipts, as above.....		2,193,295 46
Interest on C. R. & M. R. R. bonds.		1,415 05
Profits on securities temporarily used for sinking fund payments..		6,770 69
Total.....		$2,557,134 18
Accounted for as follows, viz:		
Operating expenses...	$1,277,726 41	
Dividend Jan., 1863, 3 per cent.....	180,852 00	
Dividend July, 1863, 3 per cent.....	180,852 00	
Interest on 1st mort. bonds	138,820 00	
Interest on 2d mort. bonds	93,520 00	
U. S. tax on dividends	11,176 66	
		1,882,447 07
		$674,687 06
From which deduct—		
Amount charged improvement account.....	$81,825 94	
Cost of eight 1st mortgage bonds and ten 2d mortgage bonds, for sinking fund.....	19,500 90	
Cost of $7,000 1st mortgage bonds, purchased and canceled for sinking fund in 1858	6,888 75	
Commission and expenses, extending 1st mortgage bonds	8,608 88	
Loss on Beloit and Madison stock	600 00	
Loss on cars taken by the U. S.....	8,464 20	
		120,888 12
Surplus, January 1, 1864		$553,798 94

The operating expenses, from the figures above presented, are 58.256 per cent. upon gross earnings, about 5 per cent. over expenses of last year—the rate then being about 53 per cent.—an excess reasonably accounted for by the higher value of fuel, material, and labor. If, however, there were deducted from the amount stated the sum of about $82,000,* properly chargeable to the improvement account, the ratio of expenses to earnings would be reduced to 54.3 per cent. The amount of State, County, and municipal taxes, (amounting this year to $72,246 43,) have always been charged to this account, a procedure not adopted by many other roads, and not strictly forming any part of operating expenses.

Surplus Earnings.—The apparent surplus of $553,798 94, (more than half of which consists in the cost of materials on hand for future use,) might have justified a larger dividend than that declared at the commencement of the current year. The Board of Directors were of the opinion that the interests of the stockholders demanded the application of a part of this surplus to increase the motive power of the road, and in the construction of additional freight cars for enlarging the business of the company. It is now nearly six years since any new locomotive have been added to the rolling stock of the road, except two, partially worn, obtained through the lease made in 1862, with the Chicago, Iowa and Nebraska Company. The stock upon the Elgin and State Line road is barely sufficient for the business originating upon it.

* Grain Elevator, $25,318 54, Passenger House, $20,000, Des Plaine Bridge, $36,736 75; in all, $82,055 29.

Bonds.—The first mortgage bonds, all of which were due on the 1st of August last, with the exception of about forty bonds of $1,000 each, have been extended in accordance with the proposition made to their holders in September, 1861. A small number of these extended bonds are within the control of the company for sinking fund purposes. Provision has been made for the payment of those outstanding upon presentation.

Amount of first mortgage bonds outstanding		$1,981,000 00
Less deposited with Trustee of 2d mortgage bonds, $143,000 on account of sinking fund, and $3,000 purchased for same fund, for May next.....		146,000 00
		$1,835,000 00
2d mortgage bonds		1,336,000 00
Amount of original bonded debt...		$3,171,000 00

This amount has been further increased this year by the issue of $189,000 for the purchase of the Elgin and State Line road with its rolling stock, connecting with the main line of your road near Elgin, and extending to Richmond, near the northern line of this State, making a line of road of thirty-three miles. This purchase was made in accordance with a circular of this Board, dated August 19th, 1863, and by your consent as expressed in your answers thereto.

Rolling Stock.—Early in 1863, there were delivered to officers of the United States Government upon requisition, fifty box and ten platform cars. These have been replaced from the shops of the company at an apparent loss of $8,464 20, this amount being the difference in the cost of the new cars over the amount allowed by the Government for those which had for some time been in use.

A similar requisition was made in November last for ten more cars, the account for which has not yet been adjusted. These last are so nearly duplicated as to be included in the statement of cars on hand. The Government has also required *the use* of sixteen box and platform cars, which have been delivered to the Michigan Central Company, and are not yet returned.

In addition to those replaced, there has been built by the company sixty box, eleven cattle, nine platform and two combination cars, at an expense of $62,385.

The Directors have authorized the purchase of ten freight engines. Contracts have been made for six only, two to be delivered in May, and four in August. The limited number of cars, and especially of engines, with which the business of the past year has been performed, has required repairs and renewals to be made at unusual hours, and often in a hasty and imperfect manner. Such has been the continual use of locomotives now in service, though no serious accidents have occurred, as to increase the account for "repairs of locomotives" to the amount of over $40,000 more than expanded last year for this purpose. The business of your roads demands an enlargement of rolling stock to at least, one hundred locomotives and two thousand cars. It consists at this time, including that obtained from the Elgin and State Company, and that purchased and received from the Chicago, Iowa, and Nebraska Company, of 1,540 cars of all descriptions, and 74 locomotives. Of these, fourteen are only adapted to and used for switching purposes, leaving sixty for passenger and freight trains.

As before stated, the Iowa line will be ready for operation to Nevada, probably, by the first of May, and the Beloit and Madison completed for the fall business, making the length of the several lines to be operated five hundred and fifty miles.

Western Roads.—The tables of the Secretary, exhibit the amount of the earnings of the two roads respectively, with the operating and other expenses, from the 1st of August, 1862, when the leases took effect, to 1st Jan., 1864, a period of seventeen months. Including the sums of money expended for improvements, (the most of which this company, by the terms of the lease, was bound to make,) consisting mainly in fencing the road, the construction of cattle yards, a station house at Cedar Rapids, and additional shops at Clinton, the eastern terminus, there is a charge against the company of nearly $19,000. Under the former running arrangement with C. I. and N. Railroad, a drawback of ten per cent. was allowed that company for all business from that road passing over the whole or a part of yours. Deducting from the earnings of these roads the amount properly belonging to way and western business, upon which no drawback was allowed, this company has derived a small revenue from the business brought to it, even during the early months of the lease, over that obtained previous to Aug., 1862. It may be reasonably expected that as the line of the C. R. and M. River R. R. is extended westward, and as the population of the State of Iowa is increased by immigration, the traffic upon the Western roads will not only be remunerating to each, but very largely increase the volume of business over your Fulton line.

About the first of December last, trains were run to State Centre, fourteen miles west of Marshalltown. The remaining part of the line to Nevada, the county seat of Story County, is so far completed that that place will be reached early in the Spring.

Northern Roads.—Work has progressed moderately during the year upon the Beloit and Madison Road, leased to and operated by this Company. Trains are now run to Evansville, twenty-five miles from Beloit; and the track is nearly completed to Oregon, within twelve miles of Madison, the capital of the State of Wisconsin. This line will probably be ready for the fall business of the present year.

A change in the directors of the Sugar River Valley Railroad Company early in 1863, adverse to the action of their predecessors, prevented the completion of a contract then nearly perfected by a former Board. It is not now probable that your interests will induce a renewal of further negotiations with that company.

Grain Elevator.—Late in the fall of 1862 it was apparent that this building, constructed by the Company at an expense (including ground) of $186,000, needed large and extensive repairs. The foundation being defective, the building had settled unevenly, causing crevices in the walls, breaking some of the timbers of the roof and deranging the shafting and other machinery. It was deemed advisable to make thorough repairs, not only of the foundation and walls, but of the timber supports and bins. This was done at an expense of $25,318 54; and it is believed that the elevator may now be used for years without additional expense. It now yields an annual rent of $25,000.

Passenger House and Offices on Wells Street.—The original building was erected before the completion of the main or Freeport line. It was always too limited, either for passenger accommodations or office business. It was necessary to use other rooms for a part of the offices of the road at a distance from the principal office, making it inconvenient for all transacting business with the Company. During the year the main building has been considerably enlarged, with such an elevation of the walls as to give an additional story, adding much to symmetry of the structure, and affording a commodious room for the use of the Stockholders and Directors, and offices sufficient for the present purposes of the road. The expense incurred in this improvement is about $20,000.

Bridges.—The wooden structure over the Des Plaines River has been replaced by an iron bridge, at an expense of $36,736 72.

The work upon the bridge from Little Rock Island to the west bank of the Mississippi River, at Clinton, has been commenced, and will be prosecuted to completion as rapidly as circumstances will permit.

Fuel.—This important element in railway operations has demanded the serious attention of this Board. The country upon either side of the Mississippi is essentially destitute of timber. The supply of wood has been sensibly diminishing since new lines of road have been completed and

put into use, and, consequently, the price of this article has been affected by the unerring rule of demand and supply. It is now evident that the country through which your roads pass cannot longer be relied upon for the supply of fuel. The coal used in engines fitted for its consumption, has been mainly purchased by the cargo at Erie, Penn. Its quality is excellent, but the expense is large. The Illinois coal is much inferior, and its cost very considerably less per ton. It may, however, and must be used to a great extent for railway purposes. There are no coal beds on the line of your roads; the nearest are those upon Rock River, about thirty miles south-east of your terminus at Fulton. The quality of this coal is equal to the best of that yet found in the northern part of this State, and the supply is said to be inexhaustible. A comparatively short and easy line would connect Fulton with these coal beds, affording not only a supply of fuel for the use of the roads east and west of that point, but also a considerable traffic in that article for one hundred miles upon either side of the river. In addition, the introduction of a new supply of fuel into this district of country, for family use and mechanical purposes, will limit the consumption of wood to such an extent, as to gradually reduce its cost to its former stardard.

The length of road operated by the company is as follows:

Main Line—Chicago to Freeport	121.00	miles.
Second Track	30.00	"
East Elgin Branch	1.50	"
Chicago, Fulton and Iowa Line	105.50	"
Clinton Bridge Branch	1.75	"
South Branch	10.50	"
Beloit Branch	21.00	"
Sidings and gravel pit tracks	50.00	"
Total	341.25	"

There was laid in the track during the year, 5,842 new rails, (equal to 1,170 tons) 20,631 repaired rails, 42,015 new ties, 170,648 lbs. spike, 15,838 chairs, 246,740 feet timber and plank, and 122 frogs. Of the new rails, 200 tons were purchased, and the balance consisted of old rails rerolled. The company have now a surplus of 1,737 tons of iron. Much more, both of iron and ties should have been provided and laid. The extreme difficulty of obtaining these materials alone prevented. During the coming year provision should be made for at least 3,000 tons of new rails, and 150,000 new ties.

Injured rails taken from the track are repaired at the company's shops, by welding new iron over the defective parts. The total number of lineal inches of new iron thus welded during the past year was 540,499—an average of about 28½ inches to each rail. Of this aggregate, 450,620 inches were due to repairs on the ends of rails, while 89,879 inches were welded in the middle of rails—thus showing how largely the failure of rails is due to defective joints. The total amount of new iron used for these repairs was 143,800 lbs., at a cost of $6,471 13, while the cost of coals, tools and labor was $15,965 46, making the average cost of repairs per rail, $1.21, and the average cost per inch welded 4.1 costs. The cost per ton of rails is about $6, exclusive of transportation, taking out and relaying.

The new bridge, 160 feet in length, across the north branch of Chicago river is in progress. It is be a draw bridge swinging on a pivot in the centre, allowing a passage way for vessels of 66 feet clear space on each side of the draw pier. The bridge across the Kishwaukee river, near Huntley, consists of two spa ns of 21 feet each. The superstructure is of rolled iron girder beams, 15 inch deep, manufactured by the Pheonix Iron Company, of Philadelphia. They rest upon a pier and abutments of masonry. One span is already in place, and the other will be put up soon. The upper and lower chords and many of the braces, etc., of the wooden truss bridge, 340 feet long, across the Kishwaukee river, at Cherry Valley, have been removed. A new bridge has been built, and brought into use, across the Des Plaines river, at Harlem. The bridge is of iron and carries two tracks. Its total length is 210 feet, divided into two spans of 97 feet each. Two heavy trusses carry the load; and the iron floor beams are securely trussed. The bridge rests upon a pier and abutments of masonry, which are founded upon piles. The old pile bridge across Du Page river at Winfield has been replaced by a double arched bridge of stone, founded on piles, with openings of 32 feet each. The arches are 30 feet long, carrying two tracks. The pile bridge across Salt Creek, near Cottage Hill, is being replaced by stone arches similar to those built at the Dus Page river. Thsee are also founded on piles. During the ensuing year, several small bridges on the Chicago, Fulton and Iowa line, of from 20 to 50 feet spans, will need to be renewed.

Miles run by passenger and freight trains, 1,012,630; by wood and gravel trains, 285,315; by C., B. & Q. trains on G. & C. track, 186,120—total, 1,484,065, an increase over the previous year of 63,784. Average cost for track repairs 15.7 cents per mile of trains run.

Number of through passengers carried, 47,904; way passenger, 417,972—total, 465,876. Total mileage of passengers, 20,402,129. Tons of freight carried, 511,710; tons carried one mile, 49,166,289. Aggregate mileage of freight and passengers, 69,568,418. Number of passengers or tons carried one mile, 53.6.

The earnings of the Chicago, Iowa and Nebraska railroad, Albany railroad, bridge and ferry, operated under the lease, from Aug. 1, 1862, to Dec 31, 1863, were:

From freight	$225,266 04	
" passengers	76,516 35	
" mails, etc	5,833 83	
" bridge and ferry	59,475 18	
	$367,091 40	
Add freight on materials for C. R. & M. R. R.	2,879 44	
	$369,970 84	
Operating expenses	$140,170 48	
Improvements	30,598 61

The directors chosen June 3, 1863, are as follows:

President.—WILLIAM H. BROWN.

Directors.—Wm. H. Brown, Orrington Lunt, Geo. Watson, Edward K. Rogers, Mark Skinner, Benj. W. Raymond, Silas B. Cobb, John Wentworth, John H. Foster, Thos. D. Robertson, Wm. H. Ferry.

Vice President.—ORRINGTON LUNT.

Acting Director.—WILLIAM H. FERRY.

General Superintendent.—EDWARD B. TALCOTT.

Assistant Sup't.—EDWARD H. WILLIAMS.

Secretary.—WILLIAM M. LARRABEE.

Auditor.—GEO. M. WHEELER.

Engineer.—W. S. POPE.

Hudson River Bridge.

The work on the Hudson River Bridge is to be commenced as soon as the proper depth of water in the river will allow. Samuel N. Payn has been awarded the contract for digging the trenches for the abutments. The stone is now being cut for the abutments on the Island, opposite the city.

Sale of Stock for Non-Payment of Assessments.—Strict Construction of Statutes.

In the case of the Lewey's Island Railroad Co., *vs.* Bolton, the proceedings to be taken under the statutes of Maine to sell the shares belonging to stockholders for non-payment of assessments, and the claim of the corporation for any deficiency upon such sale were discussed. Provisions of the same general nature in the statutes in regard to corporations render the case applicable in many other States. The case affords an illustration of an ancient and familiar rule of law, that to sustain a proceeding instituted under a mere statute authority, it is necessary for the party claiming the benefit of the statute, to show that it has been strictly complied with. Another principle of the law, that forfeitures are not favored beyond the letter of the statute, also governs the case. The claim in suit was stated by the plaintiff as follows: that the defendant subscribed for two shares in the capital stock of the company; that certain assessments had from time to time been made on said shares; that the defendant after due notice had failed to pay the same; that the Treasurer of the company had according to law advertised and sold the same for such unpaid assessments to a third party for a sum less than the sum due, and that the defendant had become liable to pay the difference between the sum due and the sum for which they were sold. The following is the decision of the Appellate Court:

KENT, J.—This action is not brought upon the promise in the subscription, to pay the assessments from time to time as they might be made. It is not upon an open executory contract to take and pay for two shares. But it is based upon the statute liability, which arises only after legal assessments and a neglect to pay, and a sale for non-payment, and as deficiency after applying the proceeds of sale. It assumes that the defendant is owner of the two shares, and that he has neglected to pay legal assessments, and that his shares have been sold and transferred to another by the company, according to the statute and by-laws. To sustain this action for the deficiency, upon the grounds of this statute liability, the terms of the statute must be complied with. (Portland & Saco Railroad Company *vs.* Graham, 1 Met, 1; Lexington and W. Cambridge Railroad Company *vs.* Staples, 5 Gray, 522.)

The charter of this company authorizes the directors to make assessments, and provides that "the Treasurer shall give notice of all such assessments, and in case any subscriber or stockholder shall neglect to pay any assessment for the space of thirty days after such notice is given as shall be prescribed in the by-laws of said corporation, the directors may order the Treasurer to sell such share or shares at public auction after giving such notice as may be prescribed as aforesaid, to the highest bidder."

The same section provides that the delinquent subscriber or stockholder shall be held accountable to the corporation for the deficiency. It appears by the by-laws adopted by the company, that the notice of assessments may be given by publication, or by a personal notice from the Treasurer of the company, and in case the directors shall order a sale under the fourth section of the act above quoted, the Treasurer shall give forty-eight hours' notice of the same in two conspicuous public places in the city of Calais, and shall notify such delinquent subscriber whose stock is to be sold, by leaving or causing to be left a copy of said notice at his place of residence, or by giving him in hand such notice, to be signed by the Treasurer, or by one of the directors in his behalf."

The directors on the 11th of December, 1857, by vote, ordered the Treasurer to sell the defendants' shares on account of non-payment of assessments, at auction, on the 18th of December, at the post office in Calais.

1. The defendant objects that there is no evidence that thirty days' notice had been given of the assessments before the order to the Treasurer to sell. The only evidence on this point is the testimony of the Treasurer who says that "he notified him of all the assessments more than thirty days before the sale," this notice might have been less than thirty days before the order to sell. It must appear affirmatively that the defendant had neglected to pay at least thirty days before the order to sell.

2. The order to sell, in accordance with the terms of the charter, was to make sale at public auction to the highest bidder. It does not appear by the testimony of the Treasurer, which is the only evidence on this part of the case that the shares were sold at public auction, or that the notice of sale contained any reference to a public sale. It does not appear that the sale was at the post office in Calais. There are manifest deficiencies in the proof.

3. It does not appear that the notice of the time and place of sale, which the Treasurer says he gave defendant in hand, was signed by the Treasurer, or by a director in his behalf.

4. The by-laws of the company require that the notices of the time and place of sale shall be posted in "two conspicuous public places in the city of Calais." The testimony is that they were posted in two public places in that city. It was decided in Bearce *vs.* Fossett, 34 Maine, 575, that an officer's return, that he posted the notices in a public place, without saying in a public and conspicuous place as required by the statute is insufficient. Perhaps, if it had been shown that a notice properly signed had been given in hand to defendant, that fact as to him might have been sufficient notwithstanding the defect in proof as to the posting.

5. It appears from the records of the directors that assessments had been made from time to time to the amount of $100, each share; and after this at one time another assessment of $100, each share, was voted. This last vote was probably passed on the assumption of the invalidity or doubt of the legality of the former assessments It provides that whatever sum had been paid on former assessments should be allowed on the new, towards the payment thereof. But it does not abrogate or disannul the former assessment in terms. The charter provides that no assessments shall be laid upon any share in said corporation of a greater amount in the whole than, $100. It does not appear whether the shares were sold for non-payment of all the assessments, or only upon the last. It is very clear that a share could not be legally assessed more than $100, or be sold for non-payment of assessments beyond that sum. What was in fact done at the sale on this point does not appear. As the records stand the defendants' shares are assessed $200 each, and stand apparently charged with all except $10 on each, paid before the last assessment. It should at least appear clearly that the sale was for some legal assessment, and did not include any illegal one. (Stoneham Branch Railroad Company *vs.* Gould, 2 Gray, 277.)

The foregoing reasons are sufficient to require us to order a non-suit as the case stands. But, as it is possible that these defects might be remedied upon a more minute examination of the records, or of the witness, we have looked into the other points raised, and are strongly impressed with the conviction that there are insuperable difficulties beyond those before indicated, in the plaintiffs' case. Without entering minutely into the consideration of all the facts and arguments on the various points, we are not satisfied that the whole of the $200,000, the minimum sum required by the charter as the capital stock has ever been subscribed within the fair intendment of the statute. It is well settled that such subscription is required before any legal assessment can be made. (O. & L. Railroad Company *vs.* Veazie, 39 Maine, 581.)

It is also settled that the subscription must be made in good faith by men apparently able to pay, and for shares to bear their equal part. (Penobscot Railroad Co., *vs.* White, 41 Maine, 512.) It seems to be conceded that the subscriptions by Jones & Rockwood for 225 shares were made by men not apparently responsible. The whole number of shares subscribed for on the books appears to be 2,557. We cannot doubt that the subscriptions by the directors and contractor, on book B, for 880 shares were made under the votes of July 31, and August 4, 1855. By those votes, the shares taken under them were to be preferred stock and to draw ten per cent. interest forthwith, and the Treasurer was authorized to execute the necessary papers to carry the bargain into effect. Such a subscription with a preference which gave to the shares the place and value of bonds cannot be regarded as within the intention of the requirement. If we deduct the above shares, 605 from 2,557 the remainder is 1,952 only. The facts in relation to the last subscription for 800 shares by the directors are not very clearly stated in the testimony. Enough, however, appears to raise a very serious question, whether that subscription was such that the company thereby secured an actual sale of, or a subscription for the 800 shares to be thereafter held by individuals who were to bear their proportion ate share of the expense incurred by the corporation. According to the agreement of the parties.

Plaintiff non-suited.

Rock River Improvement Company.

A bill has been introduced into the Wisconsin legislature, authorizing Edward McKey and eight other associates to improve Rock River from the State Line to Lake Horicon, render the same navigable by locks and dams, and run vessels thereon by steam or otherwise, for freight and passengers receiving pay for the same. The company may organize for business as soon as $30,000 are subscribed, and ten per cent. paid in. Shares are to be $100 each. The Company is to choose seven directors with proper officers. The act contains the usual sections, authorizing and controlling the action of the company as to right of way, exploration, bridges, dams, water courses, entering upon lands, &c.

American Railroad Journal.

Saturday, March 19, 1864.

Stock Exchange and Money Market.

The great plentifulness of money while it secures to the Government an absolute success for all the loans it may have to put upon the market, gives an impulse to speculation which nothing can overcome. A very large class of persons, who in years past have found themselves restricted by narrow circumstances and by the want of means, or have been simply impatient under the customary slowness of regular business by which, however, the largest and the stablest fortunes are most certainly obtained, have seized the golden opportunity of the hour to take all risks, to venture at every opportunity, or as the Scotch proverb states it, "to make a spoon or spoil a horn." In many, very many cases, a few hundred dollars fortunately invested have rapidly increased to thousands, in other cases small stocks of merchandize on hand have rapidly appreciated han-

dreds of per cent; in a rising market; all sellers are gainers for the time. It is not surprising then that in this city, where we have so large a population, so much wealth, so many foreign houses with capital and home credits, where exchange for every mart in the Union is regulated, and where keen and hopeful adventurers flock from all parts of the world, we should see the Money Market and Stock Exchange in a state of feverish excitement, particularly where the variety of operations is so great, and the extent of the currency which floats here, is counted by hundreds of millions of dollars. We have not yet quite reached the fury which marked the time of the Mississippi and South Sea bubbles, and it is to be hoped we never shall. But as it is, we have to fear that when paper and gold once more are convertible terms, or rather when our currency is again redeemable in specie, the parties holding much of the property for which they are paying such enormous premiums, will find themselves left in the lurch and in a very precarious position. It is the part of real prudence then not to be tempted into the purchase of any property whatever, which will not realize beyond all question the annual regular interest, and the principal, in the final and universal standard. We think it our duty to express our opinions frankly on this subject, while at the same time we adhere to those frequently expressed, that the country itself is rich and strong, full of resources and energy, rapidly increasing in population and extent, and fully able to bear all its burdens. This truth as a whole may be unhesitatingly accepted, and yet nevertheless great disaster is very likely to follow and overtake every speculation which rests purely on a paper basis. It is this idea which cannot be too frequently impressed on the public mind, and if our readers are wise they will act upon it, now while they can.

The gold question has had considerable effect on the Money Market the last week. The uncertainty of the action of Congress, the difference of opinion prevailing there and elsewhere as what was best to be done, and how best to do it, has kept operators in a state of suspense, and dealers in other articles have been equally undecided. It is understood as we write this, that Congress has given the power to the Secretary of the Treasury to sell his surplus hoard at his discretion, taking care not to part with what may be necessary to keep for the accrued interest, and one per cent. for the sinking fund as originally intended. We can scarcely account for the opposition to the measure. We fear it has arisen and been kept up from unworthy motives, and proceeds from that intense desire of making money, which seems to be active in direct proportion to the public confusion. History teaches us by example, that in political crises, in times of financial revulsions, and in the midst of wars there is a class of men who ignore every consideration but that of immediate personal advantage, no matter what the consequences are to the Nation at large. Napier in his Peninsular war recounts the constant and most extortionate conduct of those who had the opportunity of fleecing the British Government in its financial arrangements for the support of the Peninsular armies, and the audacity with which the operators in gold wrung the highest prices for it, though paid for in Government bills, which were known to be eventually as good as gold.

We cannot expect to be exempt from the lot of other people under similar trials, but when we have the power of rendering them less dangerous, we should not hesitate to adopt the remedy.

The real objection on the part of the majority in Congress which is friendly to the Government, is doubtless an honest jealousy of giving too much power to the Secretary; a fear that he will use it to enrich personal friends, and advance his political interests. But now that he has withdrawn his name from the Presidential contest, political anxieties may be dismissed from the calculation. We presume the sale of the gold to be made by the Secretary will necessarily be through Mr. Cisco the Assistant Treasurer, and if so, it may be as well taken for granted, that the gentleman whose integrity, large private fortune, and independent politics have for several administrations pointed him out as a man to be trusted with our millions above all others, may also be trusted with the management of a comparatively insignificant amount in the street. If the Secretary of the Treasury has had any friends to enrich, he could have done so long ago. Indeed it would be a wholesome check on the gold operators, if they could be brought to believe that they were to be out-generalled by a better informed class of operators than themselves. Let the street once believe, no matter whether it is true or not, that Mr. Chase's friends were going to make a few millions out of them, and the crowd of speculators would rapidly be thinned out, and gold would fall itself without the necessity of parting with any great amount on the part of the Government. The readiness with which a fall or a rise takes place on the smallest rumor, is proof of the purely speculative character of the operations in gold. If it had a substantial value in our market at the present quotations, no rumor would affect it. We do not see flour fall on mere rumors, or the passage or rejection of a resolution in Congress. But we have seen in Holland the tulip mania rampant, and prices of bulbs raised by competition, combination, and exaggeration higher than gold has ever yet been.

It is absurd to deny Mr. Chase the power of exercising his discretion in this one matter, small in amount at the best, when we have allowed him to devise, control and regulate our whole national indebtedness, with an unrestricted power as to time and place with regard to most of his issues, and when if he has not proved to be a single minded and virtuous statesman, he could already have retired with immense private gains. If Mr. Chase is not now fit to be trusted with the disposition of the surplus gold when the interests of the country require it to be made, then he was never to be trusted with the management of sixteen hundred millions of funded debt and currency, and all the gold beside.

We consider this a vital question. We insist upon it that the rise of gold is seriously affecting the prices of other commodities, and distressing a large and loyal class of people, who are willing to meet taxation to any extent, but are unable to meet an advance of 2 and 300 per cent on articles of necessity. To give a single example in this city. One article of fresh food used in large quantities by the poorer classes, the product of our domestic fisheries, formerly sold at 6 cts. a lb., is now sold at 22 cts. a lb., and there is no other excuse offered for the advance in price, since the article is as plentiful as ever, than the rise in gold. If there be any one thing which is likely to dishearten the people in this struggle, beyond the singular manner in which it has been conducted, it is that the Government which is the principal party in making gold dear, should refuse to part with its surplus hoard, and excess, in order to make it cheap. Those members of Congress who do not see the force of the argument must be blind indeed. As we go to Press we have the pleasure of recording the passage of the gold bill so called.

The Railway market continues to be very active and prices firm. Proposed changes to be effected by legislation have made the Erie and Harlem prominent the last few days. In both cases the changes will materially advance the substantial interests of the companies. The extension of the Harlem through the Lebanon Valley so as to make a through connection with the Northern and Canadian lines was pressed on the consideration of the company by the JOURNAL, two years ago; as a clear matter of duty, if not of interest. Our weekly tables will as usual record the changes in prices of the week, and the heavy advances in some of the favorites of the hour. Government securities are firm and in fair demand.

The money market is a little stiffer, since 7 per cent is taken, where 6 would have done last week; 5, however, only is paid under some circumstances.

Exchange for the steamer of Wednesday was quoted at 175@175½.

We should not forget to notice the important fact that large quantities of cotton are now arriving at this port from the Southwest. As the States lately in rebellion come back to the Union, the people are beginning to conform to the better condition of things, and to be disposed to realize from what remains of their products.

Within a fortnight past 15,332 bales have arrived in the city from that part of the country, while we notice small cargoes reach us simultaneously from ports in South America, where the culture is encouraged and progressing. We are compelled for want of space to omit the discussion of several other questions of finance just now coming into view. We close this part of our article however in a most hopeful mood. From the best information we are able to obtain, we come to the conclusion that the country is coming strong and bright out of its present trials, while the Old World appears to be entering into a long unprofitable and bitter contest for dynasties, for which their subjects without the least possible interest in the questions themselves, are compelled to toil and die.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Champlain Canal.

The Commissioner of Public Works has officially recommended to the Canadian Government the construction of a ship canal between the St. Lawrence and Lake Champlain. We have not seen the report, but from the allusion to it in the Montreal *Gazette*, we believe it recommends an appropriation for the object. The *Gazette*, which fears it will damage the foreign trade of Montreal, admits however, that if "grain could be delivered by vessels from Chicago, to the Railways at Rouse's Point, Burlington and Whitehall instead of at Buffalo, Oswego and Ogdensburg, and that were all the effect to be produced the project would undoubtedly be one well worthy of Canadian consideration. But the scheme as a whole involves also a large canal into the Hudson, enabling grain to be delivered still cheaper at New York itself than is now done."

This is exactly the reason why we are in favor of it, and we also believe it will benefit Montreal, by giving it a new, safe, cheap and accessible water communication with New York.

Compensation to Railway Servants.

Some months ago we alluded to a principle which obtains in the management of the celebrated Orleans Railway in France, which is to set apart out of the profits of the company, a certain per centage for the benefit of their servants and employee's. An eminent Engineer and manager of one of our great lines of railways expressed to us at the time, his belief in the efficiency of the plan, and his personal willingness to adopt it. Since then we have been able to obtain some further information on the subject and place it on record, for we are satisfied that great improvements in our railway system are likely to take place, especially in the direction of rewarding faithful and competent labor.

We never see a locomotive dash out from a depot with its precious freight of human lives, without feeling that to one man above all others at that moment, and all the while the train is in motion, is committed a most important and sacred trust. Financiers, managers, officers are all important in their place, but the engineer or driver of the locomotive, is the chief of all authorities for the time being, and is under the most fearful of responsibilities, the moment he starts his train. It seems to us therefore that the best class of talent should be selected for such situations, and the largest salaries bestowed for such kinds of service. Considering the nature of the employment, the risk, the discomfort, and the responsibility, we are of the opinion that our locomotive engineers are not as well paid as they should be.

At all events there is one eminent European Company which has adopted the plan of adequate remuneration to its servants extending the princi-

ple throughout the whole range, from Directors to the humblest officials. Twenty years ago it was determined to distribute 15 per cent of the net profits annually among them in addition to their salaries something after the following manner, and since that time by judicious management it has been equal to 22 per cent on each employee's salary. The company succeeds in making extraordinary profits.

Before the 15 per cent. upon net profits is allotted to the staff, 15 per cent. is taken off the sum, to make, with what may be in hand, a sum of about £10,000, which is for appropriation under the following heads:

1st. To employees who have been wounded or injured in the service, or who have contracted illness so as to render them unable to continue their duties.

2nd. To the families of those who have died under illness, or who have been killed in the service.

3rd. To assist the families of poor worthy employees in the service who have been unfortunate.

4th. To recompense good services.

After the appropriation of the 15 per cent. for these purposes, there has still been left on the average of 20 years, an amount equal to 22 per cent. of each employee's salary. This 22 per cent. has been disposed of as follow:

7 4-12 per cent. cash payment to employee.
7 4-12 " paid for him into a Government Savings Bank.
7 4-12 per cent. paid for him into a Superannuation Fund.

When an employee's fund in the Savings Bank amounts to 1,000 francs (say £40), he then receives 14 8-12 per cent. cash, and also the interest on the £40. At the age of 50, payments to the superannuation cease, and an employee receives the 22 per cent. in full, with interest on the £40, as well as interest upon the amount paid into the superannuation fund.

From 1864 the 22 per cent., supposing the traffic yields that amount, will be disposed of as follow:

7 per cent. cash payment to employee.
5 " paid for him into Savings Bank.
10 " paid for him into superannuation fund.

The payment of 5 per cent. to the Savings Bank will not cease as before, when the sum amounts to £40. When the amount exceeds £40 it will be invested in Government Stock, in the employee's name. When he leaves the service he commences to receive the interest upon all he has paid, but he cannot touch the principal. At his death his children, or any other person he nominates, will continue to receive the interest, but the principal cannot be touched. The only exception to this is where an employee at the *offset* specially desires to abandon the capital after his death, and then he receives a high rate of interest during his life.

The nearest approach to any system of remuneration of a similar nature in this country, is that adopted on the Atlantic and Great Western, where houses and lots are conveyed to the employed, with the condition that at the end of ten years faithful service, the property shall be theirs in fee.

This is equivalent to a gift of several thousand dollars, and has already had the effect of securing very choice hands, superior talent and entire fidelity. When a company has arrived at a condition of management, that harmony of purpose and interest prevails throughout staff, rank, and file, it is sure of being conducted in the best possible manner, not only in regard to the public, but the interests of the stockholders.

We hope that the example of the Orleans Company will not be lost upon some of our great lines, and that we shall see the fruits of the imitation in larger profits, superior management, and in the increased confidence of the public in this, the greatest of all improvements in locomotion.

Mail Service with the Territories.

The Post-Office Department has just concluded contracts for mail service in Nebraska, Washington, Idaho, and other far off Territories. Among them is one providing that from the 1st of July next the mails shall be carried thrice from the intersection of the overland mail route at Salt Lake City, Utah Territory, by the way of Boise City and Auburn, to Walla Walla in Washington Territory, in ten days, in lieu of sending them *via* Placerville, California, to Portland, Oregon. This saves 1,200 miles of travel and ten days in the expedition of the mails for Oregon, Washington Territory, and Idaho Territory. This important mail service is let to Ben Holladay at $156,000 per annum.

The mails for the newly-discovered gold-mines in Idaho Territory and Bannock City are to be sent three times a week from Salt Lake City, and the contract is awarded Mr. E. S. Alford, commencing at Fort Hall and intersecting the Walla Walla route at that point.

New York Central Railroad.

The select committee, consisting of Hiram Sibley, D. H. Fearing, John Knower and William Kelly, appointed at the annual meeting of the shareholders in December last, on the accounts of the company, have published the following result of their investigations:

The committee appointed by the Shareholders of the New York Central Railroad Company, at their last annual meeting to examine the annual report of the company, respectfully report:

That, in order to perform their duty understandingly, they proceeded to Albany to make the requisite investigation, all the committee being present, save one. Every facility for making thorough examination of the books and papers was freely offered, and every inquiry promptly replied to—not only by the President, but by the Treasurer, Assistant Treasurer, Secretary, and the subordinate officers.

Before proceeding to a scrutiny of particular items, your Committee took up the Annual Report as a whole, comparing it carefully, item by item with the reports of previous years, that they might clearly comprehend the changes in the character of the business of the Road, or its management which time had wrought, and seek for an explanation of any material difference in the items presented.

One of the results of this analysis and comparison was a matter of surprise; the relative increase of freight over passenger traffic on the Road.

The passenger receipts in the years 1855 and 1856 were $3,200,000; they gradually fell, until in 1861 they were reduced to about $2,300,000, since which period they have rapidly increased, but have not yet reached $3,000,000. The freight receipts present a marked contrast to this, having risen from $2,500,000 in 1854, to $7,500,000 in 1863.

The decrease in passenger earnings is perhaps to be explained by increased competition, consequent on the completion of other great lines of Road leading from the seaboard to the West. The New York Central Railroad is not likely to suffer from such causes hereafter; and the construction of a railroad bridge across the Hudson at Albany, giving a better connection with the New York Roads, will, in the opinion of your Committee enlarge the passenger traffic.

Your Committee found the business of the office conducted on a system commendable for its good order and simplicity. The items in the various Sinking Fund accounts were carefully verified, and all the bonds found to be duly canceled.

After having made as minute an examination as was practicable of the financial statements contained in the Company's report, your committee came to the conclusion that they are in every particular correct.

Your Committee examined the improvements of the Company's works now in progress at West Albany; and, considering how large a share of earnings of the Road is derived from the transportation of freight, are of the opinion that all these new and enlarged arrangements are indispensable to the successful and economical performance of the rapidly increasing business.

The arrangements made and making at Albany for the receiving and forwarding of grain and of freight generally, are on a very large scale; and are calculated when completed to secure the greatest possible convenience and economy. The same may be said of the extensive provision at various points, for the accommodation of cattle transported on the road.

The machine shops at West Albany are, in extent and perfection of arrangement, truly admirable, and their erection at this point may be regarded as a measure of wise and liberal economy, as it will enable the Company to concentrate its principal business, in the way of building and repairing equipment, at this terminus and at Buffalo.

The fact heretofore referred to in this report of the relative increase of freight over passenger traffic, will account, in a great measure, if not entirely, for what has not failed to arrest the attention of stockholders, namely, the gradual increase of transportation expenses from 52 per cent. in 1854, to 62 per cent. in 1863. It is well known to all that the actual cost of handling and moving freights is much more in proportion to earnings, than on passenger business; it follows, therefore, that as the relative amount of freight traffic increases, the cost of transportation must increase also.

Your committee are of opinion that the policy of the Directors has been to charge to transportation expenses, rather than to construction account, numerous items which are of a substantial character, and which add to the *permanent* value of the road; thus transportation expenses are made to appear considerably larger than they would under a different practice.

If this be an error, it is one on the safe side; for it is surely better the report of the company should *under*-state, rather than *over*-state the actual net earnings.

The report of the past year shows this gratifying result: The net earnings have paid all the interest on indebtedness—seven per cent, in the form of dividends to stockholders, and have given a surplus of a million and a quarter of dollars, applicable to permanent increase and improvement of the company's property and reduction of debt.

Your committee approve the policy of making such improvements of the road as from time to time are found to be necessary; but this, should, if possible, be done from its earnings rather than from the proceeds of new loans. They at the same time are of the opinion, that at some time in the future, but not at present, the question may be entertained with propriety, whether such large additions to the permanent value of the company's property ought not to be represented by a corresponding increase in the amount of its capital stock.

At the annual meeting of the stockholders, which appointed the committee, the question of supplies and the best mode of procuring them was discussed, and action taken thereon with great unanimity by the passage of a resolution "recommending as a general principle that the supplies should be obtained through advertised proposals, and purchased from those offering to furnish them on the most favorable terms." This resolution, regarded by your committee as very judicious, disposed of the question, and no action has therefore been taken by the committee on that subject.

In closing this report, your committee would congratulate the stockholders on the excellent condition of their property; on the profitable results of business the past year; and on the pros-

pect of still greater success, which under prudent and wise management may be regarded as certain.

Commerce of New York.

The import entries of foreign goods at this port in February 1864, are officially given as follows:

In dutiable goods consnmption direct	$15,766,601
" " warehoused	4,991,398
Free goods	797,788
Total entries	$21,555,787

In February 1863, the amount was much smaller.

In dutiable goods direct consumption	$7,372,539
" " warehoused	3,657,775
Free goods	783,561
	$12,813,874
Increase February 1864	$9,741,913

The export clearances from New York in February of the present year were as follows:

In domestic produce	$13,662,218
Foreign re-exported	534,191
Specie and bullion	3,015,367
Total exports	$17,211,776

In February 1863, they were as follows:

In domestic produce	$17,780,586
Foreign re-exported	653,898
Specie and bullion	3,965,664
	$22,400,148
Decreased exports same month	$5,188,372

In order to better appreciate the extent of our foreign commerce, with which the English merchants are at present greatly gratified, and which figures largely in their Board of Trade reports, we give the following statement of the totals of imports of foreign goods for eight months in 1862–'3 and 1863–'4, that is to say from July to February in each period (in round numbers.)

1862–'3.		1863–'4.
$116,176,000		$130,540,000
1,194,000	Foreign specie	902,000

The export of specie during the same period of eight months was as follows:

1862–'3.	1863–'4.
$40,052,000	$37,595,000

Showing a decrease in the export of $2,457,000.

The exports of domestic produce from New York during the same period were as follows:

1862–'3.		1863–'4.
$122,283,000		$104,147,000
6,282,000	Foreign re-exported	3,839,000
$128,565,000		$107,986,000

With this increase of imports the receipts for customs increase, and the amount of gold on hand is enormous, for it must be remembered that the Government only pays it out in the shape of interest. In the same period of eight months, it was

1862–'3.	1863–'4.
$34,909,345	$48,930,136

The actual receipts of gold from California by the way of the Isthmus during the same period has been as follows:

1862–'3.	1863–'4.
$16,272,631	$6,858,230

This is however understood not to be the real balance shipped for American account, as the practice has been since the war, to ship to England from Aspinwall and to realise by exchange.

☞ President J. M. McCullough having accepted the position of General Superintendent of the Pittsburg, Fort Wayne and Chicago Railroad, the Board of Directors have appointed J. F. Clark as President, and Mr. J. H. Devereaux, as Superintendent of the Cleveland and Pittsburg Railroad.

Logan Copper Mine.

The property of this company comprises about two hundred acres of rich mineral lands, favorably situated upon elevated ground in the South range of Stukeley, Canada East. Its geological position in the midst of the rich belt of copper bearing rocks usually denominated talcose or nacreous slate. It is in this class of rocks, which extend from Western Vermont to Quebec, that the Sutton, Canada, Acton and Harvey Hill Mine, in Canada, are located. The rock is micareous and chloritic slate of a dark green with bands of other colors. The copper ores occur disseminated through the chloritic slates, chiefly at or near the juncture of different colors, and between the slate and limestone; veins of quartz and chlorite traverse the slate rocks irregularly, and where these occur they are usually marked by the presence of vitreous, variegated and pyretous sulphurets of copper in considerable masses.—*Boston Com. Bulletin.*

The Peninsula Railroad.

We took occasion recently to direct public attention to the magnitude of the products of the Lake Superior iron mines, stating that this year they would reach 300,000 tons, and would give employment to 100 sailing vessels. Hitherto the route for these ores has been over the Iron Mountain Railroad to Marquette, thence through Lake Superior, the Sault Canal, and St. Mary's River, to the lower lake ports. But this year a new route will be opened, through the Peninsula Railroad, from the mines to Bay des Noquets of Lake Michigan which, it is believed, is far more feasible than that hitherto pursued, and one which the navigating interest of the lakes cannot view with indifference.

THE TWO WATER ROUTES CONTRASTED.

The advantage of this new route may be summed up as follows:

1. The distance in the voyage from the lower lake ports, taking Presque Isle as the diverging point is 100 miles less.

2. The cost of towing through the St. Mary's River which amounts to about $110 both ways, and occupies about three days' time, will be avoided; and estimating the cost of chartering a vessel at $100 per day, would make a difference of $410.

3. The tolls for passing the canal, which is 12c. both ways, rating according to the vessel's tonnage and not her cargo, would also be avoided, which, on a vessel of 380 tons, whose average cargo would be 450 tons gross, would amount to $45.60, making a difference in expenses of $455.60.

4. Assuming the freights from Marquette to Cleveland to be $3.00 per gross ton, and that the depth of water in the canal is sufficient for ordinary vessels, the rates of transportation by the new route ought to be from 25 per cent. to 33 per cent. less.

5. As the depth of water in the canal during the past season was only ten feet three inches, the larger vessels were either excluded from this route or compelled to load light—vessels of 600 tons only loaded to two-thirds of their capacity. Such vessels, with ample depth of water, and loaded to their full capacity, can be navigated about 5 per cent. cheaper than ordinary ones.

6. Navigators complain that the sides and bottom of the canal were left rough and jagged, so that a vessel touching is injured; and from this cause, during the past season, many vessels arriving in port were compelled to go into dry dock. Hence, vessel owners are reluctant to engage in this trade. By the other route, no perils of this kind will be incurred.

7. The harbor of Marquette is merely an abrupt bend in the coast, affording no shelter from North and North-east winds, and hence vessels are often compelled to weigh anchor and put to sea. The harbor of the Bay des Noquets on the other hand, is deep, land-locked, and capacious enough to ride the whole lake fleet, with no liability to interruption while loading.

8. An additional advantage is that in the summer, when freights are dull, vessels would run down light from Chicago to Bay des Noquets, take in a cargo of ore, and proceed to Cleveland or Buffalo, at a time when they would not go to Marquette at all. In the fall when freights are high, this rule would obtain, as relatively more time would be consumed in going to Marquette than to Chicago, in consequence of the prevalence of westerly gales.

9. It may be assumed that the new route will afford at least six weeks additional navigation—not that there will be that difference between the opening and closing of the two routes, but navigators are reluctant to enter Lake Superior after the 10th of October, when they are sure to encounter boisterous weather, and incur great risk of being nipped by ice in the St. Mary's River. On the other hand vessels may safely approach Bay des Noquets until excluded by ice, with the full assurance that they will find open ports below.

THE TWO RAILROAD ROUTES CONTRASTED.

The Iron Mountain Railroad starts from Marquette and reaches the Jackson mine at a distance of 14 miles, and at a height of 830 feet above the lake, and thence is protracted six miles further. Instead of a uniform grade of 60 feet to the mile, there is one up grade of 79 feet, and a descending grade of 60 feet, while the course of the road is marked by numerous abrupt curves, all of which facts have a direct influence on its capacity for transportation. The usual freight train is made up of 20 cars, loaded with 8 tons of ore, equal to 160 tons; and to haul back such a train empty, up a grade of 179 feet, taxes the capacity of the most powerful locomotive.

The Peninsula Railroad, on the other hand, starts from Bay des Noquets of Lake Michigan, and runs nearly due north for 15 miles; thence N. N. W. along the water shed between the Escanaba and Whitefish rivers for 25 miles in an airline; and thence, after reaching the region of Crystalline rocks, by a more devious course, for 22 miles to the Jackson mine, making the whole distance a little over 62 miles. There are no abrupt curves, nor heavy grades, the steepest being 52 feet—in fact, the route affords no impediments more serious than are found on the prairies of Illinois. The tractive power of a locomotive over this road will be capable of hauling 50 cars each, loaded with 8 tons of ore, equal to 400 tons, on a descending grade, with the ability of hauling them back empty.

A locomotive on the Iron Mountain road makes two trips in 12 hours and delivers on the lake shore 320 tons of ore, making a run of 68 miles. A locomotive on the Peninsula road, making one trip in 12 hours, will deliver at Bay des Noquets 400 tons of ore, making a run of 124 miles, from which point the rate of transportation will be $1 less than from Marquette.

As a passenger route, it must command the favorable consideration of the community. Leaving Chicago in the morning by the Northwestern Railway, the traveler, after an easy ride, finds himself by dusk at Green Bay, where he embarks on board of a new steamer, which lands him the next morning at Escanaba, and at noon he dines at Marquette, thus reducing the distance between Chicago and Lake Superior to thirty hours.

MILITARY ASPECTS.

This communication has all of the importance of a national work. Without it, in the event of a war with Great Britain, the whole commerce of the Lake Superior region could readily be cut off, either by the destruction of the locks of the St. Mary's Canal, or the blockade of the St. Mary's River. The waters of that river, after leaving the Saut, expand into ten thousand channels and embrace as many islands, among which gunboats of light draft could glide with little fear of detection. On the other hand, with Mackinac fortified, the whole commerce of that region could be thrown into Lake Michigan, with little inconvenience, and with no probability of interruption. This important work was commenced in August last, under the energetic management of P. H. Smith, Esq., of this city, as President, and will be

completed by the middle of June next; and when it is considered that the route lay through an unbroken forest, it may be regarded as a splendid feat in railroad construction.—*Chicago Tribune.*

Railroad Earnings--Weekly.

The earnings of the Toledo and Wabash Railroad Company for the 1st week in March, were:

	1863.	1864.
Passengers	$6,448 30	$10,508 10
Freight	17,832 09	20,916 39
Total	$24,280 39	$31,424 49
Increase		$7,144 10

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in March, were:

1864	$35,569 76
1863	24,927 29
Increase	$10,642 47

The earnings of the Michigan Central Railroad for the 1st week in March, 1864 were $77,800 00
Corresponding week of previous year 58,783 00
Increase $19,017 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in March, 1864, were $57,949 00
Corresponding week of previous year 24,253 00
Increase $33,696 00

The earnings of the Chicago and Northwestern Railroad for the week ending March 7, 1864, were:

Passengers	$8,500 00
Freight	20,665 57
Mail	508 33
Express	352 92
Total	$30,026 82
Same period last year	15,922 01
Increase, 88½ per cent	$14,104 81

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of March, were:

	1864.	1863.
Passengers	$26,435 93	$20,035 29
Freight	42,832 59	35,649 58
Mail and Express	1,500 00	1,500 00
Total	$70,768 52	$57,184 82
Increase		$13,583 70

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending Feb. 29th were:

	1864.	1863.
Freight	$22,217 05	$11,252 87
Passengers	12,821 05	5,247 69
Mails, rents	948 13	924 68
Total	$35,986 23	$17,425 24
Total for 2 months	$217,884 09	$143,261 95

The earnings of the Chicago and Alton Railroad Company for the week ending March, 7, were:

	1864.	1863.
Passengers	$14,819 90	$11,021 89
Freight	19,399 20	12,092 42
Sundries	1,808 29	2,230 77
Total	$36,027 39	$25,345 08
Increase 1864		$10,682 31

The earnings of the Marietta and Cincinnati Railroad for the 1st week in March, were:

	1864.	1863.
Passengers	$7,417 90	$3,104 37
Freight	13,406 65	10,675 37
Mail, express & telegraph	899 58	752 00
Total	$21,724 13	$14,531 74
Increase		$7,192 39

The traffic of the Great Western Railroad for the week ending March 4th, 1864, was as follows:

Passengers	$20,202 25
Freight and live stock	49,241 28
Mails and sundries	1,286 33
Total	$70,729 81
Corresponding week of 1863	69,709 78
Increase	$1,020 03

The earnings of the Galena and Chicago Union Railroad for the week ending March 8, were:

	1863.	1864.
Freight	$17,823 82	$18,448 48
Passengers	8,821 87	14,356 32
Mails, &c	1,200 00	1,300 00
Total	$27,345 69	$34,104 75
Increase 1864		$6,759 06

The earnings of the Grand Trunk Railway for the week ending February 27, 1864, were:

Passengers	$22,195 12
Express freight, mails and sundries	2,500 00
Freight and live stock	67,291 44
Total	$91,986 56
Corresponding week, 1863	90,215 13
Increase	$1,771 43

The earnings of the Montreal and Champlain Railroad for the week ending Feb. 27, 1864, were:

Passengers	$1,350 46
Mails and sundries	188 00
Freight and Live Stock	1,279 91
Ferries	108 17
Total	$3,926 54
Corresponding week, 1863	3,110 50
Increase	$816 04

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of February, compared with the same period last year, were as follows, viz:

	1864	1863
Freight	$291,366 84	$257,085 48
Passengers	137,462 26	91,006 54
Express matter	5,000 00	2,557 50
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	8,127 83	1,039 81
Total	$451,885 26	$366,597 66
Increase		$85,287 60
En'gs fr. Jan. 1 to Feb. 29.	$742,561 17	$703,948 04
Increase for two months		$38,613 13

Increase for February, 23¼ per cent.; average increase to February 29, 5⅛ per cent.

The apparently small increase during the two months ending Feb. 29th ult., is attributable to the "strike" among the Engineers in January, which caused a temporary cessation of business.

The earnings of the Toledo and Wabash Railroad Company for the month of February, 1864, were $95,842 58
Corresponding month of previous year. 91,970 58
Increase $3,872 00

The earnings of the Norwich and Worcester Railroad in February, 1864. $39,603 85
Corresponding month of previous year. $23,882 68
Increase $15,721 17

The earnings of the Milwaukee and Priarie du Chien Railroad for the month of February, 1864, were $115,135 00
Corresponding month of previous year 76,131 00
Increase $39,004 00

The earnings of the Erie Railway for the month of February, 1864, were. $914,133 07
Corresponding month of previous year 839,949 25
Increase $74,183 82

The earnings of the St. Louis, Alton and Terre Haute Railroad for February, 1863 $147,485 00
December, 1863 110,603 00
Increase $36,882 00

The earnings of the Cleveland and Pittsburg for the month of February, 1864, were $167,600 00
Corresponding month of previous year 115,400 00
Increase $52,200 00

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of Feb., 1864, were:

	1864.	1863.
From passengers	$30,755 93	$15,740 70
" freight	13,100 00	13,823 99
" other sources	1,879 41	2,054 50
Total	$54,735 34	$31,619 19
Increase 1864		$23,116 15

The traffic receipts of the European and North American Railroad for February, 1863 and 1864, were:

	1863.	1864.
Passengers	$2,659 95	$2,711 08
Freight	5,334 21	5,406 45
Mails and Sundries	497 50	440 66
	$8,491 66	$8,558 19
Decrease		$65 52

The earnings of the Hudson River Railroad for the month of February, 1864, were $472,240 09
Corresponding month of previous year 425,046 7
Increase $47,193 31

☞ Mr. S. S. Merrill has resigned his position as Superintendent of the Milwaukee and St. Paul Railroad. The following gentlemen have been appointed Superintendents on this road, under the supervision of Mr. E. H. Goodrich, General Superintendent and Manager: Mr. John M. Kimball is placed in charge of the line between Milwaukee and La Crosse; Mr. H. C. Atkins, of the Watertown division, and Mr. D. L. Harkness, of the Horicon division.

☞ Mr. Julius Movius has been appointed the General Eastern Agent of the Michigan Central Railroad, and entered upon the duties of his new position on the 1st inst.

☞ We mentioned last week the sale of the Pittsburg, Steubenville and Indiana Railroad, for the sum of $1,890,000, to J. Edgar Thomson, of Philadelphia, Henry M. Alexander, of this city, and Geo. W. Cook, of Steubenville, Ind. The Pittsburg *Post* says: "We take it for granted, from our knowledge of the condition of the company and its relations to the Pennsylvania Railroad Company, that the purchase is on account of the last mentioned corporation. The road is an important one, and under the influence of a Philadelphia management may be made to serve, in an eminent degree, the commercial interests of our city."

☞ The contract for grading the sixteen miles of the Milwaukee and Western Railroad, otherwise the Watertown Division of the Milwaukee and St. Paul Railroad, between this city and the junction with this and the Prairie du Chien road, has been let to Messrs. George Burnham and Stephen A. Harrison, the previous contract for grading the same having been annulled.—*Milwaukee Wis.*

☞ The Erie Railway Company is prepared to to issue seven per cent. Convertible Bonds to the amount of two millions of dollars, for the purpose of completing the road at its eastern terminus. The holders of the Mortgage Bonds of the Long Dock Company have the option, until September 1, 1864, of taking these Bonds in exchange for the Bonds they now hold.

☞ The Directors of the Cleveland Iron Mining Company, have declared a Semi-Annual Dividend of five dollars on each share, payable on the 21st inst., at the office of the Company in Cleveland, Ohio.

☞ The Engineers of the Atlantic & Great Western Railway have completed the preliminary survey of a railroad from West Greenville to Mercer, by the way of the Otter Creek. They are now engaged in surveying another route by the way of Mercer and Greenville road. They will afterwards continue their surveys southeast of Mercer to the coal regions in the neighborhood of Harrisville.—*Meadville Journal.*

SUBSTITUTE FOR

CAR DUCK.

Kingman's Patent Car Covering.

A PATENT CANVASS, bedded in Water Proof Paste and Painted. Costing now about half as much as Car Duck. Full particulars, directions, and samples sent. Also an experienced man sent to show the best way to apply it when requested.

WILLIAMS & PAGE, Boston.

Car Duck. Hemp Packing.

HEAVY 4 Ply Fitchburg Duck 100 to 140 inches wide.

BEST HACKLED HEMP PACKING.

For sale by

WILLIAMS & PAGE, Boston.

BROWNE'S METALLIC WEATHER STRIPS, AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

EAST RIVER STEEL WORKS

AND

ROLLING MILL,

Cor. 18th Street and Avenue B.

AUSTIN KELLEY & CO.

Manufacturers of CAST STEEL for WIRE RODS, FILES, TOOLS, MACHINERY, TIRES, RAILROAD AXLES, FROGS and SIDE PLATES, Steel Converters and Refiners, and CAST-STEEL WIRE DRAWERS.

We invite the attention of FILE MANUFACTURERS to our TAPER STEEL of all sizes for SAW FILES.

All steel warranted, both in quality and finish, equal to any imported.

OFFICE AND WAREROOMS,

254 CANAL STREET, NEW YORK.

Notice to Contractors.

ENGINEER'S OFFICE MORRIS & ESSEX R. R. Co.
NEWARK, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hacketts-town to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

6t8. J. B. BASSINGER, Chief Engineer.

TO RAILROAD CONTRACTORS.

Sealed proposals will be received at the office of the Pacific Railroad, (of Missouri,) in St. Louis, till March 25, 1864, for doing the graduation and masonry of about thirty-five miles of the road, being from Holden, in Johnson County, to a section in Jackson County between the Little Blue and Independence. Profiles, list of sections to be let, giving time as to when they must be completed, forms of bids, specifications, &c., can be seen at the office of the Chief Engineer in St. Louis.

Bids should be made for each section of about one mile, and no distance greater than ten miles will be let to any party or firm

Payments will be made monthly in cash, fifteen per cent. being retained till the completion of the work.

Bids should be addressed to GEORGE R. TAYLOR, President, and where the bidder is not personally known to the President or Engineer, he must accompany his bid by substantial references, and should give also his post-office address, and he will be informed of the acceptance or rejection of his offer.

The company reserve the right to reject any or all bids.

T. McKISSOCK, Chief Eng'r and Sup't.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

American Railroad Journal.

New York, Saturday, March 26, 1864.

Our Surplus Money.—How it may be Employed.

The Government in carrying on this war, has so far disbursed nearly sixteen hundred millions of dollars. The daily press is very generally remonstrating against the extravagance which has followed this plethora of currency. The wasteful expenditure now so prevalent with a large class of our people excites its alarm, and the follies of dress, luxurious living and costly equipages are calling forth its animadversions. There is some reason for this, as it must be evident that by-and-bye, when we come to another standard of values, there will be a collapse in all but the most stable fortunes. It is under this impression we venture to suggest a different disposal of the surplus means which are now filling out the pockets of a large class of our citizens.

Of the currency put forth by the Government no doubt a large amount, hundreds of millions, have gone into the hands of those who held railway and other similar properties at peace prices, or large stocks of imported articles such as teas, sugars, cottons and woollen goods. Of the thousand millions or more of railway capital, at least one half is represented in the Exchange and Money Market of this city. Say five hundred millions and this we deem a moderate calculation, as we quote weekly in the JOURNAL, sales in various companies, regularly, whose aggregate capital is fully equal to that amount.

Now many of these companies were greatly below par when the war broke out. Take for example a well-known company whose par shares of $100 were sold with difficulty at 20 cents on the dollar. We have seen that stock on a capital of eight millions sold at 160 to 170, and standing to-day after numerous fluctuations at 137. Here then we see how from four to five millions of dollars have been absorbed in this rise to the benefit of the original holders. This is not a solitary case. The stock lists show a similar advance in a great many other companies. This is the way in which so many persons have become suddenly wealthy. But the mass of currency exists somewhere notwithstanding. It has not been called in or destroyed.

What we have to say is this, that unquestionably there is a method of using it which yet lies open to the possessors, and which should not be unimproved.

We mean to say that now is the time for capital assisted by the enterprise of the country to develope itself to its utmost capacity in works of internal improvement. The construction of railways and such particular works as the Illinois and Niagara ship canals, which while they increase the wealth and resources of the country will secure revenue or interest on the investment, is the most obvious direction which capital ought now to take.

The great agricultural west only needs to be fully opened to railway communication to double its production. By this, the interior is populated and enriched, and the commercial marts on the Atlantic, increased in wealth and stability. There are numerous lines west of the Mississippi and Missouri that cannot be built too soon, and intermediate trunk lines, which should be made ready as their outlets to the sea. If we had such an Institution as a Credit Mobilier to hunt up these projects and introduce them to the public through their indorsement, we might turn all the Northwestern States both into gardens and granaries. Looking forward to the burdens of this war, which will press upon us for years to come, it is of the utmost consequence that emigration and labor should be drawn to the rich prairies of the West, and that other great cities should rise and sparkle over the plains. In the opinion of some political geographers we shall see one of these days some of the largest inland cities of the continent midway between the Atlantic and the Pacific, geographical, political and commercial centres, like those great towns which once flourished in the prosperous days of the East, and even now are found in the very heart of Europe.

We may safely therefore venture upon immediate investments in all those lines of intercommunication and transportation which at the end of this century, and many of the readers of the JOURNAL will undoubtedly live to see it, will be the main routes of travel east and west for a population of a hundred millions.

There are also other opportune and inviting occasions for the investment of some of these millions of our surplus money, to be found in the mineral wealth of this country. We do not speak of our silver or our gold mines. These are sure to be explored and wrought as fast as they are discovered, no matter how difficult of access. How much more so when that access becomes perfectly easy. We refer to our iron, copper, and lead mines, and our exhaustless coal fields, these last the largest in area on the face of the globe and prepared for the millions close at hand, by that Providence which cares in advance for all the wants of the human race, however indifferently and unthinkingly it accepts its gift. The wealth of England is in minerals, so is that of Denmark and Sweden, but none of these countries can in these natural endowments compare with ours. Pennsylvania is at this day drawing an enormous revenue from her coal and iron. New Jersey is one of the most substantial states in the Union by reason of her zinc and copper, and we may hope from such states as Tennessee and Ohio and Western Virginia, great developments in the future, of their iron and coal deposits. We have even in

New York, which is more essentially commercial, much to hope from our iron ores.

Now from these materials we may draw forth incalculable wealth, and the advantage of its creation lies in the fact that it brings forward the laboring classes of the less skillful sort, whose toil is not that of the intellect, and after these, the "cunning workers in metals" who produce in every possible form the curious and useful machines, and implements by which progress is secured, cultivation, refinement and condition are advanced, and the happiness of individuals and the comfort of society are promoted. We see therefore how good may come out of evil, how surplus means created by the exigencies of an unnatural rebellion may be turned to account; not in enriching other nations, but ourselves. It is to be hoped this view of the subject may be the study of capital, phelanthropy and enterprise, and that we shall find in the end, that the plentifulness of money which has corrupted so many nations, may by the good sense of the American people be converted into new defences for free institutions, new barriers against foreign interference, and new foundations for our great political structure.

Erie Railway Company.

The earnings and expenses of this road for the years ending December 31, 1862 and 1863, were as follows:

Earnings:	1862.	1863.
From passengers	$7,065,363 07	$8,476,810 18
" freights	1,200,450 21	1,850,984 49
" mails	101,652 04	101,052 04
" other sources.	32,868 99	40,634 58
	$8,400,334 31	$10,469,481 29
Expenses, viz:		
Office station & exp.	$671,905 28	$915,587 30
Cost of running	1,274,893 46	1,585,549 80
General expenses	126,418 52	158,305 00
Repairs of engines and cars	1,177,240 95	1,455,760 78
Repairs of track and roadway	1,248,610 26	1,791,626 96

Incidental expenses.	36,859 32	54,323 09
Miscellaneous	134,607 80	198,804 72
	$4,860,748 55	$6,380,511 07
Net earnings	$3,539,585 76	$4,088,970 22

Disbursed in 1863 as follows:

Interest on Mortgage Debt	$1,406,405 00
Rent of Union Railroads	78,400 00
" Chemung Railroad	30,000 00
" Elmira, Jeff. & Can. R. R.	25,000 00
" Long Dock Property	143,551 84
Internal Revenue Tax	113,504 98
Taxes on Real Estate	104,259 43
Pavonia Ferry	39,351 37
Loss by Fire at Jersey City	10,000 00
Hire of Cars	28,246 21
Interest on Assessments	5,242 69
Sinking Fund Buffalo Branch	2,354 00
	$1,986,315 52
Surplus	$2,102,654 70
Dividends July 1, 1863. $699,062 00	
Dividends Jan. 1, 1864.. 761,040 50	
	1,460,102 50
	$642,552 20
Surplus January 1, 1863	26,621 28
Balance to Credit of In. Ac't, Jan. 1, 1864	$669,173 48

The results of the operations of 1863 as compared with 1862, show an increase in earnings of $2,069,146 98, or 24.63 per cent., and an increase in expenses of operating the road of $549,384 46, or 31.03 per cent. The payments for interest and rents were about the same as in 1862, while in the item of taxes on real estate and internal revenue taxes, there is an increase in 1863 of about one hundred and twenty thousand dollars. The expenses of operating the road were increased beyond the usual proportion between earnings and expenses, by the great advance in the cost of every article used in the repairs of the road and machinery, and in the price of labor.

Out of the net earnings, after paying interest on the mortgage debt, rents and other charges as set forth in the table above, leaving $2,102,654 70 as belonging to income account, the Directors have paid two dividends of three and one half per cent. each on the preferred stock, and one of three and one half per cent. on the common stock, amounting in all to $1,460,102 50, and leaving, with the surplus for 1862, a balance of $669,173 48.

The amount expended for construction in the year was $464,481 24. The increased value of materials on hand was $177,890 71.

The earnings from Freight and Passengers as compared with last year, show an increase in the former of $1,411,447 11 or 19.90 per cent.; and in the latter of $650,534 28, or 54.01 per cent.

The following table exhibits the earnings from the transportation of freight for the last two years, showing the amounts derived from through and way freights respectively:

	1862.	1863.
Through East	$3,639,764 42	$3,853,042 71
Through West	1,196,750 00	1,371,186 25
Way East	1,462,863 40	2,322,774 21
Way West	765,985 25	929,806 91
Total	$7,065,363 07	$8,476,810 18

It will be observed that of the increase $1,411,447 11 in the earnings from the transportation of freight, $1,023,732 47, or more than five-sevenths, have been derived from way freight. This fact is significant in view of the maintenance of remunerative business, and of the ability of the road to earn a fair income in the worst of times. The earnings from way freight in 1863 were nearly equal to the earnings from both through and way freight in 1859. It is expected that this increase will continue and be largely augmented by the carrying of coal, only small quantities of which were transported on the Eastern portion of the road last year.

The number of tons of freight transported in each of the years as above were:

	1862.	1863.
Through East	471,314	452,667
Through West	149,896	169,920
Way East	501,018	635,442
Way West	553,006	616,605
Totals	1,675,234	1,874,634

The number of miles run by freight trains, with earnings and expenses per mile run, are given in the following table:

	1862.	1863.
Miles run	3,290,400	3,750,771
Tons moved	1,675,235	1,874,634
Tons moved per mile run	0,509	0,497
Earnings per mile run	2.14	2.26
Earnings per ton moved	4.22	4.52
Av. cost per ton moved	2.23	2.28
Av. cost per mile run	1.13	1.14

The fourth and fifth mortgages are reduced $132,000 by conversions into common stock, which is correspondingly increased.

The Company owes no floating debt.

The reduction of the debt and its ultimate payment have not been lost sight of by the Directors. To provide for the payment of the first mortgage, falling due in little more than three years, the Directors have applied to the Legislature for power to issue of the Common Capital Stock enough to pay off the whole issue. It is believed, that should the right to issue stock for that purpose be conceded, negotiations could be entered into for retiring the bonds before their maturity.

By a vote of the Directors passed in September last the fourth and fifth mortgage bonds, under existing provisions of the General Railroad Law, were made convertible into common stock, and holders have availed themselves of the privilege to a very considerable extent. It is probable that a large portion of both issues will be retired by exchange into stock. Previous to December 31st $132,000 of these bonds had been exchanged for stock. Since that date large amounts have been converted and the exchange is still going on. The payment of the bonds issued for the purchase of the Buffalo Branch—Hornellsville to Attica—is provided for by a sinking fund; but they may be converted into stock.

Should the whole of the first, fourth and fifth mortgages be paid off as above, there would remain of debt but $10,000,000, which a moderate sinking fund would extinguish before maturity.

The property of the Company consists of—

The Main Line from Jersey City to Dunkirk	460 miles.
Piermont Branch	18 "
Newburgh Branch	19 "
N. W. D., Hornellsville to Attica	60 "
Total length of road owned by Co	557

Rochester Division	18 "
Canandaigua and Elmira	66 "
Hawley Branch, just completed	16 "
	240
Whole number of miles of road owned & leased.	797

The Warwick Valley road, ten miles long, is operated by the Company, but not leased.

The whole number of miles of road operated by the Company is 807.

The are on the main line and branches owned by the Company, 190 miles of double track and 131 miles of sidings, and on the leased roads 19 miles of double track and sidings; making the entire length of track equal to 1,137 miles of single track.

During the year considerable improvements have been made in the permanent property of the Company. Of double track eight miles have been laid, and six more nearly prepared to receive the iron, most of which would have been laid but for the difficulty of procuring iron in season. Nine miles of additional side tracks have been graded and laid, and 15,143 tons of new iron, equal to 150 miles, and 302,873 cross-ties, have been used in repairs. The general condition of the road bed, track, bridges and other structures is fully equal to what it has been at any former time, and will, in the opinion of the Directors, compare favorably with any of the great roads in the country.

The rolling stock consists of 243 locomotives, 109 passenger cars, 201 emigrant, baggage and caboose cars, 3,386 freight cars, and 310 other cars—in all 4,249.

The rolling stock of the Buffalo Division is not included in the above statement. It consists of 28 locomotives and 459 cars, all in good working condition—adding this equipment to the stock of the main line, makes a total of 271 locomotives and 4,708 cars. It should be borne in mind that the freight cars of this road, on account of its wide gauge, are of greater capacity than those on narrow gauge roads.

The efficiency of the rolling stock has been largely increased during the year by the addition of seventeen first class new locomotives and 257 cars. A number of old locomotives have been rebuilt with increased power, and 232 cars have been entirely rebuilt.

The repairs of the rolling stock have been most thorough, the aim of the officers in charge being to keep it in the most effective condition.

The necessity for more equipment both of locomotives and cars, as well as additional double track, machine shops, station accommodations and turnouts, is strongly impressed upon your Board. In order to increase the earnings, or even to maintain the rate of last year for any considerable

time, these increased facilities are indispensible. The large earnings of 1863 were produced by working the machinery almost to its utmost capacity, and far beyond the limits of economy; while some parts of the single track were so constantly filled with trains as to render delays, always costly, unavoidable. The earnings of 1863 were $10,469,000 against $5,342,000 in 1860, while the increase in the number of locomotives was comparatively small. In 1863 there were 243 against 220 in 1860. Of this increase, less than one-half were in use the whole of last year. The increase of freight cars has been somewhat greater in proportion, though the present stock is quite inadequate. With a moderate increase of equipment the earnings of last year would have been at least one million dollars larger than they were, while the expenses would not have been proportionately increased.

In view of these facts the Directors have authorized the President to contract for as many locomotives, and to build in the shops of the company as many cars as the executive committee and the officers shall judge necessary. Under this authority forty first class freight locomotives have been ordered and are in course of delivery. The whole number will probably be completed by the first of June. The building of cars is going on in the company's shops. Additions to the double track, new turnouts, machine shops, engine houses and station houses, will be commenced in the spring. To provide the means to meet the cost of these improvements your Board has but two resources —either to use the earnings of the road, or to raise new capital. They have determined in favor of the latter, and have made application to the Legislature for authority to increase the common capital stock five millions of dollars, for the purpose of building double track, machine shops, station houses and engine houses, and procuring such additional rolling stock as the business of the road may require. It is not the intention of the Directors to expend the whole or any considerable portion of this amount during the current year, but only so much as in their judgment is expedient and necessary to the full development of the business belonging to the road, spreading the work over several years, and so arranging it that in the occurrence of any revulsion that might lessen the earnings, it can be stopped without detriment.

A considerable portion of the earnings has been applied to expenditures properly chargeable to construction, a statement of which in detail will be found appended to this report. In addition to the amounts there stated, other sums have been charged to the account of transportation expenses, which might with propriety have been charged to construction. The error, if it be one, has generally been on that side. This policy, the Directors trust, will meet the approbation of the stockholders. The expenditures were for purposes of absolute necessity to the business of the road, and the Directors were not willing to borrow money to meet them. The permanent value of the property of the company has been increased, and it will be matter for future consideration whether the amount so appropriated should not, in some form, be divided among the stockholders.

The railroad from Lackawaxen station to Hawley, the terminus of the railroad of the Pennsylvania Coal Company, and known as the Hawley Branch, was completed about the close of the year, and the transportation of coal under the contract with the coal company commenced. The difficulty of procuring labor and materials delayed the opening of the road beyond the time at which it was expected, when the report of last year was published, it would be ready for use. The road is now in complete order, and provided with engines and cars sufficient to meet the requirements of the contract. In addition to the advantages to be derived from the transportation of the coal, it is expected that the facility of procuring fuel at all seasons of the year will lead to the increase of manufactures along the line of the Eastern Division. The recent discovery of extensive deposits of iron ore convenient to the road will have considerable influence in this direction.

The consumption of coal in the locomotives of the company has largely increased during the year, and its cost now forms an important item in the expenses of transportation. This consumption will increase from year to year as coal burning engines are substituted for wood burning engines. There are now sixty-seven coal burning engines on the road against thirty-eight at this time last year, and it is expected that by the close of this year about one half of the whole number in use on the road will burn coal. For want of adequate sources of supply the last year the company has been compelled to pay higher prices for coal than it is expected will be paid hereafter. The connection with the Pennsylvania Coal Company at Hawley now supplies the eastern portion of the road with anthracite coal at moderate price. The completion of the Buffalo, Bradford and Pittsburg Railroad from Carrollton to the coal mines in McKean County in Pennsylvania, which it is expected will be accomplished in June next, will ensure a supply of bituminous coal of excellent quality, at moderate rates, as well as furnish a large tonnage to the road. The distance from these mines to Dunkirk is 75 miles. It is believed that these mines are many miles nearer to Dunkirk and Buffalo than any others in Pennsylvania.

This company took possession of the Buffalo, New York and Erie Railroad on the first day of May last, under lease for a long term, as stated in the last annual report, and it has since been operated in connection with the main line and known as the Buffalo Branch. The results of the operations of the road are satisfactory, both the local and the through business between New York and Buffalo and Rochester showing a handsome increase. The almost constant employment by the Government of a large portion of the rolling stock of the roads leading south from Elmira to Baltimore and Philadelphia has lessened the business expected from that source, and at times almost wholly cut it off. Better results are anticipated in future. The increasing intercourse between the Western and Central portions of New York and Canada, and Philadelphia, Baltimore and Washington with its share of New York business, will secure to the Buffalo Branch a profitable traffic.

Additional depot grounds at Buffalo have been purchased, and much done towards putting the road and equipment in good working condition.

The accounts of the Buffalo Branch have been kept distinct and no part of the earnings or expenses appears in the statement of the earnings and expenses of the Erie Railway Company.

While the Directors, in these unsettled times, will not venture to make any estimates of the future earnings, they are happy to assure the stockholders that the condition of the company was never more prosperous than it is now, and the prospects of a successful year never more flattering; still they are not without apprehension of a still further advance in the price of labor and materials, without a corresponding increase of revenue. It will be the aim of the Directors to keep the expenses as low as is consistent with practical economy and the true interests of the company; and in this endeavor they confidently count on the continued co-operation of the officers and employees, to whose faithful services they acknowledge themselves indebted for the results of the past year.

The whole number of miles run by engines was 5,858,687. Cost of renewals and repairs, $597,099 13. Cost per mile run 9.77.

The Directors and officers for 1863–'64, are as follows:

President.—NATHANIEL MARSH.

Directors.—Samuel Marsh, Daniel Drew, John Arnot, William B. Skidmore, Cornelius Vanderbilt, Robert H. Berdell, Dudley S. Gregory, Ralph Mead, Nathaniel Marsh, Ambrose S. Murray, William Evans, J. C. Bancroft Davis, D. A. Cushman, Alexander S. Diven, Thomas W. Gale, Isaac N. Phelps, Horatio N. Otis.

Vice President.—SAMUEL MARSH.

Treasurer.—JOHN HILTON.

Secretary.—HORATIO N. OTIS.

Auditor.—BENJAMIN E. BREMNER.

General Superintendent.—CHARLES MINOT.

Assistant Superintendent.—JOS. W. GUPPY.

Division Superintendents.—Charles L. Robinson, Jersey City; Hugh Riddle, Port Jervis; H. B. Smith, Elmira; H. G. Brooks, Dunkirk; Solomon Bowles, Hornellsville; H. C. Fisk, Buffalo.

Pittsburg, Ft. Wayne and Chicago Railway.

The annual meeting of the stockholders of this company was held in Pittsburg on the 16th inst. From the report of the directors, an abstract of which is given in the Pittsburg *Post*, it appears that the gross earnings for the year ending December 31, 1864, were $5,132,933 74; and the expenses of operation $3,026,310 56—leaving net earnings $2,106,623 18. The total income of the company, including $90,042 33 received from the Cleveland and Pittsburg Railroad was $5,222,976 07. Against which is charged: expenditures for operating, as above, $3,026,310 56; for construction and equipment, $1,517,162 25; interest paid, $761,559 39—making the total expenditures, $5,305,032 20, and showing a deficit of $82,055 13. This deficit, says the report, will be further increased by the amount of interest (about $97,000) to be paid April 1st proximo, on the outstanding third mortgage bonds, out of surplus earnings of the year.

This result makes the operating expenses for the year 59 per cent. of the earnings. For the year 1862 the operating expenses were 50 per cent. of the earnings, showing an increased per centage of the past year, over 1862, a fraction less than 20 per cent., while the increase in the cost of labor and supplies has been more than 36 per cent.

The total expenditure during the year, on construction and for additional equipments, were $1,517,162 25. This is a very large expenditure out of "income" for the permanent extension and improvement of the property, which should be paid for by fixed capital. It is a sum equal to

29½ per cent. of the earnings of the railway, and equal to a dividend of 23⅓ per cent. on the authorized capital stock of the company.

During the year there have been added to the equipment 27 new locomotives, 604 burthen cars and 12 new passenger coaches of the most approved pattern and style—six of which are iron. Forty-three new locomotives, at a cost of $634,-00, and 9 new passenger coaches, at a cost of $34,500, have already been contracted for. It is also designed to construct a double track between Leetsdale and Rochester (10 miles) at a cost of $122,000. Extension of side tracks, $230,000. Four hundred freight cars to be built in the company's shops, $280,000.

The following resolutions, recommended to the favorable consideration of the stockholders by the Board of Directors, were offered by W. S. Hickok, Esq., of Mansfield, Ohio:

Resolved, That it is expedient that expenditures for construction, equipment, and objects pertinent thereto, involving new capital, should in the main be provided for by an increase of capital stock of the company.

Resolved, That the increase of capital stock should be made solely for the purpose of building and completing a double track, or such part thereof, as may be expedient, and for equipping the road, and providing such additional rolling stock, machinery, appurtenances and other facilities, as may be necessary to properly do all the business which may offer, and for no other purpose; and should only be issued from year to year in such amounts as the stockholders, at their annual meetings, may decide upon. Their decision shall be based upon detail estimate, made by the Board of Directors, of the amount of money necessary for the year, and that the new issue of stock shall only be sold after public notice.

Resolved, That the increase of capital for 1864 shall not exceed $3,500,000.

Resolved, That the stockholders hereby recommend, and as far as may be necessary, authorize the Board of Directors to make such agreement or arrangement as will enable them to increase the capital stock, as indicated in the preceding resolutions.

The following Directors were elected: J. F. D. Lanier, Louis H. Meyer, Samuel J. Tilden, New York; J. Edgar Thomson, G. W. Cass, Springer Harbaugh, Pennsylvania; Kent Jarvis, William Merriman, Robert McKelley, Ohio; Samuel Hanna, Jesse L. Williams, Pliny Hoagland, Indiana; Wm. B. Ogden, Illinois.

Railroad from Salamanca to Buffalo.

The Atlantic and Great Western Railroad Company have decided to connect the terminus of their road at Salamanca, in Cattaraugus county, with Buffalo; and Mr. Seymour, the engineer in the employ of that Company, has been instructed to select the shortest and most feasible route for the proposed road. In accordance with these instructions, Mr. Seymour has been making preliminary examinations of the various routes that are supposed to be practicable. One line has been run, wholly or in part, which if adopted will locate the road near the village of Springville, and a second line, cursorially surveyed, will pass in the vicinity of Morton's Corners.

How far these routes are available, is best known to the accomplished engineer who has the matter in hand; but we incidentally learn that the configuration of the country through which they pass, is decidedly adverse to an easy and economical constructions of a railroad.

Several years ago, when the people of Buffalo first began to bestir themselves in relation to a railroad from that city to the coal mines in McKean Co., Pa., a survey was made by Samuel Healy, Esq., for the purpose of establishing the feasibility of a railroad from North Evans or some contiguous point on the Lake Shore Railroad, to the New York and Erie at Little Valley or as near as possible to the railroad leading to the coal fields. Mr. H. found an extremely favorable route all the way, the grade being a natural ridge, which extends from this village through Taylor Hollow and Pontiac, to the Lake Shore line. Here, and above, the route runs near Col. Plumb's residence, and crosses the Cattaraugus near Hidi, and up the South Branch, and thence *via* Erie road to Salamanca.

This outline of the route will show that the Atlantic and Great Western Company may, eventually, find it the "shortest and most feasible route" to Buffalo, and Engineer Seymour is so far impressed with the favorable accounts in regard to it, as to give it a thorough examination, which he begun yesterday, and will continue until it is fully tested.

It is of course, useless to speculate on the result, but we devoutly hope that our greatest want—a railroad—may be forthcoming; and, connected by this means with New York and the West, Buffalo and the East, and the coal beds of Pennsylvania—with our sheltered and beautful location, our splendid water power—what a picture of prosperity does this hope create.—*Gowanda Reporter.*

Pacific Railroad of Missouri.

Now that all necessary legislation to insure the completion of the road has been perfected, it may be a matter of some interest to the public to know what is exactly the present condition of the road.

The Pacific Railroad is now completed and running from St. Louis to Dresden, a distance of one hundred and ninety miles. From Dresden to Warrensburg twenty-four miles, the grading is nearly completed—the ties, chairs and spikes are on the ground. It is expected that the cars will be running to Warrensburg in April. From Warrensburg to Independence is fifty-four miles. Most of this distance remains ungraded.

There is no heavy work upon this section of the road except a rock cut on the Little Blue, where the company have had a considerable force at work all-winter.

From Independence to this city the road is nearly ready for the iron. Thus it will be seen that but little over fifty miles of new road is to be built to complete it to our city. That it will be for the interest of all concerned to finish it as quickly as possible is evident. As such works are ordinarily pushed, it might require the balance of the present year to finish it. That it can and will be done much quicker is certain.

St. Louis men say the cars will run to this city in six months. Responsible contractors offer to take the job of completing the road in four months.

The military authorities are determined that nothing shall delay the work, as its early completion is regarded a military necessity.—*Kansas City Journal.*

Nova Scotia Coal Mines.

A report laid before the Legislature of Nova Scotia, shows that the amount of coal shipped during 1863, exceeds that of 1862 to the extent of thirty-seven thousand tons. The great body of coals has been shipped from the mines of Cape Breton; but owing to more recent explorations, extensive fields of coal have also been discovered in the county of Cumberland, and partially worked. Preparations are now in progress to work them upon a large scale. There have been one hundred and fifteen applications for licenses in the year 1863, yielding $2,690. There are 22 mines in operation, from which there have been raised, during the past year, 394,705 tons of large, and 34,616 tons slack; in all, 429,321 tons. Of this quantity 72,758 tons have been sold for home consumption, and 286,758 tons exported to the United States, and 65,773 tons to the neighboring colonies.

Imports into the United Kingdom.

The British Board of Trade returns give the following statements of the imports of wheat, Indian corn and flour into the United Kingdom (Great Britain and Ireland,) in each of the last three years. The wheat and corn are in "quarters," which signifies eight bushels, this being considered in dry measure a quarter of a ton. The flour is in "hundredweights," or 112 lbs. The total only of the Indian corn is given; but the greater part of it came from the United States:

Wheat from	1861. Qrs.	1862. Qrs.	1863. Qrs.
Russia	1,041,461	1,327,158	1,046,378

Washington Insurance Company.

The last report of this company states its capital and surplus at $582,510 45, which shows an increase of nearly $60,000 over the same total for last year. This fact is a telling testimonial to the progress of the Washington. Its capital is $400,-000; its surplus is $182,810. Some idea of the character and the amount of business done by the company may be gathered from the fact that its premiums received, for the fiscal year ending in January, 1864, amounted to $210,154, while its unexpired premiums were only $98,103. This shows that it does a considerable and successful business on what are termed "short risks." Indeed, out of 951 policies maturing during the last two months of the year, not over fifty were on special hazards, upon which there was no loss.

While the Washington is eminently conservative—which is seen in the character of its risks—it still possesses the energy to do a strong local business. Thus it exemplifies the great truth that energetic action is as essential to success as capital. Results justify its policy. Its dividends have always been paying ones, to stockholders. Since its commencement of the participating system it has divided among the latter $180,000, besides *giving three scrip dividends* of 60 PER CENT. each on participating policies, in the course of the last three years. The amount of its participation dividends for 1863 was over $50,000, which shows that a large portion of the fire business is done on this plan.

The company is most fortunate, too, in able and untiring officers. Its President, Mr. Satterlee, is a hard-working man, who gives his whole attention to the advancement of the interests of the corporation; and his exertions are aided in a similar spirit of watchful energy by Vice President Weston, and the accomplished and courteous Secretaries. There is no pleasanter office than that of the Washington—on the corner of Broadway and Maiden Lane. When the company moved thither from Wall Street, it was thought that the site chosen was too far up town. But time has proved the wisdom of the removal. The Washington now occupies elegant and conspicuous quarters, so that "he who runs may read" where to find security for his worldly goods.—*Insurance Monitor.*

American Railroad Journal.

Saturday, March 26, 1864.

Stock Exchange and Money Market.

It is curious and interesting to notice the speculations which continually find their way to the public eye through the newspapers, on the subject of finance. At the bottom lie many sound truths, and on the surface many remarkable opinions, yet we are as far as ever from being unanimous in our verdict after we have heard all the writers have to say. In a cotemporary of Tuesday evening last, a very well written and well intended article on the subject, and the advantage of individual economy, (the argument is well enough in its application) rests entirely on the assertion that the public expenditure has withdrawn very many millions of dollars from the actual capital of the country, and therefore it would have been better to have left it untouched and to have borrowed this amount from abroad paying six per cent interest for it. Now the real

fact is that *the capital of the Country has not been troubled at all.* All the money so called, has been created for the occasion by the Government. It has issued its promises to pay in paper, paying interest for the time being in gold, on that part at least which is in the form of stock in the funded debt. For these promises, the people have given the Government all the material and labor it has wanted. The men of the Army and Navy trusting to the strength, vitality, resources and honor of the nation have taken this paper, much of it without any interest at all, and in return devoted themselves to danger and death, with the same readiness and patriotism as if it were gold. And so the industry of the country with equal zeal and promptness has furnished supplies of all kinds for every arm of our defence, and every want of the field. Our currency, not our capital has provided a million of soldiers, and six hundred vessels of war, while the capital has really remained untouched. It is very evident therefore that any statements of the kind we refer to, must be received with "many grains of allowance."

The real and pressing difficulty of the hour is the disparity between gold and this paper, for strange to say, there are plenty of railway securities where the premium on them in the market more than covers the difference in that price of the two articles, and where the net earnings and dividends are made on the same scale and show the same result. Companies that pay from 12 to 20 per cent. dividends may therefore meet a resumption of specie payments and not expect their shares even then to fall below par. So far as these are concerned no great crash is to be anticipated.

The evil is chiefly felt in the enhanced price of commodities considered as life necessities. The difference between currency and gold pinches most here. When meat and fish and butter rise in the city of New York 250 per cent, something has to be done to save a very large class of persons from actual suffering. If humanity were not interested in the question, policy demands its solution, for it is understood that the Confederates calculate more on the discontent of our poor and middling classes at this moment, than on the justice or strength of their own cause.

There is however a very singular aspect of the case which should not be overlooked, and which must be taken into account in our speculations as to a remedy. A circular has been very recently addressed to our State Legislature which, among other statements, asserts that in Philadelphia, which should be as much affected by the inflation of the currency as New York, at this moment the necessaries of life are there on the average 46 per cent cheaper than they are here. It is further stated that the prices of the New York retail up town dealers are 58 per cent higher than they are at the large down town markets. In Boston, Baltimore, Cincinnati and St. Louis the same if not greater disparity exists in the price of these necessaries. This would show then that in this city we are, according to the prevailing theory, suffering greatly from the condition of the currency, while in the face of that theory in other more favored cities of the Union, no such consequences are visible.

This shows how unsafe it is to adopt a sweeping theory on any subject, and how careful we should be in legislating for remedies in these cases. If it is possible to reconcile the discrepancy, we might attribute this particular disadvantage under which we at present labor, to a fact of a rather temporary character.

New York is the undoubted metropolis of the Country. Here is collected the greatest amount of its exchangeable wealth, and credit, foreign and domestic. Here every large European City is represented by intelligent and active agents, most of them having no real interest in the Country at all, and ready to withdraw from it as soon as their fortunes are secured.

The amount of property in goods, wares and merchandize, lands and tenements, ships, steamers, railways and mines, represented here and for sale is almost inconceivable. It seems to be the universal opinion, that New York is the Dorado, and that fortune here is at the beck of the quickest, shrewd and most adventurous. To add to the great tide which thus breaks upon our island, thousands of strangers, foreigners, refugees and exiles, have poured in upon it the last year or two, until the astounding fact is proclaimed, that the city is no longer able to give its customary shelter to its population. Here then speculation may be expected to entrench itself, and to exert its utmost powers. Here excitement even to turbulence, visible every day at the Exchange, may be naturally looked for, and here colossal fortunes are heaped up as if by magic by some, and every penny of their substance is lost by others. It is no wonder that gold and the gold question are constantly in the mouth of every one who seeks to win, by the turn of the card, the toss of the die by packed hands, or by confederacy, and a secret understanding with associates.

We see plainly enough why gold is the universal charm, and why every one is seeking for the Philosopher's stone.

What then is the remedy for all this abnormal difficulty. We naturally look to the Government and the Treasury, to Congress and Legislation.

And it is to this point we are arrived. We have already on former occasions discussed the propriety of an interference on the part of the Government through the Secretary of the Treasury, to check the speculative operations in the one commodity, which appears to be at least in New York, the master of all the rest. We need not repeat them. We know they have been adopted, and we now look to see what will be the effect of the proposed measures.

One plan approved by the Chamber of Commerce, that of selling gold to importers for duties is already agreed upon.

We approve of this. We do not know but it may be of itself fully effective. If the Secretary will every day undersell the brokers, by even so small a sum as one per cent., the price of that demanded for home consumption at the Customs, would certainly fall; nothing could prevent this. So too, if large amounts were suddenly thrown upon the street, we are quite sure no combinations such as we are acquainted with, certainly not among the margin operators, could sustain themselves against an avalanche. How far foreign agents might continue to purchase for shipment and pay in their bills, depends beyond all question on circumstances not now to be clearly foreseen.

If the balance of trade is against us, if we continue to purchase all and everything foreign countries offer for sale, or if it is the policy of the Government of those countries to obtain all the gold they can from the United States, whether for goods sold, or on the credit of bills of exchange, there must continue a foreign demand, and we see no other remedy but a very large increase of our tariff on articles of luxury and *folly*, with the intent and to the end of equalizing our imports and our exports; in which case the revenue will be still as large, our foreign debt will decrease and bills of exchange will be in less demand. For it is clear that if the present tariff was doubled, and our imports should fall off one half, yet the revenue would be the same, while the balance of trade would be turned by the difference thus created in our favor. If this view be correct, then Congress should lose no time in revising and increasing our customs duties.

So that, just as soon as we can equalize our currency with gold, or lessen the difference, we shall find the expenses of the Government diminish, and the cost of living reduced; at present quite unbearable by those of fixed incomes, and who do not seek to make money by Government contracts, or supplies, or the holding of office. Perhaps we shall be able to take a clearer view of these matters in a few weeks. We have reason to know that Mr. Chase will not fail to do his duty at the present juncture, and it will be performed with his usual ability. Gold sold nominally on Tuesday at 164½, but there was none, however, sold at the regular board for two days, and the rise is attributed to a corner. The demand for money continues brisk, and it is thought the rate will soon be 7 per cent.

The Assistant Treasurer reported on Tuesday as follows:

Amount on hand	$37,032,424
Receipts from customs	259,000
From other sources	4,277,590
Total	$41,569,014
Payments	5,414,539
Balance	$36,154,475

The week's exports of domestic produce and miscellaneous goods (exclusive of specie) from this port, have been to the value of $3,298,035, against $3,522,562 same week last year, and $2,-236,613 the corresponding week of 1862.

On Tuesday the amount of business done at the clearing house was 146 millions.

Government stocks continue firm, and railway shares are generally advancing, and in good demand.

An association of capitalists in this city proposes to obtain a charter from the Legislature for the establishment of a Credit Moblier.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Connellsville Railroad.

By an advertisement elsewhere, it will be seen that the Directors of the Pittsburg and Connellsville Railroad have decided to put the road between Connellsville and Cumberland under contract at once, and proposals for the construction of the same are now invited. This is a practical step towards the finishing of the line, and we trust the Board, having once begun, will now follow it up until we shall be able in due time to announce the completion of the enterprise. In the meantime, the business on that part of the road already finished, continues to increase beyond even the most sanguine expectations—the receipts for the four months ending the 1st of March, 1864, exceeding those of the corresponding four months of the previous year $33,135 50. This shows an increase of nearly sixty-four per cent., and will give our readers some idea of what the road would do were its eastern connections complete. The following figures are from the company's books:

	1862.	1863.
November	$13,758 54	$19,280 29
December	13,172 06	19,880 65
January	12,252 52	23,406 96
February	12,660 58	22,411 30
	$51,843 70	$84,979 20

Increase for the four months, $33,135 50, or nearly 64 per cent.

☞ We learn from the McGregor *Times* that a convention is to be held shortly in Wisconsin, to urge the construction of the Wisconsin and Fox River ship canal route, in preference to the Illinois River route.

Montgomery and Erie Railroad.

A new railroad enterprise has been initiated, connecting the village of Montgomery, in Orange County, with the Erie Railway at Goshen—ten miles—called the Montgomery and Erie Railway. The capital stock is to be $105,000. The Directors are already appointed, and the subscription books open.

☞ In the Legislature on the 11th inst., a bill was introduced "to incorporate the Green Bay, Shawano and St. Croix Railroad." If this bill becomes a law, we shall have a railroad to St. Croix in less than five years.—*Green Bay Advocate.*

Tax on U. S. Securities.

The following very important decision in reference to the Income Tax on United States Securities has just been made public:

"Holders of United States Securities will be assessed for an income tax of 1½ per centum upon income derived from such securities. Where interest upon such securities *is paid in gold*, only the amount actually received is to be treated as derived from such securities. If the gold is subsequently sold at a premium, the amount of profit thus realized must be returned as income from business, and the tax will be three or five per centum, as the case may be."

☞ Among the Acts passed at the recent session of the Legislature of Kentucky, we find the following:

An act to amend the charters of the Louisville and Frankfort and Lexington and Frankfort railroad companies. Authorizing them to build a road from their road to Covington or Newport.

An act to tax railroads, turnpike roads, and other corporations, in aid of the Sinking Fund. Turnpikes are taxed six per cent. on their dividends; railroads are assessed for taxation at the rate of $20,000 per mile; property held by cities and towns to be assessed as other property; and all insurance companies chartered by the State shall pay upon their capital stock the same rate as may be assessed on real estate.

Opening of the Miami and Erie Canal.

We are informed that the Miami and Erie Canal will be opened from Cincinnati to Toledo on the 1st of April. The lessees have completed the Lewistown Reservoir, which it is calculated will furnish a full supply for the summit level through the season. Boatmen and shippers will therefore be saved the detention, which has heretofore occurred in the midst of the busiest season, from want of water. It will make an essential difference in boat earnings, and in the amount of property for the shipment of which the canal can be relied upon. Last year, from some unexplained neglect, the Indiana portion of the Wabash and Erie Canal was not opened till after the bulk of the spring shipments was over. It is announced that this spring the canal from Toledo to Fort Wayne will be opened on the 15th of this month, and that the Indiana portion will also be ready by that time.—*Cincinnati Gazette.*

Combustion of Water.

It has long been thought by scientific persons that water was yet to play an important part in the production of heat.

Dr. Hagan of Troy, after many years study and experiment, considers that he has at last found out the secret, and that by his invention he is able to unite the vapor of water or steam with the carbon of the ordinary fuel, so as to secure a perfect combustion with increased heat. He is selling large quantities of his apparatus which is adaptable to the warming of dwellings and the use of manufactures.

Canadian Securities in London.

The latest quotations of Canadian Securities in London were: Government five per cents 89 to 91; do., six per cents, 99@103; Grand Trunk Stock, 19½@20½; 1st preference bonds, 73@75; 2d pref., bonds, 66@68; Great Western Shares, 9⅝@9⅞; do., six per cent. bonds, 92@94; Northern Railway 1st pref., bonds, 82@84; Canada Land, 75@80.

☞ We understand that a small force of men has been sent on by the Chicago & Northwestern Railroad Company, and have commenced digging on the line of the road the other side of Devil's Lake about four miles from this place. There seems to remain in the minds of some of our people here a doubt as to the serious intentions of this company. Although we have no means of knowing any more about it than others who are incredulous, we don't believe there is any sham about this matter. Such a Company ought certainly to be above such business. We have great faith in the early completion of the railroad from Chicago to Baraboo.—*Baraboo Republic.*

☞ The conference of the representatives of Galena and Rock Island Railroad Companies and the extended line of the latter Company through Iowa, as well as those of the Chicago, Iowa and Nebraska and Cedar Rapids and Missouri River Companies, has resulted in the definite settlement to unite the Iowa roads at a point not further west than the west branch of the Raccoon River or further east than Marengo, a station upon the Mississippi and Missouri Road, about 50 miles west of Cedar Rapids. The new road will be built by both Companies, and is to form the main line to the point of junction with the great Pacific, the through business on both lines (the Rock Island and Galena) to be joint, both roads participating equally in the profits. Des Moines, Council Bluffs and Omaha are made points in the new road. The one road from the point of junction, instead of two continuous lines, will be built as rapidly as labor and materials can be procured.—*Chicago Tribune.*

Cincinnati and Zanesville R. R.

A meeting of the parties for whose account the road was purchased at the foreclosure sale in August last, was held on the 11th inst., at the office of the company in this city, pursuant to notice.

The meeting was largely attended, and was organized by the appointment of Mr. Henry Amy, of New York, as Chairman, and Messrs. Joel Rodebaugh, of this city, and Chas. C. Goddard, of Zanesville, as Secretaries.

Mr. Charles Moran, of New York, who purchased the road for the benefit of the parties to the reorganization, presented a report stating the time and condition of the purchase of the road, equipment and franchise of the company and the names of the several parties to the reorganization with the amount and nature of the respective interests held by each.

The new Company was then organized under the name of the Cincinnati and Zanesville Railroad Company.

The cost of the road and equipment will be represented in the new organization by $1,300,000 first mortgage and seven per cent. bonds, and about $2,000,000 of stock in shares of $50 each. No other mortgage is to be on the property of the company, except for the purpose of extending the road to Cincinnati, for which purpose the Directors were further authorized to create a new stock to any amount not exceeding the corporate limits of the charter.

The meeting adjourned to 2½ P. M., when the election for Directors took place, forty-three thousand three hundred and seventy votes (equivalent to $2,168,500) having been cast for the following gentlemen:

Erasmus Gest, Charles Reemelin, Robert Brown and S. N. Pike, of Cincinnati.

Richard Von Hoffmann, Henry Amy and Chas. Moran, of New York.

The election of these gentlemen was made unanimous *viva voce.*

The greatest unanimity prevailed, and a strong feeling was apparent of a determination to extend the road into this city.

At a subsequent meeting of the Directors, Mr. Erasmus Gest was elected President, and Mr. David Hull Secretary and Treasurer.—*Cincinnati Commercial.*

Placerville and Sacramento Valley R. R.

We have received the annual report of Francis A. Bishop, Esq., Chief Engineer and General Superintendent of the Placerville and Sacramento Valley Railroad, dated the 5th of January, 1864, which shows the progress of the work during the past year. The road was commenced at Folsom the first day of January, 1863, the line was thoroughly located, and during that month a portion of it was prepared for grading. The Company began the work themselves, the ground was broken by a small force on the 19th of February following, and operations were continued with satisfactory results to the 22nd of June, at which time the grading was taken up by J. R. Myers & Co., under a contract for the remainder of the grading and mason work in the first division, excluding section C (one mile) previously let to Pinney & Abbee. This work was not completed and accepted, however, until the 5th of December, owing to the sickness of the laborers through the malarious influences of the locality. The Engineer Corps also suffered from the same cause, yet notwithstanding these impediments, the work has been thus far successfully carried forward.

A few miles more of grading will complete the first division. The grading of this road, with a trifling exception, is completed from the Sacramento Valley Railroad at Folsom, to a point on Deer Creek, a distance of 10⅔ miles, and aside from 200 feet of low trestle bridging, and some open drains, which have been delayed by non-delivery of timber, the road-bed is ready for the ties and iron for that distance. The entire amount of grading completed on the First Division, is twelve miles. Four trestle bridges have been constructed, having an aggregate length of 176 feet, costing $7 per foot, including timber, iron and labor, assuming that all of the materials cost cash. But as the first cost of the timber was paid for in stock, the actual cash price of the bridges to the company is only $5 per lineal foot.

The obtainment of right of way through various ranches through which the road runs, was not procured without considerable trouble and with greater expense than was anticipated.

With the exception of a short distance in entering the town of Folsom, the land damages have been adjusted for the First Division of the road.

The total amount of land damages thus far arranged is $3,011, and 25½ shares have also been paid in the stock of the company in addition as a satisfaction to the owners.

The number of cubic yards of material removed during the year was 68,602. The total expenditures chargeable to construction amounted to $10,200 94; to engineering, $2,009 77—making the amount of money disbursed by the Superintendent during the year $12,210 71. There are no unpaid accounts against the company to exceed one hundred dollars, with the exception of some claims for land damages.

During the past year the line has been thoroughly located to Placerville and Shingle Springs.

The heavy enbankment at Buckeye Flat and the tunnel through the Forty Mile Hill have been avoided; also a lower crossing obtained at Weber Creek. In making these changes, heavier grades and more curvature were adopted, and, at the same time the line of road has been considerably lengthened. Against this is a reduction in the cost of construction of, perhaps, one half. As this division will be the last one completed, improvements on the present location can be made without much additional cost, and according to the condition of the Company's finances.

An estimate has been made for the second division, between Shingle Springs and Miller's Corral. The cost of grading that division should not exceed $140,000, and can be completed by the 1st of November next. The report recommends that the work be put under contract at as early a day as possible.

The work on the first division is progressing favorably. At Deer Creek the contractors encountered a very hard kind of rock, which they declined taking out at contract prices. The Board of Directors hold the matter in abeyance until the Engineer makes a practical test of the cost of removing it.

The bridges across Deer and Carson Creeks are yet to be built. The estimated cost of the two, including the masonry, is $3,200. There will be no difficulty in getting them ready in time for the iron. Proposals for ties for the first division will shortly be advertised for, and it is believed a superior article can be obtained from that section of the country, at a moderate cost.

In November last, Assistant Engineer Moore made a survey from Placerville to Strawberry Valley, connecting at that point with the surveys made across the mountains to Carson City, N. T., in 1862. The result of Mr. Moore's examinations is highly satisfactory, and places the practicability of a line of railroad across the Sierras on this route beyond a doubt.

The finances of the company are stated to be in a healthy condition and assurances of foreign aid in obtaining iron and rolling stock have been received. The future importance and value of the road are considered to be completely established. Two new and permanent towns are expected to spring up along the line, one, at Miller's corral, offering great advantages as a commercial centre for the rich valley of Cosumnes. The lumber, grain and hay of the adjacent country will there be eagerly exchanged for merchandize. The neighboring copper mines are also becoming important.

Nowhere in California are copper mines located which have the facilities for transporting their ores to market, equal to those adjacent to the line of this road. Cheap carriage will admit of a lower grade of ores being profitably worked, and from this fact alone we may expect a large influx of mining population.

In Amador County copper mining is becoming an interest of the first importance. Many rich mines are now being worked. The ore from these mines, and, in fact, almost the entire freight and passenger transportation of that county, will be drawn to Miller's corral. Stage lines are already projected to connect that point with Mokelumne Hill, in Calaveras County, and Columbia and Sonora, in Tuolumne County.

The business of the line is also expected to be large from the fact, that 3,700 teams passed by this route the last year, and the number is expected to be increased to 6,000 during 1864. From the report of the last and the present year, of which the foregoing is an abstract, it appears this road is progressing rapidly and with the fairest prospects.

Injuries to Employees.—Distinction between Negligence of Fellow-Servant and Employer.

There have been many cases in which railroad companies have been held not liable for accidents and injuries to their own servants when the damages were occasioned by the negligence of other servants of the company, although in the regular course of their duty to the company. The important distinction that exists between these cases, and the comparatively small number of cases in which the railroad companies have been at fault, deserves special mention. It is the duty of every employer to use all reasonable precautions for the safety of those in his service. He should provide them with suitable machinery, and see that it is kept in a condition which shall not endanger the safety of the employed. If the employer knowingly make use of defective and unsafe machinery, when an injury is done to a servant ignorant of its condition, and in the exercise of ordinary care, he must compensate the person thus injured through his neglect. The superior intelligence and determining will of the master demand vigilance on his part, that his servants shall neither negligently or wantonly be exposed to needless and unnecessary peril. The servant is obliged to rely on the judgment of the master that suitable machinery, and the needed requirements are supplied. He has not the means nor the opportunity of knowing whether those furnished may be safe, and he may be wanting in intelligence required for the proper determination of the question. His service is compulsory from the pressure of want. His attention is peculiarly due to the peculiar duties incident to his branch of employment. He assumes the risks more or less hazardous of the service in which he is engaged, but he has a right to presume that all proper attention shall be given to his safety and that he shall not be carelessly and needlessly exposed to risks not necessarily resulting from his occupation, and preventable by ordinary care and precaution on the part of his employer. This principle is discussed in the case of Buzzell against The Laconia Company in the Supreme Court of Maine. The decision, omitting certain formal portions, was as follows:

APPLETON, J.—The rule is well settled that a master is not liable to a servant for an injury caused by the neglect of a fellow servant in the same employ. Each servant assumes the risk of neglect on the part of fellow laborers. The question here presented is, whether the master is liable to a servant for an injury caused by his own negligence and want of ordinary care. In Vose *vs.* Lancashire and Yorkshire Railroad Company, 2 Hurls, and Nor. 728, the cause of action arose from the defective rules of the defendants who were held liable. In Patterson *vs.* Wallace McQueen, 748, "I believe by the laws of England," says Lord Cranworth, "just as by the laws of Scotland, in the actual state of the case with which we have to deal here, a master employing servants upon any work particularly a dangerous work, is bound to take care that he does not induce them to work under the notion that they are working with good and sufficient tackle, whilst he is employing improper tackle and being guilty of negligence occasioning loss to them." The same view of the law was taken by Lord Brougham in that case. The case of Marshall *vs.* Stewart, 33 Eng. L. & Eq., was an appeal heard in the House of Lords, from a Judgment of the Court of Session in Scotland, in an action by the representatives of a miner killed by injuries arising from the shaft of the pit being in an unsafe state, owing to the negligence of the defendant, his employer. The law of Scotland was throughout the case, treated as the same with the law of England. The servant in that case, was killed, while leaving his master's employment without proper cause. "A master," says Lord Cranworth "by the law of England and by the law of Scotland is liable for accident, occasioned by his neglect, to those whom he employs, I quite adopt the argument of the Solicitor General, that he is only responsible while the servant is engaged in his employment; but then we must take a great latitude in the construction of what is being engaged in his employment," and he further adds that the liability of the master continues "whatever he does in the course of his employment according to the fair interpretation of the words *eundo, morando, redeundo;* for all that the master is responsible, and it does not in my opinion make the slightest difference that the workman had, according to the finding of the jury, no lawful excuse for going out, no lawful excuse for leaving their work. "The master" remarks Lord Brougham in the same case, "who let them down is bound to bring them up even if they come up on their own business, and not on his, is answerable for the state of his tackle by which this lamentable accident was occasioned." In Bryden *vs.* Stewart McQueen, 30, Lord Chancellor, *inter alia*, said "the law of both countries (England and Scotland) makes a master liable for accidents occasioned by his neglect towards his servants."

In Dixon *vs.* Rankin, 14 Court of Session Cases, 420, the Lord Justice Clerk held, "the master of men in dangerous occupations is bound to provide for their safety. This obligation extends to furnishing good and sufficient apparatus, and keeping the same in good conditions, and the the more rude and cheap the machinery, and the more liable on that account to cause injury, the greater obligation to make up for its defects by the attention necessary to prevent such an injury."

The English cases cited by the counsel for the defendant are not adverse to these views. In Farrant *vs.* Webb, 86 E. C. L., 796 Jarvis, C. J., says "the rule is now well established that no action lies against the master for the consequences to a servant of the mere negligence of his fellow: that, however, does not negative liability in every case. The master may be responsible when he is personally guilty of negligence," &c. In Ormond *vs.* Holland, 96, E. C. L., 102, the liability of the master to the servant for personal neglect is fully affirmed. "The rule is," remarks Crompton, J., "That the master is not liable unless there be personal negligence on his part, which negligence may be either personally interfering in the work or in selecting servants who do interfere."

The same question has been repeatedly discussed in the courts of this country, and with the same result as in England. In Indianapolis Railroad Company *vs.* Love, 10 Indiana, 554, the court held the corporation liable if they allow an employee to pass over a defective bridge known to the corporation and not to the servant. If the employee knows, or both company and employee know, the company is not liable unless it give special direction. But in the present case it is not necessary to consider the effect of special direction, and as to that we give no opinion. In Keegan *vs.* Western Railroad Company, 4 Seld. 175, a railroad company which continued a defective and dangerous locomotive, was held liable to its servant engaged in running such machine for an injury sustained by him, (without negligence on his part,) in consequence of such defects. In Noyes *vs.* Smith, 28, Vermont 59, it was decided that a master was bound to exercise proper care and diligence in the selection of the agencies, and instruments with, or upon which he employs his servants; and if he fail to do so he will be liable to the servant for any injuries he may sustain therefrom. In Mad River and Erie Railroad Company *vs.* Baker, 5 Ohio, N. S. 541, the court say, "if the defects which caused the injury were actually unknown to the company or the conductor, and were not discoverable by due and ordinary care and inspection, and yet were such as resulted from a neglect of reasonable and ordinary care and diligence on the part of the company, either in procuring or continuing to use cars and machinery beyond the time when they could be safely used the company will be liable." In McGatrick *vs.* Wason, 4 Ohio, N. S. 566, the general rule is declared to be that an employer who provides overseers and controls the operation of machinery, must see that it is suitable, and if a defect unknown to a workman injures him, which ordinary care could have prevented, the employer is liable for the injury. In Byron *vs.* N. Y. Telegraph Company 26 Barb., 39, the plaintiff was employed to climb the poles and regulate the wires. The complaint alleged negligence in providing and using unsound poles, and in not having guards, &c. The company was held liable. Negligence was proved by showing the corporation knew the defect in the pole. The defect in that case was not known to the plaintiff and was not discoverable by inspection. In Hayden *vs.* Smithville Man. Company, 29 Conn., 548, it was held that a servant might maintain an action against his master for an injury caused by defective machinery when the employer knew, or ought to have known of the defect, and the servant did not know it, and had not equal means of knowledge. In Fifield *vs.* Northern Railroad, 42 N. H., 225, the plaintiff, a brakeman in the employ of the defendant's corporation, being injured without fault on his part, by their negligence in permitting the road to be blocked up with snow and ice, and their car to be out of repair, was held entitled to maintain an action to recover compensation for the damages by him so sustained. If the danger is known and the servant chooses to remain, he assumes it would seem, the risk and cannot recover. He might leave if he chose, but choosing to remain, he cannot remain at the risk of the master. Every employer has a right to judge for himself how he will carry on his business, and workmen having knowledge of the circumstances must judge for themselves whether they will enter his service, or having entered, whether they will remain. (Hayden *vs.* Smithville Man. Company, 29 Conn., 548.) "A servant," remarks Pollock, C. B., in Dynen *vs.* Leach, 26 Law Jur., 221, "cannot continue to use a machine he knows to be dangerous, at the risk of his employer." In McNeil *vs.* Wallace, 15 Court of Sessions [cases, 818, a collier sued his employer for an injury received by the fall of the roof of his excavation. It was the custom of the mine for the workmen each to prop his own excavation; the wood for that purpose being furnished by the coal master at the mouth of the mine. No wood was furnished, but the workmen went on to work although it was as the witnesses agreed "a seen danger," and the workmen were warned of it. The court held as he went on to work he assumed the risk himself, and could not recover of his employer.

Neither can the servant recover if his own neglect contributed to the injury. "In England, in Scotland, in every civilized country," remarks Lord Cranworth in Patterson *vs.* Wallace, 28 Eng. L. & Eq., 48, "a party who rushes into danger himself, cannot say, that is owing to your negligence." The master is not liable for the folly, the carelessness or the rashness of his servant. The plaintiff, to recover, must show ordinary care on his part.

Railroad Earnings--Weekly.

The earnings of the Galena and Chicago Union Railroad for the week ending March 15, were:

	1863.	1864.
Freight	$22,010 28	$26,597 40
Passengers	7,829 04	10,690 34
Mails, &c	1,200 00	1,300 00
Total	$31,039 32	$38,587 74
Increase 1864		$7,548 42

The earnings of the Chicago and Northwestern Railroad for the week ending 14, March 1864, were:

Passengers	$16,062 70
Freight	19,712 00
Mail	508 33
Express	352 93
Total	$36,636 64
Same period last year	23,287 93
Increase, 57½ per cent	$13,348 71

The earnings of the Chicago and Rock Island Railroad for the 2nd week in March, 1864, were $38,826 00
Corresponding week of previous year 29,252 00
Increase $9,574 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2nd week of March, were:

	1863.	1864.
Passengers	$20,051 00	$27,060 00
Freight &c.	36,284 00	38,911 00
Total	$56,335 00	$65,972 00
Increase		$9,637 00

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending March 14 were:

	1864.	1863.
Freight	$7,548 20	$5,083 53
Passengers	8,602 04	3,765 21
Mails, rents	981 00	1,040 63
Total	$17,131 24	$9,889 37
Increase 1864		$7,241 87

The traffic of the Great Western Railroad for the week ending March 11th, 1864, was as follows:

Passengers	$21,380 54
Freight and live stock	44,986 10
Mails and sundries	1,252 07
Total	$67,618 71
Corresponding week of 1863	70,937 13
Decrease	$3,318 42

The earnings of the Grand Trunk Railway for the week ending March 5, 1864, were:

Passengers	$25,431 88
Express freight, mails and sundries	2,500 00
Freight and live stock	68,888 56
Total	$96,820 44
Corresponding week, 1863	70,966 86
Increase	$25,853 58

The earnings of the Chicago and Alton Railroad Company for the week ending March, 15, were:

	1864.	1863.
Passengers	$16,632 69	$10,592 18
Freight	24,632 76	12,294 75
Sundries	1,448 28	2,230 77
Total	$42,718 73	$25,117 70
Increase 1864		$17,596 03

The earnings of the Toledo and Wabash Railroad Company for the 2nd week in March, were:

	1863.	1864.
Passengers	$6,708 90	$9,796 50
Freight	16,490 85	21,483 68
Total	$23,199 75	$31,280 18
Increase		$8,080 43

The earnings of the Marietta and Cincinnati Railroad for the 2nd week in March, were:

	1864.	1863.
Passengers	$7,838 19	$3,240 36
Freight	11,400 83	9,026 37
Mail, express & telegraph	899 58	752 00
Total	$20,138 60	$13,018 73
Increase 1864		$7,119 87

The earnings of the Michigan Central Railroad for the 2nd week in March, 1864 were $75,789 29
Corresponding week of previous year 52,813 13
Increase $22,676 16

A Successful Power Brake.

In this progressive age of Railroad improvements and inventions, few things have struck us as having more real merit, or of meeting a greater want in public feeling in regard to the safety of railroad travel, then a very simple and ingenious Power Car Brake invented by J. M. Brown, late of Cincinnati, Ohio, now of Worcester, Mass. Mr. Brown is a practical Engineer, who having been thrown from the track, and having a leg broken because his brakeman fell asleep and did not obey his signal to break up, set about finding out means of placing the Engine and train entirely under the control of the Engineer, independent of the brakeman. The result is a complete success. By a simple arrangement attached to the Engine, the Engineer can instantly apply every brake on the whole train with much more power than can be done by hand, and can as readily release them. Can slacken the speed of the train to any point, then let go again at will. The momentum of the train being used for the purpose of overcoming itself, by winding up a chain on a shaft, and applying the brakes now on every car without at all interfering with the hand brakes. This invention has already been introduced upon several Roads,

among which are the Boston and Maine, Boston and Lowell, Concord and Northern, Worcester and Nashau, Norwich and Worcester, Eastern, Pittsburgh, Fort Wayne and Chicago, Cincinnati, Hamilton and Dayton, Little Miami, etc., and is being fast applied to others. Any information in regard to details can be learned, and a lithograph furnished any Railroad Company, by application to S. HATHAWAY, at this office.

TO RAILROAD CONTRACTORS.

PROPOSALS ARE INVITED FOR THE Graduation, Masonry, Bridge Superstructure, Ballast, Cross-ties and Track Laying of the PITTSBURGH & CONNELLSVILLE RAILROAD, between

Connellsville and Cumberland,

Embracing a distance of about EIGHTY-SEVEN MILES, in Sections of about one mile each. Specifications will be ready at the Company's Office in Pittsburgh, on and after the 1st APRIL proximo, and proposals will be received until the 23d of APRIL ensuing.

BENJ. H. LATROBE,
President.

Office P. & C. R. R. Co.
Pittsburgh, March 15, 1864. 3t18

SUBSTITUTE FOR
CAR DUCK.

Kingman's Patent Car Covering.

A HEAVY CANVASS, bedded in Water Proof Paste and Painted. Costing now about half as much as Car Duck. Full particulars, directions, and samples sent. Also an experienced man sent to show the best way to apply it when requested.

WILLIAMS & PAGE, Boston.

Car Duck. Hemp Packing.

HEAVY 4 Ply Fitchburg Duck 100 to 140 inches wide.

BEST HACKLED HEMP PACKING.

For sale by

WILLIAMS & PAGE, Boston.

BROWNE'S METALLIC WEATHER STRIPS, AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

EAST RIVER
STEEL WORKS
AND

Manufacturers of CAST STEEL for WIRE RODS, FILES, TOOLS, MACHINERY, TIRES, RAILROAD AXLES, FROGS and SIDE PLATES, Steel Converters and Refiners, and CAST-STEEL WIRE DRAWERS.

We invite the attention of FILE MANUFACTURERS to our TAPER STEEL of all sizes for SAW FILES.

All steel warranted, both in quality and finish, equal to any imported.

OFFICE AND WAREROOMS,

254 CANAL STREET, NEW YORK.

Notice to Contractors.

ENGINEER'S OFFICE MORRIS & ESSEX R. R. Co.
NEWARK, N. J., Feb. 15th, 1864.

SEALED PROPOSALS will be received at this office for the grading, masonry and bridging of the extension of the Road of this Company, from Hackettstown to the Delaware River, at Phillipsburg, (a distance of twenty-three miles,) until Saturday, the 26th day of March next.

Maps, profiles, plans and specifications, with blank forms for proposals and approximate estimates of quantities, will be in readiness at this office on and after Saturday, March 12th.

6t8. J. B. BASSINGER, Chief Engineer.

TO RAILROAD CONTRACTORS.

Sealed proposals will be received at the office of the Pacific Railroad, (of Missouri,) in St. Louis, till March 25, 1864, for doing the graduation and masonry of about thirty-five miles of the road, being from Holden, in Johnson County, to a section in Jackson County between the Little Blue and Independence. Profiles, list of sections to be let, giving time as to when they must be completed, forms of bids, specifications, &c., can be seen at the office of the Chief Engineer in St. Louis.

Bids should be made for each section of about one mile, and no distance greater than ten miles will be let to any party or firm

Payments will be made monthly in cash, fifteen per cent. being retained till the completion of the work.

Bids should be addressed to GEORGE R. TAYLOR, President, and where the bidder is not personally known to the President or Engineer, he must accompany his bid by substantial references, and should give also his post-office address, and he will be informed of the acceptance or rejection of his offer.

The company reserve the right to reject any or all bids.

T. McKISSOCK, Chief Eng'r and Sup't.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

Currency of Russia.

It is well known that the currency of Russia consists almost exclusively of paper. Travellers complain of the variety of colored notes which there represent money, and of their ragged and dirty appearance. We are also beginning to know something of the unpleasantness of carrying such symbols about us, since the disappearance of silver small change from circulation. We hear nothing of its being exported in large quantities abroad like gold, unless we take into account the dollars and half dollars which have found their way into the Canadas, and we imagine that it exists among us in shape of hoards not to be seen again in broad day light, till our paper money is again convertible into gold on demand.

Russian finance has at this moment something of the character of our own, and therefore is worthy of notice by all those who are interested in our national finance.

On examining our foreign files we perceive that an article which lately appeared in the *Revue des deux Mondes*, on this subject, created great uneasiness at St. Petersburg, and led to an animated discussion in the leading Russian journals. The motive of the author of the article was charged to have been a malicious one, and among those who have appeared in the conflict to defend the Russian system is M. Raffalovich, a rich banker of Odessa, who to great possessions adds a large experience in business, and a thorough knowledge of the resources of his Country. It is to his views we propose to give our attention, as far as we are able to comprehend them from the translation of his memoir as it appears in the English journals.

Like all other Bankers he is opposed to the issuing of paper money by any but by banking institutions, and yet he considers that the paper currency of Russia is not excessive, not being in all but six hundred and thirty five millions of roubles (the rouble at 75 cts.) while that of England is one thousand millions of francs (20 cents each) that of France something less, so that of Russia is really but a very little greater. Mr. Raffalovich maintains the necessity of this large circulation, from the fact that there is no such system of rapid intercommunication in Russia as exists in France and England, that the distances between commercial centres are enormous, and there is a great lack of a good system of banking. Russia contains seventy millions of people, and to traverse the Empire between its commercial bounds, requires fifty and sixty days. On the contrary, in France and England a man may almost pass from one end to the other in a couple of days and nights. Payments of money in Russia are always made in bank notes, and not in checks or drafts, and these are kept in the pocket ready to be used. Money orders are unknown, the monies received by the Government for taxes are not immediately disbursed, but remain for some time in the districts where they are collected, before they reach the treasury.

It is therefore contended that an immense amount of paper money is constantly withheld from circulation, and that the real quantity passing from hand to hand is but little more than one third of the whole issue.

One of the most curious points discussed by the writer is the effect of paper money on exchange. The article in the *Revue* maintains that the quantity of paper money afloat in a country acts injuriously in its exchange. The Russian banker maintains the opposite, and asserts that exchange depends upon the exportation of products. Thus he says in 1856 and 1857 when the paper currency of Russia was greater than it is now, and could not he exchanged for gold, exchange on Paris was favorable to the Russian bourse, and that it was entirely caused by the increased exportation of Russian products. He asserts that the flow of Russian capital to other markets, in consequence of the reduction of the interest in Bank deposits at home, the increase of imports over exports, *caused partly by the reduction of the tariff*, and the drain of funds to supply the wants of travellers, who are permitted to go abroad with greater freedom than formerly, are the real causes of the unfavorable condition of Russian exchanges at the present moment.

These conditions of Russian finance somewhat resemble our own. We see paper money in quantities unknown before in this Country, and our imports exceeding our exports every week, by a very large difference.

These imports, many of them purely articles of luxury and fashion, find ready purchasers at any price, because paper money is so plentiful, and though it has to be reduced to gold to pay the cost of the imports abroad, there is margin enough left for a large profit to the importers. The business thus transacted is however very much like passing a coal of fire from hand to hand, each one pushing it to his neighbor as quickly as possible, and so rapid is the movement, that no one holds it long enough to burn himself. If by any change our exports were equal to our imports, there would be no balance in gold to be remitted. This simple proposition can not be disputed. How far it would be wise to attempt by legislation to bring about the equalization, remains for consideration. Doubling the duties on all articles of luxury, has been suggested. The effect of this would be to leave the revenue very much as it is. If half our imports were cut off, and the duties on the remainder doubled, the revenue would be the same. Those persons only who are getting rich, or have become rich in paper would be able or willing to

purchase wines at five or ten dollars a bottle, or Smyrna grapes at one dollar a pound. Easy come and lightly go is the motto of the suddenly made rich, but as political economists, we have but little sympathy for their imaginary wants.

It is the hard working, industrious, saving, prudent people who really accumulate the true wealth of the nation, who fill its reservoirs, and keep them full, and not those who with the fury of a suddenly swollen mountain torrent, come rushing over the old land marks of business, sweep on with resistless power, and suddenly disappear from view, leaving wrecks and ruins behind them where they have passed. We are certainly at a very critical moment in our financial affairs, having as we believe issued as much paper for circulation as the Country can bear. Russia congratulates herself on her great and inexhaustible resources, and so may we with even greater cause, for the mines of Russia are surpassed by ours. Our internal transportation, natural and artificial is perfect, our soil is superior, and above all, our enterprise is unchecked, and seizing opportunity generally comes off victorious.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS.

For the half-year ending 31*st December*, 1863.

Earnings of the half-year	£477,839
Deduct ordinary working expenses	275,073
Net balance over ordinary working expenses	£202,766
Deduct renewals of permanent way charged to revenue in the half-year	37,037
Net balance	£165,729

The gross receipts from traffic and all other sources for the half-year have been £477,839, as against £439,361 for the corresponding half of 1862, or an increase of £38,478, or 8.76 per cent. This increase has been obtained in the face of unusually low rates for freight throughout the fall and winter, caused by depressed prices of produce, and by the navigation of the St. Lawrence and the lakes having been kept open, owing to the mildness of the early winter season, until the close of the year. Thus the winter rates, fixed at a higher scale when the navigation is closed, could not be put into operation as heretofore about the first week in November. The estimates formed of the harvest in 1863 in Canada and the Western States have also not been fully realized. From these causes it will be noticed that while the total tonnage of freight carried during the half year has been 372,984 tons, as compared with 325,337 tons in 1862, the receipts have only been £282,067, as against £286,273. Thus, the freight of the December half of 1862 yielded an average receipt of 17s. 7d. per ton, while that of 1863 only yielded 15. 1d. per ton.

The passenger receipts, on the other hand, show a very gratifying increase: the number of passengers of all classes carried having been 529,723, as against 453,926 in the last half of 1862, or an increase of 75,797 or 16.69 per cent. The money earned has been £170,484, as against £127,180, or an increase of £43,304, or 34.05 per cent. Thus, while in 1862 the average receipt per passenger was 5s. 7d., that of 1863 has been 6s. 5d. As the company's local passenger charges have been reduced in many cases, it will be seen that this increase has been caused by the conveyance of a larger proportion of "through" or long distance traffic.

The amount carried into the accounts for "Postal Service" is merely nominal, no settlement having yet been arrived at with the Government of Canada, which is matter of deep regret. This delay has seriously affected the company's financial position, preventing it from giving that increased accommodation which the trade of the Province stands so much in need of, and has also involved great hardship upon the late creditors of the company, who gave up claims and securities in order to promote the interests of the undertaking, and in the confident hope of that just and early arrangement, so often promised, hitherto without accomplishment.

The ordinary working expenses show a total outlay of £275,073, as against £262,307 in 1862, or an increase of £12,766, or 4.86 per cent., expended in earning an increase of £38,478, or 8.76 per cent.

The per centage of ordinary working expenses in 1863 is 57.56 per cent., as against 59.68 per cent. in 1862.

The following statement shows the per centage rate of ordinary working expenses since 1861, inclusive:—

	June Half Year.	Dec. Half Year.
1861	87.32 per cent.	68.64 per cent.
1862	77.23 "	59.68 "
1863	63.87 "	57.56 "

The following statement shows the progress of the net revenue of the company since 1859:—

Year.	Miles open. No.	Earnings. £	Expenses includ'ng renewals. £	Revenue balance. £	Yearly Total. £
1859—June.	880	223,930	203,062	20,867	73,537
" Dec.	880	282,939	230,448	52,490	
1860—June.	978	314,811	268,810	46,000	102,684
" Dec.	978	367,847	311,163	56,684	
1861—June.	1,090	347,110	300,324	46,785	142,492
" Dec.	1,090	419,469	323,701	95,707	
1862—June.	1,090	382,992	319,556	63,436	170,233
" Dec.	1,090	439,361	332,563	106,797	
1863—June.	1,090	434,339	310,166	124,173	269,901
" Dec.	1,090	477,838	312,110	165,728	

From the net profit of the half-year, viz., £165,728 7s. 3d., there has to be deducted the [nominal] amount of £13,104 6s. 11d. for postal and military service receipts, and £20,032 17s. 4d. for loss on American currency, leaving [including the balance carried forward from last half year of £185 19s.] £132,777 3s, which has been applied, or is now applicable, as follows;—

Interest, &c., paid on land			£1,986	1 4
Do. on mortgage to Bank of Upper Canada			4,423	16 2
Do. Promissory notes, European Exchange			1,712	13 6
Do. British American Land Co.'s debentures			616	8 9
Do. Montreal Seminary debentures			616	8 9
Do. Island Pond debentures			2,700	0 0
Half yearly instalment Portland Sinking Fund			2,311	12 4
			£14,367	0 10
Atlantic and St. Lawrence lease	£31,992	4 2		
Detroit Line lease	11,250	0 0		
			43,252	4 2
First preference bond interest for half-year	49,920	15 0		
Second pref., bond interest for half year.	24,715	0 0		
			74,635	15 0
Balance carried forward to next account			532	3 0
			£132,777	3 0

As already announced, the half-year's interest accruing on the First and Second Preference Bonds to the 31st December last, will be paid on and after the 15th April, on the presentation of the coupons at the Company's bankers, and the certificates for the arrears to be capitalized for the first half-year on the 2nd Preference Bonds, and for the whole year on the 3rd and 4th Preference Stock, will be subsequently issued.

The improvement of the Permanent Way by strenthening and renewal has progressed rapidly during the half-year. No less than 80¼ miles of line relaid with heavier rails fished at the joints have been renewed, as against 54¼ miles in the corresponding half of 1862. The total length of line relaid in the year 1863 has been 125¼ miles, or nearly one-eighth of the whole length of the Grand Trunk Railway system. The length laid in 1862 was 80¾ miles. The number of new sleepers or ties, laid in, was in 1862, 302,172, and in 1863, 405,001.

The Board now consider that the time has arrived for distributing the extra charges involved in reconstructing portions of the main line to their proper accounts, and for commencing the proposed "Renewal Account" to be gradually extinguished out of Revenue. Therefore, the sum of £8,622 has been charged to capital for additional weight of iron and for fish plates, and £26,035 has been placed to such "Renewal Account."

Arrangements are in progress for the manufacture, under contract, of steel and steel-headed rails, to be laid down in place of iron rails on the main line; and the information and reports which the Board have received confirm their previous impression of the greatly superior endurance of the proposed new material. The proved results on the London and North Western Line afford most valuable evidence; it has, in fact, been found, as stated by the Chairman of the London and North-Western Company at their recent half-yearly meeting, that the new rails laid down on the busiest portions of their Line have already lasted ten times as long as the ordinary iron rails.

Assuming results at all approaching to these experiences, it may be estimated that a great future economy in cost can be achieved on the Grand Trunk Main Lines, by a comparatively small additional outlay on first cost of Renewal: and it will undoubtedly be so much added to the improved and solid value of the property.

It is proposed for the future to charge direct to Revenue £70,000 a year for Renewals, and to carry the excess outlay in the next two years to the "Renewal Account," and so far as the extra cost of "fishing" and of steel are concerned, to Capital.

The Company's practical officers report that a regular charge to Revenue of £70,000 per annum, equal to the renewal of 80 miles a year of improved and strengthened road, will in the course of five years overtake and extinguish the Renewal Account established. But it will be observed that such an account involves the provision of so much available Capital to meet the first outlay to be so extinguished.

The outlay on Capital Account for additions to the plant and property of the Company has been £47,182, as against £18,142 for 1862. The former sum includes the cost of 99 new freight cars, two new sleeping cars, and two new engines, being part of the additional plant proposed to be provided in the last Report confirmed by the Bond and Shareholders.

The large and steady increase in the traffic will compel further additions to the means of conveyance, and enlarged station accommodation at various points.

The Board are happy to report that the Canadian government have released the £42,500 Second Preference Bonds previously retained, enabling the use of these securities for similar necessary outlay.

As the Equipment Mortgage Bonds authorized by the Arrangements Act of 1862 are to be offered in the first instance to Bond and Shareholders, the Board propose to permit applications for the early issue of a moderate portion of this capital.

An addition to Bond capital for unpaid interest on Bonds has been made in the accounts, under the terms of the Arrangements Act, 1862.

The issue of Postal and Military Service Bonds to the Company's creditors now appears in the Capital Account; as also the issue of Fourth Preference stock.

The long-pending claim of Mr. Turcotte in connection with the Three Rivers Branch has, during the half-year, been amicably settled, and the outstanding claims not disposed of in Canada are now of a very trifling amount.

As the Arrangements Act provides for the General Meetings at which the Accounts are sub-

mitted being held in April and October, it will be necessary, with a view to regularity, to obtain powers from the Canadian Parliament to pay the Bond Interest earned subsequent to the approval of the Accounts by the Bond and Shareholders.

An agreement has been sealed between the Grand Trunk and Buffalo and Lake Huron Companies for mutual facilities of working and interchange of traffic; and powers will be sought in the present Session of Parliament to confirm the same.

The Board believe that the results of the past half-year's working, showing as the do a steady increase of revenue and an important decrease in the per centage of working expenses, will be regarded as very satisfactory by the Bond and Shareholders. The latest accounts received from Canada speak hopefully of the traffic prospects of the current year, and they at the same time afford many evidences of the improved state of the public opinion in Canada in regard to the undertaking.

The Directors who retire by rotation are Messrs. Blake, Cassells, Hodgson and Molson, and the retiring Auditors in Canada are Messrs. Taylor and Morland, and in England, Mr. Newmarch. They are eligible and offer themselves for re-election.

On behalf of the Board.

EDWARD W. WATKIN, *President.*

On the 31st Dec. last, the Company owned 80 passenger, and 147 freight engines; 88 first-class, and 45 second-class cars, as also 12 sleeping cars, "composite;" 38 Post-office and baggage, 22 baggage, 1,853 box, 50 box and cattle, 55 cattle, 1,073 platform and 73 ballast cars. The rolling stock further comprised 57 break-vans and 32 snow-ploughs. The total rolling stock, therefore, comprised 228 engines and 3,450 passenger, freight and other cars. In the half year ending on the 31st December, 2,532,184 miles were run against 2, 324,281 miles run in the corresponding period of the previous year. In the last six months of 1863, 58,113 cords of wood were used against 59,-628 in same period of 1862.

Illinois and Michigan Canal.

The following is an abstract of the Report of the Trustees for the year ending November 30, 1863:

Receipts during the year:	
Sales of lands and lots	$22,352 59
Notes paid for previous sales	7,654 58
Canal tolls December 1st, 1862, to November 30, 1863	210,386 68
Rents of water power, lands and lots.	3,900 60
Sales of old material, &c	1,941 79
Interest on deposits	6,450 15
David Leavitt, repayment of him	32,063 90
Accumulated profits on currency received in Illinois for lands, &c., &c.	5,983 70
Loan of $1,600,000, erroneously over-reported in former reports	3,358 30
Total for year ending Nov. 30, 1863	$294,092 29
Balance reported Nov. 30, 1862	267,850 30
Total to be accounted for Nov. 30, '63	$561,942 59
Expenditures:	
Principal of registered canal bonds	$165,791 66
Premium paid on gold for dividend on bonds payable in London	37,245 24
Maintenance and repairs of canal feeders, &c.	62,715 64
Tolls, expenses of collectors & salaries	6,486 41
Canal property, sales of lands, and expenses	1,206 67
Contingent and general expenses	14,694 21
Interest and exchange on funds remitted to New York for payments there	294 58
Total expenditure for year 1863	$288,434 41

Schedule embracing the entire amounts received from the organization of the Trust in 1845, to November 30, 1863:

Classification.	Receipts.	Expenditures.
1. Loan of $1,600,000 principal and int.	$1,601,891 90	$2,153,771 31
2. Construct'n, canal and feeders	2,132 25	1,429,606 21
3. Canal lands, sales and protection	4,217,851 26	105,291 09
4. Arrears, interest reg. bonds		2,155,622 38
5. Principal reg. b'ds		1,083,373 66
6. Maintainance and repairs, canal, &c.	20,841 85	1,036,291 53
7. Tolls, collection, inspection, &c.	2,768,951 25	103,767 55
8. Canal damages, &c		20,408 32
9. General expenses and contingencies	3 00	315,967 92
10. Premium on gold for dividend on bonds payable in London		87,245 24
11. Int. & exchange.	122,335 85	19,153 97
12. Loss on "wild cat" currency '61.		14,234 58
13. Loss on counterfeit money 1848 to 1863		328 94
Balance in hands of the Treasurer, Nov. 30, 1863		258,944 66
	$8,734,007 36	$8,734,007 36

Some of the leading articles transported upon the canal from 1860 to 1863 are exhibited thus:

	1860.	1861.
Lumber, ft., B. M.	49,070,328	43,096,796
Corn, bush.	4,359,014	11,470,436

Sundries	48,623 63	81,535 56
U. S. Tax	.....	10,174 05
	$200,514 38	$329,344 05
Net earnings	$362,799 77	$445,274 43
Additional exp	1,527 11	137,747 28
Balance	$361,272 66	$307,527 15

The capital stock of the company has been increased to $1,517,450, by the conversion into stock of $77,000 of 7 per cent bonds. The bonded debt has been correspondingly diminished. The aggregate of stocks and bonds remains the same as last year, viz: $1,611,450. Bonds of the St. Louis, Alton and Terre Haute Railroad to the amount of $94,552 59 have been sold for $85,696 06; and $100,000 of the U. S. 5-20's purchased.

The gross receipts from transportation were		$774,618 48
Received from other sources		15,368 65
Total revenue		$789,987 13
Operating expenses	$319,170 00

Negligence of Parties Injured upon Railroads.—Injuries to an Infant.

In the case of Wright against Malden and Melrose Railroad Company, a jury had rendered a verdict against the company for $3,000. The defendants appealed from the judgment, on the trial that the plaintiff's intestate, a child, was run over by one of the cars of the defendants, on their horse railroad track in Sudbury street, Boston.

The child was two years old and died in consequence of the injury. One of the grounds upon which the plaintiff claimed that the servant of the defendant was negligent, was, that he was driving at a very rapid rate; to wit, as fast as ten or twelve miles an hour.

The defendant's counsel asked the judge to instruct the jury as follows: 1. That it would be negligence to permit a child of the age of this child to go on a public street unattended. 2. That negligence and imprudence of parents or guardians, in allowing a child of the tender years of this child, to be exposed to injury on a public and frequented street, furnishes the same answer to an action by the administrator of the child for such injury as the negligence or other fault of an adult plaintiff. 3. That if the accident would not have happened, had the parents or guardians taken proper care of the child, and the want of such care on their part had a material effect in producing the injury, or substantially contributed towards it, the plaintiff cannot recover. The judge refused to so charge except in a modified form. The following was the decision on appeal.

Hoar, J.—The instructions of the court to the jury were given with great accuracy, and what it was incumbent upon the plaintiff to prove, and the rule as to the burden of proof, were stated with case and exactness. But upon another part of the caae we find greater difficulty. The defendants' counsel asked the court to instruct the Jury, "that it would be negligent to permit a child of the age of this child to go on a public street, unattended."

The presiding Judge did not give this instruction; but said to the Jury substantially as follows: "There is a sense in which I may properly use the language of the request. If the parents, knowing the position of the child and its danger, and the means of preventing the injury, and neglected to use them, and permitting the child to remain in danger, the plaintiff, cannot recover; but I understand the defendants' counsel to desire me to rule that the mere fact that the child was passing across the street unattended, is, in and of itself, necessarily such a want of due care, or such a fault, as to prevent recovery, by the plaintiff. I cannot so rule. It is not necessarily, in and of itself such evidence of fault or neglect, as entitles, the defendants to a verdict."

We fear that this statement of the law by the learned Judge must have given an erroneous impression to the Jury, as well by what it omitted, as by what it directly expressed.

In the sense in which he understood the defendants' request, the instruction asked should certainly not have been given. Cases may undoubtedly be supposad in which the child might have been upon the street, and have been "permitted" to be there unattended, without fault or negligence on the part of his parents, or those having him in charge. The house might have been on fire, and the child might have been put into the street; or his parents might have been disabled by accident or disease, and the child have been sent into the street, as the best alternative for his own safety and preservation. A person having charge of him in the street might have fallen senseless, or met with some injury, which left the child to stray away unattended. True, there is nothing in the report of the evidence, so far as it is contained in the bill of exceptions, to show that any such state of facts was before the jury; but we cannot presume that all the evidence is reported, and the possibility that such things might occur, is enough to show that the instruction asked was too broad. But the Court proceeded to state the sense in which the instruction might properly be given; and in doing this, gave to the jury a definition of what would constitute negligence in the parents, which seems to us much too limited and defective. The jury might well infer from the language of the Court, that it was only when parents knew the position of the child and its actual dangers, and had the means of preventing the injury and neglected to use them, and permitted the child to remain in danger, that they were justly chargeable with neglect. This would lead their minds wholly from the consideration, whether the parents had used reasonable and proper care to prevent the infant from going into the street at all; a question of scarcely less importance, and which may have deserved serious attention. The prayer for instructions rendered it highly proper that some ruling should be given as to what would constitute negligence in the parents, sufficient to defeat the action; and the statement made did not cover the whole field of inquiry, and might mislead the jury. But the direction which followed went further. The jury were told that the mere fact that the child was passing across the street unattended was not necessarily in and of itself, such evidence of fault or neglect as entitled the defendant to a verdict. In this opinion we cannot concur. We think the fact, that a child of two years in passing unattended across a public street in a city traversed by a horse railroad is, "in and of itself necessarily," *prima facie* evidence of neglect in those who have it in charge. It is a fact open to explanation, and not conclusive. But in and of itself, standing alone, unexplained and unaccounted for, it is sufficient to authorize a jury to find that the child was not properly taken care of, and to entitle the defendants to a verdict.

The jury were rightly instructed that the burden of proof was on the plaintiff, to show that a want of care on the part of his parents did not contribute to produce the injury. We cannot regard evidence that he was in the street unattended, and was run over by the cars, as having any tendency to show that proper care of him was exercised, but the contrary. He was incapable of taking care of himself, and he was entitled to the care of others; and this does not show that he received it. There is nothing in the mere fact of his dangerous situation to show that it was necessary or proper, or occasioned by anything else than neglect.

It has been decided by the Supreme Court of Vermont that the question of negligence is a mixed question of law and fact; and that it is the duty of a judge to instruct the jury what will constitute negligence. Trow *vs.* Vermont Central Railroad, Verm. 487. Briggs *vs.* Taylor, 28 Verm. 180, and in several recent cases in this Court it has been held, that where a plaintiff who seeks to recover compensation for an injury occasioned by the carelessness of another offers no evidence that he was himself in the exercise of care, but on the contrary, the whole evidence on which his case rests shows that he was careless, the Court may rightfully instruct the jury as a matter of law, that the action cannot be maintained.

Exceptions sustained.

Railroad from Buffalo to Salamanca.

A railroad convention was held on the 11th ult., at Yorkshire, N. Y., for the purpose of considering the propriety of using all reasonable means to forward the construction of a railroad through the Valley of Great Valley Creek, from the city of Buffalo to same point near Great Valley in the county of Cattaragus. On motion, a committee was appointed to submit to the Convention a plan whereby the towns affected by the proposed railroad from Buffalo to Salamanca may best exert their influeuce to the furtherance of the object. Whereupon the following preamble and resolutions were submitted and unanimously adopted:

Whereas, It is for the benefit of the towns represented in the Convention, that a railroad be constructed between Buffalo and Salamanca through the Valley of the Great Valley Creek; and

Whereas, The towns interested should do everything in their power to aid and assist such an enterprise by donating the right of way, &c., therefore,

Resolved, That a committee of three from each town be appointed to secure the right of way through said towns, and perfect plans to pay for said right of way in such manner as they may think proper, after consultation with their fellow-citizens. Such town committee to act only within the limits of their own towns.

Resolved, That a committee of four be appointed to ascertain the ownership of, and if necessary to procure the franchises of the Buffalo and Pittsburgh and the Buffalo and Alleghany Valley Railroads, and hold them for the benefit of the first company, or any company that will construct a railroad from Buffalo to Salamanca through the valley of the Great Valley Creek.

Under the first resolution, committees were appointed from the towns of Aurora, Holland, Wales Sardinia, Yorkshire, Machais, Ellicottville, and Great Valley.

Under the second resolution, the following gentleman were appointed, viz: Aaron Riley, Aurora; Eleazer Harmon, Ellicottville; L. D. Cobb, Yorkshire, and A. G. Rice, of Ellicottville.

The representatives from the several towns along the line gave assurances that the right of way will be given to any company who will construct the road.

Milwaukee and St. Paul Railroad.

The Milwaukee and St. Paul Railroad Company, have now a considerable number of men at work on that part of the Watertown Division between the Mississippi Junction and Milwaukee. The intention is to have this short section completed and in running order as early as July. We notice the contractors have circulated handbills, calling for more laborers, and offering good wages.

Work is still progressing on the section between Columbus and Portage City, a great portion of the grading having been completed. We presume the next move will be to build the short section between Sun Prairie and Madison, the immediate construction of which would be a great public convenience. We can now hope that it will not long be delayed.—*Watertown Democrat.*

American Railroad Journal.

Saturday, April 2, 1864.

Stock Exchange and Money Market.

It will be perceived that the Assistant Treasurer, Mr. Cisco, has announced under instructions from the Treasury Department, that he will deliver to the importers all the gold they may require for the payment of duties, at ¼ per cent. less than the price asked for it in the street; they are not to use the certificates issued by him for any other purpose. The effect of this measure, though but a few days old, has been to stagger the market, and produce a decline from the previous rates. It has been asserted however, that there exists a combination, having at command as much as seven millions of currency, composed, we are sorry to hear, of persons who have been loud proclaimers of their loyalty to the country, and have been considered as confidential friends of Mr. Chase, yet form the nucleus of this combination. We also understand that their connection with numer-

ous banks in this city, now glutted with deposits, is so intimate and strong, that they feel able to obtain on their own names all the additional amounts necessary to control the market.

How true this is we are not able to say; but of this we are sure, the parties engaged in any such transaction, conscious as they must be of the comparative depreciation of the National currency, and the consequent enhancement of the prices of the necessaries of life and the cost of living, cannot justly claim the credit of being loyal men or the friends of the people. As we believe in "the eternal fitness of things," we venture to predict that operations such as we have alluded to will finally end in the discomfiture of those who may engage in them. We shall see in a few days the further effects of the benign intentions of Congress in attempting the relief of the importers. A regular daily underselling of the street price of gold by the Treasury will at all events try the metal of the operators, and perhaps prove a corrective which will be sufficient without the necessity of further reproof.

We have learned from parties who ought to know, and one extensively engaged in the manufacture of cotton, that there is a larger stock of this article on hand in this city than the public generally are aware. We have heard the number of bales stated at 40,000, which at $500 per bale, would be equal to two millions, and this sent to Europe would make a large difference in favor of our exporters, not only in the amount to be realized but in the profits of exchange. It may be well enough to mention in this place, that several hundred bales of S. American cotton, known scientifically as *Gossipium arboreum*, have recently been received in this city, and though unginned, brought the shippers upwards of sixty cents per lb. This cotton though of a short fibre is very strong and workable. It is also very abundant in the country of its origin, and still further we may say, that considerable numbers of cotton gins have been sent out to the shippers at their request, so that the article may be more carefully prepared for this market. It is noticeable, says our informant, that there is a reduction in price of many articles of which cotton is a component part, of at least 20 to 25 per cent. from what was demanded a few months since.

We must also remember that with the exception of small quantities of cotton which now and then slip out of Wilmington, the main bulk of this article is now surely and rapidly coming into the Union lines. And many persons are of the opinion that the quantity to come is so large, that it will yet change the balance of trade in our favor. This is certainly a most desirable event, and we hope to be able to have the pleasure of recording the *fact*.

The Secretary of the Treasury has been expected in New York for some days past, not to negotiate new loans beyond those already announced and become popular, but to consult with our wisest and most disinterested citizens on the financial policy of the Government generally, and to listen to such suggestions as may naturally be offered him.

It is useless to recur to what other plans of finance might have been adopted. We are of the opinion of those who believe that on the whole, the Treasury department has done its best to rely on the credit of the nation at home rather than to trust to the tender mercies of foreign capital. Evidently the people approve of the policy which has prevailed. There is one unanswerable reply to those objectors who maintain that the money should have been borrowed abroad at any price, and it is this, it would have been utterly impossible to have borrowed sixteen hundred millions of dollars anywhere in Europe. England, the richest of foreign nations could not now on her own account raise any such sum. It has taken her hundreds of years to get trusted for what she now owes, and it is absurd to suppose we could have raised the sums necessary for this war by applications to foreign bankers. What we have to do is to tax heavily, pay our interest in gold regularly, and trust to the industry of the people, and the unexampled resources of the country to bring everything right in the end. We are engaged in a struggle on which hang the hopes of freedom and humanity throughout the world. It is now to be decided whether we are able to govern ourselves, protect ourselves, sustain ourselves, and preserve to future generations the blessings we inherited from our forefathers. The cause is worth all our sacrifices, and finance, as an element of power is to be treated as such, and not as the final principle of Government and States.

The railway share market continues remarkably steady, with several exceptions where the prices have suddenly advanced or declined through particular causes.

There can be but one opinion as to the ultimate and fixed value of most of our great lines. Population and production are doing their work silently but surely. Common prudence in selection, is all that is required by those who wish to invest and secure future incomes.

Money is plentiful but the rates do not fall much below 7 per cent., and will not while so many new and inviting investments are offered to the public. We repeat our previous opinions that coal and other mineral stocks which are actually capable of large production deserve consideration. Especially in coal and iron may money be safely placed, for the consumption of these is largely increasing, and must increase as the country advances in population, manufactures and commerce.

There are some things which may be demonstrated and this is one of them, that the production of fuel and the useful metals must increase with the increase of numbers. Faith in this truth if it could have been exercised thirty or forty years ago, would have made the fortunes of many men, towns and cities, and it is not too late to see the future as it is to be.

Government stocks continue strong, and subscriptions to the new 10-40's are coming in rapidly. More than half a million were received on Tuesday last. They are likely to be as popular as any similar loan yet put upon the market.

The week's exports of domestic produce and miscellaneous goods (exclusive of specie) from this port, have been to the value of $3,177,025, against $4,534,075 same week last year, and $2,320,060 the corresponding week of 1862.

The total value of imports of foreign goods at the port of Boston for the week ending March 25, was $972,758, against $903,920 for the corresponding week last year. The total value of exports from Boston for the week ending March 25, was $360,580 63, against $570,685, for the corresponding week last year.

The total value of exports from the Port of Baltimore for the week ending March 25th, was $147,879.

The business of the Sub-Treasury on Tuesday was: receipts, $3,954,290 17—for customs, 257,000; payments, $5,025,259 85; balance, $32,704,383 79.

Money was more active during the weeek, and 7 per cent. was readily obtained. Some of the banks complain of a scarcity of plain legal tenders, and have paid over their counters 5 per cent. notes with nearly a month's interest, a fact which proves the scarcity beyond all question.

Several houses in the street hitherto foremost in the gold market, have under the influence of the present Treasury movement withdrawn their attention from that commodity, to other operations more promising.

In addition to our usual tables we give the present week another of a novel and interesting character, showing the condition of all the mining companies that are now known in the market, and we think we may without hesitation assert, that no person can safely invest or deal in any of the securities now afloat, public or private without consulting our tables, prepared with great care and a necessity of the times.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio 6s, 1860, 102; do., 1886, 110½; Illinois coupon bonds, 1862, 101½; Georgia 6s, 60; New York state 5s, 1874, 104; Illinois War Loan, 102; Indiana War Loan, 98; Illinois Canal bonds, 1860, 100; North Carolina 6s, 58½; Chicago and Milwaukee, 83; Peninsula R. R., 70; Long Island R. R., 96; At. & Gt. Western (Ohio div.) 1st mort., 104; Detroit, Mon. and Toledo bonds, 105; Sandy River Coal and Oil, 1st mort., 100¼; Mariposa 1st mort., 82; Canton Co., 70; Central Coal, 93; Copake Iron, 17; Wyoming Valley Coal, 95; Canada Copper, 11; Central Mining Co. of Col., 18¾; International Coal, 104; Lehigh and Susq. Coal, 19½; Hope, gold, 15; Briggs gold, 125; Bucks Co. Lead, 1¼; Rutland Marble, 24; Quartz Hill gold, 29¼; Nashua Copper, 1¼; Mendota Mining, 10¼; Maryland Copper, 2¼; Denver Mining, 10¼; Ashburton Coal, 48; Bank of Commonwealth, 108; Merchants Bank, 112: Bank of Commerce, 113; Ocean Bank, 100; Am. Ex. Bank, 117; Continental Bank, 104½; Importers and Traders Bank, 110; Phœnix Bank, 106; Metropolitan Bank, 121; Merchants Ex. Bank, 103; Corn Ex. Bank, 110; Park Bank, 138; 4th National Bank, 101.

Philadelphia.—Huntingdon and Broad Top, 25; do., 7s, 103½; Elmira Chattle 5s, 80½; Chester Valley, 4¾; do., 7s, 50; Penn. War Loan, 6s, 107½; Camden and Amboy mort., 108; Belvidere Delaware 2d mort., 100; North Branch bonds, 40; Union Canal, 3½; Wyoming Valley Canal 6s, 99¾; Delaware Division, 45½; 5th and 6th streets, 61; Girard College R. R., 35; 13th and 15th streets R. R., 41½; Ridge Avenue, R. R., 22⅜; 5th and 6th streets, 61; Allegheny Co. 5s, 80½; Pittsburg 5s, 77; Oil Creek, 12¾; Hazleton Coal, 71; N. Y. and Middle Coal Fields, 18; Fulton Coal, 15¼; Big Mountain, 11½;

☞ The people of Allegheny County and also of Dansville, are again agitating an extension of the Genesee Valley Railroad in both directions.

Massachusetts Bank Dividends.

The Boston Banks have declared the following dividends, payable April 1: Atlantic, 3 per cent.; Atlas, 4; Blackstone, 5; Boston, 4; Boyleston, 5; Broadway, 4; City, 4; Columbian, 3½; Commerce, 4; Continental, 4; Eagle, 4; Eliot, 4; Exchange, 5; Fanuel Hall, 5; Freeman's, 4; Globe, 4; Granite, 4; Hamilton, 8; Hide and Leather, 4; Howard, 4; Market, 4; Massachusetts, 4; Maverick, 3½; Mechanics', 4; Merchants', 3½; Mt. Vernon, 4; Mutual Redemption, 4; National, 4; New England, 4; North, 3; North America, 3½; Republic, 3½; Revere, 4; Shawmut, 4; Shoe and Leather, 5; State, 3½; Suffolk, 5; Traders', 3; Tremont, 4; Union, 4; Washington, 4; Webster, 4. The banks in Worcester have declared the following net dividends, payable April 1: Central 4 per cent.; Citizens' 5; City, 4; Mechanics', 4; Quinsigamond, 4; Worcester, 5. The Railroad Bank of Lowell pays 5 per cent., April 1: Asiatic, Salem, 3; Ocean Bank, Newburyport, 5; Charles River, Cambridge, 4; Peoples', Roxbury, 4; Warren, South Danvers, 4; Andover, 3½; Northborough, 3½; Grand, Marblehead, 4; Merchants', Salem, 3½; Rockland, Roxbury, 4; Fairhaven, 5; Spickett Falls, Methuen, 4; Hingham, 4; Bristol County, Taunton, 4; Merchants', Newburyport, 4; Quincy Stone, 4; Old Colony, Plymouth, 3; Plymouth, 4; Laighton, Lynn, 3½; Bank of Brighton, 3; Village Bank, Danvers, 4 per cent.; Haverhill, 3; Lancaster, 4; Brighton Market, 4; Agawam, Springfield, 4; Mechanics', New Bedford, 3½; Lee, 3½; Rockport, 4; Cabot, Chicopee, 4; Chicopee Bank, 5; Cambridge City, Cambridgeport, 4; Neponset, Canton, 5; Hadley Falls, Holyoke, 5; Framingham, 5; Abington, 5; Fitchburg, 4; Lowell, 4; Holliston, 3½; Harvard, Cambridge, 4; Oxford, 4; Southbridge, 4; Bay State, Lawrence, 4; Marblehead, 3 9-17; Woburn, 5; Bunker Hill, Charlestown, 5; Commercial, Salem, 4; Essex, Haverhill, 3; Union, Haverhill, 3½; Lynn Mechanics', Lynn, 5; Pacific, Nantucket, 4; Falmouth, 3½; Provincetown, 4; Holyoke, Northampton, 5.

Proposed Railroad Routes at Lake Superior.

The Houghton *Gazette* of 11th ult., says there is considerable excitement there over proposed railroad routes, and surveys are now making for three routes—one from Eagle Harbor, to come on the range somewhere near the Madison, by Mr. Webster, one from Copper Harbor, around by Lake Fanny Hoe, and out on the range east of the Star mine, by Mr. Pickel, and another from Lac la Belle, through the south range into the Montreal river valley, opposite Mosquito Lake, by Mr. Green, late of the Portage.

☞ The Treasurer of the Philadelphia and Reading Railroad Company gives notice that the transfer books of the common stock, will be closed on the 31st, March, to be re-opened on the 14th of April, at which time stockholders who have New York certificates are requested to return them to the Farmers' Loan and Trust Company, New York, who will give a receipt for the same, and furnish in a few days thereafter certificates from the Philadelphia office in exchange for said receipts. The transfer office in New York for the preferred stock will be closed permanently on the 31st of March. That for both the preferred and common stock in Boston will be permanently closed on the 31st of March.

Milwaukee, Winnebago and St. Paul R. R.

The charter of the Milwaukee, Winnebago and St. Paul Railroad Company has been amended so as to remove all obstacles to its organization. The southern part of this route contemplates a line from Richmond, on the La Crosse Road, to Fond du Lac and Oshkosh, by the way of West Bend. The distance from Richmond to Fond du Lac is forty-two miles through a finely settled portion of the State, over a route that affords easy grades, most of which has been already surveyed, where there are no large streams to cross, and where timber and other materials for construction are convenient. The importance of this road to this city, and to those places named, is very great, and needs only to be appreciated to insure its construction.

Its completion to Fond du Lac alone would bring back to this city all of the trade of that beautiful section of country of which it is the centre, which has been entirely diverted since the building of the Northwestern Road. It would restore the trade of the Wolf River country, which finds its outlet at Oshkosh, and which has been for several years lost to us. The whole trade tributary to Oshkosh and Fond du Lac rightfully belongs to this city, and can be regained by a tithe of the enterprise our neighbors have shown in taking it from us.

The interchange of commodities between those cities and this should not occupy more than a day in transit each way. But such are the difficulties now, that from one to three weeks are consumed in transportation, and all this trade is for that reason sent around to Chicago.

This condition of affairs should not be suffered to continue. The trade of that section which this road should control, is very great, and will soon be so thoroughly settled into its present channel, that we cannot divert it. We hope there is enterprise enough in this large and growing city to secure the building of this road, and the business that will come over it.—*Milwaukee Sentinel.*

Railroad Earnings--Weekly.

The earnings of the Chicago and Northwestern Railway for the week ending March 21, 1864, were $32,404 65
Corresponding week of 1863 ..... 19,978 08

Increase $12,426 57

The earnings of the Cleveland and Toledo Railroad for the 3d week in March, 1864, were $39,501 00
Corresponding week of 1863 ..... 38,913 00

Increase $588 00

The earnings of the Michigan Central Railroad for the 3d week in March, 1864, were .. $74,813 86
Corresponding week of previous year .. 54,569 60

Increase $20,244 26

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of March, 1864, were $61,411 72
Corresponding week of previous year. 56,842 46

Increase $4,569 26

The earnings of the Chicago and Rock Island Railroad for the 3rd week in March, 1864, were $45,416 00
Corresponding week of previous year .. 29,799 00

Increase $15,617 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week in March, were:

	1864.	1863.
Passengers	$7,364 03	$3,669 08
Freight	11,216 84	9,525 79
Mail, express & telegraph	899 58	752 00
Total	$19,480 45	$13,946 87
Total this month to date.	61,343 18	$41,497 34

The earnings of the Galena and Chicago Union Railroad for the week ending March 22, were:

	1863.	1864.
Freight	$22,609 33	$25,919 57
Passengers	8,394 81	13,137 84
Mails, &c	1,250 00	1,300 00
Total	$32,254 14	$40,357 41
Increase 1864		$8,103 27

The earnings of the Chicago and Alton Railroad Company for the week ending March, 23, were:

	1864.	1863.
Passengers	$16,522 20	$13,485 28
Freight	20,438 63	13,295 42
Sundries	2,103 68	2,292 27
Total	$39,064 51	$29,072 97
Increase 1864		$9,991 54

The traffic of the Great Western Railroad for the week ending March 18th, 1864, was as follows:

Passengers	$22,399 29
Freight and live stock	50,705 16
Mails and sundries	2,121 82
Total	$75,226 27
Corresponding week of 1863	72,776 69
Increase	$2,449 58

The earnings of the Grand Trunk Railway for the week ending March 12, 1864, were:

Passengers	$25,858 53
Express freight, mails and sundries ...	2,500 00
Freight and live stock	72,071 07
Total	$100,429 60
Corresponding week, 1863	80,392 23
Increase	$20,037 37

The following is a statement of earnings of the Toledo and Wabash Railway for the week ending March 21, 1864, were $25,494 58
Corresponding week of previous year. 24,658 64

Increase $835 94

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending March 21 were:

	1864.	1863.
Freight	$6,893 66	$4,063 95
Passengers	10,354 21	4,396 67
Mails, rents	981 00	1,035 97
Total	$18,228 87	$9,496 59
Increase 1864		$8,732 28

Missouri State Bonds.

The following is the law passed by the Legislature of Missouri to provide means for the payment of the bonds of that State that matured in 1862, and 1863:

Section 1. The Governor of this State is hereby authorized to issue the bonds of the State of one thousand dollars each, payable in either of the cities of New York or St. Louis, and redeemable at the pleasure of the State, at any time after twenty years, and with coupons attached, bearing interest at the rate of six per centum per annum, payable semi-annually.

Sec. 2. The bonds hereby authorized to be issued shall not exceed in the aggregate four hundred and two thousand dollars, and shall be signed by the Governor, sealed with the seal of the State and countersigned by the Secretary of State, and registered in the office of the Auditor of Public Accounts.

Sec. 3. The Governor is authorized to negotiate for the exchange of said bonds in renewal of the bonds of the State which matured in 1862, and which shall mature in the year 1863, and all such bonds so taken up or renewed as aforesaid shall be cancelled by the Auditor; and the Governor is further authorized to negotiate a sale of said bonds through the Bank of the State of Missouri, or other agents, at his discretion, and he shall apply the proceeds therefor to the payment of said State bonds, issued for State purposes, due and to become due in 1863, as aforesaid, which shall not be renewed or extended as hereinbefore provided; and said bonds, when paid, shall be delivered to the Auditor and cancelled by him in his office.

Sec. 4. The interest coupons for semi-annual interest on said bonds shall be paid out of the appropriations for State interest, and the same shall be included in the general appropriation bill for the support of the State government, as heretofore, to pay interest on State bonds issued for State purposes. The faith of the State is hereby pledged for the punctual payment of the interest and principal of the bonds authorized to be issued under this act.

The Gold Market.

In compliance with the act of Congress the Secretary of the Treasury has taken the first steps to bring down the price of gold, admitted to have been enhanced by combination rather than the exigencies of commerce. Mr. Cisco the agent of the Treasury in this city has issued the following notice:

United States Treasury,
New York, March 28, 1864.

By direction of the Secretary of the Treasury, notice is hereby given that, until further ordered, I will issue to importers, for payment of duties on goods imported by them, certificates of deposit of gold coin, to the credit of the Collector of any port as desired, in exchange for notes, at a quarter of one per centum below the current market value of gold.

These certificates are not assignable, but will be received by the Collector from the party to whom they are issued. J. J. Cisco,

Assistant Treasurer of the United States.

He also publishes the following form of the receipt to be given to those importers who have occasion to apply for the coin.

UNITED STATES TREASURY.

No.— New York, ———, 186—.

I Certify, that ——— ha— this day deposited to the credit of the Collector of the port of New York, ——— in gold coin. This Certificate is receivable only for duties on imports from the part— to whom it is issued, and upon —— endorsement.

$ ——

Assistant Treasurer U. S.

These receipts are to be printed on gold colored paper, and are not assignable, nor to be used for any other purpose than the payment of duties. Whatever may be the price demanded in the street the Government will now undersell it.

Root River Railroad.

The City Council of La Crosse have resolved to procure from the Legislature authority to subscribe and pay for stock in the Root River or Southern Minnesota Railroad to the amount of $50,000; $100,000 more can be easily raised between La Crosse and Rochester. The road for nearly 25 miles is nearly graded and bridged, so that only about $300 per mile will have to be expended in order to prepare the line for the rails. The present cash value of the work performed on the line, is not far from a quarter of a million dollars. The work already done, and the available subscriptions will amount to over $400,000. This will supply ample basis for an issue of bonds, with which to purchase the iron and rolling stock for a considerable distance into the most productive and populous portion of Minnesota.—*La Crosse Rep.*

Winona and St. Peter Railroad.

The Winona *Republican* of the 23d ult., says that work on the road west of St. Charles is being carried on as rapidly as circumstances will admit, and strong hopes are entertained that the line will be in running order to Rochester sometime in July next. The requisite quantity of iron for laying the track to that point has been purchased in New York and paid for, and will be delivered in Winona soon after the opening of navigation. When the cars reach Rochester, the company will begin to realize something from their immense outlay but scarcely before, notwithstanding a brisk traffic has already been inaugurated. Meantime the region of country through which the road runs, and in fact all that portion of the State from Winona west as far as Mankato and St. Peter, will be greatly benefitted even by the extension of the line to its present western terminus.

Interest and Dividends.

The Chicago and Rock Island Railroad Company have declared a semi-annual dividend of three per cent (and the United States Government Tax on the same) payable at the office of the Company, in the City of New York, on and after the 11th day of April.

The semi-annual interest, due April 1, on the first mortgage preferred bonds of the St. Louis, Jacksonville and Chicago Railroad Company will be paid at the office of Messrs. M. K. Jesup & Co., No. 59 Exchange-place, New York.

The coupons of the New Land Bonds of the Hannibal and St. Joseph Railroad Company, due April 1, will be paid on presentation at the office of Duncan, Sherman & Co.

The coupons of the first mortgage bonds of the St. Louis, Alton and Terre Haute Railroad Company, Series B, due on the 1st April, 1864, will be paid on presentation at the Bank of North America.

The Panama Railroad Company will pay 5th of April a quarterly dividend of 4 per cent. from the earnings of the road, and one per cent. from those of the steamers.

The coupons of the Atlantic and Great Western Railway due on the 1st of April will be paid at the office of McAndrew & Wann, No. 12 Pine st.

The Cincinnati, Hamilton and Dayton road will pay April 1, at the Bank of America, a dividend of 5 per cent., free of tax.

The Chicago and Great Eastern Railway Company will pay, 1st April, the coupons of the first mortgage bonds at the office of Schuchardt & Gebhard 21 Nassau street.

The coupons of the income bonds of the Chicago and Alton Railroad Company, due 1st of April, will be paid at the office of G. S. Robbins & Son, No. 54 William street, New York.

The Cleveland and Toledo Railroad Company, have declared a semi-annual dividend of four per cent, free of Government Tax, payable on the 23d day of April, at the office of Messrs. Vermilye & Co., No. 44 Wall street, New York City, and until the 21st day of May, and after the latter date at the Company's office in Cleveland.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 free of Government tax, payable April 1, at the Union Bank, New York.

The interest on the mortgage bonds of the New York and New Haven Railroad Company, due April 1, will be paid at the Bank of the Republic.

The Philadelphia, Wilmington and Baltimore Railroad Company have declared a semi-annual dividend of five per cent, payable on the 1st of April, clear of the usual Government tax.

The Philadelphia, Germantown and Norristown Railroad Company have declared a semi-annual dividend of four per cent, clear of all taxes, payable on the 1st of April.

The Champlain and St. Lawrence Railway Company have declared a semi-annual dividend of five per cent., on the new preferred stock of the company payable April 1.

The Georges Creek Coal and Iron Company have declared a dividend of three per cent, payable April 4.

The Franklin Coal Company has declared a monthly dividend of $3 per share, payable April 6.

The Lowell and Lawrence Railroad have declared a dividend of $3 per share.

Cornwall Copper Mining Company.

This mine is located near the thriving village of Strafford, in the State of Vermont, in the immediate vicinity of the well known Corinth, Vershire, Copperas Hill and Green Mountain Mines, and upon the same veins of those mines, all of which have been successfully worked. The Company own seventy acres of mining land, with a large dwelling house and other buildings thereon. The Mine is located upon elevated land, affording an excellent drainage, and should it be deemed advisable an adit could be driven into the vein at a low level. There is also a fine stream of water running through the property, giving a sufficient supply of water at all times, for mining purposes; and the neighborhood is thickly settled, and an abundance of labor can be obtained at a low rate. The smelting furnace of the Copperas Hill Mine is only three-fourths of a mile distant, where the ores could be dressed at low rates. Being upon the same vein with, it is not too much to predict for this mine a success equal to the mines above mentioned.—*Boston Post.*

Bridging the Mississippi River.

We learn from the Milwaukee *Wisconsin*, that the bill granting power to the Milwaukee and Prairie du Chien Railway, to bridge the Mississippi River, has finally passed the Legislature. A bill had already passed the Iowa Legislature; so the bridge is now in a fair way of construction, as well as the much needed Southern Wisconsin Railroad. By the bridge to be build at Dubuque, Milwaukee, will be in running connection with the whole system of railroads of Northern Iowa.

Massachusetts Railroads.

The following statement of the condition of the steam railroads of Massachusetts and their operations in 1863, is gathered from the last annual returns:

Capital stock	$69,362,052
Capital paid in	57,546,563
Cost of roads and equipment	66,809,802
Total length of miles in main roads and branches, (single and double tracks)	1,941
Total income in 1863	11,950,739
Working expenses	6,571,066
Net earnings	5,379,673
Interest paid	1,017,837

Among the dividends declared for 1863 were the following: Boston and Lowell, 7 per cent; Maine, 8; Providence, 8; Worcester, 9; Connecticut River, 6; Eastern, 6; Fitchburg, 6; Fitchburg and Worcester, 6; Nashua and Lowell, 8; New Bedford and Taunton, 6; Norwich and Worcester, 5½; Old Colony and Newport, 6; Providence and Worcester, 8; Taunton Branch, 8; Western, 9; Worcester and Nashua, 6.

The Gold Bill.

The following is an official copy of the resolution authorizing the Secretary of the Treasury to dispose of the surplus gold:

Resolved, That the Secretary of the Treasury be authorized to anticipate the payment of interest on the public debt by a period not exceeding one year from time to time, either with or without a rebate of interest upon the coupons as to him may seem expedient, and he is hereby authorized to dispose of any gold in the Treasury of the United States not necessary for the payment of interest of the public debt.

Provided, That the obligation to create a Sinking Fund by the act of February 25th, 1862, shall not be impaired thereby.

The act alluded to provides that the duties on imports shall be paid in coin or old demand notes; and the coin so paid shall be set apart as a *special fund* (1) to the payment of interest in coin on the bonds and notes of the United States; (2) to the purchase or payment of one per centum of the entire debt of the United States to be made within each fiscal year after the 1st day of July, 1862, which is to be set apart as a sinking fund; and (3) the residue thereof to be paid into the Treasury of the United States.

The Albany and Boston Railroad.

A bill has been pending before the Legislature to secure the relaying of the track between Waterford Junction and Eagle Bridge, with a favorable prospect of its passage. The opponents of the measure, however, have effected an agreement which, if carried out, will induce the friends of the bill to withdraw it, and further movements to secure its passage will be suspended for the present, to afford an opportunity to carry out the new proposition. The Troy and Boston, the Rutland Burlington, the Cheshire, the Fitchburg, Rutland and Washington, and the Albany and Boston Railroads, will enter into an agreement whereby a continuous and through connection shall be secured from Albany to Boston over those roads. For this purpose, a track will be laid from the track of the Northern road, in West Troy, over the bridge into the depot of Troy. If this project shall be consumated, and trains run from Boston into this city without change of cars, over the roads named, the friends of the measure now pending in the Legislature will, it is said, be satisfied. —*Albany Evening Journal.*

Steel Boilers.

Some interesting experiments have been made in Prussia with steel steam boilers, an account of which has been published in *Dingler's Polytechnic Journal*. A steel boiler of the egg-end shape, four feet in diameter and thirty feet in length, without flues, was tried. It had a steam drum two feet in diameter and two feet in hight, and the plates were one-fourth of an inch in thickness. Beside it there was placed another boiler, similar in every respect, excepting that the plates were of iron 0,414 of an inch in thickness. The steam boiler was tested by hydraulic pressure up to 195 pounds on the inch, without leakage, and both the iron and steel boilers were worked under a pressure of 65 pounds on the inch for about one year a half. During this period the steel boiler generated twenty-five per cent. more steam than the iron one, and when they were thoroughly examined after eighteen months' practical working, there was less scale in the steel than in the iron boiler. The former evaporates 11.66 cubic feet of water per hour; the iron boiler 9.87 cubic feet. The quantity of coal consumed was on an average 2,706 ponnds for the steel one in twelve hours, and 2,972 pounds for the iron boiler. The plates of the steel boiler over the fire were uninjured, while those of the iron one were worn out. In Prussia several

worn out plates of iron boilers have lately been replaced with steel, which, it is stated, lasts four times as long. As steel is twice as strong as iron, thinner plates of the former may be employed for boilers, and more perfect riveting can be secured. A greater quantity of steam can also be generated in the steel boiler on account of its thin plates, and thus much fuel may be economized. Such steam boilers should engage the attention of all who make and use steam boilers for engineering and manufacturing purpose.

Platt County Railroad.

The Missouri Democrat of the 11th ult., says that the Platte County Railroad "is attracting much attention now. Since it has been advertised for sale, parties have begun to inquire into its value. Its net receipts last year are said to be over $100,000, and its passenger receipts alone for February last, were $6,900. As the minimum price of the road is $826,000, its value as an investment is operating on our capitalists, and you need not be surprised if a company of St. Joseph men become the purchasers. The road is to be sold for cash, but the coupons on the bonds issued to it by the State are to be received as cash. Agents are in New York negotiating for the coupons. The bondholders are ignorant of the value of the road, and will no doubt eagerly embrace the opportunity of converting their coupons into cash at almost any figures. It is to be hoped our Western men may for once steal a march on their sharp Eastern brethern."

Minnesota Railroad Matters.

The La Crosse *Republican*, in speaking of Minnesota railroad matters, as bearing upon La Crosse, says:

Mr. Chamberlain intends to build the Minnesota Central (formerly known as the Cedar Valley Railroad) as far south as the Iowa and Minnesota State line, to a point that is nearly one hundred miles west from La Crosse, there to connect with a line extending down through Iowa. The Minnesota Central intersects the Winona and St. Peter Railroad, at Owatonna, about the same distance west from the Mississippi.

Unless La Crosse secures the early construction of a more direct road, *via* Root River, to some point on the Winona and St. Peter Railway, the Milwaukee and St. Paul Railroad Company, and the Minnesota Central Railway Company, both of which are owned by the same capitalists, will supply the intermediate link to complete a continuous railway connection *via* Winona.

☞ The Lehigh Coal and Navigation Company have determined to issue a new mortgage loan, having twenty years to run, from the first of April, 1864, at 6 per cent. per annum, payable quarterly, for which the holders of the existing loan will be permitted to exchange at par, provided notice of their intention to do so is given before the 19th of April, 1864. The exchange of the old or existing bonds, which have six years to run, for the proposed new bonds, having twenty years to run, is entirely optional with holders of the existing bonds.

☞ The Pittsburg *Commercial* gives the following as the quotations for local bonds in that city:

Allegheny County Compromise 5s	80½
Pittsburg Compromise 5s	75
Pittsburg Municipal 6s	95
Allegheny County (to Railroad), with back coupons	95
Pittsburg (to Railroad), with back coupons	90
Pittsburg and Conn. R. R. mortgage 6s	81
Allegheny Valley 1st mortgage 7s	105
Allegheny County Bounty Bonds	90
Allegheny City 4s	67

Dansville and Genesse Valley Railroad.

The following gentleman have been selected as directors of this company: George Hyland, James Faulkner, Chas. Shepard, James C. Jackson, Jesse Angell, Hugh McCartney, Sidney Sweet, Alonzo Bradner and Orville Tousey, Dansville; Hugh T. McNair, West Sparta; Anson D. Smith, Mt. Morris; Isaac Butts and William Kidd, Rochester.

The road, when constructed, will be 15 miles in length, extending from Dansville to Mt. Morris. The amount of capital stock is $150,000.

Extensive Coal Depot.

We understand that proposals have been made by agents authorized by the New York Central Railroad Company, for the purchase of the premises at Niagara, formerly known as the Car Factories and grounds. The ostensible design is to construct there a mammoth coal yard for the supply of Western Canada. The road is soon to be completed to Fort Erie, by the assistance of the New York Central, and the coal is to be transported from the American side to Fort Erie, and thence to Niagara. The intention is to have no change of cars, as the coal cars will be ferried across the river at Fort Erie.—*St. Catharines (Canada) Journal.*

Marietta and Cincinnati Railroad.

The engineer has completed the surveys for the bridge over the Ohio River from Belpre to Parkersburgh, and is now engaged on the plan and drawing. It is expected that the work on this important structure will be commenced this Spring.

Copake Iron Mines.

The Copake Iron Company, whose mines are situated in Columbia Co., N. Y., expect during the Spring to mine and forward two or three hundred tons of iron ore daily. Mr. D. B. Martin recently an engineer in the employ of the Erie Railroad Company, has been engaged as Superintendent. The demand for this ore is sufficient to warrant the yearly production of one hundred thousand tons. On the 17th, a large meeting was held at Poughkeepsie, to take measures to build a railroad from the latter place to Copake.

☞ A company has been formed in France to supply steamers for the navigation of its canals. Sixteen vessels of 16 horse power are being constructed by it at Argentuil. Three of the same description are already at work, and are said to be profitable.

☞ A meeting of the first and second mortgage bondholders of the Pittsburg, Fort Wayne and Chicago road has been called by Winslow Lanier & Co., of New York, for the 7th of April, in pursuance of the provisions of the deeds of trust, for the purpose of considering certain modifications of the present financial system of the Company, to which the consent of a majority in interest of each of these classes of bondholders, by a vote at a meeting, is necessary. The principle of the proposed measures was submitted to the annual meeting of the corporation held at Pittsburg on the 16th ult., at which were represented a majority of the stockholders, and of each class of the bondholders, and was unanimously approved.

☞ Gen. McCallum, Inspector of Railroads, has taken possession, in the name of the United States, of all the unfinished locomotives of the Portland Company's works. They were being constructed for the Grand Trunk Railway.

Fulton Coal Co.

We have several communications in respect to this company, in reply to which we say, that the original corporation was "The Northumberland Improvement Company," with a capital of $300,000, dividend into shares of $50 each, and organized in 1854, on 4000 acres of land. In 1857 the capital stock was reduced from $50 to $10 per share. In 1859, by virtue of an act of Assembly, the shares were again reduced to $5 each, thereby saving in tax on capital. The name was at the same time changed to "The Fulton Coal Company." The company now own about 1856 acres of land, nearly the whole of which the report of geologists and engineers say is underlaid with very large amounts of white and gray ash anthracite coal. Whether any portion of the lands referred to have been sold we cannot say. The same report states that five of the veins can be worked above water level. The Philadelphia and Sunbury Railroad runs through the lands. The Company is represented as not only clear of debt, but owns 3000 shares of its own stock, equal, at Saturday's prices, to about $52,500.—*Phila. Ledger.*

Lake Ontario and Hudson River Railroad.

The project of a railroad penetrating the wilderness of Northern New York, which has successively been known as the Sacketts Harbor and Saratoga, and Lake Ontario and Hudson River Railroad, and more recently as the Adirondac Company, now exhibits signs of vitality which promise a speedy and successful issue. New surveys of the route are nearly completed, and we are assured that preparations are in progress to put the work in hand with the least possible delay. The Eastern terminus of the road—which will be either at Saratoga Springs or Ballston Spa—is now the most important question remaining unsettled, and it is one of no little interest to the company and to the people of this vicinity.

The natural terminus of the road is Albany, and here is where it will terminate. The road should, we trust will, be speedily completed. The Saratoga meeting adopted the following:

Resolved, That in order to facilitate this location, a committee, to consist of Augustus Bockes, J. M. Davison, John Denton, H. H. Hathorn and W. J. Hendrick, be appointed to negotiate with the land owners in the towns of Greenfield and Saratoga Springs, along the several routes pointing to this village, and to secure the right of way, conditionally, upon the most favorable terms—*Saritogian.*

☞ The first locomotive engine was landed last month at Ceylon from the ship Palmerston. It was sent ashore on a bamboo raft, and was to be drawn to the railway station by a team of three elephants.

☞ J. N. McCulough, Esq., lately appointed General Superintendent of the Pittsburgh, Fort Wayne and Chicago Railroad, and Cleveland and Pittsburgh Railroad still retains the Presidency of the latter road; the Vice-President, James F. Clark, discharging the duties of President in his absence.

☞ T. B. Blackstone, Esq., has been made President of the Chicago and Alton Road, in place of Hon. James Robb, resigned.

☞ Robt. Hale, Esq., late President of the Vermont and Massachusetts Railroad, takes the position of General Superintendent of the Chicago and Alton Railroad.

☞ E. A. Chapin, Superintendent of the Rutland and Burlington Railroad has resigned his position for that of Superintendent of the New York and Harlem Railroad, upon which he enters the 1st of April.

Ohio and Mississippi Railroad.

We learn from the Cincinnati *Gazette* that the Ohio and Mississippi Railroad Company have "purchased transfer grounds at Storr's, three-fourths of a mile in length, embracing all the land south of the canal and west of Mill Creek, with an unimportant exception. It is above high water, and arranged for five miles of side tracks, intended for the storage of cars of the Atlantic and Great Western, the Cincinnati, Hamilton and Dayton, the Ohio and Mississippi, and such other roads as may desire to use them. The Ohio and Mississippi Railroad Company have recently removed the buildings on these grounds, and are now erecting a warehouse 800 feet in length by 65 feet in width with two tracks running through it, and two adjacent, all of which are arranged for the wide and narrow gauges. Four of the longest freight trains can occupy the building at the same time, and transfer their freight to each other. Trains on the inside tracks can be housed in perfect safety if necessary. The Ohio and Mississippi Railroad Company have shown a wise foresight in securing such an eligible location for the purpose, and are pursuing to completion, with commendable energy, the necessary buildings for the accommodation of the immense transfer business now done at this point."

RAILROAD IRON.

2,500 TONS RAILROAD IRON, 50 lbs. per yard.
5,000 Tons Railroad Iron, 56 lbs. per yard.
In yard and on shipboard to arrive. All New York and Erie pattern, of best English make, and inspected at the works. For sale by

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be re-placed every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 89 State street, Boston.

British Balance of Trade.

We have received by the late arrivals some interesting information with regard to the value of the exports and imports of Great Britain for the past year, and if arithmetical balances indicate whether a nation gains or loses by its foreign trade, then we might if we adopt a very common theory, declare that the commercial transactions of that country for the last three years have been a loss to it of many millions of dollars. Nor will the difference be made up (other than in goods, wares and merchandize of any description,) by imports of gold. Even if all the gold remitted to that country belonged to it as the price of its products, enough of it has not gone forward to equalize the import and export columns, and moreover we know that large quantities of the precious metals are sent abroad on foreign account, and held there by timid capitalists who are waiting to see what is next to happen.

We give the following abstracts from the report of the Board of Trade for 1863, and in addition give a return for the two previous years:

	Imports (exclusive of gold & silver.)	Exports.	Apparent loss.
1861	£179,248,161	£125,102,814	£54,143,747
1862	184,787,507	123,992,264	60,795,243
1863	203,826,363	146,489,763	57,336,000
Total.	£567,862,031	£395,584,831	£172,277,200

According to these figures then, and in accordance with the received theory, upon which we are constantly reminded by our lugubrious cotemporaries that our own country is rapidly going to ruin, the foreign trade of Great Britain has been conducted for the last three years at a loss of upwards of eight hundred and sixty millions of dollars, about half the amount of our National war debt, accumulated during the same period. In other words, the balance of trade as appears from the official report is against Great Britain by that large amount, and its three years of peace have been nearly as damaging as our three years of war. This is the inevitable conclusion if we adopt the usual balance of trade theory.

But it may be said that this difference between the imports and exports of merchandize was made up by importations of the precious metals. But we are able to show from the same authority that this was not the case. As follows:

	Imports of gold and silver.	Exports of the same.
1861	£18,747,045	£20,811,648
1862	31,656,476	29,326,191
1863	30,030,794	26,544,040
	£80,434,315	£76,681,879

The difference between these columns is £3,752,436. In other words, all the gold and silver which Great Britain has been able to retain out of the vast amounts remitted that country, is only about eighteen millions of dollars! No one will pretend that this small sum accounts for the difference, or makes up the balance of the eight hundred millions appearing at the footing of the import and export columns above stated.

We come to the conclusion, irresistable in this case, that according to the prevailing theory of the day, the balance of trade against Great Britain for the last three years, after deducting the amount of gold and silver received and retained in the country, is almost exactly eight hundred and forty-two millions six hundred and twenty-three thousand eight hundred and twenty dollars. After all that British industry and enterprise have effected, after draining all the gold possible from the United States and Australia, the three years work has ended in this enormous loss!

We now call upon the balance of trade theorists to explain this if they can. If their positions are correct, then England is rapidly losing by her foreign commerce; if they assert that the difference is in fact a profit, as some of the English papers would like to believe, then the theory is untrue. If a profit, then we may claim for the United States that we are making money rapidly by our foreign commerce, for in 1863–'64, our imports were $147,687,791, and our exports $116,540,756, (exclusive of specie,) showing by the same rule that we have made a profit of $31,147,035.

Nor will it answer to give another explanation as regards this difference of imports and exports, which we find in a Liverpool paper evidently confounded by its own figures, viz., that the difference may be attributed to the circumstance that much of the imports are British property coming from British possessions. This would, however, account for but a very moderate portion of the imports; the largest and best part of the trade being with the United States and South America, and so far as it goes amounts to nothing, for profits made in Australia or Canada, enure to the benefit of those countries precisely as much as if they were foreign possessions. We therefore for the present leave these facts to be explained by that school of political economists who have two ideas with which they are forever combatting their weak brethren, and we must admit often to their discomfiture—Bullion and balance of trade.

Some other features in the report of the Board of trade are worthy of notice. There has been the last year an increase in the exports of the following articles:

Manufactures of wool and worsted stuffs	£350,000
" linen and linen goods	100,000
" cotton	1,200,000

Among the other exports the increase stands in round numbers:

Manufactures of silk	£35,000
Haberdashery and millinery	83,000
Metals	240,000
Hardware and cutlery	40,000
Glass	11,000
Earthenware and porcelain	6,000
Coal, cinders, &c	53,000
Carriages, railway and others	16,000
Beer ale	35,000
Empty bags	31,000

There is a decrease in the following items:

Apparel and slops	£21,000
Firearms (small)	122,000
Machinery, steam engines	36,000
Wrought iron	28,000
Thrown silk	10,000
Twist and yarn	11,000
ugar	36,000
Woollen and worsted yarns	66,000
Woollen clothes of all kinds, &c	20,000

It is especially to be remarked that the exports of cotton manufactures to most of the continental markets are diminishing in quantity. France, Portugal, the Neapolitan dominions, and the Austrian territories are the chief exceptions. Even some of the South American Republics have taken reduced amounts. The cotton growing countries are those from which the greatest inquiry has been experienced: the increased export to India amounts to 400 per cent., and to the British West Indies to 100 per cent. China has taken goods representing 100 per cent. increase over the export thither in January, 1863. The demand for Brazil has increased 325 per cent.

The imports of goats' hair and wool have decreased two millions of pounds.

In regard to the substitutes for cotton two very important facts appear. That the demand for flax has not led to an adequate increase in the supply, was shown by the returns lately issued by the Board of Trade for the past year. Those now published for the first month of 1864 seem to indicate that the stocks of wool have become much reduced. As the cultivation of flax is expensive, there is strong probability that it will not be extended on a scale equal to the present rate of consumption, and it is quite as likely that the production of wool will not keep pace with the want now experienced.

Abroad, wool has been greatly used where cotton was formerly employed. Blankets, coverlets, rugs, and many similar articles, were manufactured abroad of coarse cotton, but woollens are now almost universally substituted. The arrivals of cotton, as reported in the returns, are small, but greater quantities are expected this season. In beet root sugar there has been a large falling off. So also in coffee and prices have advanced.

The return for the year relating to navigation are chiefly remarkable for the falling off in the tonnage and in the number of vessels of the United States. The total tonnage entered in the year 1862 was 10,740,090 tons, and in 1863 11,137,946. The total increase is 400,000 tons. The decrease in American is 480,000 tons and 646 vessels. The increase in English ships is 1,417, with 700,000 tons, and that in the tonnage of foreign other than American 180,000 tons. The English ships cleared out outnumber those of the previous year by 560 and 552,000 tons. The vessels cleared out belonging to the United States of America are fewer by 545, with tonnage 455,000 tons.

We have thus given our readers some idea of the condition of British Foreign Commerce formed from official documents. They are suggestive of the following considerations. May not the theory of the balance of trade be without the usual foundation given to it by our political economists. Is not Great Britain getting rich in spite of the larger balance exhibited against it on the Great Ledger.

Of what value then is the croaking, what truth in the disparagement, what sense in the wailing which we observe just now in those journals which seem to have but the single idea, that the times are out of joint. "O cursed spite that only they were born to set them right."

Northern Central Railway.

The earnings of this road for the fiscal year ending December 31, 1863, was as follows:

From freight and tolls		$1,263,561 00
" passengers		592,676 50
" U. S. mails		26,100 00
" express		50,932 79
" troops (collected)		122,375 19
" " (uncollected)		185,864 11
" rents		6,870 90
" individuals and companies		49,438 83
" sundry sources		10,129 79
		$2,307,448 30

The expenses were:

Conducting transport'n	$456,494 62	
Motive power	447,207 60	
Maintenance of cars	300,076 40	
" way	449,868 31	
General expenses	33,220 48	
		1,686,867 41
Balance net earnings		$620,580 87

The total receipts of the Northern Central railway, including Wrightsville branch, for the year were $2,122,084 19; and the working expenses, $1,686,867 41—leaving net revenue, $435,216 78.

The principal expenditures, in addition to working expenses, have been:

Payment of interest on funded debt	$295,500 00
Instalments for the year on sinking fund	35,000 00
Purchase of real estate in Baltimore	105,063 52
Construction main line	174,470 06

The working expenses of the road as shown by the above statement, have been 78.1 per cent. of the receipts. This, however, includes the following items which do not properly belong to working expenses, are extraordinary, but should be continued until the road is in perfect order and fully equipped.

4 new locomotives	$46,865 00
New passenger, baggage, express and freight cars	158,690 69
Partial renewal of bridge destroyed	55,000 00
	$260,555 69

Which would reduce the working expenses to 61.81 per cent. of the earnings, showing an increase over the expenses of the preceding year of 10.1 per cent. This increase is to be attributed to the advance in price of labor and materials of every description, and might have been met by a corresponding increase of rates on transportation had your managers not deemed it due to the interest of the City of Baltimore to keep the rates so as to attract trade to Batimore, which under a different policy might have been sent to other cities.

At the last annual meeting, in the report then submitted to you, the propriety of continuing the second track north from Relay upon its completion to that point was suggested, and a resolution passed sanctioning that policy. The Board has ordered the laying of the second track as far north as Parkton, 29 miles from Baltimore, which we hope to have completed during the present year. This has become a necessity to the safe and economical management of the trains, and every effort should be made to have it completed at an early day. The laying of the track is finished to Relay, and the track graded to Cockeysville. The ballast is being distributed, and the iron contracted for, we hope to have it in running order to that point by the first of June, when it is our intention to pu on an additional train to accommodate the local trade which is rapidly increasing, and is of such a character that the utmost promptness is requisite and cannot be satisfactorily done by our through trains, which are now overloaded and are frequently detained by the numerous connections we make with other roads between Buffalo and Baltimore. It has been customary to discontinue the local trains during the winter season, until last year, when the experiment of running a train during the entire year was tried and found to succeed so well, that a second train placed on the road last spring has been continued during the present winter. The revenue from this local passenger business in December last, showed an increase of 20 per cent. on the revenue from the same business, over the corresponding month of the preceding year. It is the intention of the Company to provide every necessary facility for this local travel, and we do not doubt but that the revenue derived therefrom will in a very short time suffice to pay the increased expenses.

We regret that we cannot report any progress upon the Canton Extension. The work has been delayed, not by the desire of the Company, for we are convinced that after the termination of the war a large tonnage of Coal may be shipped from Baltimore, which otherwise will be shipped from the Delaware, or some point on the lower Susquehanna, thereby depriving this road of the profit in the carrying of the Coal from Harrisburg to Baltimore, and the City of Baltimore also, the profit arising from the trade. It has been interfered with by circumstances entirely beyond the control of the Company, and growing out of a difference of opinion as to the validity of a supplement to the ordinance of the City of Baltimore of 1854, and which the City Council made an effort to correct by an ordinance passed in 1862. The Mayor of the City interposed his veto o this. Too late, however, in the opinion of the Counsel of this Company, to prevent its becoming a law. As he objected to it, it was thought that if an attempt was made to proceed with the work it would lead to litigation between the City and Company, which it was desirable to avoid. The Council again passed an ordinance in September, 1863, which was also vetoed by the Mayor, for reasons which he gave in his message and which we are assured were founded not upon any desire to prevent the completion of the line to Canton, but upon the erroneous impression which had become prevalent in this City, that the Company did not intend to construct the line, but was only desirous of having the time for its completion postponed. A committee of the Board has lately had several interviews with Mayor Chapman, and at his suggestion a new route is being surveyed, which he thinks will be more advantageous to the City than the one fixed upon by the Company, and less expensive to build. After the survey and estimated cost of both routes are completed, we hope to be able to make such arrangements with the city authorities as will enable us to proceed with the work and insure its early completion. Not anticipating the delay just referred to, we purchased and paid for a considerable amount of Real Estate in Baltimore, to secure the right of way for the line to Canton and Calvert Station, and for the increase of our depot and siding facilities. So far, we have not been able to make use of these purchases, but they when made available will be of great benefit to the Company, by enabling us to receive and discharge freight more promptly than our limited space will now permit.

The following resolution was unanimously passed at the last meeting of the Stockholders:

Resolved, That the incoming Board are hereby authorized, if they deem it judicious, to lease the road and property of the Shamokin Valley and Pottsville Railroad Company, and to make such arrangements, leases and contracts as in their judgment may be needful to secure a perfect line, with a policy in harmony with the interests of the Company between Baltimore and Lakes Erie and Ontario.

Acting in accordance with this resolution, your board have leased for 999 years, the Shamokin Valley and Pottsville Railroad, and the Elmira and Williamsport Railroad upon terms, which at the time were considered favorable, and for the purpose of ascertaining the propriety of our action in this matter, we have had the accounts of the two leased roads kept accurately and independent of those of the main line. The result has been satisfactory.

The gross receipts of the Shamokin Valley and Pottsville Railroad from February 1, 1863, the date at which we took possession of the road, until December 31, 1863, were		$144,728 17
The expenditures	$57,615 63	
The rental	60,856 58	
		188,472 21
Leaving a net balance of		$26,255 96

Being over 3 per cent. on the entire amount of the capital stock of that road.

The gross receipts of the Elmira and Williamsport Railroad from the 1st of May to the 31st of December, 1863		$297,391 04
Amount due from the U. S. uncollected		37,399 47
Total earnings		$334,790 51
Expenses	$224,421 88	
Rental	108,000 00	
		332,421 88
Showing a surplus of		$2,368 63

In addition to the leases just referred to, and in order to fully carry out the wishes of the stockholders in reference to the control of a complete line to the lakes, we have entered into a contract with the Erie Railway Company of the State of New York, for the operation of the Baltimore and Philadelphia trade over the Buffalo, New York and Erie Railroad (which has been leased by the Erie Railway Company) from Buffalo and Rochester. As to the loss or gain growing out of this contract, we are not able to give any accurate statements, owing to our not having received full reports of the receipts and expenditures from the Erie Railway Company, who have the control of the accounts.

The business of all the roads under our control or that we have an interest in by contract, has been limited by our inability to move any more trains over a single track, showing the necessity of our extending the double track in justice to the trade dependent upon our line for an outlet to market, and in justice to the State of Maryland and the City of Baltimore, from both of which the road in its early history received many liberal favors.

It is due to the stockholders as well as to the operating officers of the road, that some reference should be made to the numerous delays that have occurred during a portion of the year. Upon a thorough investigation, we find that there has been no want of ability or energy upon the part of the officers in charge of the transportation, maintenance of way and machinery departments in the discharge of their duties, and believing that the men in their employ have been industrious and faithful, we think the delays are to be attributed to the fact, that the officers in endeavoring to accommodate the business of the Government, which at times has been very heavy, together with the local traffic, have taxed the road and its equipment beyond its capacity, and so long as the war continues we shall be subject to the same annoyances.

We cannot close this report without a reference to our non-compliance with the resolution passed at your last meeting, recommending the Board to decline a dividend out of the profits of the last year of 6 per cent. on the capital stock. We have not done so, because upon entering upon the present year, to fully carry out your wishes with regard to the improvement of the company's property, we made arrangements to have a large amount of work done upon the road, including new bridges and extension of double track and sidings; made contracts for a large supply of shop and road materials, anticipating an advance in prices and difficulty of obtaining them when wanted for use, and for the increase of our rolling stock, so as to obtain sufficient for the wants of the trade, in which, notwithstanding the large amount purchased, we are still far short, expecting after making these heavy contracts, that we should have a sufficient revenue left to make a dividend on the capital stock which would be satisfactory to all parties interested. But our expectations were frustrated by the Rebel invasion in June and July last, when the actual loss of trade in those two months amounted to $108,792 83, sufficient to have made a dividend such as you recommended, independent of the loss sustained by the destruction of the bridges on the main line and Wrightsville Branch, thirty-three in number.

We could not have declared a dividend after having arranged for the heavy expenditures just referred to, without creating a floating debt, which you would have condemned. It would be well in this connection, to say that the cost of building the road having been materially increased by a large part of the payment therefor being made in bonds at par, irrespective of their depreciated market value at the time of payment, it is proper that this extra cost should be liquidated by applying a corresponding amount of the sum now appearing to credit of profit and loss before any stock dividend can be made.

The General Superintendent in his report recommends an expenditure of $1,500,000, as requisite to place this road and its equipment in the condition necessary to do the business now offering, and for the trade of uncompleted connecting roads. We would recommend that his suggestions be adopted, as there scarcely can be a doubt but that the true interests of the road as it now exists, from Buffalo to Baltimore, will be best secured by putting it in such good condition as will enable it to compete successfully with other roads for the great trade of the lakes.

During the year there have been transported northward 255,875 passengers, travelling an average distance of 45.2 miles, equal to 83,869 through passengers; and southward 215,677 passengers, an average distance of 44.9 miles, equal to 70,045 through passengers. Of the above, 276,846 were local passengers, an increase of 67,855, and from connecting roads 194,706, an increase of 51,165.

Of the 762,735 tons of freight moved during the year, 563,538 tons were in the cars of the company, and 199,197 tons were in the cars of individuals; a total increase for the year of 111,717 tons.

The engine mileage for the year was 1,012,096 miles, at a cost of 9.66 cents per mile, an increase of 69,538 miles run, at an additional cost of 1.1 cent, or 13.5 per cent., hauling 20 per cent. increased tonnage.

The equipment of the road consists of 53 locomotives; 29 passenger, 3 baggage, 9 baggage and mail, 5 express, 687 freight, 947 coal, 159 lime and lumber, and 8 tool and drover cars. Two engines worn out or destroyed have been replaced by new ones. Contracts have also been made for ten first class freight engines, two of which were delivered in March, and two are to be delivered each month until the contract is completed. Contracts have been made for 225 house freight, 215 gondolas, and 200 8-wheel coal cars, to be delivered previous to Sept. 1st; also for 11 first class passenger cars; and it is proposed to build two baggage cars in the company's shops. The equipment added during the year has been 4 passenger, 1 baggage, 4 express, 102 house freight, 135 gondolas, and 20 stock cars. There have been renewed 8 passenger, 2 baggage, 73 house freight, 1 stock, 15 gondolas, and 118 coal cars, all worn out.

There have been used in repairs of track, 4,007 tons of 64 lb. rail, 42,344 cross ties, 16,446 chairs, and 141,248, lbs. spike.

The receipts and expenditures of the company during the year have been as follows:

Balance cash assets Dec. 31, 1862		$777,349 07
Earnings main line and branch		2,122,084 19
" Shamokin division		144,728 17

Construction main line		174,470 06
" Canton extension		1,020 41
" Elmira division		581 00
Real estate main line		105,063 52
" Elmira division		100 00
Sinking funds		50,463 50
Second mort. bonds redeemed		300,000 00
Balance of Assets Dec. 31, 1863		260,974 45
		$3,368,037 73

The equipment of the Elmira division consists of 16 locomotives; 7 passenger, 3 baggage, 96 freight, 541 coal, and 7 caboose cars. The mileage of engines was 196,907 miles, at an expense of 7.51 cents per mile for repairs. The number of passengers transported for the eight months was 26,655 northward, an average distance of 51.8 miles; and 26,943 southward, an average distance of 57.3 miles. The number of tons of freight moved was 117,968. The condition of this road was anything but satisfactory, and has required extensive renewals. One thousand tons of new rails have been put on the road, many new ties, and nearly every water station has been overhauled, and one new tank built; nearly two miles of new iron pipe have been laid in place of defective wooden pipe. Fourteen of the engines are modern built truck engines, but too light for the grades of the road, and two of the engines may be called useless. The freight cars are in fair order. The coal cars will require very extensive repairs, 60 of which are now out of service. One passenger car has been entirely rebuilt, two are running but require a general overhauling, and the remaining four are condemned as unfit for service. Two baggage cars are laid up for rebuilding. It will be necessary to expend the entire receipts of the road over rental and operating expenses in the general improvement of the road and equipment.

The equipment of the Shamokin division consists of 5 locomotives; 1 passenger and baggage, 5 freight, 39 lime and lumber, and 439 coal cars. The engine mileage was 40,476 miles at a cost of 9.71 cents per mile run. The tonnage was: through, 1,778; local eastward, 173,877; do., westward, 148,942—total, 324,597 tons. The con-

dition of this road on Feb. 1, was most excellent, and has been fully maintained during the year. The only limit to the tonnage of this road, holding a large portion of one of the anthracite coal fields of the State, is a want of facilities for its movement. By early summer the Northern Central will have more than doubled its coal equipment for this trade, and it is hoped that prompt transportation can be furnished for all tonnage offered.

Commerce in the Sandwich Islands.

The prosperity of the Sandwich Islands is steadily on the increase. During the year 1863 he imports amounted to $1,175,492 25, and the exports to $1,025,852 74. In 1861 the imports were: $761,109 57; exports, $659,774 72—showing a difference in the exports of $366,078 02, or over 50 per cent. in favor of 1863. The export of domestic produce was $476,872 74 in 1861, and $744,413 54 in 1863. More than half the duty-paying goods came from the United States.

The Great Canada Law Case.

The Court of Appeals of Canada West has rendered a decision in the famous case of the Commercial Bank *vs.* the Great Western Railway. The suit was brought by the Bank for the recovery of $1,300,000, including interest, claimed to have been loaned to the Railway Company for the completion of the Detroit and Milwaukee Line, but which the Great Western Company contend was loaned to the above named Line direct. The latter being bankrupt, the question was who should be the loser, the bank or the corporation through whose agency the money was borrowed. The decision of the Court was against the Great Western to the amount of $650,000, about one-half the amount claimed, thus apparently intending to divide the loss between the two parties. It is thought that an appeal may be taken by one or the other of the parties. The Railway Company can ask a new trial in respect to the amount adjudged by the Court, by paying costs, and the bank can have one without costs. If the Bank carries the appeal to England, it must give a bond for the payment of costs. The Great Western Company will be compelled to give a bond for the entire sum involved, should it conclude to have the case adjudged by the English Courts.

Chicago and Northwestern Railway.

Mr. H. Palmer has a communication in the Lodi *Herald*, to the effect that he recently went to Chicago to see Mr. Ogden about the extension of the Northwestern Railway through that place, and Mr. Ogden being absent he saw Perry H. Smith, who informed him that their purpose was to build their railroad from Chicago to St. Paul *via* Lodi and Baraboo, passing through the gorge of the Baraboo Bluffs (in which is situated the Devil's Lake.) Mr. Palmer adds:

"The first portion finished will be from St. Paul this way to Hastings. This they agreed to complete first, in order to secure the immediate completion of 500 miles of railroad beyond St. Paul, on the Pacific line or survey, which passes through the northern portion of the gold mines of the Northwest.

"In view of the importance of this great thoroughfare to our country, both as a commercial and a military highway, and the local importance to each of us, I would advise all living on, or near the line of said road, to render all assistance in their power to the agents employed by the company to build this road.

"The bill for a railroad from Madison or Watertown *via* Lodi to Baraboo has been slightly amended in the Assembly, which sends it again to the Senate, after having once passed that body. This will delay the passage of the bill a number of days. The ultimate success of the bill to Lodi (provided the N. W. R. R. is built) is very important. The reasons why are for the present contraband, as military men would express it.

☞ A type printing telegraph is in use between Manchester and Liverpool, invented by Bonelli. The message is first set up in large Roman letters; it is then placed on a travelling bed and made to pass under small moveable wires which come in contact with certain projecting parts of the types and make and break the electric circuit. These deliver at the other end of the wire an exact reproduction of the printed message. It is now intended to enlarge the capital of the company and extend its operations. We confess we have long wondered at the continued use of the needle system in England when Morse's & House's instruments are so decidedly superior.

Northwestern Virginia Railroad.

In the first branch of the city council, on the 31st ult., Mr. Dukehart, chairman of the committee of ways and means, reported a resolution "authorizing the commissioners of finance to sell the city's interest in the Northwestern Virginia Railroad Company, for $1,100,000, payable in cash, or at a period not later than January 1, 1873, with interest to be paid semi-annually on the first day of January and July in each year, and with all necessary stipulations to secure an early completion of said road, and of a bridge to connect it with the Marietta and Cincinnati Railroad." The city's original investment in this road was $1,500,000, and the arrears of interest due the city amount to $360,000. It is understood that the sale of the city's interest in the road on the above terms to the Baltimore and Ohio Railroad Company has already been effected, and that the object of the resolution is to confirm the sale.

Rutland Marble Company.

The Rutland Marble Company has issued a pamphlet, from which the following description of the property is taken:

The quarries of the company have a range of about 1,600 feet. For the past ten years an opening at the south end has been worked, having a length of 140 feet on the range, and a breadth of about 80 feet, covering a surface of about one-fourth of an acre. This one opening has annually supplied the mills of Mr. W. Y. Ripley, and Messrs. Clement & Son, with 150,000 feet each of two-inch marble, or 300,000 for the two. This has been worth, at a low average, 50 cents per foot. Thus, in ten years, this one opening of one-fourth of an acre has produced $1,500,000 worth of marble, exclusive of the sales of blocks to other parties. These for six months, ending Oct. 1, 1863, were $21,364. What they were for the ten years we do not know.

The opening is now worked at a depth of 70 or 30 feet, and gives no sign of exhaustion; and the deeper it is worked, the finer is the marble. If ten years have not begun to exhaust one-fourth of an acre, or one sixty-fourth of the company's marble lands, it is difficult to say how many centuries would be required to exhaust the whole. The Rutland quarry holds just that desirable position on the ledge which yields marble of the finest grain and texture, with the highest degree of perfect soundness. It is thus the only marble now known in this country which can be used for statuary, mantle pieces, furniture, monuments, and the various purposes for which Italian marble has been heretofore used, and is now preferred by marble dealers to the best Italian. One great advantage it has over the Italian is its entire freedom from even the smallest unsound spot or blemish.

New Railroad Project.

The citizens of Stark and surrounding counties in Indiana are considering the practicability and expediency of constructing a railroad from Goshen, Elkhart Co., on the Michigan Southern and Northern Indiana Railroad, to Gillam, Iroquois Co., to form a junction with the Logansport, Peoria and Burlington, and Chicago Branch of the Illinois Central. It is said a road could be easily built, and the character of the country such as to render it a paying institution from the start. It is represented that the people along the proposed route are ready to subscribe liberally to the construction of this road in order to secure facilities for reaching a desirable market, and such they regard the eastern termini of the Michigan Southern road.

At a meeting of those interested in the proposed road, held on the 21st ult., a committee was appointed to obtain subscribers to the stock and organize a company, said committee to report to a meeting to be held on the 7th of May.—*Toledo Blade.*

American Railroad Journal.

Saturday, April 9, 1864.

Stock Exchange and Money Market.

The most interesting financial spectacle at present is the condition of the gold market, as affected by the action of the Treasury, in underselling the street. The prices there have been touched beyond all question, but not so much so either by the reduction first made to the importers of a quarter per cent, or as it afterwards stood on Tuesday at 2½ per cent below the market price. This we think is susceptible of explanation. The operations in the street are not really legitimate in their character. The importers have withdrawn from purchasing there, and have no need to do so, for they find at the Sub-Treasury department a sensible relief in the price. They would of course be insane to give three or four per cent more for gold to the speculators, than they can obtain it for at the Sub-Treasury. They will do no such thing. Who then remain to purchase the com-

modity? Only one single class of persons, viz: the bill drawers; and those in large credit may draw and renew a dozen times in succession, by paying interest and commissions without remitting gold for the bills at all, except at the expiration of their credit. It must also be remembered that our exports weekly are by millions, and the proceeds of these generally go to the credit of these very bill drawers, being transferred as far as they will go by their customers here. The speculation in gold is therefore inevitably left in the hands of those who trade in it as they do in any other article in the street which offers the largest profit. In this case it is believed there has been what may be called a corner, and a good many must have been caught in it. The shorts are at the mercy of the longs, and it is quite possible the quotations will be higher till these are fully matured and liquidated. The public, however, have not the slightest interest at present in the struggle. The importers are clear of it entirely. The loss to many and the gain to the few in this, is a matter which we may record but without any sympathy. It must end, because the fuel will be expended, and the real merchants will not care to keep up a fire to burn themselves. Indeed if it grows too warm for those, who are watching the cauldron, no one would feel particularly regretful. We should not therefore be in the least surprised, if the demand for gold falling off at the Importing houses, the whole affair would flicker out. Further, it will be observed that the demand for export has fallen off lately in a very large degree. The export for the last week was small. It will also have been noticed that the exports of the precious metals for the past year have largely declined.

It has been suggested that the excess of our imports of late may be attributed to a belief in certain leading mercantile quarters, that the tariff will be so increased as to effect the prices of imported goods very considerably, and therefore it is best to anticipate the change, and lay in stocks in advance. This no doubt is an explanation, but as there is in human affairs a compensating principle in some form or other for every change from their normal condition, we may find one in this. When prices rise from extraordinary causes, the consumers need not purchase. Already it is well known that persons of fixed incomes even in large amounts, and certainly those in moderate circumstances, have already adopted a system of economy based on the advance. At the largest retail shop in this Country it is remarked that where dozens of certain articles were formerly sold to customers, a single one is now the usual sale. And this economy can fortunately be practised in a great many cases, where these articles come under the head of *luxe*. Again, a decisive victory on our part would make a most material change in our financial system. It would at once bring the whole remaining cotton product of the South into the exchange market, and bring that down in sixty days to near its former rates. For it would only require three or four weeks to place the whole of it at our ports of shipment, where commercially and financially it would be the same as if it had actually reached Liverpool or Havre. Here in New York as we stated last week we have, it is believed at least 40,000 bales, worth at the present prices *twenty* millions of dollars (not "two" millions as incorrectly stated by us last week). It is observable even now that scarcely a steamer ascends the Mississippi without being loaded with liberated cotton. Red river, will add enormously to the quantity even now finding its way to our home markets.

The disposal then of this large amount of the staple, in affecting exchange would affect gold as well, and this is the danger that prudent importers will do well to consider before they venture on very heavy imports, based on the prospect of a protracted war. Peace came suddenly in 1815, and those who thought it never would come, and did business on that principle were very generally broken down. We repeat it, one great decisive battle ends the war; for the confederates, if they have plenty of corn and whiskey, have no more soldiers or money. Gen. Grant it is expected will not move at all till by absolute superiority in the field, he shall be as sure of Lee and Richmond, as he was of Pemberton and Vicksburg.

There is one other view of our finances worthy of notice, and that is the opinion prevailing in certain quarters that the National Banks will flood the Country with paper. It must be remembered that the capital of the whole of them as yet established is only about forty five millions, and that they cannot issue to this extent by the restricting force of the law. And this will be but a drop in the bucket, compared with the whole currency of the Country, and will not count much more. These Banks will have to return to specie payments just as soon as the Treasury can retire its own legal tenders, and this it can do just as soon as the war ceases. As long as this lasts new loans must be made. When it stops, the treasury will be able to pay its interest, support the civil list, the reduced army and navy list, and attend to the sinking fund. A foreign demand already begun for the leading public securities and beginning to tell upon prices here, within a few weeks with considerable effect, will continue, and we shall find the greater portion of them bought up in Europe to be held, and at a premium which would enrich the American holders by *hundreds of millions*.

It is thus plain that at this moment there is nothing more important to secure our entire financial triumph, but a statesmanship at Washington, which is wise enough not to attempt any more generalship. These qualities do not exist in the same persons usually. The greatest military reverses in all ages have followed the interference of politicians with the management of armies.

A law amending the present National Banking Act is before Congress, clogged with all sorts of amendments. One of these most pertinaciously pressed, gives permission to such old institutions as desire it, to retain their former names. We think this is a mistake. There is much in a name good or bad, but we think it will be seen that these Banks which prefer to retain their old designations will find their circulation affected unfavorably by the retention. In the broad comprehensive word National, there is a charm which will give currency to a bill in all the States. On the contrary, a mere local appellation gives but a local popularity, and detracts from the apparent value. The remedy we proposed months ago, to soothe the pride of the local bankers, was merely to have placed across the face of the new bills, the words "formerly the Bank of." We are confident our anticipations on this subject will prove correct.

Money rules pretty strongly at 7 per cent. There are so many new channels offering profit to adventure, that large numbers of persons are embarking their means in them, and are prepared to go with the current.

The accumulation of gold continues both in the Sub-Treasury and the City Banks. Government securities are firm and in demand. The five-twenties are rising with inquiry for European account. A single foreign House took $400,000 by the last steamer for its foreign correspondents.

The business of the Sub-Treasury on Tuesday was: Receipts, $3,658,504 20—for Customs, $383,000; payments, $4,279,825 98; balance, $37,845,396 82.

State stocks are firm, so are Bank shares, and railway bonds in good repute. The railway share market is pronounced irregular with a tendency to higher figures. The particular fluctuations will be found on examining our tables corrected for the week.

The subscriptions to the ten-forty loan at the Sub-Treasury on Tuesday amounted to $168,850, and at the First National Bank to $409,000.

The aggregate value of the exports of produce and merchandise from this port during the past week was $3,766,748.

The total value of imports of foreign goods at the port of Boston, for the week ending April 1, were $334,164, against $774,377 for the corresponding week of last year. The total value of exports for the same period were $289,660, against $730,520 in the corresponding week of 1863.

The total value of foreign exports from the port of Baltimore for last week was $161,805.

Exchange is firm at 181¾.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Chicago and Milwaukee, 85; Cincinnati, Hamilton and Dayton, 132; Peninsula R. R., 75; Long Island R. R., 100¼; Pacific R.R. 7s, 60; Hannibal and St. Joseph, convertible, 98; At. & Gt. Montreal.—Champlain and St. Lawrence R. W., 13½@15; do., preferential, 99@101; do., 6 per cents, 82½@85; Government 5 per cents, sterling, 92@92½; do., currency, 92@92½; do., 6 per cents, 1872, currency, 103@104; Montreal City bonds, 6 per cents, 97½@98; do., Water Works, 6 per cents sterling, 98@98½; Quebec City 6s, 95@96; Ottawa City 6s, 1880, 90@91; Toronto 6s, 1872, 90@92½; County debentures, 80@90; Montreal Consols, $2½@5; Huron Copper Bay, 50@60; Montreal Telegraph Co., 130@131; City Gas Co., 120@120½; City Passenger Railway, 120@122½.

The New Territory of Montana.

The act before Congress defines the new territory by this name as follows: Commencing at a point formed by the intersection of the 27° L. W. from Washington with the 45° N. L.; thence due West on said 45th degree to a point formed by its intersection with the 34th degree W. from Washington; thence due South along said 34th degree of longitude to its intersection with the 44th degree and 30 minutes of N. L.; thence due west along said 44th degree and 30 minutes of N. L. to a point formed by its intersection with the crest of the Rocky Mountains; thence following the crest of the Rocky Mountains northward till its intersection with the Bitter Root Mountains; thence northward along the crest of said Bitter Root Mountains to its intersection with the 39th degree of longitude W. from Washington; thence along said 39th degree of longitude northward to the boundary line of the British possessions; thence eastward along said boundary to the 27th degree of longitude W. from Washington; thence southward along said 27th degree to the place of beginning. This makes it the northernmost territory next the States east of the Missouri Valley.

Canadian Securities in London.

The latest quotation of Canadian Securities in the London market were: Government five per cents 89@91; do six per cents 99@103; Grand Trunk Stock 19@20; do 1st preference bonds 73@75; do 2nd preference bonds 65@67; do 3rd preference stock 49@51; do 4th preference stock 26@28 Great Western Shares 9⅛@9¾; do 6 per cent bonds 92@94. Atlantic and St. Lawrence Shares, 57@59 x. d. Buffalo and Lake Huron Shares 5½@6; Northern Railway 82@84; Hudson's Bay 18½@19; Canada Land 74@77.

New York Canals.

The Canal Commissioners have resolved to open the canals on the 30th inst.

Northern (Ogdensburg) Railroad.

A dispatch from Albany states that the Legislature has finally passed the bill giving the Ogdensburg Railroad to the second mortgage bondholders.

Wabash Canal.

Water was let into the Wabash Canal on the 31st of March. The canal is now open for the season of 1864.

☞ The bulk of the nickel used by the U. S. Government in making cents comes from the Lancaster County mines in Pennsylvania.

Railroad Extension in America.

Proposals have been issued to the existing holders of bonds of the Atlantic and Great Western Railway for subscriptions for £405,000 additional bonds at the price of 70, to which will yield interest in sterling at the rate of nearly nine per cent per annum, and for which they are entitled to a preference. The line has been completed within its estimated cost, and these bonds will constitute the whole of the mortgage debt to be created on the New York and Pennsylvania divisions. Hitherto the road although only partially opened, has yielded unusual profits, owing partly to the fact of its being in connection with the great oil district, but more especially from its forming the most convenient and direct route for the large and constantly increasing Western traffic from New York. On its complete opening in May next express trains will be run from New York to St. Louis, one thousand two hundred miles, in forty hours, without break of gauge or change of carriages. A large business on the line is likewise being opened up for the supply of coal to Canada. The present bonds are to be redeemable in sterling at par by means of a sinking fund in nineteen years.—*London Times*, March 24.

The Quicksilver Mine Case.

WASHINGTON, April 4.—In the case of Chas. Fossalt, appellee, *vs.* the United States, the opinion of the Supreme Court was delivered by Justice Nelson to-day, establishing the southern and eastern boundaries of Fossalt's grant, as including the mine. The southern boundary is the Great Sierra, which defeats the pretensions of the United States. The eastern boundary is the straight line by the east base of the Low Hill, thus throwing the mine Berreyesas on Fossalt's ranch. The Court orders a decree confirming the survey of December, 1860, and filed January following.

Pittsburg and Connellsville Railroad.

Benjamin H. Latrobe, Esq., president of this road, invites proposals for the gradation, masonry, bridge superstructure, ballast, cross-ties and track-laying of the Pittsburg and Connellsville Railroad, between Connellsville and Cumberland, embracing a distance of about eighty-seven miles, in sections of about one mile each. Specifications are now ready, and proposals will be received until the 28d of this month.

U. S. Securities Abroad.

The following is an abstract from a late commercial letter from Frankfort, Germany, touching the large demand on the continent of Europe for United States Stocks:

"Transactions in United States Stocks are large and increasing. On one day in March the Rothschilds bought all that was offered in the Bourse, and their purchases that day amounted to over $100,000. They have again been buying. Another firm, P. N. Schmidt, sent over to New York, and subscribed for $100,000 of the 5-20's just before the subscription closed. Capitalists are selling Austrian securities and investing in American. Two other firms in Frankfort are bringing out large amounts for sale to supply numerous orders coming in from various towns in Germany. These banking houses are M. A. Grunebaum & Ballin, and Speyer, Ellisson & Co., who, perhaps, do the largest business in this line. They have branch houses in New York. It is probable that the extensive orders for U. S. 5-20's will have a favorable influence in lowering the ratio of exchange on Europe. The quotations now are 66¾ for 5-20's, and for those of 1861, 66½. The calculation is made that over $6,000,000 have been purchased in Southern Germany alone, within the last four or five weeks, while in Holland a still larger amount has been taken by the bankers. Rate of interest is now 3 to 3½ per cent., and money bundant."

Albion Gold Mining Company.

This is a company that has just been organized under the statutes of the Commonwealth, with a capital of three hundred thousand dollars, with twenty thousand shares in the treasury, and a cash fund of ten thousand dollars, thus giving it quite a strong working capital. The mine is located in the Montague District, near Halifax, N. S., and consists of the well known O'Connor, Farrell, McQuary and Robinson & Co. claims, together with about seven hundred and eleven acres of mining land adjoining them, and embraces the best lands in the Montague District. These claims have produced as high as 60 ounces of gold to the ton; and in December, 1863, four men at work on this property divided in five weeks, after paying all expenses, $1,200 in gold as the proceeds of their labor, with simple pick and drill. Prof. Silliman advised the purchase of this property, after carefully examining the Gold Fields of Nova Scotia, and states in his report upon the same, that his facts in relation to the Montague District were collected from his investigations upon this property.—*Com. Bulletin.*

New England Mining Company.

The New England Mining Company of Colorado has 50,000 shares, par value $5. Capital $250,000; has a valuable, unencumbered property in a productive condition, with $15,000 in the treasury—has no liabilities and not subject to assessment. A. H. Potter, *President;* J. Wetherbee, Jr., *Treasurer;* Hon. Rodney French, *Superintendent.*

Astor Mining Company.

This is one of the new Companies recently formed, and from its prospectus, vouchers and management, it promises to be one of the best Companies on Lake Superior. It is on the Great Bay State and Phenix veins, and nearly adjacent to these mines. There are now $20,000 in the treasury of the Company, as a working capital; and with the known integrity and ability of the management of this Company, their good standing in the community. and the fidelity and good practical common sense and judgment of their Superintendent at the Lake, and the business character of the Stockholders, this appears to be as promising and remunerative an investment as is now offered—*Boston Post.*

Montezuma Gold Mining Company.

The property of this company is situated in Nevada District, Colorado Territory, about four hundred feet from Nevada Gulch, only one-fifth of a mile from Central City, and easily accessible by good roads: it was discovered and worked as early as February, 1860, and secured by the owners as among the most promising developments of the gold bearing region. The original owners, it is stated, divided $40,000 in gold as the net proceeds of eighteen months work by rude processes of extraction, without the aid of machinery or engines. The present Company intend to put up a 36 stamp quartz mill fitted up with all the recently improved fixtures and gold saving apparatus, and of power sufficient to work off three cords of ore a day, producing from six to nine hundred dollars of gold per cord. A letter from Hon. H. A. Johnson, Judge of the Supreme Court of Colorado, speaking from personal observation of the property, says:

"I believe the yield will be more than tripled by the operations of such new and improved machinery as your Company will erect."

The following is a list of the officers of the company: President, R. S. S. Andros; Treasurer, F. B. Webster; Directors, R. S. S. Andros, Andrew McKinney, Jesse A. Locke, F. B. Webster, Francis Bush, W. H. Hollister and Stillman B. Allen.—*Com. Bulletin.*

The New Coinage.

The act now before Congress creating new one cent and two cent pieces, provides that the alloy shall consist of 95 per cent. copper, and 5 per cent. tin or zinc. The weight of the cent is to be 48 grains, that of the 2 cent piece 96 grains or 1-5th of an ounce Troy.

Atlantic and Great Western Railway.

Mahoning Division.—The Cleveland and Mahoning Railroad, which since its lease to the A. & G. W. Railway has been known as the "Mahoning Railroad," and operated as a partly independent line under the Superintendency of C. L. Rhodes, will, on and after April 1st be merged into the Atlantic and Great Western Railway, and be operated as the "Mahoning Division" of that line. Mr. Rhodes retires, and the entire line will be under the General Superintendency of Mr. H. F. Sweetser, and all the rules and regulations of the Mohoning line that vary in any degree from those in force on the main line, are abolished. Returns of all descriptions are to be furnished direct to the general officers of that line. Cleveland is now, in name as well as in fact, the present terminus of the Northwestern trunk line of the Atlantic and Great Western Railway.—*Cleveland Herald.*

Exports of Petroleum.

The foreign exports of petroleum from the United States from January 1, to April 1, 1863 and 1864, have been as follows:

From		1864.	1863.
Boston,	gallons.....	354,986	908,165
Philadelphia	"	987,174	1,374,835
Baltimore	"	211,652	360,163
Portland	"	976	155,463
New York	"	4,044,486	6,873,861
Totals		5,599,274	9,672,487
Decrease in gallons.....			4,073,213

☞ The Laconia (N. H.) *Democrat* states that the Directors of the Boston, Concord and Montreal Railroad are consulting with committees of the inhabitants of Whitefield, Dalton, Lancaster, &c., upon the propriety of making the attempt to extend the railroad from Littleton to the Grand Trunk Railroad, at Northumberland. The people there think they can build about ten miles of road a year by having a little assistance from the lower roads or the people below. The whole distance is twenty-eight miles.

☞ The Baltimore City Councils have resolved to extend the time for receiving proposals for the sale of the dividend stock in the Baltimore and Ohio Railroad Company belonging to the city until Monday, April 11th at noon, or until such time as the commissioners of finance may determine.

☞ The City Council of Louisville, Ky., has passed an ordinance granting the privilege of building street railroads, and awarding the contract to Gen. Boyle and others.

Coal at One Mill per Bushel.

A member of Council, one of the late Coal Committee, has received a letter from a gentleman owning coal lands in Perry county, on the Cincinnati, Wilmington and Zanesville Railroad, offering to contract with the city to furnish coal, in the mines, at one mill per bushel! At this rate, we would think that by proper management, we need never have another "coal famine."—*Cin. Gaz.*

☞ The Logansport, Peoria and Burlington Railroad was sold in Chicago by H. W. Bishop, Jr., esq., Master of Chancery of the U. S. Circuit Court for the Northern District of Illinois (upon a decree of said court), to Chas. L. Frost, Edward Weston, and Henry G. Marquand of New York. The purchasers own a large majority of the bonds against the road.

☞ Hon. George Wells has resigned the office of President of the Annapolis and Elkridge Railroad Company, and Joshua Brown Esq., who has been connected with the road as Superintendent, from a very early period after its completion, has been unanimously chosen by the board of directors to fill the vacancy.

Western Maryland Railroad.

In view of the interest which the city has in the Western Maryland Railroad, at the instance of Mr. Evans, of the City Council, a very comprehensive resolution of inquiry was adopted, and addressed to Mr. Robert J. Irwin, president of the road, a few days since. He has returned an answer, embodying facts in relation to its financial condition, construction, prospects, &c. The funded debt is $600,000, represented by the bonds of the company, $200,000 whereof have been guaranteed by the mayor and City Council of Baltimore, and these were sold at par, the rate of interest being six per cent., which was paid up to November 1st, 1862, the time at which the road was placed under the control of the company by the contractors for building and equipping it, and since that date it has been paid from the net earnings of the road, and at no time has the capital been invaded for such a purpose. As to whence they expected to realize the funds for the future payment of the interest, they refer to the rapidly increasing monthly savings from the part of the road now completed.

There is no interest in arrears, and the floating debt is $37,000, upon which the company is chargeable with six per cent. interest, and the indebtedness is held by various individuals and corporations in Carroll County. The road was constructed for $700,000, under contract, not inclusive of the costs of right of way and other matters not immediately connected with construction.

The road has been constructed in the mode used in an undulating country, with grade light, comparing favorably with other roads, and the general construction is of a permanent character. The rolling stock is in good order, and is estimated to be worth $82,000—at present prices their cost would largely exceed that amount. There is $20,000 of subscribed stock outstanding, for which suits have been instituted, and the questions of law have been decided in favor of the road by the Superior Court of Baltimore City. The test case has been taken to the Court of Appeals by the defendant.

Reference is made to the enthusiastic and encouraging meetings which have been held in favor of the road, especially in Washington County, where its terminus will be, at Hagerstown. It will cross the South Mountain, but at what point has not yet been determined. It is intended to press the construction to Hagerstown at the earliest practicable time. The general route which would be adopted by the company for an extension to the city, independently of the Northern Central Railway, would be upon the line of Gwynn's Falls, from Owings's Mills to the western or northwestern section of the city, or from the Relay House in the southeastern section of the city. The length of the former line would be about twelve miles, and of the latter eight miles. Neither of these routes have yet been surveyed, nor has any estimate been made. After alluding to what has already been done, an earnest appeal is made to the Council to consider the importance of this enterprise at this time, and not to permit its safety to be imperiled by any attack, open or insidious. —*Baltimore Sun, April* 2.

Coal in Minnesota.

The St. Peter's *Tribune* of the 16th instant says: "Coal has been found between Lakes Jefferson and Washington, Minnesota. The coal was found some ten feet beneath the level of either of the above lakes, and if these beds of coal prove as fine and rich as the land in that vicinity would indicate, it will be an immense resource to the State. These beds, without doubt, extend to the valley of the Minnesota River, and in this direction some eight miles; and toward the east to the Cannon River, or even to the Zumbro, or perhaps to Root River, but there it will be found to a much greater depth if the dip is there found. We have no doubt it will be found in that direction when boring is introduced and properly used."

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad Company for the week ending March 31, were:

	1864.	1863.
Passengers	$17,591 54	$13,230 65
Freight	24,935 76	17,968 00
Sundries	1,830 48	2,292 27
Total	$44,357 78	$33,490 32
Increase 1864		$10,867 46

The traffic of the Great Western Railroad for the week ending March 25th, 1864, was as follows:

Passengers	$21,621 17
Freight and live stock	52,316 30
Mails and sundries	1,241 18
Total	$76,178 65
Corresponding week of 1863	71,498 17
Increase	$4,680 48

The earnings of the Grand Trunk Railway for the week ending March 19, 1864, were:

Passengers	$26,105 00
Express freight, mails and sundries	2,500 00
Freight and live stock	77,177 12
Total	$105,782 12
Corresponding week, 1863	83,751 39
Increase	$22,030 73

The earnings of the Michigan Southern and Northern Indiana Railroad for the 4th week of March, 1864, were $133,905 00
Corresponding week of previous year. 82,346 00

Increase $51,559 00

The earnings of the Galena and Chicago Union Railroad for the week ending March 31, were:

	1863.	1864.
Freight	$22,080 00	$44,497 53
Passengers	10,870 67	18,219 14
Mails, &c	5,636 27	1,300 00
Total	$38,586 94	$64,016 67
Increase 1864		$25,429 73

The earnings of the Marietta and Cincinnati Railroad for the 4th week in March, were:

	1864.	1863.
Passengers	$11,645 64	$6,391 75
Freight	16,776 89	11,631 30
Mail, express & telegraph	1,089 19.	1,019 69
Total	$29,511 72	$19,042 74

Interest and Dividends.

The New York, Providence and Boston Railroad Company have declared a quarterly dividend of three per cent., free of Government tax, payable on demand.

The Beaver Meadow Railroad Company have declared a quarterly dividend of 2½ per cent., payable April 7th.

The Housatonic Railroad Company has declared a dividend of $4 per share on the preferred stock, payable on the 15th inst.

A dividend of three per cent. on the capital stock of the Potomac Coal Company has been declared, payable on the 15th of April next, to the holders of stock April 1st, at the office of the Treasurer, No. 18 City Exchange, Boston.

☞ The Oswego *Times* says: "The work on the Oswego and Rome Railroad is progressing most favorably, and we shall soon enjoy the benefits of its completion. The gentlemen having the matter in charge deserve commendation for the very energetic and thorough manner in which the work has been prosecuted."

☞ The officers of the Northern Central Railroad Company are making preparations for the location of another track on that portion of their road between Dauphin and Sunbury, a distance of about forty-five miles. This is rendered necessary not only by the immense tonnage now carried over the road, but the additional heavy trade that will be thrown upon it on the completion of the Philadelphia and Erie road, the ensuing summer.

☞ The bondholders of the Pittsburg, Fort Wayne and Chicago road, at their meeting in this city on the 7th inst., acceded to the request of the stockholders in regard to the sale of stocks for new work, and applying earnings to dividends after proper deductions for sinking funds.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company are pushing forward the grading and bridging for the double track as rapidly as the weather will permit. It is now graded some distance south of Charlestown.

Railroad Franchise.—Injury to Adjacent Real Estate.

The case of Milhau and others against Sharp and others, recently decided in the New York Court of Appeals, involving the right of property holders along the line of a proposed railroad to be constructed under a grant from the City of New York, to enjoin the construction of such road, and also involving the determination of the question of franchise is worthy of attention as differing in some important particulars from previous cases in the same court. The plaintiffs, property holders in the City of New York obtained the judgment of the Supreme Court, restraining and enjoining the construction of the road. The defendants, the grantees of the franchise appealed. The other facts sufficiently appear from the following abstract of the opinion:

By the Court:—Selden, J.—In the present aspect of the case there are but two material questions presented for consideration: 1. Had the Common Council authority to grant to the defendants the right to construct and maintain a railway through Broadway, upon the terms specified in their resolution of Dec. 30, 1853. 2. If that grant was not valid, have the plaintiffs shown such prospective special injury to their rights as entitles them to the relief granted by the Supreme Court.

The first question was distinctly presented to this Court, and decided adversely to the validity of the grant, in the case of Davis *vs.* the Mayor, &c., of New York, (14 N. Y., 506.) In determining that question, the provisions of the resolution granting those privileges must be regarded as indivisible. I allude only to the essential features of the plan. The thirteenth and fourteenth articles, which assume to authorize the creation of a joint stock association, and to provide for the transfer and forfeiture of shares and the general management of the affairs of such association, may be disregarded without touching upon the main objects of the resolution. I, therefore, lay out of view those articles, as having no bearing upon the question as to the validity of those parts of the resolution upon which the defendants rely. The provisions giving the right to lay the track of the railway, determining its location, width and manner of construction, the quality of the cars, the times of their running, the motive power to

be used, the maximum rates of toll to be charged, the amount of license fees to be paid, and the duration of the privileges granted, are all parts of a single scheme which are incapable of separation. The whole scheme is valid, or no part of it. These privileges, whether they create a monopoly or not, constitute a franchise. The definition of a franchise by Bouvier, is "a privilege conferred by grant from the Government and vested in individuals." Kent says, (3 Com., 458): "The privilege of making a road or establishing a ferry, and taking tolls for the use of the same, is a franchise." Railroads certainly do not form an exception (3 Paige, 45; 14 N. Y., 523.) Monopoly is not an essential feature of a franchise. A corporation with banking powers would be no less a franchise if there were no law restraining private banking, which alone gives to banking corporations the character of monopolies.

The granting of franchises was a part of the prerogatives of the British Crown (Finch's law, 164,) which on the severance of the colonies from Great Britain became vested in the people, and no franchise can be created in this State without authority to create it derived from the people through the Legislature. The corporation of New York can grant ferries, (or at least could do so prior to the act of May 14, 1845, on this subject,) because that power has been expressly granted to it (1 Hoff. Est. and rights of the corporation of N. Y., 275, 281, 286; Benson *vs.* the Mayor, &c., 10 Barb., 223,) but neither the Common Council has been authorized to create a franchise of the character of that described in the resolution under consideration. It follows that the resolution, relating to a subject not within the powers of the body passing it is merely void.

The remaining question is, whether the plaintiffs have shown such prospective special injury to their rights as likely to result from the construction of the railway, if such construction should be allowed, as to entitle them to the perpetual injunction granted by the judgment appealed from.

The material facts found by the judge at the trial bearing upon this question are as follows, viz: "that the plaintiffs were severally owners and occupants of buildings fronting on Broadway and of the lots of land upon which said buildings were erected, as particularly set forth in the complaint, and that the establishment of a railroad in Broadway would be specially injurious to said property of the plaintiffs, and other property similarly situated in the same part of Broadway. The defendants do not deny that they design to construct the railway, and threaten to enter upon Broadway and take up the pavement for that purpose as alleged in the complaint, and they claim to justify their action in this under the resolution of the Common Council.

There is no express binding either way upon the question (upon which the parties in their pleadings are at issue,) whether the plaintiffs own the fee simple of the lands in front of their respective buildings to the centre of the streets, or not. If it should be considered that such title in the plaintiffs was necessary to justify the finding that the railroads would be specially injurious to their property, this Court would be bound to infer, in support of the finding, that that fact was established. (Carman *vs.* Pultz, 21, N. Y.; Grant *vs.* Morse, 22 id., 313.) It was held by this Court in the case of The People *vs.* Kerr, *supra*, that the plaintiffs had no title to the lands over which the streets passed in front of their lots, and therefore could not maintain an action to prevent the construction of a railroad in such streets. It appeared, however, in that case that the land in front of the plaintiffs' lots were taken for the streets, under the act of 1813, and it was held that where streets were opened under that act, the fee of the lands was vested in the Corporation. In the present case it appears that all that part of Broadway which is below Union place was opened as a street prior to 1813, and no evidence is furnished to us of the extent of interest taken by the Corporation in streets so opened. We must, therefore, hold in accordance with the general rules that the proprietors of the adjoining lands own to the centre of the street.

Assuming, therefore, as we must, from the case, that the defendants were about to construct a railroad along Broadway in front of the plaintiffs' building, over lands of which they had the title, subject to the easement of the street, and that such railroad when constructed, would be specially injurious to the plaintiffs' property, the right of the plaintiffs to a perpetual injunction to prevent such injury would appear to be free from doubt. Judge Story, speaking of private nuisances which will justify the interference of a Court of equity, says: "There must be such an injury as from its nature is not susceptible of being adequately compensated by damages at law, or such as, from its continuance or permanent mischief, must be a constantly recurring grievance, which cannot be otherwise prevented but by injunction." (2 Story's Eq. §, 925.) In the case of Williams *vs.* The New York Central Railroad Company (16 N. Y., 91—111), which was a case similar to the present, except that the railroad had been built and was in use, and damages were claimed for past injuries as well as perpetual injunction against their continuance, it was said, in the opinion of the Court, "although the plaintiff had a remedy at law for the trespass, yet, as the trespass was of a continuous nature, he had a right to come into equity, and to invoke its restraining power to prevent a multiplicity of suits, and can, of course, recover his damages as incidental to this equitable relief." The application in such cases is as appropriate to prevent injury where it is threatened as to arrest it after it has been commenced. (Corning *vs.* Lowerre, 6 John, ch 439; Angel on Highways, § 283; 2 Story's Eq., §§ 825, 826 and 924.)

It is insisted by the defendants' counsel that the finding of the Judge at the special term shows that the injury complained of was a public and not a private nuisance, and that consequently a private action to prevent or restrain it could not be maintained. It is not an available objection to actions of this nature that the wrong complained of constitutes a public nuisance, provided the plaintiffs are subjected by it to any special injury, not common to the public, or to large classes of people. (Doolittle *vs.* Supervisors of Broome County, 18 N. Y., 160; Corning *vs.* Lowerre, 6 John, ch 439; 2 Story's Eq., § 924. a; 2 Waterman's Ed. on Injunctions 267-8.) This principle is not controverted, but it is insisted that the finding that the railroad "will be specially injurious to the property of the plaintiffs, and other property similarly situated in the same part of Broadway," shows the case to be one of public nuisance only, without any special injury to the plaintiffs; that the finding of a special injury to one and to others similarly situated, is the finding of a common and like injury to all, and that "such a common injury is a common or public nuisance." This is not a fair interpretation of the finding at the special term; and is entirely inadmissible under the liberal rule applicable to such cases, laid down in Carman *vs.* Pultz, and Grant *vs.* Morse, above referred to. The fair meaning of the language is, that the railroad would be specially injurious to the property of each of the plaintiffs, in severalty, and in like manner specially injurious to the separate property of others similarly situated, that although the cause of the injury would be common, the special injury of each would be several and direct, and not merely consequential. This interpretation of the languarge in question, which is the natural and obvious one, when it is read in connection with the other facts of the case, answers the objections of the defendants' counsel, and renders it unnecessary to examine particularly the numerous cases referred to on the argument. In none of them has it been held that an injunction to prevent a public nuisance could not be obtained by a private individual suffering, or likely to suffer, a special injury from it, not common to other people, under circumstances which would entitle the same person to an injunction if the nuisance were a private one merely.

The judgment of the Supreme Court should be affirmed.

☞ At the recent session of the Maine Legislature an act was passed relating to the foreclosure of railroad mortgages, which provides that the second mortgage holders or later mortgage bondholders may come in and redeem and hold for the benefit of themselves. This gives an extension of one year to those who may wish to avail themselves of the act.

An act was also passed providing means for the defense of the northeastern frontier. This act grants to the European and North American Company the timber on ten townships of land, all the claims of the State against the United States up to 1860, and, in case Massachusetts will surrender the claims held jointly with Maine against the general government and assign to the company the balance due her for public lands bought of her by the State in 1853, all the State lands on the Aroostook and St. John, the proceeds to go into the State Treasury and be paid out to the company after they shall complete the road to Lincoln, in the proportion of $10,000 for every mile completed beyond that point. All the lands in Piscataqus county are set apart for the construction of a branch line to the Brownville slate quarries and Katahdin iron works.

The amount of appropriations made for the current fiscal year is $4,707,911 55. Among the items are the following: Temporary loan of February 3, $500,000; war purpose, $50,000; State prison, $12,200; military purposes, $1,500,000; reform school, $10,000; insane hospital, $17,000; soldiers' allotments, $500,000; aid to families of volunteers, $661,374 66; interest on public debt, $242,900; bounties to volunteers, $2,350,000; refunding bounty advanced to towns, $100,000; public debt, $53,000, balance due on school funds, $89,515 55; salaries of public officers, $34,000.

☞ The three west spans of the Troy and Greenfield Railroad bridge over the road and Green river, just south of Greenfield, fell from their own weight on Saturday.

PROPOSALS.

SEALED PROPOSALS will be received at the office of the Minnesota Central Railway Company, in Minneapolis, Minnesota, until the 5th day of May, 1864, at 12 o'clock noon, for the grading, masonry and bridging on the branch line of said road from Mendota to St. Paul.

This work comprises a large amount of sand rock excavation, and the masonry and superstructure of a bridge across the Mississippi River.

Notice is hereby given that on or about the same date, the work of completing the grading, masonry and bridging on the main line of said road, from Farribault to the Iowa State line, (57) fifty-seven miles, will be contracted for.

The work upon the branch line is of a very heavy character and is worthy the attention of responsible contractors.

Payments will be made monthly, in cash, and bids received for the work in small or large quantities, the company reserving the right to reject any bids not satisfactory as to price or as to the responsibility of the parties making the same.

For information with regard to said work, application may be made to the company's Chief Engineer, at Minneapolis, Minnesota.

S. CHAMBERLAIN, President.
D. S. SHEPARD, Chief Engineer. 4t15

RAILROAD IRON.

800 TONS GUESTS' 52 lbs. RAILS, Erie Pattern, just arrived, for sale by

C. CONGREVE & SON,

2t15 No. 6 Pine street, New York.

RAILROAD IRON.

2,500 TONS RAILROAD IRON, 50 lbs. per yard.
5,000 Tons Railroad Iron, 56 lbs. per yard.

In yard and on shipboard to arrive. All New York and Erie pattern, of best English make, and inspected at the works. For sale by

DEHON, CLARK & BRIDGES,
28 Beaver Street.

New York, 2nd April, 1864.

SPECIAL NOTICE
TO
BANKERS, BROKERS,
Coal, Mining Companies, Merchants and Others.

THE BUILDINGS
69, 71, and 73 Broadway,
(Cor. of Rector street,)

Are to be altered into and fitted up in a very superior manner as first class offices. Also offices corner of Broad street and Exchange Place, No 4 and 6 Broad street, and No. 19 Wall street. Parties desiring to select space and have improvements to suit themselves can see the plans by calling on

EDWARD MATTHEWS,
Corner of Broad street and Exchange Place, NEW YORK.

EAST RIVER
STEEL WORKS
AND
ROLLING MILL,
Cor. 18th Street and Avenue B.

AUSTIN KELLEY & CO.

Manufacturers of CAST STEEL for WIRE RODS, FILES, TOOLS, MACHINERY, TIRES, RAILROAD AXLES, FROGS and SIDE PLATES, Steel Converters and Refiners, and CAST-STEEL WIRE DRAWERS.

We invite the attention of FILE MANUFACTURERS to our TAPER STEEL of all sizes for SAW FILES.

All steel warranted, both in quality and finish, equal to any imported.

OFFICE AND WAREROOMS,
254 CANAL STREET, NEW YORK.

TO RAILROAD CONTRACTORS.

PROPOSALS ARE INVITED FOR THE Graduation, Masonry, Bridge Superstructure, Ballast, Cross-ties and Track Laying of the PITTSBURGH & CONNELLSVILLE RAILROAD, between

Connellsville and Cumberland,

Embracing a distance of about EIGHTY-SEVEN MILES, in Sections of about one mile each. Specifications will be ready at the Company's Office in Pittsburgh, on and after the 1st APRIL proximo, and proposals will be received until the 23d of APRIL ensuing.

BENJ. H. LATROBE,
Office P. & C. R. R. Co. President.
Pittsburgh, March 15, 1864. 3t13

SUBSTITUTE FOR
CAR DUCK.

Kingman's Patent Car Covering.

A HEAVY CANVASS, bedded in Water Proof Paste and Painted. Costing now about half as much as Car Duck. Full particulars, directions, and samples sent. Also an experienced man sent to show the best way to apply it when requested.

WILLIAMS & PAGE, Boston.

Car Duck. Hemp Packing.

HEAVY 4 Ply Fitchburg Duck 100 to 140 inches wide.

BEST HACKLED HEMP PACKING.

For sale by

WILLIAMS & PAGE, Boston.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

American Railroad Journal.

New York, Saturday, April 16, 1864.

St. Louis, Alton and Terre Haute Railroad.

The company owning this line of railroad was incorporated under a special charter granted by the Legislature of Illinois on the 28th January 1851, and in conformity with the provisions of "An act to provide for a general system of railroad incorporations" approved on the 5th November 1849.

THE TERRE HAUTE AND ALTON RAILROAD CO. —as it was originally called—was by the above acts created a body politic and corporate for the term of fifty years, and authorized to construct and maintain a railroad, from the state line of Indiana in a direction from Terre Haute westward through Paris, Charleston, Shelbyville, Hillsboro and Bunker Hill to Alton on the Mississippi River.

The capital stock of the company was fixed at $2,000,000, and the company was also authorized to borrow money on its bonds to bear interest not exceeding 8 per cent per annum.

The charter also authorized the company by and with the consent of the State of Indiana, to extend said railroad to Terre Haute or to make a connection with any Company that might be formed for that purpose.

Authority to extend the road from the State line to Terre Haute was granted by the Legislature of Indiana, by an act passed on the 11th February, 1851. The same act authorized the company to construct a bridge across the Wabash River at or near Terre Haute.

On the 12th February 1853, an act was passed by the Illinois Legislature, authorizing the company to increase its capital stock from time to time as might be necessary to complete the road, but not to exceed in all $4,000,000.

By another act passed 28th February, 1854 the company was authorized to construct a branch from Paris, in an easterly or northerly direction to such point on the eastern line of the State as might be deemed advisable, and to form a connection with any railroad company in the State of Indiana. For this purpose the company might issue stock or bonds for the necessary means; and was also authorized to consolidate said branch road with any company in Indiana with which it might connect. Power was also granted the company to take stock in or loan its credit to connecting companies.

In 1855 (Feb. 14,) an act was passed authorizing a connecting road between the Chicago and Mississippi Railroad, and the Terre Haute and Alton Road in the City of Alton, and the leasing or purchase by either company of the Belleville and Illinoistown Railroad etc.

The above named laws in connection with the general law of 1849, and its amendments present the chief legal points connected with the administration of the affairs of the company.

The charters granted by Illinois and Indiana required as a preliminary to an organization of the company, a subscription of $500,000 to its capital stock. The first object of the company therefore, was to secure this amount. The city of Alton, and the counties of Montgomery, Shelby, Coles and Edgar through which the road was to be located, voted liberal subscriptions, and the requisite amount having been obtained, the organization of the company was perfected by April 1852.

Immediately thereafter the president of the company, Simeon Ryder, closed a contract for the construction and equipment of the entire line of the road from Terre Haute to Alton a distance, by the original survey (made by Mr. Crocker), of 173 miles, but which might possibly be reduced by modifying the location of the line to 170 miles. The contractors were to complete and equip the road by May 1855, for the sum of $3,000,000 and to receive in payment therefor seven-eighths of the amount in cash, and the remainder in stocks and bonds.

The work of construction was commenced within a month after the organization of the company. The first fiscal year ended 1st June, 1853. During the intervening period operations had been successfully carried on, the grading, masonry and bridging upon 98 miles of the road had been completed viz., from Alton to Hardinsburg 38 miles, and from Terre Haute to the Chicago Branch of the Illinois Central Railroad, at a cost of $455,049, and the iron chairs, spikes, etc., for the entire length of the road purchased and 9,000 tons delivered. The total cost of labor and materials to date had been $1,788,549, and at this time the sum required to complete the said 98 miles was estimated at $390,000. The remaining portion of the line between Hardinsburg and the Chicago Branch, was about to be finally located and sub-contracted and it was promised that the whole line should be completed in the year 1854.

The means employed to forward the work were a call of 30 per cent on the stock capital, and an issue of bonds and credits furnished by the contractors. Other bonds had been prepared but were not yet brought into the market for special reasons, one and the most important of which was the demonstration of certain parties to construct a parallel line from Terre Haute to St. Louis. This affair, however, was negatived by the Legislature six times and ultimately died a natural death.

The resources of the company at this time consisted of:

1. Subscriptions to the capital stock of the company including stock issued for labor and the city and county subscriptions $2,025,000
2. Seven per cent mortgage bonds redeemable in 1862, 1867, and 1872, convertible into stock, negotiated in the purchase of rails 1,000,000
3. Eight per cent mortgage bonds redeemable in 1865, to be issued, convertible into stock 1,000,000

Total resources $4,025,000

These two mortgages were secured on the whole

road and equipment, and may be described as follows:

	1st mort.	2d. mort.
Amount	$1,000,000	$1,000,000
Interest	7 per cent	8 per cent
Interest periods	1 Feb. & 1 Aug.	1 F. & 1 A.
Principal payable 1863.	$200,000	$———
" " 1865.	———	1,000,000
" " 1867.	400,000	———
" " 1872.	400,000	———

The road as finally located, is 173 miles in length. Starting from the station of the Terre Haute and Richmond Railroad at Terre Haute, and connecting there with that road it passes through the extensive station grounds secured for the use of this company in the city, and crosses the Wabash and Erie Canal, and the Wabash River, upon a bridge 550 feet in length, and sustained upon abutments and piers of the most substantial nasonry, a turning draw affording two openings of 65 feet each, for the passage of steamboats which ply upon that river. From the Wabash River the line proceeds by St. Mary's, across the State line at Sandford's, to Paris; thence by Grandview, Midway and Ashmore to Charleston; thence to the junction of the Chicago Branch, affording an important connection with that city; thence by Cochran's Grove to Shelbyville, crossing the Kaskaskia River in the south part of the town, and thence to a junction with the main line of the Illinois Central Railroad. From the junction the line proceeds by Audubon to Hillsboro and thence by Litchfield, Gillespie, Bunker Hill and Bethalto to the city of Alton.

Nearly 160 miles of the entire distance is perfectly straight, leaving only 13 miles upon which curves are found and these are of large radii.

The grade of 40 feet to the mile was originally adopted by the company as its maximum. A large portion of the line is far below this maximum grade, and much of it is entirly level.

From this description it will be seen that the line passes through the seats of the different counties upon its route, embracing some of the most populous and fertile portions of the State, and well adapted to secure a large and valuable local traffic. Its freedom from curves, and its moderate gradients adapt it to safe, rapid and economical transportation of passengers and merchandize; and the unsurpassed fertility of the soil (and there is scarcely an acre of land unfit for cultivation upon the entire route) secures for the road an almost unlimited supply of the great staples of country.

The city of Alton, the western terminus of the main line of the road, enjoys a most favorable position for an extensive commerce. Situated on the Mississippi a short distance from St. Louis, and immediately at the mouth of the Missouri with an ample depth of water for the largest steamboats, it affords facilites for transshipment not enjoyed by any other place on these waters, when considered in reference to its connection with the Eastern markets. The high limestone bluffs at Alton, approaching to the very edge of the river point out a fitting place for the erection of a bridge over the Mississippi, a project entirely feasible, and requiring nothing but the development now going forward in the west to render it indispensable. A charter for this purpose was many years ago granted by the Illinois Legislature.

The second annual report of the company brings matters down to Jan. 1st 1855. At this time the branch of the Belleville and Illinoistown Railroad, was being constructed between Illinoistown and Alton. The new road indeed was nearly ready for the rails, and was expected to be completed, simultaneously with the completion of the Terre Haute and Alton Railroad.

The condition of the Terre Haute and Alton Railroad at this time was thus. There were in actual operation about 82 miles, viz., from Terre Haute westward about 45 miles, and from Alton eastward 37 miles. The rails had been laid beyond those points, and parties were actively engaged in laying down the track, with a view of completing the road to the two junctions of the Illinois Central, from each end of the line at the earlicst practicable day.

The line between Alton and Illinoistown was looked upon as a most beneficial and promising adjuct to the Terre Haute road.

The equipment of the Terre Haute and Alton road at this time, consisted of 9 locomotives, 10 first class passenger cars and 198 freight cars.

The financial condition of the company on the 1st of January, 1855, shows that the capital stock had been increased to $2,943,950, of which $2,281,420 had been paid in. This with the 1st and 2d mortgages of $1,000,000 each made the total resources of the company $4,943,950, but of this sum $744,000 (2d mort. bonds) remained in the Treasury. To complete and equip the road, however, it would require another $1,000,000, and this was to be raised by increasing the 2d mortgage issue by that amount. These were subsequently issued and made payable in 1870.

The first estimate of the cost of the road was made when rails could be purchased at a price nearly 50 per cent. lower than the company had subsequently to pay when its organization and finances enabled it to contract and pay for them. Other items in its construction varied with the state of the money market, and were found to exceed the cost originally estimated. The estimates as presented in the report of January 1, 1855, were as follows:

Expenditures to date	$3,537,324
Estimate for completing and equipping the line	1,364,583
Cost as per engineer's estimate	$4,901,907
Add for contingencies, interest, discounts, etc.	348,093
	$5,250,000
Which deducted from the total resources of the company, (including $1,000,000 additional 2d mortgage bonds)	$5,943,950
Which leaves to the future wants of the company	$693,950

The report concludes as follows:—

"At the rate of progress now making in the construction we may anticipate that the road may be opened throughout its whole extent, including the extension to St. Louis during the ensuing autumn. It has been urged forward through a season of unparallelled difficulty in the financial world, which has borne with severity upon the railroads of the Western States. Thus far it has been accomplished without creating a floating debt against the company. The interest coupons upon its bonds have been promptly paid as due," etc., etc.

During the year 1855 the road was opened from Grandview to Mattoon 28 miles, and Litchfield to Pana 39 miles. The year 1854 had been unprecedented in the general failure of the staple crops of the country; and from the opening of the first section of the road on the 13th of November of that year until the fall of 1855, there was scarcely anything along the line for transportation. The absence of all connections rendered the travel entirely local. Notwithstanding these discouraging prospects, the road was operated in portions and completed regardless of its unfit condition until the 1st of March, 1856, when it was so far completed as to admit of the passage of a daily train over its entire length. The bad condition of the track on the newly worked portions required the greatest care and prudence to get the trains through; and but for the favorable character of the spring, the company could not have succeeded in opening the road at the period stated. Subsequently, on the 1st of April, one freight and two daily passenger trains were placed upon the road.

The road was constructed in two divisions—the Eastern extending from Terre Haute to Pana; and the Western from Alton to Pana. The dates at which the different portions of the road were opened for local business were as follows:

EASTERN DIVISION.

Terre Haute to Paris	19 miles.	Nov. 13, 1854
" to Grandview.	28 "	Dec. 3, 1854
" to Embarras R.	42 "	Jan. 26, 1855
" to Mattoon	56 "	July 2, 1855
" to Pana	96 "	March 1, 1856

WESTERN DIVISION.

Alton to Litchfield	38 miles.	Dec. 11, 1854
" to Hillsboro	49 "	June 25, 1855
" to Pana	77 "	Nov. 12, 1855

The results of the partial operation of the line the 13th Nov., 1854, to the 1st March, 1856, show the gross earnings to have been $163,345 97, and the operating expenses during the period $81,964 67, or about 50 per cent. of the gross earnings. The sum thus realized was expended upon the road as earned, and included in the construction account.

At a meeting of the directors in 1856, the contractors surrendered the road to the company, by mutual agreement—in its then unfinished condition. According to the terms of the agreement the amount of work remaining to be done to complete their contract was furnished by the company, and the cost deducted from the contract.

The Belleville and Illinoistown Railroad of which mention has heretofore been made, was incorporated by the Legislature of Illinois, June 21, 1852, originally for the construction of a line from Belleville to Illinoistown opposite the city of St. Louis—a distance of 15 miles. This portion of the road was completed and put in operation early in the fall of 1854. Under a close of the charter the road was extended from Illinoistown to Wood River Junction, a point of the Terre Haute and Alton Railroad 4½ miles east of Alton. This extension was completed in October, 1856. The great importance of this connection to the Terre Haute and Alton Railroad in furnishing an outlet for its business to St. Louis, induced that company to acquire a controling interest in the stock of the Belleville company. The extension formed part of the through line from Terre Haute to St. Louis, and was operated wholly as such from the commencement of its through business.

The lower portion of the road extending from Illinoistown southeasterly to Belleville, relied upon its coal and local traffic.

Belleville is a thrifty place, of 10,000 inhabitants, and the business between St. Louis and that point is large and increasing. The chief value of the line will eventually, as now, be derived from coal transportation. The coal fields commence at the bluffs of the American Bottom—7 miles east of St. Louis—and extend to Belleville. The coal is of good bituminous character well adapted for manufacturing and domestic purposes, inexhaustible in quantity and easily worked. The Belleville company owned 1,080 acres of these coal lands, the development of which, and of other coal interests furnished a large business to the road. The company also held the franchise of the St. Clair Ferry and other privileges at St. Louis, which are estimated of much prospective value.

By resolutions of the directors of the Terre Haute and Alton, and the Belleville and Illinoistown Companies, the executive committees thereof respectively, were now authorized to agree upon terms of consolidation, and submit the same by circular to the stockholders of both interests. An agreement was accordingly made August 8, 1856, which having been approved of by a majority in interest, Articles of Consolidation were executed on the 30th of October following, and the consolidated companies took the corporate title of the—

TERRE HAUTE, ALTON & ST. LOUIS RAILROAD CO.

The funded debt of the company, at the time of consolidation, was comprised as follows:

Terre Haute & Alton 1st mort. 7 p.c. b'ds.	$1,000,000
" " 2d " 8 " "	2,000,000
Belleville & Illinois-town ..... 1st " 7 " "	600,000
" " 2d " 7 " "	500,000
Total	$4,100,000

The amount of consolidated capital stock then issued and outstanding, was as follows:

Terre Haute and Alton stock	$2,672,050
Belleville & Illinoistown (at 87½ cents).	498,750
Total	$3,170,800

The length of the consolidated line at date, was as follows:

	Miles.
From Terre Haute to Wood River Junction.	168.46
" Junction to Alton	4.04
" " to Illinoistown	19.75
" Illinoistown to Bloody Island	1.25
" " to Belleville	14.75
Total length of road	208.25

Length of sidings of 8.78 miles.

The main track and sidings are laid with heavy T rail. The track at this time, however, was only ballasted in portions and partially fenced, but in good general condition and constantly being improved.

Thus it appears, that after expending so much larger amounts on the road than estimated as necessary, there still remained much to be done before the road could be rendered capable of profitable working. Hitherto all the net earnings of the company had been consumed in construction, and the same state of matters was certain to continue unless additional resources could be called into requisition.

With a view therefore to the more speedily finishing the road and equipping it sufficiently to transact economically the business thrown upon it, and thus enable it to earn and pay a dividend to stockholders at an earlier date, and to avoid a floating debt the Board of Directors in October, 1856, concluded that the cash means of the company must be immediately increased. The low price of all western bonds at this time rendered it imprudent to place any securities of the company upon the market, and suggested the propriety of a direct appeal to the stockholders. The directors therefore resolved to offer to them $500,000 of 10 per cent. bonds, payable in 18 years, and receive in payment therefore, half in cash and half in the interest stock of the company at par. The amount to be realized was thought to be sufficient for the immediate wants of the company. A sinking fund was provided for these bonds. Provision was also further made for the subsequent issue of an additional $500,000 for any future wants, and also for the issue of $4,000,000 of bonds at 30 years, to be used for the sole purpose of taking up and providing for the outstanding bonds of the consolidated company. The object of the latter provision was to place all the securities of the road on the same basis.

The amount of bonds offered to the stockholders was immediately subscribed for, and the finances of the company made comparatively easy.

The first report of the consolidated company embraces 10 months to the 31st December, 1856. During this period the gross earnings of the entire line, were $662,860 49
—and the operating expenses 330,520 30

Balance carried to construction acc't. $332,314 19

The equipment at the end of the year consisted of 29 locomotives, 30 passenger cars, 8 mail and baggage cars, and 315 freight cars. This was not more than half the equipment necessary for the amount of business that was brought to the road.

The general balance sheet of the company, Jan. 1, 1857, stood as follows:

Capital stock (T. H. & A.) ..	$2,671,891	
" (B. & I.)	498,850	
		$3,170,641
Funded debt—		
1st mort. (T. H. & A.)	$1,000,000	
2d " (")	1,960,000	
		2,960,000
1st mort. (B. & I.)	600,000	
2d " (")	500,000	
		1,100,000
Sinking fund bonds (T. H., A. & S. L.).		117,750
Coupons unpaid		2,435
Bills payable, &c		373,053
Income account		828,029
		$8,551,908
Construction	$7,219,541	
Equipment	248,693	
Real estate, right of way, etc.	128,482	
		$7,596,716
Transportation account		412,485
Materials on hand		53,076
Freights uncollected, etc		66,970
Bills and other assets		339,042
Cash		83,618
		$8,451,908

The report concludes with the following: "The policy and desire of the directors is to complete and equip the road in a first class manner, and close its construction account at the earliest date practicable; and it will be necessary to use the net earnings to aid in accomplishing this. They are unwilling to borrow money or further increase the construction account for the payment of dividends. They have confidence in the *intrinsic* value of the stock, and the future indicates that the time is not remote when the road with good equipment and management can fairly earn, save, and pay a dividend to the stockholders."

The prospective earnings for 1857 were estimated at $1,200,000, and the expenses at 50 per cent.

(To be continued in our next.)

Lake Superior Copper Mines.

The following statement, compiled from the Houghton *Mining Gazette*, will exhibit the product of the Lake Superior Copper Mines for 1863

PORTAGE LAKE DISTRICT.	Tons.	lbs.
Quincy	1,472	1,531

Portage Lake District	4,104	1,132
Keweenaw District	2,439	592
Ontonagon District	2,004	1,342
Total	8,548	1,066

These figures show a decrease on the production of 1862 of 418½ tons, which is confined entirely to the Ontonagon District, the Portage Lake and Keweenaw Districts showing an increase.

The following table will give, in round numbers, as nearly correct as possible to obtain, the amount of rough copper produced by the mines of Lake Superior since the first attempt to develop its riches by regular mining:

	Tons.		Tons.
1845 to 1854	7,642	1860	6,000
1855 to 1857	11,312	1861	7,400
1858	3,500	1862	9,062
1859	4,200	1863	8,548
Total			57,664

Collision Between Cars and Ordinary Vehicles, Presumption of Negligence.

In the case of Suydam *vs.* Grand street and Newtown Railroad Company, which was an action to recover damages for personal injuries sustained by the plaintiff, from being thrown from his cart by a collison between plaintiff's cart and one of the cars of the defendant.

There was evidence from which, as the plaintiff claimed, the following facts were established: There are two rail-tracks laid in the centre of First Street, Brooklyn, (Eastern District). The street is a 30 feet carriage way. The tracks are laid in the centre of the corriage way. The space occupied by rails is 14 feet 6 inches; the space between tracks is 3 feet 11 inches; the gauge of track is 4 feet 8½ inches. On the day of the collision the plaintiff was driving his cart along First Street, in a Southerly direction, on the right hand track; his cart was heavily loaded with agricultural instruments. When near the corner of South Fifth street, defendant's car coming in the same direction, approached plaintiff from the rear. This car was coming at an unusual rate of speed, the horses being on a full trot. As soon as the plaintiff was aware of the approach of the car, he commenced to get out of its way, by hauling off of the right hand track upon the left track; plaintiff hauled off to left track because there was not room on the right, between cart and track to allow car to pass. While plaintiff was hauling out, defendants car struck plaintiff's cart, and he was thrown from his cart. The defendant's driver and superintendent were on the car, and did not check the speed of the car, or attempt to avoid collision, although told by one of their workmen on the car that they would run into cart. The collision occurred on front of car, and rubbed along it. The force of the collision threw the tail end of plaintiff's cart in towards car, and the heavy machinery on cart came in contact with the stauncheon of car and broke it out. So great was the force of collision, that some iron work or machinery was broken. The plaintiff's horse did not sway, and the plaintiff did all that a person could do, and used the greatest of care. His injuries are permanent in their character.

The case was tried in the City Court of Brooklyn, and a verdict rendered for plaintiff for $1,500. The defendant moved on judge's minutes for a new trial, which was denied. Judgment was entered, and defendant appealed.

Brown, J.—This same case upon substantially the same evidence, was before us at the General Term in February last, and we then took occasion to say "that a cartman's cart is a vehicle which traverses all parts of the street, crossing and recrossing, going backwards and forwards and turning to the right or to the left, at the will of the driver, its passage way limited only by the limits of the street. Not so with a railway car. It is irrevocably fixed to a given track laid down longitudinally with the street. To this line the car must adhere, and from which it cannot be inclnred or deflected for any purpose. It is quite evident therefore, that where a cartman's cart and a railway car are progressing side by side, with a space of 16 or 24 inches between them, there can be no collisioh if each adheres to the track which the law assigns to it. And if a collision does occur under such circumstances, the presumption of negligence is altogether against the driver of the cart, and not against the conductor of the railway car, for the obvious reason that the former can deviate and depart from his track, which the latter cannot do. One of the two must incline towards the other or there can be no contact, and as the cart can be inclined and deflected towards the railway car, at the pleasure of the driver or by his indifference or carelessness while the latter is irrevocably bound to its iron rail, whatever might be the will or the misconduct of the conductor, there can be no other presumption but against the care and good conduct of the cart driver."

Both the cart and the car were proceeding in the same direction, the car on the right and the cart on the left hand. Two-thirds of the car passed the cart without contact, and had there been no change in their relative position, there would have been no contact, that is, if each of them had proceeded directly along the street and without deviation, the remaining third part of the car would have been passed freely and there would have been no collision; and had they inclined towards each other, the sides of both vehicles would have become the point of contact This was not so however, the side of the car and end of the cart came in contact. By what means then was the hinder end of the cart brought in contact with the side of the car. The car could be moved forward and backward, but not to the one side or the other. It was not possible to move the car so as to produce the actual result. It was produced by a movement of the cart and by no other means. The cart with the projecting load was six feet ten inches long, six feet of which was behind the axle.

If the head of the horse was pulled by the driver to the left, even for a small space, it would place the cart diagonal to the railway and bring the end of it instantly in collision with the car. That this actually took place, may be inferred from the injury done to the third stancheon from the rear of the car and the broken end of the platform of the plaintiff's cart. It is also proved by the sum of the testimony on both sides. Reur Suydam, the plaintiff himself, testifies, "I was pulling to the left when the collision took place. I knew the car struck my load which projected about two feet in the rear of my cart." Patrick McQuinn, a witness for the plaintiff, testified, "the car struck the machinery on the right hand corner of the tail of the cart with violence. It jarred the plaintiff off the cart." Again, he says: "the horse was diagonal with the track, and the plaintiff kept the same direction until the collision." William S. Townsend, a witness for the plaintiff, says: "I observed the horse and cart turning off to the left, I saw the horse and part of the cart. The cart was ahead and going the same direction as the car." Ira Buckman, a witness for the defendant, said, "I was standing on the step (of the car) on the left side, as we passed my face was toward him, (the plaintiff,) and on a line with the side of the car. My face was 16 or 18 inches from the platform of the reaping machine on plaintiff's cart, which projected further than anything on the load, that is when my face passed the rear of the cart. After I told the car driver to go on the car began to get under way. Just before the collision the horse swayed to the left and threw the hind end of the cart against the side of the car. All was done in an instant. This was after I told the driver to start up. This platform projected over the right side of the tail of the cart, and lay rather diagonally across the cart, acting as a fulcrum, and the other end in that way and he stood by the other side of it in front. Our car hit the platform, that was the point of collision. The platform slewed around, the cart rung knocked him off the cart. It broke the stancheon of the car, the third one from the hind end and sixth from the forward end. It broke out so that a piece fell on the ground." Again he says: "the car stopped within 18 inches or it would have broken another stancheon." George Bennett, another witness for the defendant, said: "The cart continued parallel with the car until we (the car,) got nearly two-thirds passed the rear end of the cart. Plaintiff was standing on the left stand, front corner. I saw him look towards the car, he pulled his horse to the left, and threw the end of the cart into the car. I saw the rear load of the cart coming towards the car, as the plaintiff turned his head. It struck the car by the stancheon near the rear." Patrick Malone, a witness for the defendant, said: "When we commenced passing the cart it was perfectly straight with us. I think we were 12 or 13 inches from the rear of the cart."

This is the evidence and it leaves no manner of doubt upon my mind, that the accident was caused by the imprudent and mistaken acts of the plaintiff in pulling his horse to the left, as he himself says, at the moment of the collision. It is in vain to say in the face of the evidence, that he is without fault, and did not contribute largely to bring about the collision which resulted in his injury.

It was the manifest duty of the jury to find a verdict for the defendant, and failing to do this, I think the City Court should have set aside the verdict upon the motion for that purpose.

The remarks of the late Mr. Justice Barculo, in the case of Haring *vs.* the New York and Erie Railroad Company, 13 Barb., at page 15, are peculiarly applicable to the present case. In speaking upon the duty of non-suiting a plaintiff, or setting aside a verdict where the plaintiff has contributed to the injury, he says: "We cannot shut our eyes to the fact that in certain controversies between the weak and the strong, between a humble individual and a gigantic corporation, the sympathies of the humane mind, naturally, honestly and generously run to the assistance and support of the feeble, and apparently oppressed, and that compassion will sometimes exercise over the deliberations of a jury, an influence which, however, honorable to them as philanthropists is wholly inconsistent with the principles of law and the ends of justice. There is, therefore, a manifest propriety in withdrawing from the consideration of the jury, those cases in which the plaintiff fails to show a right of recovery."

The judgment and the order denying the motion for a new trial should be reversed, and a new trial granted.

☞ Work has been resumed on the section of the Brockville and Ottawa Railway between Almonte and Arnprior. The rails, some of which are already on the ground, will be laid during the Summer, and it is expected that the line will be completed before next Winter.

American Railroad Journal.

Saturday, April 16, 1864.

Stock Exchange and Money Market.

It cannot be denied that the Money Market is greatly disturbed, and that something of an alarm exists as to its future. The Treasury department is sought to be made responsible for the present condition of things, by a portion of the press, and many of its readers. Unjustly we think, for whatever it has done in expanding the currency has been absolutely unavoidable. The war could not be carried on for six months on any other plan than the present one, and the Union would ere this have not only been divided, but broken up into fragments. Once the principle of cohesion destroyed, and further unity would have been impossible. What we have to do is to make the best of our difficulties, meeting the present with all our energy and forbearance, and to be hopeful, as we have every reason to be, of the future.

The immediate embarrassment lies in the gold

market, which is the Procustean bed of the hour, to which everything is to be shortened or lengthened, and this process is a painful one. The result of the recent authority to sell gold under certain restrictions by the Secretary of the Treasury is not yet clearly perceptible. About two millions have been paid in duties for which certificates have been issued. On this sum at the rate of sixty per cent. average, the Treasury is enriched about twelve hundred thousand dollars, and yet its hoard of gold is increasing. It has been asserted by some of the fault finders, that the street price, or as we should say the combination price having been higher somewhat, the Government has lost the difference. Now in fact it has lost nothing, for practically it receives gold at par and pays it out at par. If the process may even be termed a discount of its own obligations, as by some it is, with a measure of reproach for the act, it is precisely what every sound merchant is glad to do when he has the opportunity. Buying up legal tenders at a good profit is not unworthy of the Government when its capital in gold is excessive and currency is scarce. So in any way the operation is perfectly defensible.

A combination nevertheless is actively at work to compel the Treasury department to raise the price of gold. Sales are ostensibly made at the board daily, at rates beyond those of Mr. Cisco, but it is the opinion of many close and discriminating observers, that not only are these sales small in amount, but most of them fictitious. We have seen in this city how daily quotations, even if false, may affect prices. We saw the Third Avenue Railway stock now worth two hundred, pressed down to 25 in the second year of its existence, by reported sales, when there were no corresponding transfers on the books of the company, and by the reverse of the process though on the same principle, quotations of a daily rise in gold may produce the other result of an advance. We have repeatedly said that if the combination persisted, the rate might be made as high as 200. We believe that if Mr. Chase would now throw five or ten millions on the street which he may do in safety, he would break down the price at once. Nor is there any danger of a scarcity, for it is known that since the first of January, notwithstanding the large export of the precious metals, we have received from California upwards of three millions more than we have parted with, and the balance in our banks is still on the increase. It is also known that the Government, which has received large customs payments in California has allowed the proceeds to go forward to Europe from Aspinwall, and has nearly or quite four millions of gold to its credit in London.

In order still further to embarrass the Government, it has been the practice of late to send boys and agents to the office of the Sub-Treasury, and by creating a crowd, to force the importers by the delay alone to go into the street to purchase at higher rates. Boys with scarcely clothes to their backs or shoes to their feet, have had the assurance to take their "turn" as it is called in the throng, and demand a price from the merchants seeking an opportunity to transact their regular business, for the places thus occupied. The appearance of the police on Tuesday, however, disconcerted these urchins and their employers, and about nine-tenths of the crowd were turned away from the doors, it being discovered that they had no business there whatever.

We imagine therefore, that this disturbance in the market is not founded on reality, and if so, we may see a fall. One thing is certain, that there is a conviction in the public mind, that the next movement of the army of the Potomac which is being reorganized and reinforced to an unusual extent, will be of a character to lower the market. We know that large contracts to deliver at present prices, at sixty days hence, and even less time have been made within a few days. And we may add as a fact within our knowledge, that all the scattered yet disposable force north of the Potomac, and even south of it, are under orders to join the forces of Gen. Grant. Two bodies of heavy artillery, (as an example,) 3,600 strong that have been for twenty months lying useless at Washington and Baltimore have gone to the front.

This new arrangement may as well be considered by those who are now operating for a further rise in gold. If the theory is correct, that a great victory will put down the price of gold, what becomes of the assertion, that it is purely owing to the inflation of the currency? The accumulation of the capital continues, and yet it commands 7 per cent. This is doubtless owing to the great number of new companies coming on the market in various forms. We advise our readers to be wary in the choice of their investments, and if they are rushing into speculations where half a million is required to purchase a mining property not 600 feet square, first to consult those who are familiar with the locations before they subscribe very heavily. Governments continue firm and in demand, the five-twenties coupons are wanted at 113 and upwards, and coupon sixes go readily at 115. Bank shares and State stocks are all firm, and railway shares are "excited" and buoyant. Our tables will show the variations from last week in these as well as the mining shares.

We understand that large quantities of cotton have been captured on the Red River and the Colorado, and are rapidly coming into market, and it will be noticed in another place that it has been successfully raised in Utah, from whence it is being already transported to San Francisco.

The foreign news is of an interesting character, in its probabilities as affecting our own Country. The growing dissatisfaction in England, at the inaction of the Government in regard to Denmark, and the increasing strength of the republicans in Paris, are likely to culminate in important changes in both countries, which instead of inter-meddling with our affairs, and disparaging our financial system will very shortly have to use all their wisdom in taking care of their own. If they want any particular evidence of the strength and resources of our country, let them reflect on the fact recently made known, that since the war, two hundred and eighty seven millions of dollars have been voluntarily contributed by the loyal States in aid of our sick and wounded soldiers, the increase of their bounties and the relief of their families. No such spectacle was ever before witnessed on this globe, and the people who have done this, are they who have determined to carry the war to a triumphant conclusion, and to sustain the credit of the Country, no matter to what extent its obligations have to be created.

On the 1st of May next a large amount of interest in gold will be disbursed by the Sub-Treasury, the payment of which Mr. Chase desired to anticipate, but Mr. Cisco was unable to do it for the want of sufficient clerical force.

The condition of the Sub-Treasury on Tuesday was as follows:

Amount on hand	$32,868,490
Receipts from customs	434,000
From other sources	2,891,721
Total	$36,194,211
Payments	4,784,690
Balance	$31,409,521

The subscriptions at the Sub-Treasury to the two hundred millions five per cent loan amounted to $325,750, those at the First National Bank to $531,800, and 6th National Bank to $241,000. The new loan is decidedly more popular than it was when first put upon the market. The government has decided to receive the ten-forty bonds in future as security for the issues of the National Banks, and as the five-twenties are now worth in the market 112@115 the new loan has become attractive.

The aggregate value of the exports of produce and merchandise, exclusive of specie, from the port of New York during the past week was $3,181,888, against $2,525,094 same week last year, and $2,458,539 the corresponding week of 1862.

The exports from the port of Baltimore during the past week amounted to $169,388. The total value of imports of foreign goods at the port of Boston for the week ending April 8, was $508,295, against $691,762 for the corresponding week last year. The amount of exports from Boston for the week was $371,508 against $138,820 for the corresponding week in 1863.

Since the foregoing was in type, one prediction has been verified. On Thursday last the price of gold fell from 187½ to 175 before 3 p. m., and the circumstance created intense satisfaction.

By reference to statements given elsewhere, it will be seen that the earnings of the Milwaukee and Prairie du Chien Railway the 4th week in March were $33,070, against $15,904 in the corresponding week of the previous year—an increase of $17,160, or 108 per cent. For the month of March the earnings were $88,220, against $44,925 in March, 1863—an increase of $43,295, or 98 per cent. From January 1, to March 31, 1864, the earnings were $306.105, against $188,187 in 1863—an increase of $117,918, or 62½ per cent.

The earnings of the Ohio and Mississippi Railroad (Eastern division,) for March, 1864, were $200,680, against $146,621, in March, 1863—an increase of $54,059. For the year 1863 the earnings were $1,163,702 41, against $1,122,530 27 in 1862, and $771,999 25 in 1861—an increase over 1862 of $531,172 14, and over 1861 of $891,703 16. The earnings of the Eastern and Western divisions, March, 1864, were $310,680, against $236,667 in March, 1863, an increase of $74,023. For the year 1863 the earnings were $2,825,276 62, against $1,845,397 81 in 1862, and $1,318,586 78 in 1861—an increase over 1862 of $979,878 81, and over 1861, of $1,506,689 84.

The earnings of the Chicago and Northwestern Railroad in March, were $157,961 65, against $92,483 18 in March, 1863—an increase of $65,487 47. For the three months ending March 31, the earnings were $367,580, against $243,334 in

1863—an increase of $124,246. For the fiscal year ending April 1, 1864, the earnings were $1,628,863 93, against $1,083,054 05 in 1862—an increase of $545,809 88, or 50.5 per cent.

The gain in the earnings of the Chicago and Rock Island Railroad Company, in March, 1864, over March, 1863, is $75,607, and for the 1st three months of the year over the corresponding period of 1862, the gain is $128,543.

The Galena and Chicago Railroad Company show a gain in March, 1864, over March, 1863, of $48,840, in February, $45,415, and in January, $11,389—together $105,644.

The Michigan Southern and Northern Indiana Railroad earnings in March, 1864, are in excess of those of March, 1863, $78,850, in February the increase was $69,382—and for the three months to March 31, the increase is $149,609.

The gain in the earnings of the Michigan Central Railroad in March, was $112,370, in February, $32,991, and in the quarter ending March 31, $155,723.

The March earnings of the Pittsburg, Fort Wayne and Chicago Railroad, show a gratifying increase of $140,038. The increase in February was $88,613; and for the three months $191,977.

The Toledo & Wabash show an increase in March of $29,840, and in the three months of $27,125.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—At. & Gt. Western (Ohio div.) 1st mort., 102; Peninsula R. R., 82; 1st mort., 100; New Jersey R. R., 165; Long Island R. R., 101⅛; Chicago and Milwaukee, 90; N. Y. and N.
